# 526 Close Times for Game—Seasonable and Unseasonable Fish.

# CLOSE TIMES FOR GAME.

IN each case the dates are inclusive :-

Black Game-Dec. 11 to Aug. 19 (Aug. 31 in Somerset, Devon, and New Forest).

*Grouse-Dec. zz (Dec zo, Scotland) to Aug zz.

*Partridge—Feb. 2 to Aug. 31. *Pheasant—Feb. 2 to Sept. 30.

*Ptarmigan-(Scotland only) Dec. zz to Aug. zz.

It is also unlawful (in England and Wales) to kill the game marked * on a Sunday or Christmas Day.

In England and Wales, hares, rabbits, wood-cock, snipe, quail, landrad, and heath or moor game (and the eggs of swan, wild duck, teal, and widgeon) are protected under the Game Laws, though no close-time is fixed for them by those is, under the Wild Birds Protection Acts, 1880 to 1908, from March 2 to July 31 both inclusive. Otherwise this close-time applies to all wild birds throughout Great Britain.

#### HUNTING AND GROUND GAME.

There is no statutory close-time for foxhunting or rabbit-shooting, nor for deer or hares, but by an Act passed in 1892 the sale of hares or leverets in Great Britain is prohibited from March z to July 3z inclusive under a penalty of a pound. The first Monday in November is the recognised date for the opening of the fox-hunting season, which continues till the following April. Otter hunting lasts from and April to mid-September. The period for laws In Scotland the same remarks apply to deer-hunting of statking varies from about August deer and hares, to the first four birds, and to rate obtober refor stags, and four howember rewild duck. The close-time for all these birds to the end of March for hinds. deer-hunting or stalking varies from about August

# SEASONABLE AND UNSEASONABLE FISH.

different kinds of edible fish mostly in use are "in season" and "out of season"

THE following table shows the periods when the ifferent kinds of edible fish mostly in use are in season " and "out of scason" The letter p signifies that the fish are then " close-time" as fixed by statute.

(a) This is for sea craytish (or crawfish). River crayfish can be obtained in the summer and It is illegal to take fresh-water crayfish from March to June.

(b) Foreign oysters can be sold in the close

(d) In the close season, salmon from the Netherlands, and also from certain British rivers where net fishing is permitted later in the year than usual, are largely sold.

(e) For the first six months the bulk of our

season, and are to be had almost all through the London supply of shrimps comes from the Nether-year, even though they have been laid down in lauds, but Dutch shrimps are far inferior to the English beds for temporary storage.

CHANNEL SWIMMING.

Capt Matthew Webb swam from lower to Calais
(Aug 44-55, 1875) in 32 hours 45 min 8 Tiraboschi was
the next, best Webb's record, swimming 56 hours 33 min
from 6 alais to lower (Aug 22, 2933). Miss 6; feldele
(I' NA 1, 45 hours 34 min (Aug 6, 2956), and 6; Michel
Fram c, holds the record, 21 hours 5 mins,) (bept, 20, 2936)

satisfies on Getsper to Lower (Aug 22). both from Grisnez to Dover.

PROGRESS IN MOTORLESS FLIGHT. It generally takes two or three years for any new sport to settle down into some semblance of new sport to settle down into some seminiance or properly supervised orderliness. There is a spate of enthusiasm at the outset, which may continue as a flood, or degenerate into a mere trickle according to the success with which the new sport overcomes its initial difficulties, and auryives its various ordeals. Thus has been the case with gliding, which, although not a new sport, has recently received a new lease of life, particularly in x930 when, following various demonstrations by German experts, it again attracted attention in Great Britain. "Booms" are often to be mistrusted, and sometimes the mere fact that hundreds of thousands of people find a new common enthusiasm is sufficient eventually to kill it, but it can be said quite safely that the gliding movement has now become firmly established in Great Britain. Although during the past twelve months the augle of approach has been considerably changed there is little doubt that the enthusiasm has by no means waned, and in some respects considerably increased. This is particularly so with regard to the outlook of the average Gliding Tub When the spectacular feats of Heir Kionfeld and other Gorman pilots first began to create a and other corman phots first began to create a desire for emulation amongst young air-minded people in this country, many thousands of young enthusiasts suddenly discovered that they wanted to glide, and they focked to join the numerous gliding clubs which came rapidly into existence. When they had succeeded in keeping a primary type glider in the air for a fraction of a second they were very pleased with themselves, but too large a proportion of them failed to follow up their success and to qualify for the certificates which can be obtained when advanced training has been completed. It is on this latter aspect of gliding instruction that the clubs have now been concentrating attention This is all to the good, for it is obvious that in order to keep pace with gliding developments in other countries, particularly on the competitive side, Britain must have an ample supply of fully qualified glider pilots. It must be explained that the popularly accepted term 'gliding" does not give a complete idea of the possibilities of motoless flight. Its really advanced form, and undoubtedly its most important ant aspect, is what is known as sailplaning There are three outstanding classes of motorless aircraft: (1) The Primary Glider; (2) The Secondary; and (3) the Sailplane. The two former types are mostly used for instructional purposes, whilst the third type is used for cross-country work, by pilots who have obtained their "C" work, by phots who have obtained their "C" certificate. This e certificates, "A." "B" and "C," are obtainable after tests have been successfully passed under regulations laid down successfully passed under regulations laid down by the Royal Aero Club, and during the past year a greatly increased number of these confificates have been obtained by gliding pupils in Great Biltam. There has been a particularly notable increase in the number of "C" class pilots, whereas at the end of last year they represented a very small number. The Gliding Clubs, too, have now settled down on sound lines, and many new ones have come into existence. The movement in Great Britain is controlled by the British Gliding Association. into existence. The movement in Great Britain is controlled by the British Gliding Association, of which Lieut. Col. Shelmerdine, the new Director of Civil Aviation, is the President. In this office Lieut. Col. Shelmerdine succeeded the

late Sir Sefton Brancker, who was a staunch friend to British gliding, and did much to help the movement. The past year has been one of much experimental effort, and good progress has been made in this direction. The technical side of gliding has received more attention from the Gliding Clubs, many of which now possess a valuable nucleus of members who have acquired valuable knowledge. Glider design has naturally progressed, and some of the new types are a great inprovement in performance on those which preceded them Notable directions in which useful advances have been made are in connection with towed flight and power launching, in connection with both of which much valuable new data has been discovered. Mr. Lowe-Wylde, one of the pioneers of towed flight in England, has been particularly active in experimental work. Many clubs are now training pupils in towed flight, in which a suitable motor car is used to launch the glider into the air, and to keep it aloft. The driver of the car plays a very important part in these operations, and must be specially skilled in the work. Pupils are taught by easy stages. the instructor using a car with dual control. so that he can easily correct any mistake made by either the driver of the car or the pupil in the glider. Power launching is covered by special regulations issued by the British Gliding Association, and has been experimented with in a number of clubs. An interesting gliding event during the year was the crossing of the Channel by Mr. Lissant Beardmore, and Herr Kronfeld, both of whom, however, were towed by aero-planes to a sufficient altitude before being released. The International Commission for the Study of Motorless Flight held a meeting in England towards the end of the year, and the delegates from several countries subsequently saw the first International Gliding competitions take place on the downs near Brighton. These competitions attracted many thousands of spectators Foreign competitors were present, and some of the English competitors flew gliders of foreign design. The Distance Flight for the de Haviland Cup was won by Mr. G. M. Buxton, of the London Gliding Club, on a "Professor" glider, with a flight of 500 yards. Mr. Buxton was also successful in the cross-country fight for the Wakefield Trophy, with a distance of three miles. Soon after this event started a heavy fog descended on the countryside and Mr. Buxton and two other competitors were lost in it for some time. They all succeeded in lauding safely and thus proved the safety of gliding even under such unfavourable weather conditions A large number of other interesting events, designed to test the skill of the many pilots who had entered, also took place, including spot-landing competi-tions, figure of eight contests, rig and fly contests, and a club aggregate event. The wind was too light on both days for a really successful was too light on noth usys for a tenty second meeting. A number of new sallplanes were demonstrated at this meeting and showed considerable advance in design. Unfortunately the siderable advance in design. Unfortunately the meteorological conditions did not allow of their performance being fully appreciated, but there is little doubt that by the time the next international contests take place some excellent British sailplanes will be available. The clubs are now taking up sailplaning seriously and some of them are building their own machines. Progress on the technical side during the year is regarded as satisfac-tory, but it is certain that the possibilities of

motorless flight have not yet been fully probed. Future progress lies with the enthusiastic experimenters rather than with those who are simply attracted by the fascination of the sport itself, and the numbers of the former are now sufficient ly large to ensure that experiments on the right lines will go on. Many suggestions have been made which would divert motorless flight from its orthodox course of development. The glider, it is thought by some, might become "the motorcycle of the air" if fitted with a light engine, but the "Rocket plane" experiments in Germany motive possibilities of a novel kind which might be applied to the glider. The pioneer-experts, however, are seemingly satisfied with the lines on which they are now working. Some critics make much of the point that gliding has no commercial application, but it would seem to be early to argue too rigidly on this aspect of it. At the same time it is equally premature to paint an extravagant picture of the glider being used for purposes which are now fulfilled by other media of passenger transport. At the moment gliding is a sport with a well-developed technical bias and as such it is not surplising that it makes so strong an appeal. There is no other sport quite like it. Its thrills have no pronounced element of danger, the percentage of accidents being very low. This fact is as much a tribute to the common-sense lines on which the movement is common-sense lines on which the inovement is organised as a proof of the absence of serious risk. The growing international interest in gliding was emphasised by the fact that i epresentatives of ten nations attended the British meeting of the International Commission. The aim of the Commission was lucidly explained by Lord Amulree, the Secretary of State for Air in the then Government, when he said that its object was to secure international co-operation in scientific, technical, seconautical and administrative questions concerning motorless flight, and the exchange of ideas for initial benefit which would result should help to solve the large number of hitherto unsolved problems

-----

Gliding, considers Lord Amulree, has a very definite contribution to make to the general progress of aviation and to certain branches of technical research, and should do a great deal to popularise flying. One point which cannot be too strongly emphasised in favour of a continued interest in gliding is its value in the training of air pilots. It has been proved that a course of motorless flying reduces the time needed to enable a pilot efficiently to control power-driven aircraft. There is no reason why gliding should not provide "flying for the million." Pupils of ordinary intelligence quickly make progress, and once they gain confidence are generally keen to take their "A" certificate. The great need in this country at the moment is the provision of some gliding schools on the lines of the famous German school at the Wasserkuppe, at which, by-the-way, many British pilots have been trained. The training resources of most ordinary Gliding (lubs are obviously limited, and the provision of even one central school of this kind would no doubt be welcomed by gliding enthusiasts in Great Britam. So far, gliding has not made a very pronounced feminine appeal. But there are a number of certificated women priots in Britam. Most of the clubs, however, have not neglected the social side, which, by-theway, has a distinct publicity value, and many of them have ladies' committees to take charge of this aspect of their activities The two-seater glider has made its appearance, and it is not unimportant to mention as an indication of the progress which has been made that at least one progress which has been made that at least one glider of this type has provided hundreds of rived "joy" flights for the general public at gliding demonstrations. A glider "flying-boat" has also been successfully landed by a speed-boat. A notable flight in 1931 was that from Hanworth to Chatham and back on thermal currents by Herr Kronfeld. The 12th aumual competitions at the Wasserkinppo attracted much attention, and the performances of many young German pilots were proof of stiking progress in the science of motol-leafight. gress in the science of motorless flight.

# The British Empire.

AREA AND POPULATION.

Continental Distribution.	English Square Miles.	Estimated Population.
In Europe Iu Asia In Africa In North America In Central America In the West Indies In South America In Occania	121,512 1,824,550 4,652,000 3,893,020 8,600 12,300 97,800 3,300,000	48,000,000 333,000,000 50,000,000 9,000,000 50,000 1,730,000 314,000 8,000,000
Total	13,909,782	450,094,000

GEOGRAPHICAL DISTRIBUTION .- The British Empire occupies over one-quarter of the known surface of the globe, and its population exceeds one quarter of the estimated number of the human race. The total area is distributed human race. almost equally over the Northern and Southern Hemispheres, but more than two-thirds lie in the Kastern and less than one-third in the Western Hemisphere.

ETHNOLOGY.-The estimated white population of the Dominions in your was 60,000,000, mainly British and Hish, but pat by French, Dutch, and Spanish. The remaining 370,000,000 include 315,000,000 of the native races of India and Ceylon, 40,000,000 black races, 6,000,000 Arabs, 6,000,000 Malays, 1,000,000 Chinese, and 1,000,000 Polynesians, with various other elements, including 100,000 "Red Indians" in Canada.

RELIGIONS.—Of the total population over

RELEIONS.—Of the total population over 210,000,000 are Hindus, 100,000,000 Huhammadans, 80,000,000 Christiaus (67,000,000 Protestants, 12,000,000 Chololies), 12,000,000 Huhammadans, 12,000,000 Sikhs, Jains and Parsees, 750,000 Jews, and the remainder Polytheists and Idol worshippers.

CONSTITUTION AND GOVERNMENT. - There is no fundamental law upon which the Constitution of the British Empire rests, but there are three main principles underlying its administration, main plinciples underlying its administration, viz, self-government, self-support, and self-defence. The first of these principles has been applied for many years, and is fully developed in the case of Canada; Newfoundland, Australia, New Zealand, the Uniqu of South Africa, and the Irish Free State. The second principle is equally developed, almost every unit being financially self-supporting, and few requiring aid from the central Government. The third principle is of modern growth, and may be said to be the outcome of the Imperial Conference.

THE IMPERIAL CONFERENCE.-The origin of the Imperial Conference may be traced to the presence in London (in 1887) of the Prime Ministers of the various Dominious, at the celebrations of the Jubilee of Queen Victoria. Similar gatherings took place in London in 1897, 1902, 1907 and 1912, and in 1907 the title of "Colonial" Conference was obsaged to Imperial Conference. At the earlier meetings the Colonial Secretary presided, but with the change of title additional

with the sessions of the Imperial War Cabinet, was called the Imperial War Conference, and was held under the Chairmanship of the Secretary of State for the Colonies. In 1921, the Premiers' Conference, under the Presidency of the Prime Minister of Great Britain, discussed all matters of general interest to the Empire as a whole. The constitution of the Conference, which again met in 1923, 1926 and 1930, is as follows:—The Prime Ministers and other Ministers of the United Kingdom, Canada, Common-wealth of Australia, New Zealand, Union of South Africa, the Irish Free State, and New-Joundland, the Secretary of State for India and other representatives of India. The Secretariat of the Conference is provided by the Governments represented.

SKLF - GOVERNMENT. - (1) Great Britain. The Constitution recognises certain great principles, including the fair administration of justice, the prohibition of taxation without the consent of the people, and a limited monarchy, the power of the monarch being, in effect, wielded by a Ministry supported by a majority of the House of Commons, the members of which House are elected on a wide franchise, exorcised by electors of both sexes. The component parts of the British Government are the King; the Legislature (House of Lords and House of Commons); the Executive, appointed by the Sovereign and responsible to Parlianient; and the Judicature.

(a) The Indian Empire.—India is governed by the King as Emperor, acting on the advice of the Secretary of State for India, who is assisted by a Council whose members are appointed by the Secretary of State. The latter is responsible to, and represents the authority of. Parliament. Subject to the Secretary of State's direction, the supreme executive authority in India is the Governor-General and his Executive Council, with a legislature of two houses, the Council of State of 60 members (of whom not more than so are government officials), and the Legislative Assembly of 144 members (26 official and the remainder elected).

(3) Imperial Dominions.—All British Dominions are subject (except as regards taxation) to the legislation of the British Parliament, but no Act of Parliament affects a Dominion unless that importance was given to the assembly by the Dominion is specially mentioned. If the legis-assumption of the Presidency by the Prime | lature of a Dominion chacts a law which is Minister of Great Britain. In 1917 and 1918 repugnant to an Imperial law affecting the the Conference, which was held concurrently Dominion, it is to the extent to which it is

repugnant absolutely void. Dominion legislatures may be controlled by the refusal of the Governor's assent to any measure passed; by reservation of a measure for the consideration of the Crown, a measure for the consideration of the country assent; by a suspensory clause and the refusal of the Royal assent. Subject to such control the parliament of a selfgoverning Dominion exercises within its borders all the ordinary powers of a sovereign assembly. The Imperial Dominions may be divided into four classes, according to the way in which they

are governed—

(a) Those utumy Dominion Status. Where

"Dominion Status" is enjoyed the executive is
entrusted to political chiefs who are responsible, not merely or mainly to the Crown, but to the elected legislature of the Dominion. The Dominions thus governed are Canada, Newfoundland, Australia, New Zealand, the Union of South Africa, the Irish Free State and Northern Ireland. Malta, Southern Rhodesia and Northern Ern Rhodesia have "responsible government,"

luit certain powers are reserved.

(b) Where there is government by legislative assembly wholly or partly elected, and an executive council nominated by the Crown or the Governor representing the Crown. In this class may be placed the Bahamas, Barbados, Bermuda, British Guiana, Jamaica, Leeward Islands, and Mauritius.

(c) Where there is government by a Governor acting with an executive and a legislative council, the councils being nominated by the Crown or a Governor representing the Crown. Dominions so governed include Ceylon, Falkland Islands, Fill, Gambla, Gibraltar, Nigeria, St. Vincent, Sierra Leone, Straits Settlements, Tanganyika, Trinidad.

(d) Wherein both legislative and executive powers are vested in the Governor alone. In this class are Labuan and St. Helena, where power is also reserved to the Crown to legislate by Order in Council. In South Africa, Bechuaualand, Basutoland, and Zululand are governed in substantially the same way, but no power is reserved to the Crown.

(c) Protectorates The protectorates are countries which, as regards their foreign relations, are under the exclusive control of the Crown. The protectorates of the British Empire include Kenya, Nyasaland, Somaliland, Swaziland, Uganda.

(f) Spheres of Influence. A sphere of influence may be described as an area wherein other Powers undertake not to attempt to acquire influence or territory by treaty or annexation; such British spheres exist in the Persian Gulf and in Arabia. In addition to the Spheres of Influence are

(g) Mandatory Spheres, where the responsibility for securing good government and a reasonable development of natural resources is confided to an already established government by man-date from the League of Nations. Such British spheres are parts of the former German Colonies in West Africa, and the former Turkish govern-ments of Palestine and Mesopotamia.

SELF-SUPPORT.—With but few exceptions the British Dominions are self-supporting, revenue being raised locally to meet the expenditure. Occasional grants are made by the Central Government to meet exceptional expenditure, or in aid of administration in the earlier stages of development. Certain capital expenses are sentatives of India and the self-governing Doalso undertaken from time to time by the Central minious. India and the Dominious have each a

Authority, e.g., the Nigerian purchase, the Uganda Railway, &c. No taxes are imposed on the subjects of a Dominion or Colony by the the subjects of a Dominion or Colony by the Central Government, as such subjects are not directly represented in the British House of Commons; this principle, "No taxation without representation," was the mainspring of the revolt in the North American Colonies at the close of the eighteenth century. Since that disastrons attempt to impose taxes without the consent of the taxpayers, the principle, which had for many years been accepted in Great Britain, has become an accepted maxim of British Overseas administration.

SELF-DEFENCE.—The Dominions, generally, provide for the defence of their immediate area, but the general strategical defence of the Empire is undertaken by the Central Government. Questions affecting general strategical defence are considered and determined by the Imperial Defence Committee, which co-ordinates the work of the sea, land and air forces. In the Great War of 1914-1918 the Dominions provided Armies or Contingents, which fought in every area and hore a full share of the sacrifices by which victory was achieved. The land and air forces of the Dominions are maintained at the expense of the Dominions concerned. The amounts provided for Naval Defence in the estimates of the under-mentioned parts of the estimates of the under-mentioned parts of the Empire for the year 1930-31 are as follows:—Great Britain £51,730,000; Canada \$3,600,000; Australia £1,756,531. New Zealand £675,480 (including £125,000 as a contribution towards the Naval Base at Singapore, and £100,000 interest and sinking fund on account of H.M.S. New Zealand); Union of South Africa £78,560. The proportion of expenditure on Naval Defence to the total Import and Export trade of these to the total Import and Export trade of these parts of the Empire is as follows: Great Britain 304 per cent.; Canada o 13 per cent.; Australia 1 o 6 per cent.; New Zealand o 17 per cent. Union of South Africa o 043 per cent. Per caput of population the expenditure is, Great Britain of population are expendences, reac britain fr as 7d.; Canada 36 cents; Australia 3s. 6d.; New Zealand 9s. rd.; Union of South Africa (European population only) rol/d. As regards Colonies not possessing responsible governments, contributions to Imperial Defence are paid to the War Office.

THE LEGISLATURE.—The Parliament of Great Britain is the supreme legislative authority of This Parliament has, with the the Empire. consent of the King-Emperor, delegated its legislative authority to other parliaments constituted by itself, while retaining a general supervision of Imperial affairs. The Secretaries of State for the Dominions and Colonies are Cabinet Ministers, their active participation in the government of the nations of the Empire decreasing with the measure of self-government accorded to each. Parliament also exercises a control

over Indian affairs through a Secretary of State, THE JUDICATURE—The Supreme Judicial Authority of the Empire is the Judicial Committee of the Privy Council, before which appeals may be brought (in the form of a petition to the Crown) from Consular Courts and Courts of Vice-Admiralty, and from the Courts of India and every British Dominion. The Committee (see p. a46) consists of such members of the Prity Council as have held or are holding high judicial office, judicial system, with judges appointed by the Crown. The Supreme Judicial Authority for Crown. The Supreme Judicial Authority for Great Britain and Northern Ireland is the House of Lords.

EDUCATION .- Educational systems, on a more or less uniform plan, are developed throughout the Empire under the control of the respective governments. Universities (see pp. 328-28) and University Colleges have been established and degrees are conferred. Under the will of Cecil Rhodes scholarships were founded at Oxford, his old University, for students from the British Dominions and Colonies, the United States of America, and the German Empire. Rhodes Scholarships are awarded in each of the United States, in each State or Province of Canada, Australia and South Africa (where there are also scholarships for Rhodesia and for certain towns and schools in Cape Colony), in New Zealand, Newfoundland, Jamaica, Bermuda and Malta. They are of the annual value of £400, and are tenable at any College in Oxford. The normal number of Rhodes scholars in residence together is about 256, of whom 200 come from the British Empire and 56 from America. Statistics issued by the Universities Bureau of the British Empire show that the total number of students from overseas attending Universities and Colleges in the United King-Universities and Colleges in the United Kingdom at the heginning of the 1929-30 session was 5,486, of whom 995 are from Africa, 1,071 from America, 2,282 from Asia, 794 from Europe, and 244 from the Pacific. The principal figures are. India, Burma, and Ceylon, 2,846; United States, 621; South Africa and Rhodesia, 331; Expyrag66; Austalia, 223; Canada and Newfoundland, 233; Germany, 252; China, 143; West Indres, 440; New Zealand, 128; Russia, 64; France, 63, Japan, 62; Netherlands, 46; Poland, 44; Switzerland, 43; Slam, 42, Norway, 32, Hungary, 32; Spain, 30. gary, 31; Spain, 30.
The Davison Scholarships, established in 1923,

have been withdrawn.

Under The Commonwealth Fund (The Fuller Building, 42 East 57th Street, New York, U.S.A.), established in 1918 by Mrs. Stephen V. Harkness, there are available for candidates of British descent 40 Fellowships, of an annual value of approximately £600 each, tenable for two years at certain American Universities. They may be awarded as follows.

2. Thirty Fellowships open to men and women unmarried, under thirty years of age, domiciled in England, Scotland, Wales or Ireland, and graduates of recognised universities therein;

2. Ten Fellowships for (a) candidates from the British Dominions, graduates of a University of a British Dominion or Colony, men or women, unmarried, under thirty years of age, who have studied, but not necessarily graduated, at a British University and (b) candidates who hold an appointment under the British Covern-ment, or the Government of a British Dominion, Colony, Protectorate, or Maudated Territory, or the Government of India. They may be single or married, but must not be more than thirty-five years of age on September x of the year of award. At least five of these ten Fellowships are open to candidates from the Government Service.

FINANCE. — Complete financial autonomy is enjoyed, in fact, by all British Dominions, and customs tariffs are in most cases the principal source of revenue. The tariffs are generally lower for merchandise of British origin There is no Imperial Debt, but certain obligations of Crown Colonies and Protectorates are met in the early stages of their development by the central Government, and occasional grants in aid of revenue are also made at need. Advances so made and still outstanding are shown under the heading "National Debt" (see Index).

Stocks anthorised under the Colonial Stock Act 1000 are Trustee Securities, and the price at which some of them may be obtained is shown

On p. 455.

PRODUCTION.—Canada, India, Australia, and Great Britain are the principal wheat-pro-ducing units, and Mesopotamia (with irrigation) has great potentialities. Barley, oats, rice and malze, and tea, coffee and rubber are largely cultivated, while more than half the world's output of cocoa was produced in British Dominious. Cane sugar is produced in India (for local consumption), West Indies, Australia, New Zealand, Natal, and Mamitius, and beet sugar in Canada and elsewhere Fruit is grown in most of the Dominions and figures largely in the sales of the London Fruit Exchange (Spitalfields). Meat is produced in large quantities in New Zealand, Australia and South Africa. Australia and New Zealand are the greatest wool-producing countries of the world, and the output of coal in Great Britain exceeds that of every country except the USA; coal is also abundant in Australia, Canada, India and South Africa is extensively grown in India, West Africa, East Africa, Sudan, West Indies, and in the tropical parts of Australia; chemical and mechanical wood pulp for paper-making is extensively produced in Canada and Newfoundland. Iron ore is found in many of the Dominions, and pig iron is largely produced; tin is produced mainly within the Commonwealth (particularly in the Malay pennisula), while 70 per cent. of the world's supply of gold is drawn from South and South-West Africa, Australia, New Zealand and Canada; it is produced also in Borneo, British East Africa, British Gunan, Ceylon, India, Malay States, Saiawak, Sudan, and West Africa. Precious stones are found in various parts of the Commonwealth, South Africa producing the principal supply of diamonds, and India of rubies and emeralds. Petroleum is produced in India, Trinidad and Canada, and there are vast resources available at Mosul (Mesopotamia) and in the neighbourhood of the Persian Gulf.

CAPITAL OF THE BRITISH EMPIRE.-London

(England). Population (1931), 8,203,828.

Nationality of Passengers.—In 1930 British Subjects numbering 220,966 emigrated from the United Kingdom to countries out of Europe and British Subjects numbering 297,256 entered the U.K. from countries out of Europe. In 1930 Aliens numbering 297,023 arrived from non-European countries and 197,025 Aliens left the U.K. for countries out of Europe. The total number of Aliens indeed from all countries was 457,424 (1929) and 454,756 (1930) and the total number of Aliens enhanced for all destinations was 449,645 (1930). Laws to land was refused to 2,200 Aliens (1939) and to 2,235 (1930).

#### CENSUS POPULATION OF THE BRITISH ISLANDS.

Previous to 1801 there existed no official return [ of the population of either England or Scotland; Ireland was taken in 1802, and since the time nor was it till 1813 that statesmen had anything named there has been a fresh numbering every more than surnise to guide them respecting the property of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the Ireland, and the census then taken of that country was far from correct. The estimate formed of the English population at various periods, calculated from the numbers of hap-tisms, burials, and marriages, was in the years—

1570.....4,160,221 1670.....5,773,646 1700.....6,045,008 1600 . . .4,811,718 1630 . . ..5,600,517 1750 .....6,517,035 The first general Census of Great Britain and

#### CENTRAL GOVERNMENT.

THE BRITISH CONSTITUTION.—The British Constitution is mainly unwritten and customary, but its development is marked by certain outstanding and fundamental laws, of which the principal are Magna Carta (x215), which secured annual parliaments and the equal administration of justice; the Habeas Corpus Act (1679), securing the liberty of the person; the Act of Settlement (1701), providing for the Protestant succession to the throne; the Act of Union with Scotland (1707), the Act of Union with Ireland (1800), the Parliament Act (1912), which enabled the Commons to pass certain Acts without the concurrence of the other chamber; the Government of Ireland Act (1920), and the Irish Free State (Agreement) Act, 1922.

The constituent parts of the British Constitu-

tion may be thus briefly described :

- z. The Sovereign.—The throne is hereditary in the British house of Windsor with mixed succession, the sons of the Sovereign and their descendants having precedence of daughters, but daughters and their descendants preference over lateral lines. The Monarchy is constitu-tional and limited. The King has a right to veto Bills passed by both Houses of Parliament, but in practice his veto is almost obsolete. "The King can do no wrong" is a maxim of the Constitution, and consequently no action for civil wrong will he against the Crown A petition of right will, however, enable an injured subject to obtain refress, while, if in the administration of an Act of Parliament a Government department exceeds its rights, a declaration of right may be obtained in an action against the Attorney-General.
- z. The Legislature.—Parliament consists of two Houses, the Lords and the Commons,

(a) The House of Lords consists of peers A peer may hold his seat by (x) hereditary right, (a) creation by the King, (3) official position or election. English bishops (24), Irish peers (28) elected for life, and Scottish peers (16) elected for dura-tion of Parliament, also set in the House of Lords. The powers of the House of Lords were much

restricted by the Parliament Act, rorr. Thus, if a Money Bill is not passed unamended by the House of Lords within a month of its being sent up, it becomes law upon the Royal assent being signified. A Public Bill other than a Money Bill will become law without the consent of the Lords if it is passed by the Commons, and sent up to the Lords, in three successive sessions, provided two years elapse between the date of the second reading in the Commons in the first session and the date when it is passed by that body in the third session. Passing a Rill with amendments by the House of Lords is equivalent to rejection, unless the Commons approve the amendments. Any Bill by which the maximum duration of Parliament is increased is excepted from this Act. Members of the House of Lords are unpaid.

(b) The House of Commons.—This body consists of 615 members, elected by the registered male and female electors in county, borough, and university constituencies Practically all persons over at years of age are qualified to vote at elections. The maximum duration of Parliament is five years Members of the House of Commons receive annual salaries of £400 and travelling facilities over the railways to and from their constituencies

- 3. The Executive The Crown (the King in Council) "makes peace and war, issues charters, Council) "makes peace and war, issues charters, increases the peerage, is the fountain of honour, of office, and of justice." The Cabinet, under the presidency of the Prime Minister, consists of Ministers, drawn from the ranks of the party in power and appointed by the Sovereign on the advice of the Prime Minister; Ministers receive salaries of varying amounts (see page 169). The Cabinet has no corporate existence. Ministers are severally responsible to Parliament for their actions, and the Cabinet as a whole is respon-sible to Parliament for its joint and several administration. Ministers hold their office during the Sovereign's pleasure; they may be dismissed at any moment.
- 4 The Judicature.—(a) England and Wales.— The laws in England and Wales are administered by judges appointed by the Crown, who hold office for life, and cannot be removed save on petition presented by both Houses of Parliament Two Courts of Appeal hear appeals from the High Court, the ultimate Court of Appeal from all the courts in Great Britain being the House of Lords. Civil cases arising in London and Middlesex are tried at the High Court in London, but civil cases arising in the country are tried on circuit by judges of the King's Bench at the Assizes. The Chancery division has exclusive jurisdiction to try certain classes of actions. To the County Courts is relegated the duty of trying actions where the sum in dispute does not exceed a certain amount. The County Courts, too, have jurisdiction to try cases arising under certain special Acts of Parliament, e.g., the Workmen's Compensation Act. Bankruptcy cases arising in London are heard in the London Bankruptcy Court; those arising out of London are dealt with in the County Courts.

  With regard to criminal law it is a general

principle that, except for certain minor offences, every person charged is entitled to be tried by a jury Courts of criminal jurisdiction in Eng-land are: (x) The judges of the High Court sitting at Assizes for the trial of cases out of London; and at the Central Criminal Court ("The Old Bailey," see p. 248) for the trial of cases arising in and around London. (2) Courts of Quarter Sessions, holden for every county, and formed of justices of the peace, presided over by a chairman. The recorders of certain cities and boroughs have a jurisdiction similar to that of courts of Quarter Sessions. (3) Courts of Petty Sessions, consisting of at least two justices of the peace or a stipendiary magistrate. (4) The Court of Crimmal Appeal has power to hear appeals against con-

victions and sentences.

(b) Scotland.—Scots civil law is administered by the Court of Session, which is a court of law and equity. The High Court of Justiciary is the supreme criminal court in Scotland. consists of all the judges, and as a rule it is confined to the trial of serious cases. The Sheriff of the county (see p. 254) exercises functions which correspond to those of the English County Court Judges and the Chairmen of Quarter Sessions. Burgh magistrates and jus-tices of the peace have jurisdiction in petty Cases

(c) Northern Ireland,-The higher courts in Northern Ireland are very similar to the English courts, but the County Court Judges are also the Chairmen of Quarter Sessions.

#### RELIGIONS AND LANGUAGES.

Religious and Languages.—The inhabitants of Great Britain and Ireland are almost entirely Christians, the exceptions being about 300,000 Jews and a small number of non-Christian immigrants. In England the Church of England (with an Episcopal form of Government), and in Scotland the Church of Scotland (with a Presbyterian form of Government), are the "Established Religions." The Church was disestablished in Ireland in 1869, and in Wales in 1930. There has been no religious census since 1853, but many of the religious bodies publish estimates of membership, and estimated figures for 1939 will be found on p. 305. The language of the people is English, with a large proportion of Welsh-speaking people in Wales, many of whom are bi-lingual. Attempts are lening made to revive the Gaelic language in the Inish Free State. Genlic is still spoken in the Highlands and Islands of Scotland, there being 7,059 persons speaking Gaelic only (Ross and Cromarty 3,435, Inverness 3,123, Argyll 335, other counties 176), and 137,149 speaking Gaelic and English at the Census of 1932.

#### LOCAL GOVERNMENT.

Local Government is carried out under the central control of the Ministry of Health (which superseded the various Local Government Boaids in 1919). The subjects which local bodies administer are, under alsa, education, the poor law; public health; police; the control of the sale of intoxicating liquors, the provision of lunatic asylums. The ruling principle has been to entrust special interests to those specially interested. In England and Wales there are elective Councils for each Administrative County (under Chairmen), for each City and Borough (under Lord Mayors or Mayors), and for Urban and Runal Districts (under Chairmen), every panish being thus included. Scotland has elective Councils under a Lord Provost or Provost, or Parish Councils with Chairmen.

#### POLICE.

The strength of the Police force was 58,080 in Eugland and Wales (1930), 6.613 in Scotland (1930), and 2.877 in Northern Ireland (1930). The Police of England and Wales are administered by the Home Office, those of Scotland by the Scottish Office The LONDON POLICE consists of the City Police and of the Metropolitan Police. The City Police and of the Metropolitan Police. The City Police and contains two courts of justice, those of the Guidhall and Mansion House, where the Lord Mayor and the Aldermen are the magnitizates (see p. 251). Although the area is comparatively small, the nateable value is enormous. The might population is 10,806, but the day (or working) population is 10,806, but the day (or working) population is 436,721. The Foice under the Commissioner comprises a Assistant Commissioner, 3 Superintendents, 7 Chief Inspectors, ag Inspectors, 12 Sub-Inspectors, 125 Sergeants, and 983 Constables, also 18 Constables on private service duty The City of London Police Reserve (Headquarters, Bunhill Row, E.C. 1) numbered

tendents, 688 Inspectors, 2,963 Sergeants, and 17,002 Constables, making a total of 20,696, with 247 liorses. The strength of the Metropolitan Special Constabulary Reserve and its Auxiliary Force on Sept. 5, 2931, was 27,545. The gross expenditure of the Metropolitan Police and Metropolitan Police from the type of 10,000 for the year 1939-31 was £8,479,958. On March 21, 1932, there were 13,810 Police pensioners, and 1,340 pensioned wildows and 459 children.

### FINANCE.

Revenue and Expenditure 1880-8x to 1904-05, and for twenty years ended March 3x, 1933 :-NOTE.—The estimated surpluses (£1,521,000 for the Financial Year 1931-32, and £1,500,000 for 1932-32) are resched after providing in each year approximately £32,500,000 out of revenue for amortisation of National Debt and after charging against revenue the amounts for the Unemployment Insurance Fund and the Road Fund which had hitherto been obtained by horrowing.

Year.	Revenue.	Expenditure	Surplus + or Deficit —	Gross Debt.

#### Changes in Taxation (Original Budget).

The following Changes in Taxation were proposed in the Budget:—

INCOME TAX.—Income Tax (Schedules B, D and E) at present payable in two equal instalments on January z and July z to be payable as to three-quarters on January z.

PETROL AND MOTOR CYCLES — Petrol — The duty on petrol raised from ad. to 6d. a gallon (to yield £6, 300,000 in a full year). Light Motor Cycles—Annual tax of 15a in lieu of the present 30s. on light motor cycles, to encourage the manufacture of a new type of light machine.

LAND VALUES.—The Finance Bill to provide for a tax of xd in £ on capital land value: tax to be levied for 1933 34 and subsequent years.

EXCHANGE ACCOUNT—£20,000,000 taken from the dollar exchange reserve during the War and amounting to £33,000,000.

#### THE REVISED BUDGET.

On Sept 20, 1931, amended Budget proposals for 1931-32 and for 1932-33 were introduced in the House of Commons by Mr. Snowden, Chancellor of the Exchequer in the National Ministry The Chancellor was faced with deficits of £74.479,000,000 for the financial year 1931-32 and £179,000,000 for 1932-33. To meet these deficits the following proposals were made:—

ı	our rotto attic In oboses	B WOLC HIMGE	•
	Proposals.	1931-32	1932 33.

#### Economies.

The proposed Economies (£22,000,000 in 1931-32 and £70,000,000 in the complete financial year 1932-33) are summarised as under.—

John 1930 33/ are samman took as man	-0
Reduction of Salaries (Ministers, M.P.s., Judges, Civil Servants, and Members of Defence Services)	£4,534,000
Defence Services (Material, &c.)	5,000,000
Education (Salaries and Grants)	10,300,000
Do. (University Grants)	150,000
Health Services	1,250,000
Police (Pay, &c.)	500,000
Agriculture	655,000
Forestry	478,000
Empire Marketing Board	250,000
Colonial Development Fund	250,000
Unemployment Grants	500,000
Unemployment Insurance :	•,
Reduction of Expenditure	25,800,000
Increased Contributions	10,000,000
Road Fund	7,865,500
Miscellaneous	2,500,000
Total Savings	£70,032,500

#### New Taxes (Direct).

Standard Rate of Income Tax increased from 48 6d. to 5s. in £ and readjustments made in allowances. Increase of Surtax by 10 per cent.

#### New Taxes (Indirect).

l'ax on Beer raised by zd. per pint and on Tabacco by \$d. per lb. Petrol tax increased by zd. per gallon. Entertainment tax raised by zd. on each \$d\$. and extended to include \$d\$. tickets.

#### MONETARY GOLD.

IN a written Parliamentary reply (Ma) 5, 1930) the Financial Secretary to the Treasury (Ir Pethick Lawrence) stated that the mometary gold supply of the world at the end of 1932 was estimated, in a Memorandum appended to the first Interim Report of the Gold Delegation of the League of Nations, at \$11,79,000,000, equivalent to £2,297,000,000. This includes an amount "in circulation," in the sense of being outside the reserves of central banks and Treasuries, estimated at \$795,000,000 (£185,000,000), but this is very conjectural.

The gold held in the countries named in the question at the end of rosq and at the latest available date was (in £ millions):—

Country	December, 1929	April, 1931
United States France Germany Italy Great Britain	880'3 335'1 115'1 56'1 147'7	969 o 447'7 115'1 57 4 146'3

The proportion of gold to currency in circulation (exclusive of subsidiary coin) was (in millions):—

Country.	Currency	Gold.	Proportion per cent.
United States (\$) France (fr.) Germany (rm.) Italy (lire) Great Britain (£)	77,231 3,685 14,797	4,716 55,616 2,348 5,313 146.3	72.0 63.7 35.9 41.8

#### GOLD PRODUCTION.

THE Annual Production of Gold, for the 25 years 1905-1929, is stated below from figures issued by the Bureau of the Mint, Washington, DC, U.S.A. In 1929 the chief producing countries were Unum of South Afreca, \$215,241,881; United States, \$44,514,300; Dominion of Canada, \$39,851,564; Hussaa, \$20,671,825; Mexco, \$23,475,421, Australia and New Zealand, \$12,096,438, Southern Rhodena, \$11,593,034.

Schedule A: Lauds, Tenements, &c. Owner must allow deduction from next payment of rent when tax paid by tenant.	•	5	۰
Police in remort of the cost of			

Relief in respect of the cost of

repairs is given under Sch. A to the extent of 1/2 part of the assess-

ment in the case of lands, and in the case of houses, where the amount of the assessment—

Houses, for average cost of mainten-

ance, repairs, insurance and management in excess of above relief may be

claimed. Five years' average taken.

A Clergyman or Minister using part of his house
mainly for his duties may obtain an allowance
not exceeding the tax on one-eighth of the rent,

or annual value.

Schedule B: In respect of the Occupa-tion of lands used for the purposes of husbandry only, or mainly for those purposes, on an amount equal to the Annual Value; or, by special request, if made before ght June (gth August in Sootland) in the current income-tax war on profile current income-tax year, on profits of husbandry, as in case of Trades, under Schedule D. In the case of all other lands on an amount equal to one-third of the annual value. Schedule C: Dividends or Annuities from public revenue (Government-Stocks, &c.)
Schedule D: Trades, Professions, Remittances from Abroad, Interest, &c. Schedule E: Salaries, pensions, and other be claimed on the amount of premiums paid for insurance of self or wife in approved Companies legally carrying on business in the United Kingdom, if not exceeding one-sixth of the net personal income; but the amount allowable in respect of any premium for secur-ing a capital sum on death not to exceed 7 per cent. of the actual sum assured, nor in respect of any premium for securing any other benefits, more than £ see in all. RESIDENTS ABROAD .- No exemption or other relief is given to persons not residing in the United Kingdom. Exceptions: British subjects, present or former servants of the Crown, widows whose late husbands were in the service of the Crown, missionaries, servants of native States under British protection, residents in the Channel Islands or the Isle of Man, and persons, previously resident in the United Kingdom, residing abroad for the sake of their health or the health of a member of their family. DOMINION INCOME TAX.—Relief is granted under certain conditions in the case of a taxpayer who has paid, or is liable to pay, United Kingdom Income Tax on any part of his income, and who proves that he has paid Dominion Income Tax for the same year in respect of the same part of his income.

BOHOLARSHIPS.—Income from a scholarship held by a person receiving full-time instruction at a university, college, school, or other educational establishment is exempted from Income Tax (including Super-Tax).
STANDARD RATES OF INCOME TAX.come Tax year is from April 6 to the following April 5. The following were the standard rates for the years mentioned:— 1907-8 and 1908-9 ...... e IQI4-I5 ...... 0 1915-1916...... o 1916-17 and 1917-18 ...... o rgr8-rg to rger-as ..... 1930-31
SUR TAX.—The Sur Tax replaced the Super Tax, which was levied up to and including the Super Tax Year

1928-9 (payable January 1, 1929),

Nul.

based on the statutory income of the year 1927-6). The Bur Tax is in effect year 1927-8). The Bur Tax is in effect a deferred instalment of Income Tax payable on January x after the end of the Income Tax year. Thus the first payment of Sur Tax was due January 1, 1930, and was the deferred instalment of Income Tax for the year 1928-9.

Sur Tax for the year 1990-32 (payable January 1, 1932), is at the following rates plus 20% of each rate on persons whose total incomes exceed £2,000:— 

For every £ of the first £500 of the £ s. d. For every £ of the next £500 of For every £ of the next £1,000 of 

the excess .... For every £ of the next £2.000 of 

For every £ of the next £5,000 of the excess. For every £ of the next £xe,000 of the excess .. . For every £ of the next £so,000 of the excess. For every £ of the remainder of

the excess .....

Notes on Income Tax. Under the Finance Act of 1920 a radical alteration was made in the method of granting relief in the Income Tax in favour of earned income as compared with investment income, and in the method of graduating the burden of the tax according to the size of a taxpayer's income and his family responsibilities. The previously existing exemptions, abatements, and reliefs were replaced by the various reliefs set out below. In introducing the new system, the Act employed two terms not previously used in connection with the Income Tax, viz., "assessable income" and "taxable income."

"Assessable Income" means, in the case of "earned" income, the amount of such income as computed for Income Tax purposes, after deducting the amount of the "earned" income allowance mentioned below, and in the case of other income, the actual amount of such income

as computed for Income Tax purposes.
"Taxable Income" means that part of the
"assessable income" upon which Income Tax is actually charged, that is, the "assessable moome" less the various deductions referred to below.

Deduction in arriving at Assessable Income. Earned Income Allowance.—The differentiation in favour of "earned" income is made by deducting one-fifth of the "earned" income in order to arrive at the assessable income. The deduction is given irrespective of the amount of the total income, but must not exceed £300 for any one individual. The "assessable income" of a taxpayer is, therefore, his total income, as computed for Income Tax purposes, after making the appropriate deduction in respect of any "earned" income.

An allowance is made of one-fifth of the total An allowance is made of one-ritto of the total income (from whatever source) of persons of the age of 85 years and upwards whose total income does not exceed \$500. This allowance is granted, in the case of a married couple, where sither the husband or his wife, living with him, has attained the age of 65 years at the commencement of the very of accurance. of the year of assessment, but the joint total income must in such a case fall within the prescribed limits. Provision is also made for marginal relief, in order to avoid the hardship which would be involved when the total income falls just over the prescribed limit of £500.

Total Exemption. - Exemption from tax may be claimed where the total assessable income does whose wife is living with him, £25c. Where the income is wholly earned, these limits are equivalent

to first and first ros. respectively. See above.

Deductions from Assessable Income in order to arrive at Taxable Income .- Where the taxpayer is not totally exempt, the following deductions may be claimed from the total assessable income in order to arrive at the "taxable income." The deductions may be claimed irrespective of the amount of the taxpayer's total income

Personal allocance may be claimed of £zco, or, in the case of an individual whose wife is living with him, £zso.

Wys's Earned Income.—When a taxpayer's

total income includes any earned income of his

total income includes any earned income of his wife, the personal allowance of £150 is increased by a sum equal to four-fifths of the amount of such earned income, subject to a maximum additional allowance of £45.

Deduction for a Widower's (or Widow's) House-keper taking Charge of Children.—A deduction of £50 may be claimed, under certain conditions, by a widower who has living with him a female relative for the nurses of having the charge relative for the purpose of having the charge and care of any child or adopted child of his in respect of whom the deduction for children (see below) is given or in the capacity of a house-keeper or by a widow who has a female relative resident with her for the like purpose. If the widower or widow proves that he or she has no such female relative who is able or willing to take such charge, the same deduction may be claimed in respect of some other female person employed for that purpose.

Deduction in respect of Widowed Mother, &c., taking Charge of Children —A deduction of £50 may be claimed, under certain conditions, by an Unmarried Person who has living with him and maintains at his own expense either his mother (being a widow or living apart from her husband) or some other female relative, for the purpose of having the charge and care of any brother or sister of his in respect of whom the deduction for children or adopted children (see below) is given.

Deduction for Children .- A deduction may be claimed in respect of each child, step-child, or adopted child under the age of z6 years, or who, if over that age, is receiving full-time instruction at any university, college, school, or other educational establishment. The deduction allowable is £50 in respect of one child, and £40 in respect of each additional child for whom the relief is due. No deduction is, however, allowed in respect of any child or adopted child who is entitled in his or her own right to an income which, after excluding any income to which the child is entitled as the holder of a scholarship, bursary, or other similar educational endowment, exceeds £50 a year. Deduction in respect of Dependent Relatives.— A deduction of £32 may be claimed in respect of (a) any person whom the taxpayer maintains at his own expense, and who is a relative of his or of his wife, and incapacitated by old age or infirmity from maintaining himself or herself, or (b) his or his wife's widowed mother, whether or (b) into or his whes windowed moduler, whether incapacitated or not, or (c) a daughter who is resident with the taxpayer, and upon whose services he is compelled to depend, by reason of old age or infirmity. The deduction under (a) or (b) is conditional, however, upon the income of the dependent relative not exceeding Go a year. The deduction applies in the case of a female taxpayer, with the substitution of "husband" for "wife" above.

Rates of Tax chargeable on the "Taxable Income."—The following provisions as to the rates of tax chargeable on the taxable income rates of tax chargeane on the taxine income (i.e., that part of the income on which tax is actually charged) apply, whatever the total amount of the income. For the year ending Apr. 5, 1932, the first £275 of the taxable income is chargeable at 22.6d, in the £. The remainder of the taxable income is chargeable at the

standard rate of tax, i.e., at gs. in the £.

Relief in respect of Life Assurance Premiums. Where allowance is due in respect of premiums paid for Life Assurance or for contracts for Deferred Annuities, the allowance is deducted from the amount of tax arrived at under the preceding paragraph, and calculated at following rates:—one-half the standard rate in the £ on the amount of the premium paid on policies on the amount of the premium paid on policies taken out since June sa, 2016, irrespective of the claimant's total income; and on policies taken out before June sa, 2016, a deduction of tax at one-half the standard rate in the £ is allowed on the premiums paid by a claimant whose income does not exceed £1,200, of three-fourths of the standard rate in the £ where his income exceeds £2,000, and does not exceed £3,000, and at the standard rate in the £ where his income exceeds £2,000, and the standard rate in the £ where his income exceeds £s,coo. INVENTORY DUTY, see ESTATE DUTY.

LAND VALUE TAX .- In respect of all land in Great Britain there will be charged in respect of the financial year ending March 31, 1934, and each subsequent year a tax at the rate of one penny for each pound of the land value of every land unit. The Finance Act 1931 imposes on the Commissioners of Inland Revenue the duty of ascertaining the land value of every such land unit and indicates the method by which the valuation is to be made. For the purpose of the charge to the tax the land value is to be reduced either (a) by an amount equal to four times the annual value for income tax purposes or (b) by an amount equal to seven-eighths of the land value of the unit—whichever is the less.

Where any land unit comprises agricultural land a "cultivation" value is also to be ascertained and the amount by which the tax is reduced is either the amount of the cultivation value or the amount calculated as above which would be allowable if no cultivation value was shown, whichever is the greater.

Certain exemptions are granted in respect of land owned by the Crown, National Trust, railways, &c., and also, under certain conditions, land used as playing fields.

If the aggregate amount of tax payable in respect of all the land units owned by one person does not exceed ten shillings he is entitled to relief from the tax.

-The quota payable by each Parish, as fixed in the year 1798 (less the amount redeemed), is raised by an equal pound rate, the rate of Assessment not to exceed 1s. in the £. Where the income of the owner of the the fate of assessment into the control of the fat. Where the income of the owner of the land (when not a body of persons, corporate or incorporate) does not exceed fate he is exempt from payment of land tax, and if the owner's income does not exceed face one-half of the tax is remitted, but he must claim this relief before payment of the tax.

#### GAME AND GUN LICENCES.

GAME AND GUN LICENCES .- A licence is required by every person who hunts, shoots, or takes game, except persons (in Great Britain) taking woodcock and snipe with nets or springes, proprietors, or tenauts, on enclosed land, killing rabbits; persons hunting deer, or hares, with hounds; owners or occupiers, or their servants, killing deer on their own enclosed land; beaters and others, not holding guns, attending holders of game licences. Occupiers of enclosed land, or owners, having the right to kill game, may them-selves kill hares, or authorise others to do so, without a licence, but such authority must be limited to one person at a time in any one parish, and must be registered with the clerk of the Justices of the Petty Sessional Division in which the land is situate. Even when the quarry is not what is legally known as "game," a "gun" what is legally known as "rame," a "gun" licence is necessary. A game licence, however, covers agun licence, sallors, soldiers, airmen, territurial soldiers, or constables, on duty or at practies, need not take out a gun licence, nor need occupiers of land scaring birds or killing vermin or such land, or persons so acting under the orders of occupiers holding a licence. Unless, however, the occupier is himself licensed, he

cannot authorise any milicensed person to carry a gun. "Scaring" birds is not to be regarded as including killing of any birds, and "vermin" does not include rabbits. The rates of duty are as follows :-GAME LICENCES, if taken out after £ After 31st Oct., to expire 31st July ... Licence for a continuous period of fourteen days ..... Gamekeeper's (Great Britain), to expire 3xst July..... Game-Dealer's Licence, to expire xat July, annually..... DEPUTATION or Appointment of a Gamekeeper ...... 0 to 0

GUN LIGENCES (gun, air gun or pistol)... o so e A Firearm Certificate (5/- for the first, a/6 subsequently—renewable every 2 years) is also necessary (with certain exceptions) for any person in possession of a firearm.

A person under at may not purchase or have in his possession any firearm other than a smooth-bore shot gun or air rifie.

#### LOCAL GOVERNMENT FINANCES.

In addition to the State Revenue and Expenditure large amounts are received and expended by Local Authorities in Great Britain. The estimated total collected from ratepayers and expended by Local Authorities being :-

Service	England & Wales.	Scotland
Poor Relief		(1928 29) £4,858,000
Education		5,307,000
Police	10,300,000	1,073,000
Other	89,500,000	10,680,000
Total	£168,500,000	£sz,gzB,oos

The gross rental of Rateable Hereditaments in Eugland and Wales in 1997-98 was £378,984,347 the rateable value being £978,386,528, and the assessable value under the Agriculture Rates Act 1923, £258,879,292.

Payments to Local Taxation Accounts. In the financial year 1930-31 England and Wales received £395,838, and Scotland received a total of £39,898.

#### LOCAL GOVERNMENT DEBTS.

In addition to the National Debt there are considerable amounts outstanding as Loans of Local Authorities. These amounts were raised for the provision of baths, cemeteries, electricity supply, gasworks, harbours, piers, docks, canals and quays, light railways, markets, tramways, waterways and other purposes. On March 31, 1928, there were outstanding loans in England and Wales to the amount of £1,121,225,051, against the total the sum of £6,29,29,29 stood at the credit of various Sinking Funds. The total amount of outstanding loans and capital total amount of outstanding loans and capital. total amount of outstanding loans and capital-25,000 245,000 245,000 246,000 25,1325,336, and in Northern Ireland (on March 31, 1927) £15,479,299.

## National Taxation Compared.

The taxation per head in Great Britain and Northern Ireland in a full year under the proposals in the Finance Bill (Sept. 1931) will be £16 7s. xd. This compares (approximately) with the following figures:—

	Per head	£ at par			
Great Britain		16	7	1	
France	France 1243	10	0	3	
Germany		7	0	5	
U.S.A	Dollars 28.76	5	x8	0	
Italy	Lire 414	4	9	6	

## Taxation per head, U.K.

	1909-30.	1930-31
Direct Taxes	£434,166,000	£462,781,000
Indirect do	±4#,6%5,000°	240,907,000
Per head .	fia rus. rod.	£ 16 78, 1d.

#### Wage Levels Compared.

The level of real wages, is., money wages expressed in terms of food-purchasing power, is approximately as follows (dimistry of Labour Gazette, 1920-30):—

Great Britain .	 100
Germany	 74
France	 59
Belgium	 50
1 bary	 45

### Social Services Compared.

The cost per head of the population for the five social services of unemployment, health, workmen's compensation, old-age pensions, and Poor Law relief, was in 1984 approximately as follows (Report of Royal Commission on Health Insurance, 1926):—

Great Britain	 	 	100
Germany	 	•	48
France	 		17
Belgium		 	-/
Italy		 	7

5% Conversion Loan (1944-64) ... 371,608,858 National Savings Bonds ..... Other Debt ..... 910,510

Internal Debt .. .....£6,463,exe,xe3

1,753,050

#### The External Debt.

The Debt payable abroad was stated at the fellowing totals on March 3x, 292x :--Due to

United States : Government Loan ...... ...... £,903,698,630 (1937) a8,013,733 51/2% Twenty Year Bouds (1937)

Total to U S.A... ... £931,718,363 Allied Governments:-France ...... *53,500,000 Russia ......

Italy (repayable by instalments commencing Sept. 13, 1988) ... *21,450,eec

> External Debt ......£x,c66,662,363 See "Estimated Assets" pp. 20475. The Debt to U.S.A.

The Debt Funding Commission fixed the total repayable at \$4,604, 128,685; of which \$4,128,685 was to be repaid at once in cash and the balance  for the first ro years, and 4 per cent. thereafter, to include the sinking fund. A "Table of Total Indebtedness of Foreign Governments to the U.S. Treasury, July 1, 1930" (p. 776 of Complete Edition) shows a "Funded Indebtedness" from Great Britain of \$4,308,000,000 at that date, a decrease during the twelve months since July 1, 1020, of \$28,000,000.

#### OTHER CAPITAL LIABILITIES.

These sums are not included in the capital on which interest is arranged for in the permanent charge. They consist of various loans contracted for Telegraph and Telephone extension, for the purchase of land for Government offices, &c. On March 31, 1931, these liabilities stood at 1:69,593,595, and increase of £42,418,947 upon the total for the previous year.

There are also sundry Contingent or Nominal Liabilities which the State is not likely to be called upon to any material extent to discharge. These liabilities consist of Unclaimed Dividends and unclaimed amounts due to suitors or to

creditors of hankrupt estates.

Lons Guaranteed by British Government.— The Nominal Net Liability of the State in respect of losss guaranteed by the British Government of losing guaranteed by the British Government was stated on March 31, 1931, to be as follows:—
Turkish Loan, £1,497,504; Egyptian Loan, £3,994,400; Greek Loan; £5,65,600; Mauritius Loan, £7,149; Transvaal Loan, £25,289,698; Sudan Loan, £11,485,400; Welsh Church Loan, £5,27,240,768; Ulator £5,27,240,768; Ulator Eavings Cortflicates, £1,443,589; 24% per cent. of the Austrian Guaranteed Loan, secured on the gross receipts of Austrian Customs and Tolusco gress receipts of Austrian Customs and Tobacco monopoly; Palestine Loan £4,449,626; and Tanganyika Loan £2,070,000.
Unrepaid Advances.—Against these Guaran-

teed Loans may be set the amounts remaining unpaid on March 3t. 1931, on account of Advances made by Great Britain to various Governments, made by Great Britain to various Governments, viz:—Crete, £40,000; Kenya and Uganda, £3,502,502; Uganda, £7,7,77; Nyasaland, £923,000; Petrila, £425,000; Naturu and Ocean Islands, £727,265; Tanganyika, £3,37,200; Somaliland, £178,000; Northern Rhodesia, £203,000; Transjordan, £16,740; Swaziland, £75,500; Dominica, £16,000; Nigeria, £265,588, British Gulana, £30,000.

#### The Sinking Fund.

Reductions in the Debt by means of a sinking fund were first made in 1875 by Sir Stafford Northcote, who set up the New Sinking Fund, consisting of the balance of the Annual Charge after providing for interest and cost of management. That term was afterwards applied to the fund set up by Mr. Baldwin in rees; but has again been transferred to the real rund. The Old Suking Fund, was the applica-tion of the surplus revenue of any year for the redemption of debt when so determined by Parliament. Debt reduction is also made by means of Terminable Amusicia, the capital value of which is deducted from the Debt upon the expiration of the term for which the annuities are payable, and by means of the following Funds :-

victory Bonds Sinking Fund, by means of which Victory Bonds drawn for repayment on Sept. 1 of each year are discharged, £3,923,681.

2 Funding Lons Sinking Fund, £3,341,997 applied in cancellation of Debt in 1928-31.

3. Conversion Loan Sinking Fund, £15,652,131 applied in purchase and caucellation of £19,754,751 in 1930-31.

4. 4 per cent. Consols Sinking Fund, under which £10,043,392 was applied in cancellation of £12,213,829 in 1930-32.

5. Other Sinking Funds. Issues from the Consolidated Fund, £14,765,983 applied in Debt reduction in 1930-32.

6. Deprecation Fund, under the Finance Act

of 1917, by which sums are issued by the Ex-chequer and are applicable to the purchase for chequer and are applicable to the purchase for cancellation of 5 per cent. War Loan 1929-47 at a price below 95, and of 4 per cent. War Loan 1929-42 at a price below par. (£386,731,000,075% Stock and £32,930,500 of 4% Stock had been so purchased up to March 31, 1930; no purchases could be made in 1930-31.)

7. Payments for Death Duties, under Section 3 of the War Loan Act, 1919, amounting at March 31, 1931, to £33,021,537 Cash and £121,202 att securities.

£117,302,511 securities.

National Debt Redemption Fund, Very slowly the National Fund, established for the purpose of eventually redeeming the National Debt, grows from the voluntary gifts and interest on invested funds. The audited balance sheet, as at December 32, 1930, of the Fund (of which Messrs. Baring Brothers and Company, Ltd., 8, Bishopsgate, E.C. 2, are the Trustees) shows the following net additions during the year:—Dona-Tollowing net additions during the year:—Donations £305 yr. 7d., profit on investments realised £3,660 ex. 5d., and income £42,838 8s. xzd. The amount of the Find on the gast December, 230 was £520,465 gs. 6d. Under the provisions of Clause 30 of the Finance Act, 1928, the Fund is exempt from Income Tax. The Fund was constituted on November xo, 1927, with a gift of £409,876 4s. xzd., and forty-seven persons added the more 8s. xzd. in the following year. There is £12,705 8s xid. in the following year. There is also a further sum of £5,000 that will pass to the Fund at the conclusion of certain life interests. This National Fund has no connexion with the Government—it is a purely voluntary movement to lighten the debt burden of posterity, but not that of the present generation unless there is an undreamed of accession of funds. It was the expressed hope of the original donor that his contribution should serve as the nucleus of a very large fund.

Estimated Assets.

Against the External Debt of £1,066,668,363 owing on March 31, 1931, may be set the amounts owing to Great Britain by certain of the British owing to Great Britain by certain or the Britain bominions, and by various Countries in Europe. The amount owed to Great Britain far exceeds the External Debt, and the total Assets have a nominal value of £3.403,673,693.

The amounts remaining unpaid, and the estimated value of Investments made by the British Government in various Loans and Jusertakings, and appears allower below (as an March 3: 1822-1916).

were shown below (as on March 31, 1923, prior to the announcement of the Houser Plan).

Dominions and Colonies.

Interest was paid on all these Loans, and in the case of Australia, New Zealand and Trinidad

In 'proposing the revised Budget (Sept. 20, 1931) Mr. Snowden stated that the Hower Plan reduced the Debt interest paid to the United States by £13,500,000 for this year and also the provision required for redemption of the Debt to the United States by £5,750,000.

Not including \$2.580.000 previously postponed in respect of the principal of the Australian Debt. † South Africa has expressed the wish to make this payment as usual.

#### GREAT WAR PENSIONS.

FRESH applications for compensation in respect of disablement claimed to be due to service in or unantement ciaimed to be due to service in the Great War can no longer be entertained, since the period of seven years from the date on which the claimant's active service terminated, or the date fixed (August 32, 1921) as the end of the Great War, whichever is the earlier, has now expired in all cases.

While this is the statutory position, it has been made known by announcement in the House of Commons and elsewhere that except ional cases, in which clear evidence is produced that an ex-service officer or man is suffering substantial incapacity caused by his war service in respect of which for good reason no claim was made within time, will be investigated with a view to the grant of appropriate compensation.

#### DISABLEMENT PENSION.

The disablement pension is at the outset generally a temporary award based on a Medical Board's assessment of disablement arising out of boart's assessment of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state to time reviewed until the case is ripe for consideration for a final award under the War Pensions Act, year and the Regulations made thereunder. Under that authority a system of final awards has been brought into operation, the effect of which is to stabilise pensions, gradually to eliminate recurring medical examinations, and to bring about finality as to the amount of pension to be awarded. A man, on receiving notification that a final award has been made to him, has a right of appeal, subject to certain conditions, to an independent Assessment Appeal Tribunal, whose decision is final and binding on both the Ministry of Pensions and the appellant.

At March 31, 2931, Out of some 485,000 pensions in payment to disabled officers and men, about

425,000 were final awards.

Disablement, for the purpose of pension, is assessed on a percentage scale. Total disablement is reckoned at too per cent., and the lowest degree entitling to pension is so per cent. Where the disablement is assessed at less than 100 per cent, the disablement pension and any allowances attached thereto are proportionately anowances acceled the cost of populations of general dis-selled would receive go per cent. of the full rate of pension and go per cent. of the full rate of allowances for wife and children (if elighle).

Disablement assessed at less than so per cent. is compensated by a gratuity or a final weekly allowance paid over a definite number of weeks. The Great War Pensions expenditure during

the Great, war remisions expenditure during the year ended March 21, 1932, amounted to about £51,875,000, and for the current year ending March 31, 1932, is estimated to amount to about £50,051,000. This will bring the aggregate expenditure of the Ministry of Pensions since 1927, and of the Service Departments from 1914 to 1917, together, to £1,016,000,000.

#### RATES OF PENSION.

The following are some of the principal rates of weekly pension for a private soldier are percent, disabled, and of pensions or allowances for dependants of a private soldier;—
Private—40s.; wife's allowance res.: children's allowances—7s. %d, for first child and 6s.

for each other child; (if there is no wife, ros. for the first, 78. 6d. for the second, and 6s. for each other child).

Widow—over 40 or with children 26s. 8d.; under 40 and without children 20s.; allowances for children 20s., 7s. 6d., 6s.

Parents—need-pensions not exceeding 20s.

Provision is also made for other dependants. A totally disabled man who is certified to require constant attendance may receive an additional allowance not exceeding ses. a week.

#### Treatment.

The Ministry of Pensions provide courses of treatment for disabilities accepted as attributable to or still aggravated by service, and if in consequence of and during a course of treatment a man is unable to provide for his own support and that of his family, treatment allowances may be granted in lieu of pension and allowances. In the course of its fourteen years of work the

Ministry of Pensions has spent on medical treatment and its accessories about £59,900,000, and another £36,300,000 in special allowances to the patients and their families, during the treatment, in addition to their ordinary pensions.

#### NUMBER OF FIRST AWARDS.

Officers and Nurses - From the beginning of the War to March 31, 1932, the following awards of retired pay or pension were made to officers (Navy, Army and Air Force) and their relatives, and to Nurses .-

Omeers 60,725
Widows 12,302
Children 13.405
Other Dependants 8,418
Nurses 2,469
Men's Awards.—The following awards of pensions were made to N.C O's and men (Nsvy, Army and Air Force) and their dependants from the beginning of the War to March 31, 1931:—
Navy—Seamen and Marines 34,418 Children's Allowances 20,890 Army and Air Force—N.C.O's
and Men

The following were the approximate numbers of pensions in payment as at March 31, 1931:— Officers ...... 23,850 

" Children ...... 5,600 " and Nurses' Dependants . 5,175 Men ... .....460,350 Dependants ......287,700

The following allowances were also in payment as at March 31, 1931:—
Men's Final Weekly Allowances

Allowances for Men's Wives and Children 255, 100 Allowances for Children of Men's Widows, etc..... 80,400

#### UNEMPLOYMENT INSURANCE ACT.

have paid in all not less than ze contributions, and subsequent legislation raised the qualification to 30 contributions in the z years preceding the date of claim. This condition (known as the "first statutory condition") however, has in fact, at no time been operative, as a long succession of Acts have been introduced to postpone from time to time the date of its enforcement, and since the Act of the contributions in the previous a veers ager only 8 contributions in the previous a years or se contributions at any time have been required in respect of "transitional" benefit, i.e., benefit paid when the main statutory condition has not been complied with.

When the Act of 1980 came into operation the Unemployment Fund had a credit balance of over fss, coo, coo, but after only 8 months had elepted the reserve was exhausted and recourse

The Unemployment Insurance Act of 1920, and increasing deficiency, and Act after Act has which had the effect of increasing the number of state insured workpeople from about which might be advanced by the Treasury to Acce.coc to 18,000,000, imposed a statutory which might be advanced by the Treasury to days paid in all not less than 12 contributions, was passed largely in the hope that by lifting have paid in all not less than 12 contributions, and subsequent legislation raised the qualification to 20 contributions in the 2 years future be able to meet the ordinary benefits for specific the data of claim. This condition an increasing number of claumants, but the increase in the number of unemployed continued at an unprecedented rate throughout the whole of the year 1920, until by Christmas, out of 12,400,000 workpeople insured against unemployment in Great Britain and Northern Ireland, there were 2,725,000 on the registers of employment exchanges (of whom about two-thirds were wholly unemployed and the remainder temporarily stopped or only in casual work). At that arily stopped or only in casual wors). At that date about x person out of every 5 insured was unemployed, or double the corresponding ratio at the end of 2500. An analysis undertaken for the Royal Commission on Unemployment Insur-ance showed that of the total number of claimants for transitional benefit on January atto borrowing commenced. The cost of "tran-to for the cost of "tran-stitional" (or "uncovenanted" benefit as it was 31, 1931, nearly half of the men and more than known earlier) has left the Fund with a heavy half of the women had paid no contributions

No benefits in respect of dependants were payable until November, agar, when the Unemployed Workers' lependants Act came into force produing for a weekly benefit of a for an eduit and as for a child dependant. Young bersons, aged as and punder at, who receive additional benefit for a dependant, receive the full adultation.

allowance.

These represent only the principal changes made in rates of contribution and benefit.

in the preceding as months, and nearly three-quarters of both men and women had paid less than 8 contributions during the period. During the real rape, the total contribution income to the Fund amounted to £43,245,000, while expenditure (including "transitional" benefit £16,79,000 amounted in all to nearly twice the contribution income. At the end of 259,090,000, and it was still necessary to borrow heavily in 1921 for which purpose Acts were passed in March and July raising the borrowing limit to £90,000,000 and £115,000,000 respectively.

Apart from the changes in rates of contribution and benefit the National Economy Orders of

tion and benefit the National Economy Orders of Ortober, 2922, embodied the following important changes in administration of the benefit:—Ordinary benefit is limited to 26 weeks in a Ordinary benefit is limited to so weeks in some benefit year (a reversion to the practice in force before the 1927 Act which removed this limit), after which the claimant, until qualified by further employment, would be entitled to "transitional" pay in respect of which all claimants were to be required to astisfy a needs test before a public assistance authority.

In rest there was a stoppage of production for 88 days, ending in a settlement on June 28, 1921. In 1926 there was a stoppage of production from May 1 until Nov. 30.

### Home Consumption of Coal.

In a normal year about 200,000,000 tous of coal are available for home consumption. Railway locomotives require about 14,000,000 1988; gas works x7,000,000 tons; coke production x7,000,000 tons, of which about half (with x,500,000 tons of coal) is consumed by blast furnaces; colliery engines require about 17,000,000 tons; electrical miners receive about 6,000,000 tons; electrical generating stations require about 7,000,000 tons, and coasting ships require over 1,000,000 tons The selling value (at the mines and quarries) of all minerals won in 1999 was £195,785,000. The total number of persons employed in 1995 to domestic heating and cooking, and over the total number of persons employed in 1995 to domestic heating and cooking, and over the total number of persons employed in 1995 to domestic heating and cooking, and over the total number of persons to making the six months (Jan.—June), 1932, steamers and motor versels used 7,055,000 to 30 and 199,445 males and 4,135 females above ground.

#### Production of Pig Iron and Crude Steel,

The quantity of pig iron and steel ingots and castings made is shown below. In 1905 the quantity of coal used in the United Kingdom in the manufacture of pig iron was 19,255,555 tons; in 1927 the quantity was 1,200,000 tons of coal and 8,300,000 tons of coake. In 1905 there were 345 blast furraces at work, and in 1929 they numbered 166.

NB—The above particulars relate to registered trade unions in Great Britain only, and include unions of employers of which there were By in 2929 with Funds of £223,234. The total number of Trade Unions, registered and unregistered, in Great Britain and Aorthern Ireland (employees only) at end of 1929 was 1,114, and their membership was 433.014.

#### Trade Unions and Politics.

In a written reply to a question in the House of Commons in January, 1931, the Minister of Labour (Rt. Hon. Margaret Bondfield) gave the following figures:—

Total amount subscribed to Political Funds of all Trade Unions making returns—

Year	Registered	Unregistered.	. Total.
1924	£ 146,176		£246,276
1985	154,514		154,514
х92б	137,006		137,006
1937	136,692		136,69a
1928	100,489	£69,612	170,101
1929	107,034	50,632	157,666

 Refere zees Unregistered Unions were not required to make returns.

#### Bankruptey Statistics.

#### England and Wales (1989).

The number of debtors adjudicated bankrupts was 3,229, with liabilities 25,829,326, and assets £,2,627,263; of compositions 29, with liabilities £125,026, and assets £22,016; of administration

## 574 Great Britain Industrial Socs., Workmen's Compensation, do.

orders for detended debtors estates 44, with Habilities £3:8,335, and assets £3:7,336. In addition, there were 2,972 assignments, compositions, &c., under deeds of arrangement, with Habilities £3,262,476, and assets £3,495,527.

Scotland (1929).
The number of sequestrations in Scotland was are, with liabilities £790,681, and assets £99,137.

Northern Freland (1939).
The bankruptcies numbered 27, with liabilities £38,976, and assets £3,527; deeds of arrangement 53, with liabilities £39,477, and assets £48,887; arrangements under the control of the Court 48, with liabilities £89,937, and assets £25,775.

Industrial and Provident Societies.

t it is not generally known that associations for carriting on any industry, business or trade may be registered under the Industrial and Provident Sciences Acts, and when so registered enjoy, among other advantages, the privileges of limited liability. In his report the Registrar of Friendly Societies who administers these Acts anys:—

"A society, established to carry on any industry, business or trade may be registered under the Industrial and Provident Societies Acts, and obtain the privileges of incorporation with limited liability, provided that it restricts the interest which any member may have or claim in its shares to £200, and if it carries on the business of banking, that its share capital is not withdrawable."

At the end of 1929, 5,853 societies were registered; they had a total membership of 7,279,836; and their balance sheets showed total assets (omitting inter-society investments) valued at £231,868,000. The societies registered at the end of 1929 were classified by the Registrar as follows:

Class of Society	Number of Societies	Share Capital	Balance of Undis- tributed Surplus and Reserves
, ,		£	£
Distributive Trad-	1, <b>3</b> 0g	206,255,237	16,771,397
Distributive Trad-7 ing (Wholesale)	10	9,734,694	7,302,114
Productive Trading	148	2,802,840	921,205
Clubs	2,335	241,631	1,890,913
Other businesses	308	4,446,203	111,901,560
Land and Housing	338	s,sog, 150	769,247
Agriculture and Fishing	1,415	1,7±3,751	550,984
Totals	5,853	*126,409,491	39,507,420

As stated above most of the societies registered under the Industrial and Provident Societies Acts are co-operative. Additional and later figures for these will be found in the Complete Katton under the head of "Co-operation." (See Index.)

Savings Banks.

Post Office Savings Banks.—On Dec. 31, 1930, there were approximately 12,000,000 active deposit accounts in the Post Office Savings

A considerable part of the capital of Co-operative Societies in the ferm of Deposits and Loans. Mainly Insurance Societies' reserve funds.

Barks, with the sum of Lascings, 327 due to depositors. On Dec. 37, 1790, Government Stock to the amount of £288,472,183 stood to the credit of holders in the books of the Rost Office favings Banks. Any sum from one shilling to £300 may be deposited, and interest is allowed at a½ per centum per annum. There is no limit to the amount which may stand to a depositor's credit, but not more than £300 may be deposited in the course of one war.

in the course of one year.

Trustee Savings Banks.—On Nov. 20, 1230, there were \$124, 237 active accounts in the Trustee Savings Banks. The total assets of the Banks amounted to £123, 126, 732 due to depositors in the Ordinary and Special Investment Departments, £32, 232, 132, 250 total and Bonds held for depositors and £6, 134, 134 representing the accumulated surplus of the individual Trustee Savings Banks throughout the country. Information about these Banks and their offices, sumbering 426 (Principal and subordinate) in November, 1250, can be obtained from the Trustee Lavings Banks Association, 126 Gray's Inn Square, W.C.z. (Chairman, Sir Spencer J. Portal Secretary. H. Oliver Horne, M.A.)

#### EXTERNAL TRADE (GREAT BRITAIN AND NORTHERN IRELAND).

IN statistics of Trade, the term General and the charges for Insurance and Freight, Trade refers to the whole volume of Imports (including such as are temporarily detained and afterwards exported), and to the whole volume of Exports. The term Special Trade includes the merchandise delivered to the exporting ship. Exports for consumption in the country reach their destination, awing become loaded receiving them, and Exports of home produce or manufacture. Imports are taken at their C.I.K. walve with Insurance and Freight. They walve (which includes the Cost of the merchandise

#### COMMUNICATIONS.

The total mileage of public roads in Great Britain is approximately 177,000 miles, of which 152,000 are in England and Wales and 25,000 in Scotland. The cost of maintenance and improvement in 1914-15 was £18,800,000, and in 1928-29 £57,342,642. The roads of Great Britain have 657,343,643. The roads of Great Britain have been classified by the Ministry of Transport, and out of the total mileage of 177,000, 26,400 (approximately) have been included in Class I, and 15,900 (approximately) miles in Class II.

The maintenance and repairs of public roads is within the jurisdiction of the "highway authorities." Under the Local Government Act, rosa, county councils in England and Wales as from the appointed day (April z, 1930), became the highway authorities for all roads in rural districts and all classified roads (i.e. Class I and Class II Roads) outside the county and metrodate II Roads) politan boroughs, together with the main roads, for which the county councils were already the highway authorities prior to the appointed day. These roads are known as "county loads" and are now a county charge, although district councils in many cases continue to carry out the actual work of maintenance and improvement. The borough and urban councils are the highway authorities for roads other than county roads which lie within their areas. In Scotland under the Local Government (Scotland) Act, 1989, the county councils are the highway authorities in respect of all roads outside the boroughs, and in respect of all classified roads boroughs, and in respect of all classified roads in horoughs with a population of less than so,ooo except the borough of Arbroath. All boroughs remain highway authorities in respect of their unclassified roads. The Act provides that the functions of the County Council in regard to lighways may be partially exercised by Committees or by the Town Council of small boroughs in accordance with an administrative scheme submitted by the County Council to and approved by the Secretary of State for and approved by the Secretary of State to Scotland. The motor licence duties (referred to below) are paid into a Road Fund which is administered by the Minister of Transport. Grants are made from the Road Fund to high-way authorities towards the cost of maintenance and improvement of roads and bridges. During the year 1930-21 the grants from the Road Fund amounted to £27,372,123. The bulk of this morey was directed to assisting highway authorities in the maintenance and improve-ment of classified roads and bridges. Under the Local Government Act, 1929, the grants hitherto made out of the Road Fund towards the maintenance of classified roads in London and the county boroughs and of unclassified roads in counties have been discontinued as from April 1, 1930, and a sum corresponding to these amounts, together with an additional contribution, is paid out of the Road Fund towards the block grants to local authorities for which the Act provides.

The total gross receipts from the taxation of The total gross receipts from the taxation of road vehicles between December 1, 1929, and November 30, 1930, amounted to £27,040,384. The approximate number of motor vehicles licensed during this period was 2,260,500, while licences in respect of private and hackney horsedrawn carriages numbered 53,012. The average accidents in London, am increase of 32 on the receipt in respect of a whole year licence was £13 185. 6d. for cars taxed on horse-power, from street accidents in Paris.

£2 152. 6d. for motor bleveles, £26 52. 6d. for internal combustion and steam-driven goods vehicles, £20 156. 6d. for electric goods vehicles and £47212. cd. for motor hackneys.

#### Railways.

The length of road (first track) of the railways owned, leased or worked by the Companies formed under Part I. of the Railways Act, 1921, at Dec. 31, 1930, was as under:—

Southernmiles	2,194
Great Western, London, Midland & Scottish, London & North Eastern,	6,056
Total	19,336

#### Railways in 1930.

The gross receipts during 1930 from railway working amounted to £184,836,388, compared with £195,400,523 m 1200, a decrease of £10,573,141. The principal figures were:—

	Receipts for 1930.	Decrease on 1929
	£	£
Ordinary passengers— third class	46,437,913 46,829,972 15,180,435	2,581,434 3,631,342 1,573,804
fuel	35,592,316	1,950,526

Expenditure on railway working decreased from £151,311,465 in 1939 to £147,595,684 in 1939, a swing of £3,715,782. The operating latio rose to 79.85 per cent. in 1930, compared with

77'43 per cent, in 1929.

The total net receipts of the railway and ancillary businesses in 1930 were £38,044,598, compared with £45,071,208 in 1929, a decrease of £7,026,502. The decrease occurred mainly in net receipts from railway working, which fell from £44,028,037 in 1929 to £37,240,698 in 1930. The net revenue for the year 1930 amounted to £42,007,256, which compares with £49,321,733 in 1929. The amount appropriated for the payment of interest and dividends in 1930 was £43,740,671, compared with £48,355,050 in 1939 per cent. respectively upon the total capital receipts.

receipts.
The total number of ordinary and workmen's journeys was 1,227,285,700, a decrease of 18,366,832, or 153 per cent. compared with 1930. The total number of season tickets (equated to an annual basis) was 779,031. a decrease of 1,871. The total number of passenger jounneys, including season ticket holders on the basis of 600 journeys per annual ticket, was thus 1,684,704,300. a decrease of 20,04,432, or 178 per cent, compared with 1929. Receipts from passengers decreased by 2,3,25,370, or 4'67 per cent, the higher ratio of decrease being attributable to the extended use of cheap fares.

"The total tonnage of goods and uninerals (excluding companies' free-hauled traffic) conveyed on all railways was 304,361,107 tons, compared with 329,578,743 tons in 1929, made up as follows:

Description	1930	Decrease
Merchandise	Tons 53,225,830	Tons
Minerals and		4,349,414
Merchandise		7,026,839
Coal, coke and patent	193,288,726	13,841,383
	304,361,107	

The total number of live stock conveyed was 16,116,280, compared with 17,700,80s in 1999. The passenger and goods road vehicles operated by the four amalgamated railway companies showed substantial increases in traffic in 1930 compared with 1980.

#### Canals.

There are 3,8ag miles of canals and canalised rivers in Great Britain (England and Wales, 5,6ar miles; Scotland, 184 miles), no additions to the mileage having been made for several years. In 1930 the inland waterways carried tomage (so far as returns are available) as under:

	Mileage of Canals	Tonnage carried.
Independent	1,234	11,410,861
Railway owned	1,048	1,693,905
Thames	x26	22,807
Caledonian and Cunan	70	99,121
Total	- 4-9	72 ear =0

A Royal Commission on Transport reported in 1930 that, in spite of their limitations, canals and inland unavigations form a useful component of the national scheme of transport, and that properly nationalised and developed they can be made to render much useful service to the community in the future. The Manchester Shy. Canal., opened in 1894, has a total length of 36 miles, and connects Manchester with the Mersey port of Liverpool; in 1992 the tounage carried through the canal was 6,588,599 tons, and in 1930 the tounage of toll-paying traffic was 6,296,625 tons, and the tolls, dues, &c., £1,395,567.

#### Tramways.

The total mileage of tramways and light railways open in Great Butann on Dec. 31, 1939, was a,323. The total receipts in 1939 were £25,759,000, the working expenses £25,13,000 and the net necepts £5,613,000, the total paid-up capital heng £107,334,000 (gross) and £35,025,000 (net).

ing £19,394,000 (gross) and £36,056,000 (not).

4.613,527,000 passengers were carried.

Under the London Passenger Transport Bill promoted in 1932 by the Minister of Transport (Rt. Hon. Herbert Morrison) it was proposed to transfer the tramway systems in the London netropolitan area to a London Passenger Transport Board which would have been given control of all passenger transport undertakings and interests in the London Traffic Area. The Bill was held over at the Dissolution of Panliament.

#### Posts, Telegraphs and Telephones.

The carriage and custody of the mails has been maintained by the State "from thine immemorial." The telegraphs were transferred to the State on Jan 28, 1870; the telephone service became exclusively owned and operated by the Government (with one or two mimo exceptions) on the transfer of the National Telephone Company's undertaking to the Post Office on Jan. 1, 1912. The submarine telegraph cables connecting the British Isles with the various Dominions and most Foreign Countries except the Continent of Europe are maintained and operated by private companies. The submarine telephone cables from the British Isles to the Continent are either owned entirely by the State or jointly with the Foreign Administration in whose territory the other end of the cable terminates.

#### GENERAL REGULATIONS.

UNPAID PACKETS (letters, newspapers, post-

ONTAID FACERIS (etters, necessapers, post-oards) are charged double postage on delivery; UNDERPAID PACERTS, double the deficiency. REDIRECTION.—(z) By agent of addressee: Letters, post cards, printed papers, and near-papers may be reposted free not later than the day after delivery (not counting Sundays and public holidays), and must not have been opened or tampered with. Parcels may be redirected free of charge, within the same time limits, if the original and the corrected addresses are both within the same Town Delivery Area (the whole London Postal District being for (the whole London Postal District being for this purpose one Town Delivery Area), otherwise they are charged at the ordinary prepaid rate. Registered packets, which must be taken to a Post Office, are re-registered free only up to day after delivery. (a) By the Post Office (not undertaken during temporary absence, unless house be left empty, or from clubs, hotels, &c.). Requests for re-direction of letters, &c., must be on printed forms, obtainable from the postmaster or postmau, and signed by the persons to whom the letters are to be addressed. Re direction is free for ze months; thereafter costs 1s, for each surname months; thereafter costs 1s. for each surname for second, is third, and is, each subsequent year. Separate forms must be filled in for parcels, and for the (postal) forwarding of

BEGISTRATION.—All kinds of postal packets intended for registration must be marked "Registered" in bottom left-hand corner, and must be handed to an officer of the Post Office, and a receipt taken. Parcels (or the string with which they are tied) and letters, must be estanged with way or other adhesive. Wes 3d. fastened with wax or other adhesive. fastened with wax or other adhesive. Fee 3d. Institutes of postage. Advice of delivery, a further 3d. The latest time for registering is usually half an hour before the latest time for posting ordinary packets; at Head Offices, if open, this may be done later for 6d. late fee. Unregistered packets containing coin or better than the station is open, week due or station error or or or or feed, late fee. Unregistered packets containing stamps, uncrossed bearer cheques, uncrossed postal 3d, to other Irish places 4d. Unless marked "to be

orders without payee's name, &c., 10s. or more in value, or any marked "registered" and found in a letter-box, undergo compulsory registration (8d.), earrying no compensation.

COMPENSATION for loss or damage is granted COMPENSATION for loss or damage is granted, though not as a legal right even if fee is paid and packing adequate.—The fees for commission inclusive of registration are:—Fee 3.1., compensation up to £5: 4d., £90; and 1d. for each additional £20 up to the maximum 1s. 11d. for £400. Compensation up to £2 is given on (a) unregistered parcels (for loss, only of certificate of posting is obtained at the time of posting (b) unregistered parcels conveyed by posting), (b) unregulated packets conveyed by Express Delivery Service No. (2). Compensation in respect of money of any kind (coin, motes, orders, cheques, utamps, d.c.) is only given it particulars (for identification) are kept and the money is sent by Regis.-cred Letter Post in one of the special envelopes sold officially (see next page); the maximum compensation for coin is £5. Compensation for specialcry, vacloses, dec., is only given on registered packets; for glass, crockery, greases, colour-powders, fish, meat, fruit, and regetables only when sent as parette. Compensation is not given for damage to (1) eggs, soft fruit, liquids and semi-liquids or contribute that the semi-liquids of the contribute of the semi-liquids of the contribute of the semi-liquids of the semi-liquids of the semi-liquids of the semi-liquids of the semi-liquids of the semi-liquids of the semi-liquids of the semi-liquids of the semi-liquids of the semi-liquids of the semi-liquids of the semi-liquids of the semi-liquids of the semi-liquids of the semi-liquids of the semi-liquid of the semi-liquid of the semi-liquids of the semi-liquid of the semi-liquid of the semi-liquid of the semi-liquid of the semi-liquid of the semi-liquid of the semi-liquid of the semi-liquid of the semi-liquid of the semi-liquid of the semi-liquid of the semi-liquid of the semi-liquid of the semi-liquid of the semi-liquid of the semi-liquid of the semi-liquid of the semi-liquid of the semi-liquid of the semi-liquid of the semi-liquid of the semi-liquid of the semi-liquid of the semi-liquid of the semi-liquid of the semi-liquid of the semi-liquid of the semi-liquid of the semi-liquid of the semi-liquid of the semi-liquid of the semi-liquid of the semi-liquid of the semi-liquid of the semi-liquid of the semi-liquid of the semi-liquid of the semi-liquid of the semi-liquid of the semi-liquid of the semi-liquid of the semi-liquid of the semi-liquid of the semi-liquid of the semi-liquid of the semi-liquid of the semi-liquid of the semi-liquid of the semi-liquid of the semi-liquid of the semi-liquid of the semi-liquid of the semi-liquid of the semi-liquid of the semi-liquid of the semi-liquid of the semi-liquid of the semi-liquid of the semi-liquid of the semi-liquid of the semi-liquid of the semi-liquid of the semi-liquid of the semi-liquid of the semi-liquid of the semi-liquid of the semi-liquid of the semi-liquid of the semi-liquid of the semi-liquid of the semi-liquid of the semi-liquid of the semi-liquid of the semi-liquid exceptionally fragile articles, in any case; (a) fragile articles by registered letter poet, unless conspicuously marked "Fragile, with care."

CERTIFICATE OF POSTING unregistered parcels, free; other unregistered postal packets, 1/d.

EXPRESS DELIVERY SERVICE BY SPECIAL MES-SENGER.—There are five services of which (4) and (5) alone are available on Sundays:—(1) All the way, from most offices which deliver telegrams. Inclusive charge, which must be prepaid, in stamps, 6d. per mile, or part of a mile, with ld. on each separate packet after the first, up to ten, the maximum; also a special charge of 3d. on each packet over x lb. in weight, Packets must be handed over the counter with "Express" clearly marked in left-hand top corner. Live animals, liquids, and money may be delivered by this service, and persons may be conducted. The messenger may take back an inland telegram grate. (a) After transmission by post, at sender's request: (a) from the ordinary delivery office, if open for telegraph business (maxinum charge in London &d.); or if so marked, (b) "Express Delivery from Head Office" in large provincial towns, and (c) in London "from Head District Office" or "from G.P.O." Packets must be marked "Express," and letters hear a broad vertical line back and front. Charges as for (z) (without weight fee) in addition to postage. (3) Before ordinary deliveries, at addressee's request (6d. per mile for one packet, and 1d. for every ten or less additional packets). (4) see or every ten or less additional packets). (4) see p. 500. (5) of a message telephone do an express delivery office (30 words for each express fee, besides telephone charges).—Waiting fees: no minutes free; each additional 15 mnutes or part thereof, 2d.—For Sundays and Holidays,

called for." it is posted in the nearest letter-box at station of address, but (except on Sundays and an I.F. X), can be delivered Express (from unual office, or first Express office it reaches) under Service sa, or (by wiring for messenger to meet it at station) under Service x.

messenger to meet it at station) under Service L.

DISPORAL OF UNDELLYBRED POWAL PLANKETS—Inland
packets chargeable with a postage of 14d. or more
undelivered, are returned to sender without charge, it
without sender's address or any enclosure of importance
are destroyed, except parcels which, if not applied for,
are generally disposed of after 2 months, or if perish
able are dealt with as requisite. Packets chargeable
with postage not exceeding id are redelivered to sender
only on payment of a second postage, and if name,
address and request for return appear on outside, those
without such request are disposed of. British packets
middlivered abroad are returned to sender here on payment of charges due; printed papers only if return is
requested. Magazine Post packets are charged with
return postage. For parcels see p 585.

Poers Referants (solely for the accommodation of

return postage. For parcels see p 38s.

Posts Reynaws (solely for the accommodation of strangers and travellers and for three months only)—Any postal packet may be addressed as rubble of the packet may be addressed as rubble have the words. "Poste Restants" or "to be called for" in the address If addressed to initials, fictifious names, or Christian name only, it is treated as undelivered Applicants must furnish sufficient particulars to ensure delivery to the proper owner. Redirection from a Poste Restante is not undertaken for more than 14 days unless longer (up to 3 months) is applied for. Letters, parcels, &c. from abroad, or letters at a scaport for an expected sinp, are kept a months, others, avecks, after which they are treated as undelivered (see above), unless bearing a request for return at end of the interval, or some specified shorter period.

#### Letter Post (see p. 582).

Among prohibitions are offensive or dangerous things, certain kinds of advantagement, eggs, fish, game, meat, fruit, vegetables, and (to I.F.S., I. of Man, Channel Is) dutiable articles

#### Post Cards.

Postage (see p. 58s). The left-hand half of the robage (*** ). 503). The internant man of the address side may be used for correspondence [the same holds for abroad]. Plam cards (mnimum size 4 × 2½ in.), not thinner than official cards, may also be used both inland and abroad (maximum size 5 % × 41/8).

#### Printed Papers Post (see p 582).

For printed or written matter not in the

For printed or written matter not in the nature of a letter, and not exceeding 2 lb. By this post may be sent books and other works of a literary character with or without written dedications, and any other works or printed matter not being in the matter of a letter or, e.g., personal news, drawings, ishintings, photographic prints, engravings, maps, & together with their binding (provided that the materials are those ordinarily used for the purpose and are not brittle or very fragile, and with anything necessary for safe transmission. Commercial printed forms, legal documents, printers copy and proofs, examination papers, answers and corrections, the writing on which refers solely to the subject matter of the document. Christmas and picture cards with date, names and addresses of sender and addresses, and with convertional formulas not exceeding 5 words or initials, are also admitted. (For full conditions see the official Guide) Printed papers being subject to examination, is e, without breaking, tearing, inguinming, or cutting Newmaner Post (see D. 182).

#### Newspaper Post (see p. 58s).

For newspapers "registered at the G.P.O.". The cover, if any, must be open at both ends and easily removable, and copies should be folded so that title is readily inspected No writing or additional printing is permitted, other than the words "with compliments," mame and address of sender, request for return if undelivered and a reference to a page. News spaces not registered at the registered as the registered as the registered as the registered as the registered as the registered as the registered as the registered as the registered as the registered as the registered as the registered as the registered as the registered as the registered as the registered as the registered as the registered as the registered as the registered as the registered as the registered as the registered as the registered as the registered as the registered as the registered as the registered as the registered as the registered as the registered as the registered as the registered as the registered as the registered as the registered as the registered as the registered as the registered as the registered as the registered as the registered as the registered as the registered as the registered as the registered as the registered as the registered as the registered as the registered as the registered as the registered as the registered as the registered as the registered as the registered as the registered as the registered as the registered as the registered as the registered as the registered as the registered as the registered as the registered as the registered as the registered as the registered as the registered as the registered as the registered as the registered as the registered as the registered as the registered as the registered as the registered as the registered as the registered as the registered as the registered as the registered as the registered as the registered as the registered as the registered as the registered as the registered as the registered as the registered as the registered as the registered as the registered as the registered as the registered a

#### Parcel Post.

For bulky and heavy matter (see p. 582). The parcel should be marked "Parcel Post." and handed across the counter or given to a rural postman; and the postage must be prepaid by stamps, affixed by the sender (if underpaid, deficiency plus 1d fine is collected) from addressee). Parcels are neither accepted nor delivered on Sundays. The name and address of sender should be inside or (not too prominent) on the outside of every parcel.

prominent) on the outside of every parcel.

A rural postman must accept any inland packets he cus conveniently carry, but if on fost or cycle not more, without notice, than II in from one person.

Parcels to or from Irish Free State, Channel Is or I of Man are liable to customs duty, except in last case, the sender must declare contents when posting, and addressee must tay fees as for Parcels from Abroad (p. #89) if any duty be payable. Addressees in IFS pay 6d anyhow, on dutable parcels 8s or more, unless sender arranges (fee &d.) to pay duty.

Cash on Delivery Service (not to or from I.F.S.). Cash on Delivery Service (not to or from I.F.S.). A sum (Trade Charge) up to £00 can, under certain conditions be collected from addressee and remitted to sender of a paurel or registered letter posted at a Money Order Othee, or a parcel consigned by rullway. Fees extir to usual postal or rull charges. For Trade Charge up to 18s, \$d. up to £1. \$d. £2. \$d. £5. \$1.0d., and for each further £5 or less, \$d. by rull, \$d. more Literature for the Bluid.

Papers, periodicals and books, if printed in special type and subject to certain conditions of postage marked outside "Bluid Literature," with name and address of sender; £1 b. \$d. \$6 1b. maximum, 1½d. Maximum size, \$2 × 1 × 1 ft. or if a roll 30×4 in.

STAMPS, ENVELOPES, POST CARDS, &c. POSTAGE STAMPS (used also for receipts, tele-grams, and certain Inland Revenue duties up to grams, and certain Inland Revenue duties up to 2x, 6d' -for list of latter are Index) are sold of the respective values of  $\frac{1}{2}d$ , 1d,  $1\frac{1}{2}d$ , 2d,  $2\frac{1}{2}d$ , 3d, 4d, 5d, 6d, 9d, 10d, 1x, 2x 6d, 5x, and 10x Books of 6 1d, and 6  $\frac{1}{2}d$ , stamps, and 10x Books of 6 1d, at stamps, 3x, or (b) so  $1\frac{1}{2}d$  stamps, 2x Rolls of 480 or 960  $\frac{1}{2}d$ , 1d, 11/2d and 2d stamps are also sold, found leugthwise or sideways. Stamps may be purchased at most offices between 9 a m. and 7 p.m., and at any office open for telegraph hydross. and at any office open for telegraph business. must be sent to CANADA by direct packet, and thence (or direct) to NEWFOUNDLAND, he packed without a cover, or with cover open at both ends, and otherwise comply with conditions for Inland

Newspaper Post (see p. 953). Rate: s-6 oz. 1d.; s/2 lb., 1/2d.; and 1/2d. per 1/2 lb. up to 5 lb., 5d. (c) Commercial Papers: Legal and mercarthe documents, MSS., invoices, &c., partly settlen, 1/2d. per soz., minimum charge of 2/2d. 1/2d. Samples, Patterns (bond fide), and scientific Specimens, one key, fresh-cut flowers, &c., 1/2d. Der soz.: minimum charge. 1/2d.

&c., ½d. per s oz.; minimum charge, 1d (e) SMALL PACKETS, for small articles of merchandise to many countries: 11/d. per a oz,

minimum 6d

Except that a single printed volume may weigh up to 6½ lb., the limits are: (i) to the British Empire, Tanglers, and Foreign countries not in 18 x 18 x 28 m., (d) 18 x 8 x 4 in.; weight. (a) and (c) 4 lb., (d) 1 lb. (iv) (e) to all places, 18 x 8 x 4 in., a lb. If in the form of a roll, the limits of size for (d) are  $18 \times 6$  in. diameter in case (iii), for (a) and (c) 30 × 4 in., (e) 18 × 6 in. everywhere. Wholly unpaid packets are stopped. Regulations as to packing, writing, &c., are much similar to those for inland packets. Small Packets must be easily examinable.

#### Parcels from abroad.

These are subject to British Customs examination, and duties (with 6d. fee, or 1s. if they exceed 10s.) must be paid before delivery.

#### Parcels sent abroad.

Enquiries should always be made at a P.O., or the P.O. Guide consulted, before packing. Parcels can be (and if containing coin, jewellery, &c., must be) insured for many countries, but not registered. They are subject to Customs, and contents and value must be declared on and contents and value must be declared on special forms; undervaluation or other inaccuracy may lead to confiscation and heavy fines (especially U.S.A.). (Rebate of Customs is given to British goods in parts of the Empire) The Customs charges of Dominious and certain countries (not U.S.A.) can be prepaid by sender, on depositing generally one-fifth to one-half of declared value, otherwise they are collected from addressee. Packing must be substantial, and sometimes special kinds of packing are insisted upon. Certain articles are prohibited; among them letters nearly everywhere.

Delivery in many countries is only to certain towns, post offices, stations, or customs houses, whence addressee, who is notified of the arrival, must arrange conveyance. A delivery fee is sometimes collected from addressee (is cents in U S.A.). In Belgium, France and Spain parcels are mostly delivered by the railway companies. From most countries abroad, an undetuerable parcel as returned without notice at sender's expense, when postray, he instructed either its abundonment or its delivery to some other address or person in the country. Warshouing fees and fravely the foreign customs duty are sometimes payable, the return postage alwars.

always.
Limits.—22 lb.; parcels over 11 lb are only accepted at and for important post offices, for certain countries (c, fin table below), cannot be delivered Express, and generally may not contain coin, jewellery, &c. Maximum length generally \$\frac{3}{2}\text{ ft.}, length and girth of ft. but to Portuguese Timor: length \$\frac{2}{2}\text{ ft.} length and girth \$\frac{4}{2}\text{ ft.} length and girth \$\frac{4}{2}\text{ ft.} length and girth \$\frac{4}{2}\text{ ft.} length and girth \$\frac{4}{2}\text{ ft.} length and girth \$\frac{4}{2}\text{ ft.} length and girth \$\frac{4}{2}\text{ ft.} length and girth \$\frac{4}{2}\text{ ft.} length and girth \$\frac{4}{2}\text{ ft.} length and girth \$\frac{4}{2}\text{ ft.} length and girth \$\frac{4}{2}\text{ ft.} length and girth \$\frac{4}{2}\text{ ft.} length and girth \$\frac{4}{2}\text{ ft.} length and girth \$\frac{4}{2}\text{ ft.} length and girth \$\frac{4}{2}\text{ ft.} length and girth \$\frac{4}{2}\text{ ft.} length and girth \$\frac{4}{2}\text{ ft.} length and girth \$\frac{4}{2}\text{ ft.} length and girth \$\frac{4}{2}\text{ ft.} length and girth \$\frac{4}{2}\text{ ft.} length and girth \$\frac{4}{2}\text{ ft.} length and girth \$\frac{4}{2}\text{ ft.} length and girth \$\frac{4}{2}\text{ ft.} length and girth \$\frac{4}{2}\text{ ft.} length and girth \$\frac{4}{2}\text{ ft.} length and girth \$\frac{4}{2}\text{ ft.} length and girth \$\frac{4}{2}\text{ ft.} length and girth \$\frac{4}{2}\text{ ft.} length and girth \$\frac{4}{2}\text{ ft.} length and girth \$\frac{4}{2}\text{ ft.} length and girth \$\frac{4}{2}\text{ ft.} length and girth \$\frac{4}{2}\text{ ft.} length and girth \$\frac{4}{2}\text{ ft.} length and girth \$\frac{4}{2}\text{ ft.} length and girth \$\frac{4}{2}\text{ ft.} length and girth \$\frac{4}{2}\text{ ft.} length and girth \$\frac{4}{2}\text{ ft.} length and girth \$\frac{4}{2}\text{ ft.} length and girth \$\frac{4}{2}\text{ ft.} length and girth \$\frac{4}{2}\text{ ft.} length and girth \$\frac{4}{2}\text{ ft.} length and girth \$\frac{4}{2}\text{ ft.} length and girt

carrier, in S. e. E. Engann. Fee 2s. resister source and usual express fees (calculated in London as from G.P.O.—6d. to 5s. 69.).

Evrisos of the S. p. 389 is on Stunday restricted to the London S. Price S. p. 389 is on Stunday restricted to the London Police, London. E. C. I. early on Stunday morning will be telephoned to a telephone substriker in the London Telephone Ares if the envelope be marked conspicuously. For Sunday telephone delivery, with a broad perpendicular line back and front, usual postage being prepaid on the envelope, and 3d. per 30 words or less by stamps affixed to the enclosed message. CHRISTMAS DAY AND GOOD FRIDAY—In London One morning delivery of letters, parcels, &c. on Christmas Day; none on Good Friday (except Express Service 8 chovel). Offices usually open as on Sundays, in some cases for shorter hours. Ontside London. In Scotland business is as on week-days. In Eighnid and N. Ireland there is one delivery of letters may parcels, to a ceceptance of parcels. Offices dealy in Eighnid and N. Ireland there is one delivery of letters unique to the control of letters and parcels. Offices one as Sundays.

BANK HOLIDAYS—London. One morning delivery of letters and parcels, control to business to the control of letters, evening trends to business (but not ordinary Money Order, Savings, Inferior, Pensions). Ontaide London's In Scotland, business is generally as usual in England and Ireland only one letter and parcel delivery, and generally one despatch carly in rural districts. Smaller offices are closed, the more important open in morning, some also in evening, for parcels, express, &c., and (norming only) postal orders. PUBLIO HOLIDAYS in Scotland: Telegraph moetly by Ballering and provide letters and parcel delivery and generally one despatch and the provides are closed, the more important open in morning, some also in evening, for parcels, express, &c., and (norming only) postal orders. Public HOLIDAYS in Scotland: Telegraph moetly Telegraph offices bearly all open who has an anagementally at the same hours, if any, as on Sunday evenings. PUBLIC HOLIDAYS in Scotland: Telegraph mostly as usual, other business as English Bank Holidays. On delivery only on Local Holidays. On New Year's Day one delivery of letters and parcels, no parcel, M.O., P.O., &c., business, hours as on Sundays.

Wireless Telegraphy.

Post Ofice as Licensing Authority - By the Wireless Telegraphy Acts, rogs-46, it was made illegal to install or work wireless telegraphy in the United Kingdom or on board British ships the other Angulan or of Makar Steins single in territorial waters except with the Postmaster General's licence. By the Wireless Telegraphy Order 1908, the provisions of the Wireless Telegraphy Act 1904 apply to British Ships whilst on the high seas. The Merchant Shipping (Wireless Telegraphy) Act, 1919, made it compulsory for all British sea-going ships over 1,600 tons to carry wireless apparatus. The Post tons to carry wireless apparatus. The Post Office conducts the inspection of such apparatus under the Acts, and also the examination of Wireless Operators for the Postmaster General's Certificate

Ship and Shore Service .- The ship and shore stations of the Marconi Company and Lloyds, to in number, were bought by the Postmaster General in 1900. The service has since been reorganised and now comprises 13 stations, viz.—Cullercoats, Fishguard, Humber, Land's End, Malin Head, Niton, North Foreland, Portishead, Portpatrick. Rugby, Seaforth, Valentia and Wick. Portishead Radio affords (a) world-wide communication with ships equipped with shortwave sending and receiving apparatus, and (b) communication up to a range of about 2,000 niles with ships equipped with long continuous wave-sending and receiving apparatus. Rugby Radio can transmit radiotelegrams to ships

equipped with long-wave receiving apparatus. The range is world-wide, but ships are not in a position to reply to this station. A public tele-phone service between certain Transatiantic Liners and telephone subscribers in Great Britain and certain Continental countries is also afforded through Rugby Radio.

Anglo-Continental Wireless Services. — Post Office wireless services have been instituted side by side with the cable services to the following Continental countries:—Italy, Poland, Estonia, Hungary, Czechoslovakia, the Free State of Danzig, Rumania, Latvia, Finland and Russia. The services with Italy, Hungary, Rumania, Estonia, and Danzig are carried on vid the Leafield Station (near Oxford). The latter station is also used for the transmission of news and commercial intelligence intended for simultaneous reception in several European countries. A medium-power transmitter at the Rugby Station is also used for the services to Czechoslovakia and Poland

Super-power Transmitter at the Rugby Station. This transmitter uses power of 1,000 kilowatts and is capable of communication with any part of the globe. It is used for the broadcasting of British Official news messages, Meteorological Office, reports and Greenwich Time Signals, and for transmitting radio telegrams and news mes-

sages to ships at sea.

Beam and Omni-Directional Wireless Stations -The privately-owned wireless stations in this country at present carrying on commercial services with other countries are owned and operated by Imperial and International Communications Limited. They consist of the Marcon Short Wave Wireless Beam stations at Bodm'u, Bridgwater, Gimsoy, Skegness, Dorchester and Somerton, the high-powered omnidirectional station at Carnarvon, and the medium-power omur-directional stations at Ongar and Brentwood in Essex. The Bodmin and Bridgwater and the Grimsby and Skegness Beam stations consist of two groups of two units each, one unit of each group being a transmitting station and the other unit a receiving station. The Bodmin transmitting station and Bridgwater receiving station carry ont direct high-speed wireless communication with Canada and South Africa. The Grimshy transmitting station and Skegness receiving station carry out similar communication with Australia and India. The Dorchester Beam transmitting station consists of seven Marconi short-wave Beam transmitters, and is the largest beam wireless station in the world. The Somerton station is the receiving station of this shortwave Beam group, and has eight receivers employed on the same services

All these wireless stations are operated and controlled directly from Electra House, London, the central radio office of Imperial and International Communications Limited.

* Radiotelegrams

The Address of a radiotelegram should contain name of addressee, of ship, and of coast-station to be used. Private messages for H M Navy may not be sent through Pottshead or Kingby radio, and must have in the aduress "Warship," followed by the name of the vessel, or "Submarine" (which with identifying letters and figure counts an address as one would Naxt must come figure to the control of the property of the state of the latest property of the state of the latest property of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the s

"Radrotelegram," as used in the official Postal Guide, denotes only a message to or from a ship at sea, and includes no other kind of radiotelegraphic message.

⁽c) Including £1,921,000 converted into other securities

or re-invested
(f) Including spare wire,

The Air Port of London (Croydon Aerodrome, Waddon—Tel., Croydon, 2720), extended under the Air Ministry's improvement scheme, was opened on May s. 1928. The cost of the station was about £350,000, and the buildings include hangars, offices and a hotel with 50 bedrooms. Airway traffic is controlled from a tower by a Civil Aviation Traffic Officer. Some of the

biplanes in the services operating from Croyden carry 40 passengers and about x, soo ib. of luggago, and are fitted with refreshment buffets. All expresses are subjected to a complete routine inspection before being granted their daily airworthy certificates by inspectors licensed by the Aeronautical Inspection Department of the Air Ministry.

Services Operated by Imperial Airways.

#### AIR MATLS.

AIR MAIL SERVICES. Details of services, time saved, and fees payable are embodied in the official Air Mail Leaflet which can be obtained free of charge through any Post Office.

At the Imperial Conference of Oct., 1926, the Secretary for Air, Sir Samuel Hoare, laid down

two broad propositions:—
(z) That the Empire is in urgent need of better communications.

(a) That their improvement will require a sustained and united effort.

By seroplane or airabip London could be brought within a fortnight of the farthest cities and territories of the Empire. Journeys could be reduced to the following periods :-

'Canada	Days
India	• <del>•</del> /2
Cape Town	. 6
Australia	II
New Zealand	13

In April, 1929, a stage of development in the air journey between London and India was marked by the introduction of large passenger aeroplanes for the London—Parls—Marseilles section, transhipping into air boats for the passage over the Mediterranean, and so from Cairo — Baghdad — Basra to Karachi During winter months the route is overland as far as Athens.

#### SHIPBUILDING, 1930-31.

THE total of new tonnage to which classes have been assigned by Lloyd's Register during the twelve months ended June 30, 1931, amounts to 537 vessels, of 1,758.610 tons gross, while the corresponding figures for the year ended June 30, 1930, were 637 vessels, of 2,60,7816 tons gross. Plans for 240 vessels, of 2,61,250 tons, were passed by the Society in the course of the year. These figures are very much smaller than those for the previous twelve months (60x vessels, of 2,62,516 tous) and are the lowest recorded since 1922. Of this projected tonnage, 40'2x per cent. (226,500 tous) and are the lowest recorded since 1922. Of this projected tonnage, 40'2x per cent. (226,500 tous) in other countries. The countries in which the greater part of the new tonnage classed by Lloyd's Reguster, during the year, has been constructed are shown in the following statement:—

Country.	No of Vessels	Tons Gross
Great Britam and Ireland Japan Germany Netherlands Denmark U.S.A	15 19 31 16 35 15 16	1,033,56a 138,361 115,359 105,680 88,081 78,164 77,028 37,838 24,338 18,425 16,469

The LARGEST VESSELS UNDER CONSTRUCTION and to class with Lloyd's Register, at June, 1933, were the new Cunarder, of 73,000 tons, at Clydebank, Scotland'; Rex, 50,000 tons, at Genoa, Italy; Conte dt Savoia, 45,000 tons, at Trieste, Italy. All are being fitted with quadruple screw geared turbine machinery.

The countries for which the majority of the vessels were built are:—

#### Mercantile Shipping.

On June 30, 1930, the sea-going Mercantile Marine of Great Britain and Ireland had a total tonnage of 20,438,444 gross tons, of which 20,321,020 tons were steamers and motor ships, and 216,524 sailing vessels

Census of Seamen (March 31, 1930).—Total number of seamen employed, 194,633, as under:

Sea trading Vessels,	British	Foreign	Lascars
Steam	12.165	13,479 950 4	48,775 3,997 0
Total	127,518	14,433	52,682

The British Fishing Flest.—On Dec 31, 1929, the fishing boats belonging to the United Kingdom, Isle of Man and Channel Islands numbered 14,555 (273,762 net tous) of which 6,283 were salling vessels (26,412 net tous) and 8,272 steam and motor vessels (247,350 net tous). The estimated number of men and boys em-

ployed in sea fishing in 1929 was 60,034, of whom 53,357 were regular fishermen and 6,677 persons occasionally employed in sea fishing.

Wrecks (World),—The total losses of the World's Mercantile Marine in 1930 are stated to be 392 vessels with a gross tonnage of 425,413 as against 499 vessels (604,703 gross tons) in 1929, these losses (1930) include 246 steamers (339,405 gross tons), 14 motor vessels (38,199 gross tons), 37 auxiliary vessels (7,886 gross tons) and 95 sailing vessels (39,923 gross tons).

(British).—In 1929.38 sailing vessels (2,460 gross tons) and roo steam and motor vessels (x13,623 gross tons), a total of 147 vessels (x16,083 gross tous), were totally lost at sea. In x929 the following lives were lost through wrecks at seafrom sailing vessels, crew 4, passenger ml; from steam and motor vessels, crew 127, passengers ml
—a total of 131 The years with the heaviest losses of life at sea were 1912 and 1914. In 1912 the total of a,325 included 673 of the crew and 825 passengers on S.S. Tritanic; in 1914 the total of 1,798 included 171 of the crew and 840 passengers on S.S. Empress of Ireland.

#### THE KINGDOM OF ENGLAND.

occupies the southern portion of the island of Great Britain and lies between 55° 46' and ureat Britain and lies between 55° 46' and 45° 57' 30" N. latitude (from the mouth of the Tweed to the Lizard), and between 1° 45' E. and 5° 44' W. (from Lizard). 5° 43' W. (from Lowestoft to Land's End). England is bounded on the north by the summit of the Cheviot Hills, which form a natural boundary with the Kingdom of Scotland; on the south by the English Channel; on the east by the Straits of Dover (Pas de Calais) and the North Sea; and on the west by the Atlantic Ocean (which washes the Cormsh coast), Wales and the Irish Sea. Total area, 50,851 square miles. Population (1931) 37,354,927.

Relief.—There is a natural orographic division

into the hilly districts of the north, west and south-west, and the undulating downs and lowlying plains of the east and south-east. In the extreme north the Cheviot Hills run from east to west, culminating in the Cheviot, 2,676 feet above mean sea level. Divided from the Cheviots by mean sea level. Divided from the Cheviots by the Tyne Gap is the Pennine Chain, running N. by W. to S by E., with their highest point in Cross Fell, 2,33 feet above mean sea level West of the Pennines are the Cumbrian Moun-West of the Fennines are the Cumbrian Monnians, which contain in Sonfell Pike (3, 2no feet) the highest land in Englaud, and east of the Fennines are the Yorkshire Moors, their highest point being Urra Mooi (1,489 feet). South of the Fennines are the Peak of Derbyshire (2,688 feet) and Dartmoor (High Willhays, 2,039 feet). In the western county of Shropshire are the isolated Wrekin (1,328 feet), long Mynd (1,674 feet), and Brown Clee (1,805 feet); in Herefordshire the Black Mountain (2, 20 feet) in Wor.

shire the Black Mountain (a.330 feet) in Hereiord-shire the Black Mountain (a.330 feet) in Wor-cestershire the Malvern Hills (r.335 feet), in Mommouthshire the Sugar Loaf (r.355 feet) and Cotty (r.305 feet), and the Cotswold Hills of Gloucestershire contain Cleave Cloud (r.134 feet). Hydrography.-The Thames is the longest and most important river of England, with a total length of are miles from its source in the Cotswold Hills to its outflow into the North Sea, and is navigable by ocean-going steamers to London Bridge. The Thames is tidal to Teddington (so miles from its mouth); the Wilts and Berks canal enters at Abingdon, and the Kennet and Avon canal at Reading. The principal tributaries are the Cherwell, Lee, Kennet, Wey, Mole and Medway. The Thames forms county boundaries almost throughout its course, and on its banks are situated the capital of the British Empire; Windsor Castle, the home of the Sovereign; Eton College, the first of the public schools; and Oxford, the oldest university in the kingdom. The Senera is the longest river in Great Britain, rising in the north-eastern slopes of Plinlimmon (Wales) and entering England in Shropshire, with a total length of 220 miles from its source to its outflow into the Bristol Channel, where it receives on the left the Bristol Avon, and on the right the Wye, its other tributaries being the Vynwy, Tern, Stour, Teme and Upper (or War-wickshire) Avon. The Severn is tidal below Gloucester, and a high bore or tidal wave sometimes reverses the flow as high as Tewkesbury times reverse the how as high as revasionly (13½ miles above Gloucester). The scenery of the greater part of the river is very picturesque and beautiful, and the Severn is a noted salmon river, some of its tributaries being famous for trout. Navigation is assisted by the Gloucester and Berkeley Ship Canal (26% miles), which

Position and Extent.—The Kingdom of England | admits vessels of 350 tons to Gloucester, other couples the southern portion of the island of canals connecting with the Thames, Trent, Dee treat Britain and lies between 55° 4° and all Mersey. The Severn Transa, which carries canals connecting with the Thames, Trent, Dec and Mersey. The Senern Tunnel, which carries the Great Western Railway under the river, 14 miles below the Sharpness Bridge, was begun in 1873 and completed in 1886 (at a cost of £5,000,000) after many difficulties from flooding, &c. The tunnel is 4 miles fax yards in length (of which 1/2 miles are under the river). Of the remaining English rivers those flowing into the North Sea are the Tyne, Wear, Tees, Ouse and Trent from the Pennine Range, the Great Ouse (160 miles) from the Central Plain, and the Orwell and Stour from the hills of East Anglis. Flowing into the English Channel are the Sussex Flowing into the English Channel are the Sussex Flowing into the English Chamiter are the cuse classes.

Ouse from the Weald, the Itchen from the Wiltshire and Hampshire Hills, and the Axe, Teign,
Dart, Tamar and Exe from the Devonian Hills;
and flowing into the Irish Sea are the Mersey,
Ribble and Eden from the western slopes of the Pennines and the Derwent from the Cumbrian Mountains. The English Lakes are noteworthy rather from their picturesque scenery and poetic associations than from their size. These lie mainly in Cumberland, but partly in Westmorland and Lancashire, the largest being Winder-mere (no miles long). Ullswater and Derwentwater.

Islands.—The Scilly Islands (Cornwall), as miles from Land's End, consist of about 40 islands, with a total area of about 4,000 acres, only St. Mary's, Tresco, St. Martin's, St. Agnes and Bryher being inhabited, population (1931), 1,732. The capital is flugh Town, in St. Mary's, The capital is flugh Town, in St. Mary's. The cluster is unusually mild, and vegetation luxuriant, semi-tropical plants flourishing in the open. The Isle of Wight is separated from Hampshure by the Solent. The total area is 428. open. The Isle of Wight is separated from Hampshire by the Solent. The total area is  $z_4 z_5$  sq. miles, population (1931), 88.400. The climate is mild and healthy, and many watering places have grown up during the last century. Capital, Newport, at the head of the estuary of the Medina, Cowes (at the mouth) being the chief port; other centres are Ryde, Sandown, Shanklin, Ventnor, Freshwater, Yarmouth, Totland Bay, Seaview and Bembridge. Lundy Island, ix miles N.W. of Hartland Point, Devon, is about  $z_2$  miles long, and x mile broad, with a total area of about 1,050 acres (mainly picturesque), and a population of about 50: it contains the seat of the proprietor of the island and two lighthouses. and two lighthouses.

Climate.—The south-westerly winds from the Atlantic Ocean penetrate to the heart of the country, affecting the temperature of the greater part of the kingdom, and only the coastal regions of the east have a modified continental climate. The mean annual temperature is about so Fahrenheit, varying from so in the Scilly Islands to 48° at the mouth of the Tweed, and generally the west of England is mild and wet in winter and cool and less wet in summer, while the east is cool and dry in winter and spring and hot and less dry in summer and autumn, the wettest region being the Lake district of Cumberland and the driest in the Thames estuary and the Lincolnshire Wash. The climate of England is influenced by the much-indented coastline of the west and by the flow of warm water in the Gulf Stream Drift, which strikes the S.W. projection and proceeds N. and E. along the west and south coasts. EARLY INHABITANTS.

Prehistoric Man.—A skeleton found at Galley Hill, near Northfleet, Kent (in 1895,) has been ascribed to a man of Central Asian race of the Early Stone Age, and stone implements of the remote Eolithic, Palæolithic and Neolithic periods are abundantly found throughout England. The Neolithic period is held to have merged into the Bronze Age about 2000 to 1500 R.C., and a date between these years has been given to Stonehenge (presented by Sir C. H. E. Chulb to the Nation in 1908, and now preserved as a national moniment). Stonehenge (ro miles N. of Salisbury, Wiltshire) consists of two circles of menhirs (the largest monolith being 22½ feet in height), only 16 remaining in position in the outer circle, while two of the five triple sets are still in position in the inner circle. The use for which the temple or monument was erected is the subject of many conjectures.

The Celtic Invasion.—In the latter part of the Bronze Age the Goldels, a people of Celtic race, and in the Iron Age another Celtic race of Brythons, invaded the country and brought with them Celtic civilization and dialects, place names in England bearing witness to the spread of the invasion over the whole kingdom.

The Roman Conquest .- Julius Casar raided Britain in 55 B.C. and 54 B.C., and in 43 A.D. the conquest of the country was undertaken by the Roman Emperor Claudius, who sent Anlus Plautins with a well-equipped army of 40,000 men, and himself visited Colchester (Camulodunum) and Londinium. The British leader from 48-51 A.D. was Caractacus (strictly Caratacus), who was finally captured and sent to Rome. By 70 A 1) the conquest of South Britain was completed, a great revolt under *Boadicea* (strictly Boudicea), Queen of the Iceni (Norfolk), being crushed in 6x A D In 122 A.D. the Emperor Hadrian visited Britain and built a continuous rampart, known as *Hadrian's Wall*, from Wallsend to Bowness (Tyne to Solway), remains of which are still traceable. The Romans administered Britain as a Province under a Governor, with a well defined system of local government, each Roman municipality ruling itself and the surrounding territory. Colchester, Lincoln, York, Gloucester and St Albans stand on the sites of five Roman municipalities, while London was the centre of the road system and the seat of the financial officials of the Province of Britain. A well preserved Roman town of about 100 acres was first nucovered in the 18th century at Silchester (Calleva Atrebatum), so miles south of Beading, and since risco the whole site has been investigated. Four main groups of roads radiated from London, and a fifth (the Fosse) ran obliquely from Ermine Street (at Lincoln), through Leicester, Circu-cester and Bath to Exeter. Of the four groups radiating from London one ran S. E. to Canterbury and the coast of Kent, a second to Silchester and thence to parts of Western Britain and South Wales, a third (now known as Watting South water, a chird (now known as waters) Street; ran through Verulamium (St. Albans) to Chester, with various branches, and the fourth reached Colchester, Lincoln, York and the eastern counties. Christianity reached the Roman Province of Britain from Gaul in the Roman Province of Britain from usur in the grid century (or possibly earlier), the Bishops of Londinium, Eboracum (York), and Lindum (Lincoln) attending the Council of Arles in 314. The Roman garrison of Britain was much harassed in the 4th century by Saxon pirates, who invaded the eastern counties from the Wash

to Spithead, while about 330 A.D. incursions in the north of Irish (Scoti) and Piets became most formidable, and towards the end of the entury many troops were removed from Brit...in for service in other parts of the Roman Empire. Early in the 5th century Gaul was taken from the Romans by Teutonic invaders, and Britain was cut off from Rome; officials were no longer sent to the island, the garrison was left to defend itself, and appears to have been driven inland by the Northern and Saxon invaders, and to have been conquered and absorbed by the Celtic inhabitants whose language and cutous re-amounted

tants, whose language and customs re-emerged.

Anglo-Saxons and Normans. — The Celtic Britons appear to have called in the Saxons to resist the raids of the Picts and Scots, and eventually the English (Angles, Saxons and Jutes) drove the Britons into the mountain fastnesses of the West (Strathelyde, Wales and Cornwall), the name of Welch (old English Waelsse = Foreign) being given to the islanders by the invaders from the continent. The area thus conquered was divided into several kingdoms, of which the chief were Northumbris (Bermcia and Deira), Mercia (Middle Angles), and Wessex. The heathen Angli (whose gods Ti, Woden, Thunor and Frigg are commemorated in "Tuesday, Wednesday, Thursday and Frinday") were converted to Christianity by a mission under Augustine (dispatched by Pope Gregory as 597), which established Archbishoprics at Canteibury and York, and the whole of England appears to have been converted by the end of by the invaders from the continent. The area appears to have been converted by the end of the 7th century. In the 8th century Offa, King of Mercia, is stated to have built a wall and rampart, afterwards known as Offa's Dike, from the month of the Dee to that of the Wye, as a protection against the Welsh. The greatest The greatest of the English kingdoms was Wessex, with its capital at Winchester, and the greatest of the Wessex kings was Alfred the Great (871-901), who resisted the incursions of the Northmen (Danes) and fixed a limit to their advance by the Treaty of Wedmore (878). In the 10th centhe Treaty of Wedmore (878). In the noth centrry the Kings of Wessex recovered the whole of England from the Danes, but subsequent rulers were mable to result the invaders, and England paid tribute (Danegelt) for many years, and was ruled by Danish Kings from 1016 to 1048, when Edward the Confessor was recalled from exile. In 1066 Harold (brother-m-law of Edward and 1016 of Earl (Solwin of Wessex) was closen and son of Earl Godwin of Wessex) was chosen King of England, but after defeating a Northumbrian revolt under his brother Tostig (aided by an invading army of Harold Hadraada of Norway) at Stamford Bridge in Yorkshire (Sept. 25), he was himself defeated at the Battle of Hastings (or Sautlache) on Oct. 14, 1066, and the Norman Conquest secured the throne of England for Duke William of Normandy. Since the Norman Conquest all attempts to invade England have been defeated.

#### ENGLISH COUNTIES.

For Administrative purposes England is divided into 49 Administrative Countes (under the Local Government Act of 1888). The boundaries of these Administrative Counties differ in many cases from those of the older Geographical Countes, while the areas of the ya County Boroughs created under the Act of 1883 are excluded from the County Areas, and the population of the Boroughs is separately enumerated. The area, population and chief officers of the Administrative Counties are shown overleaf.

LONDON, the capital of England and of the British Empire, and the greatest city in the world, is situated on both banks of the River Thames, so miles from its outflow into the North

The City of London represents London within its ancient boundaries. The City is the financial and business centre of London, and includes the head offices of the principal banks, insurance companies, and mercantile houses, in addition to buildings ranging from the historic interest of the Roman Wall, the Norman Tower and the state caury Guildhall, to the messive splendour of 8t. Paul's, and the architectural beauty of Ween's audies (Dec. Chamis Wren's spires (Bow Church, St. Bride's, St. Dunstan's in the East, &c.).

The City of Westminster, which is bounded by the City of London on the east, by Chelsea and Kensington on the west, by Paddington, St. Marylebone and Holborn on the north, and by the Thames and Chelsea on the south, was formed into a borough by the London Government Act of 1899, and was created a city by Royal Charter of Oct. 19, 1900, the Council con-sisting of a Mayor, 10 Aldermen and 60 Coun-cillors. Extending from the eastern end of the Strand to Kensington Gardens, and from Oxfordstreet to the Thames, it includes within its boundaries a large number of the finest buildings in London. The Abbey and the Roman Catholic Cathedral, the Houses of Parliament and the Law Courts, Buckingham Palace and St. James's, and the principal Government offices, Cluis and Early Throughout an area of 1,797 sq. miles. Theatres are situated in Westminster, which Locomotion is provided by the London County also includes the fashionable residential districts of Mayfair and Heigravia. Westminster is the private enterprise as to underground or other richest of the London areas.

Metropolitan Boroughs.-Under the London Government Act of 1899 the administrative functions of the various vestries in the Metropolitan districts surrounding the City of London were transferred to as Metropolitan Boroughs, of which one became afterwards the City of Westminster. The area covered by these boroughs extends northwards to include Stoke Newington, southwards to Wandsworth and Lewisham, eastwards to Woolwich, and westwards to Hammersmith.

London County Council -For County purposes the aftairs of London are administered by the London County Council, which was created by the Local Government Act of 1888.

Muscellaneous Authorities. - For Police purposes the administration is invested in the poses the administration is invested in the City Corporation as to the City Police and in the Home Office as to the Metropolitan Police. The authority for the supply of water is the Metropolitan Water Board; while the River Thames is administered as to its tidal portion by the Part of London Authority and above Thanks is a summing the part of London Authority and above Teddington by the Thames Conservancy, the lighthouse and pilotage authority being Trinity The bridges are maintained in the City House. of London by the Bridge House Estates Committee of the Corporation of the City, and in the remaining area by the London County Council. The London and Home Counties Joint Electricity Juthority (5 Millbank, Westmaster, S.W. z) provides (or secures the provision of) railways, &c.

LONDON was famed for its vast conflux of traders and its abundant commerce even in the first century of the Christian era. From the Romans, it is said, it received municipal institutions which have endured in their main features to the present day. In Saxon times it was, in reality, a small independent State, and its burgesses maintained their independence even after the Battle of Hastings. William the Norman only gained possession of their city by means of a treaty with them, and about eight means of a treaty with ment, and about eight years after he granted a charter, which is still preserved. It is addressed to William the Bishop, Godfrey the Portreeve, and all the Burgesses, and promises that they shall be "law worthy" (i.e., possessed of privileges) as they were in the days of Edward the Confessor. The Portreeve, however, received the Norman title of Balliff, which, in 1191, was changed to Mayor, the first holder under the new name being Henry the first holder under the new name being Henry Fitzalwyn, who filled the office for a years. On his death a new charter was granted by King John in 1814, which directed the Mayor to be chosen annually, which has ever since been done; though in early times the same individual often held the office more than once. A familiar instance is that of "Whittington, thrice Lord Mayor of London" (in reality four times A D. mayor of London (in realty four times A 1397, 1398, 1496, 1410); and many modern cases have occurred. The title of Lord Mayor was not in general use in the outer world until about 1445. The Lord Mayor is elected at Michaelmas; he is sworn into office on November 8, and on the dilugation and was a second of the Lord Chief. the following day presented to the Lord Chief Justice at the Royal Courts of Justice, to take the final declaration of office—the pageant being popularly known as the Lord Mayor's Show.

THE CORPORATION OF THE CITY OF LONDON.

was famed for its vast conflux of its abundant commerce even in the of the Christian era. From the is said, it received municipal institutions and the confluence of the confluence of the confluence of the confluence of the confluence of the confluence of the confluence of the confluence of the confluence of the confluence of the confluence of the confluence of the confluence of the confluence of the confluence of the confluence of the confluence of the confluence of the confluence of the confluence of the confluence of the confluence of the confluence of the confluence of the confluence of the confluence of the confluence of the confluence of the confluence of the confluence of the confluence of the confluence of the confluence of the confluence of the confluence of the confluence of the confluence of the confluence of the confluence of the confluence of the confluence of the confluence of the confluence of the confluence of the confluence of the confluence of the confluence of the confluence of the confluence of the confluence of the confluence of the confluence of the confluence of the confluence of the confluence of the confluence of the confluence of the confluence of the confluence of the confluence of the confluence of the confluence of the confluence of the confluence of the confluence of the confluence of the confluence of the confluence of the confluence of the confluence of the confluence of the confluence of the confluence of the confluence of the confluence of the confluence of the confluence of the confluence of the confluence of the confluence of the confluence of the confluence of the confluence of the confluence of the confluence of the confluence of the confluence of the confluence of the confluence of the confluence of the confluence of the confluence of the confluence of the confluence of the confluence of the confluence of the confluence of the confluence of the confluence of the confluence of the confluence of the confluence of the confluence of the c The Common Council, elected annually on St. Thomas's Day (Dec. 21), was, at an early date, substituted for a popular assembly called the Folkmote. At first only two representatives were sent from each ward, but the number has since been greatly increased, some wards having as many as 16 members, and none less than four, Sheriffe (as well as aldermen) were Saxon officers who usually had charge of a large district. The time of their appointment for London is untime of their appointment for London is un-certain, but they appear in ancient records as early as A.D. 1730. At first they were only the officers of the Crown, and were named by the Barons of the Exchequer; but King John gave them, in the first year of his reign, permission to choose their own Sheriffs. The citizens, however, lost this privilege, as far as the election of Sheriff of Middlesex is concerned, by the Local Government Act, 1888; but they continue, as heretofore, to choose the Sheriffs of the City of Loudon. They are appointed on Midsummer Day, and enter on office at Michaelmas.

Officers.—The Recorder was first appointed in 1208. The Chamberlain is an ancient officer. There were at one time two Chamberlains—the King's Chamberlain and the Chamberlain of the Guildhall. The former appears to have fallen into abeyance circ, 1329. The first contemporary record of the office of City Chamberlain is 1276. The Town Clerk and Common Serjeant are mentioned as officers in the charter of Edward II., A.D. 1319; but the offices can be traced to a much earlier date than this.

The Right Honourable the Lord Mayor 1931-1932.

#### THE CITY GUILDS (LIVERY COMPANIES).

In the majority of cases the designation of the Company gives a clue to the trade which gave rise to the guild, the Broderers (Embroiderers), Cordwainers (cobblers), Fletchers (arrow makers), Loriners (bridle, bit, and spur makers), Poulters (poulterers), Scriveners (legal writers), Upholders (upholsterers), and Vintners (wine sellers) retaining the ancient name of the trade. The order of precedence is given in parentheses after the name of each Company.

9,716 Liverymen of the Guilds are entitled to vote at elections in Common Hall (see p. 604). The actual net number is, however, smaller, as many belong to more than one Guild; and only those who have residential or other qualification in the City have the Parlamentary vote in that district.

City have tendential or chief quantization in New Testing and City have the Parliamentary vote in that district. There are 77 Guilds in existence. The Liveries of the Loriners' (390), Stationers (376), and Merchant Taylors (335), are the most numerous, the Fletchers' (as), the amallest.

#### THE LONDON FIRE BRIGADE. Headquarters: 94 Southwark Bridge Road, S.E. 1.

PREVIOUS to the formation of the Metropolitan Fire Brigade in 1866 the churchwardens and overseers of every parish had been compelled, under an Act passed in 1774, to maintain an engine for putting out all fires occurring within their own boundaries; and from about 1830 the leading fire insurance companies had jointly organised and worked a fire-engine establishment of their own. On January 1, 1865, under the Metropolitan Fire Brigade Act, 1865, the Metropolitan Board of Works took over these responsibilities. On January 1, 1867, the Board also took over from the Royal Society for the Protection of Life from Fire (founded 1844) the service of the saving of Life from fire. By the passing of the Local Government Act, 1888, the Loudon County Council assumed control of the Fire Brigade. In 1904 the title of the Brigade was altered from "Metropolitan Fire Brigade" to "London Fire Brigade"

On Dec. 3r, 1930, the complement of the Brigade consisted of :—r chief officer; s divisional officers; 3 assistant divisional officers; and 1,933 officers, firemen, and pilots; a technique.

nical and clerical staff of 189. There were 6x land fire-stations, 3 river stations and x river repairing depot. The appliances included 87 motor fire engines, 74 motor escape vans, 6 petrol-electric motor ladders, 3 petrol motor ladders (in addition to tenders, &c.), 3 hose carts and xxo fire escapes, x long fire ladder, 64 mules of hose, x steam and 3 motor fire floats, 55 mnoke helmets, 399 hook ladders and s93 hook belts. There were x,689 street fire-alarm posts, 7 telephone lines from station to station and 368 telephone lines from station to station and 368 telephone lines from station to station and 368 telephone lines from the to the Brigade responded during the year ended Dec. 31, 1930, totalled 8,368, and the fires numbered 4,619, of which 35 were classed as "serious"

#### THE LONDON COUNTY COUNCIL.

Offices, The County Hall, Westminster Bridge, S.E. z. and Old County Hall, Spring Gardens, S.W. z.

Hours 9.30 to 5 (Monday to Thursday), 9.30 to 5.30 (Friday), 9.30 to za.30 (Saturday).

Meets on Tuesday at 2.30 p.m.

THE London County Council was constituted | elementary schools with over 628,000 pupils, under the Local Government Act of 1888. London is an administrative county, covering an area of

117 square nules.

The City of London is an electoral division of the county. The County of the City of London is a county for non-administrative purposes, such as quarter sessions, justices, &c.; and the Metropolis outside the City is a county for non-administrative purposes, by name the County of London, in which the justices continue their judicial duties.

The Council comprises a chairman, so aldermen, and 124 councillors, together 145, or, if the char-man be also an elected member or alderman, 144. The term of office for aldermen is 6 years, and the retire every 3 years. The councillors are elected for 3 years. The councillors are elected directly for 3 years. The councillors are elected by the ratepayers, and the councillors elect the aldermen. The positions of aldermen and councillors are to the term of ciliors are the same, except as to the term of office.

The method by which the Council discharges the multitudinous duties entrusted to it is a generous delegation of powers to committees under well defined rules, subject to the re-servation to the Council itself of all questions of principle, and to periodical reports of action taken. In addition to members of the Council co-opted members are included on the following committees: Central Public Health, Education, Housing, Mental Hospitals, Midwives Act and Public Assistance.

Under the Local Government Act, 1929, the Council, as from April 1, 1930, became responsible for the administration of all forms of poor relief in London, including the services previously maintained by the late Metropolitan Asylums Board As required by the Act the Connoil prepared an administrative scheme for discharging the functions transferred, and the transferred services were merged as far as possible in the Council's existing organisation and allocated to the committees of the Council to which they were appropriate.

The Finance Committee have important statutory powers. No costs, debt or hability exceeding £50 may be incurred by the Council except upon a resolution passed on an estimate submitted by the Finance Committee. The Council is the principal money-raising body for all the local authorities in the county, and has a net debt, according to the latest returns, of £80,989,000 which £42,708,000 represents debt incurred takings), and an annual expenditure of about forty millions.

The Central Public Health Committee, among other duties affecting public health, are responsible for the treatment of tuberculosis, the diagnosis and treatment of venereal disease, the maintenance of 75 hospitals, with accom-modation for over 42.000 patients, and the Council's ambulance service.

The Education Committee comprise thirty-eight members of the Council and twelve co-opted members, of whom not less than five are

and 273 secondary and technical schools, evening institutes and training colleges, with nearly 200,000 students. In addition it gives grants-inside to 123 secondary and technical schools and training colleges.

The Housing Committee perform the duties cast upon the Council by the various Housing Acts, including the clearance of insanitary areas and the building of working-class dwellings. The total capital expenditure incurred up to March 21, 1931, in respect of all schemes was £36,618,000, and very large works are still in progress. About 45,000 houses and tenements have been completed since the war.

The Improvement Committee deal with questions relating to the carrying out of street improvements and construction of bridges, tunnels and ferries, Among other works now being carried out are the reconstruction of Lambeth and Chelsea bridges and the widening of Putney bridge,

The Mental Hospitals Committee administer the duties falling on the Council under the Lunacy Acts and the Mental Deficiency Act, 1913, and also the mental hospitals transferred from the Metropolitan Asylums Board. The Council has mental hospitals and other institutions for the care of mental defectives, with accommodation for over 31,000 patients.

The Metropolitan Main Drainage system covers about 195 square nules, including certain districts outside the county, and comprises about 400 miles of main, storm-relief, intorcepting and outfall Sewers, eleven pumping stations, two sewage precipitation stations, and five sludge vessels. The total capital outlay on main drainage is over £5.000,000, and further expenditure is in progress for a scheme to relieve certain districts from flooding after heavy falls of rain, and for the installation of plant at the northern outfall for the treatment of sewage by the activated sludge process.

The Public Assistance Committee administer the duties in connection with poor relief, other than hospital treatment, including the maintenance of institutions, receiving homes and training centres, for over xx,000 inmates.

The Council is the Tramicay Authority for Iondon The system (including about 9 miles belonging to the Leyton Urban District Council but worked by the London County Council) extends over 165 street miles, all of which are electric lines (123 miles on the underground electric lines (133 miles on the underground conduit system and 43 miles on the overhead system). The whole of this great system is worked by the Council, and through-running with various systems outside the County of London is now maintained, to the great advan-tage and convenience of the travelling public. The total capital outlay on trainways amounted. on March 32, 1931, to £18,352,000, and the net debt outstanding to £8,383,000. The results of eight members of the Council and twelve coopted members, of whom not less than five are
required to be women. The Education service
involves an annual expenditure of about
£13,000,000. The Council maintains 1,272 Amongst the Other Powers and Duties of the Council may be mentioned the following:—Sanctioning of loans required by the conneils of the metropolitan boronghs; maintenance of the brigade; acquisition and maintenance of parks and open spaces; the sanctioning of local sewers; town planning; controlling the building line, and the naming of streets and numbering of houses; supervising buildings and district surveyors; dangerons structures; cattle diseases; controlling storage of explosive substances and petroleum; infant life protection; gas, gas-meter and electricity-meter testing; testing weights and measures; licensing of slaughter-houses and of cow-houses; supervision of common lodging-houses; the granting of misic and dancing licenes; historic buildings and monuments; inspection of factories and certain other buildings to secure means of escape from fire; administration of the Shops Act, the Children Act, and the Midwives Acts; licensing and inspection of employment agencies; registration of massage establishments; licensing of premises under the Cinematograph Act; registration of motor cars; collection of duties on unotor cars, adg and establishment and certain other local taxation licences, registration of War charities; and welfare of blind persons.

The Expenditure of the Council, including loans to other local authorities, is met by two chief sources of supply—capital money raised by the issue of Stock, Bonds or bills, or by the use of the Sunking Fund of the Council's debt, and current income raised in a county rate or by the revenue of undertakings. Certain contributions, including education grants, are also received from the Imperial Exchequer. All borrowings by the Council are subject to the provision of a sinking fund, under Treasury approval, sufficient to repay all expenditure generally within a period of 60 years (in a few cases the limit is 30 years). The total Stock outstanding at September 30, 1931, was £98,204,521. These figures are exclusive of the issues of Bonds, the amount outstanding at September 30, 1931, being £6,091,775 Local Bonds for Housing.

The Rating for the year 1931-32, as shown by the statement below (which relates to rate accounts only), amounted to 63, 3d, in the pound over the whole county, including the City, and a further rate over the count, outside the City of a½d. In the pound, together 62, 7½d. The total rate for 1930-31 was 72, 2½d. The Assessable Value of the County of London on April 6, 1931, was £59,406,139-8 1d. rate over the whole county producing £447,536.

### THE PRINCIPAL ENGLISH CITIES. BIRMINGHAM.

BIRMINGHAM (Warwickshire), the second City in England, situated in the heart of industrial England, is the chief centre of the hardware trade of the world. It is practically equidistant from the other important trade centres in the country, being 111 miles from London, 85 miles from Manchester and 91 miles from Bristol. The municipal area is 51,427 acres (about 71 square miles), with a population at the census of 1931

of x,cos,4x3.

It is estimated that over x,see distinct trades are carried on in the city, the chief industries being the manufacture of ammunition and small arms, chocolate, chemicals, cycles and their component parts, magnetos, railway rolling-stock, glass, motor-cars and motor-cycles, motor tyres, tools, electrical apparatus, wireless sets

and components, jewellery and brass working.
Gas, water and electricity are supplied by the
Corporation, who also own the transport under-

Corporation, who also own the transport undertaking, markets and Mnnicipal Bank.
The principal buildings are the Town Hall, built in 1832-1850 on the lines of the Temple of Jupiter Stator at Rome, with a large hall; the Council House and Corporation Art Gallery and Museum (1878); the University (Aston Webb, 1909); the Central Library; the 13th century Church of St. Martin (rebuilt 1873); the Cathedral (formerly St. Phillip's Church, built by Archer, a pupil of Wen's), the Roman Cathohc Cathedral of St. Chad (Pugin), and the Wesleyan Central Hall. A memorial bust of Abraham Lincoln was unveiled in 1921. Birmingham was Central Hall. A memorial bust of Abraham Lincoln was unveiled in 1921. Birmingham was incorporated as a borough in 1838, and was created a city in 1889; it is governed by a Lord Mayor and City Council of 30 Aldermen and 31 Councillors. The city returns 12 members to Parliament. The generally accepted derivation of "Birmingham" is the ham or dwelling-place of the 1929 of the family of Berns, presumed to have been a Sayon. Between the 1921 and 1821. have been a Saxon. Between the 11th and 16th centuries, the de Berminghams were Loids of the Manor.

Principal City Officers.

The Lord Mayor (1931-1932), J. B. Burman. Recorder, J. G. Hurst, K.C. (1931). Stipendary Magistrate, The Rt. Hon. Lord

Ilkeston (1910).
Town Clerk, F. H. C. Wiltshire (1918).
Clerk of the Peace, Joseph James (1905).

#### LIVERPOOL

LIVERPOOL (Lancashire), on the right bank of the river Mersey, 3 miles from the Atlantic and 194 miles N.W. of London, is one of the greatest trading centres of the world and the principal port in the United Kingdom for the Atlantic port in the United Kingdom for the Atlantic trade. The municipal area is 24,102 acres (which includes 2,853 acres in the bed of the river includes 2,853 acres in the bed of the river. Mersey) (about 33 square miles, excluding the bed of the river), with a population at the census of 1,252 (about 33 square miles, excluding the bed of the river), with a population at the census of 1,252 (about 33 square miles, excluding the arriving in the port during 1,254 (about 3,554 (about 3,554 (about 3,554 (about 3,554 (about 3,554 (about 3,554 (about 3,554 (about 3,554 (about 3,554 (about 3,554 (about 3,554 (about 3,554 (about 3,554 (about 3,554 (about 3,554 (about 3,554 (about 3,554 (about 3,554 (about 3,554 (about 3,554 (about 3,554 (about 3,554 (about 3,554 (about 3,554 (about 3,554 (about 3,554 (about 3,554 (about 3,554 (about 3,554 (about 3,554 (about 3,554 (about 3,554 (about 3,554 (about 3,554 (about 3,554 (about 3,554 (about 3,554 (about 3,554 (about 3,554 (about 3,554 (about 3,554 (about 3,554 (about 3,554 (about 3,554 (about 3,554 (about 3,554 (about 3,554 (about 3,554 (about 3,554 (about 3,554 (about 3,554 (about 3,554 (about 3,554 (about 3,554 (about 3,554 (about 3,554 (about 3,554 (about 3,554 (about 3,554 (about 3,554 (about 3,554 (about 3,554 (about 3,554 (about 3,554 (about 3,554 (about 3,554 (about 3,554 (about 3,554 (about 3,554 (about 3,554 (about 3,554 (about 3,554 (about 3,554 (about 3,554 (about 3,554 (about 3,554 (about 3,554 (about 3,554 (about 3,554 (about 3,554 (about 3,554 (about 3,554 (about 3,554 (about 3,554 (about 3,554 (about 3,554 (about 3,554 (about 3,554 (about 3,554 (about 3,554 (about 3,554 (about 3,554 (about 3,554 (about 3,554 (about 3,554 (about 3,554 (about 3,554 (about 3,554 (about 3,554 (about 3,554 (about 3,554 (about 3,554 (about 3,554 (about 3,554 (about 3,554 (about 3,554 (about 3,554 (about 3,554 (about 3,554 (about 3,554 (about 3,554 (about 3,554 (about 3,554 (about 3,554 (about 3,554 (about 3,554 (about 3,554 (about 3,554 (about 3,554 (about 3,554 (about 3,554 (about 3,554

authority is the Mersey Docks and Harbour Board. The chief import is cotton, those next

in importance being grain, provisions, sugar, fruit, oil, timber and tobacco.

The principal buildings are the Cathedral, erected from the designs of Sir Gilbert Scott and consecrated in 1924; when completed this will be the largest ecclesiastical building in England; St. George's Hall, erected 1838-1854, from the designs of Harvey Lonsdale Elmes, at a cost of £300,000, and regarded as the finest modern example of classical architecture; the Town Hall, erected 755 from the designs of Wood; the Walker Fine Art Gallery, the University; the Royal Infirmary; the Municipal Offices; and the Custom House. A Roman Catholic Cathedral, designed to be the largest is the world will be with the continuous and the Custom House. in the world, will be built on Brownlow Hill.

Liverpool was incorporated as a horough early in the 13th century and was created a city in The Corporation consists of a Lord Mayor z88a. and a City Council which comprises 38 Aldermen and 113 Councillors. The City returns 12 members to Parliament. The name is believed to be derived from Norse words meaning the "Pool

of the Slopes.'

Principal City Officers.
The Lord Mayor (1932-1932), J. C. (1088, Recorder, Edward G. Henmerde, R. C. (1909).
Protice Magistrate, Stuart Deacon (1970).
President, Court of Passage, Sir Wm. F. Kyffin Taylor, K B R., K.C.

Exchange, University College, Hospital and Eye Infirmary. New University College, opened July 10, 1928.

Snotengaham or Notingeham, "the home of the sons of Snod" (the Wise), is the Anglo-Saxon name for the Celtic Tungogobauc, "Cave Homes." The city possesses a Charter of Henry II., and was created a city in 1897. The Corporation comprises a Lord Mayor, 16 Aldermen and 48 Councillors. The city returns 4 members to Parliament.

Principal City Officers.

Lord Mayor (231-1932), William Green.

Recorder, Henry Holmes Joy, K.C. (1938).

Town Clerk (1912) and Clerk of the Peace (1921),

William John Board, O.B.E.

#### STRATFORD-ON-AVON.

Shakespeare's Burthplace (April 23, 1564), at Stratford on Avon, has been for over 200 years the goal of pilgrims. It was bought for £3, too in 2647 and given to the nation. (Restored in 1857.) Managed by 26 Trustees (16 ex-official). Holds library of rare editions, pictures, and relics. In the garden are many trees and plants named by the poet.

Clopton Bridge, built of stone, on 19 arches, about 1490 by Sir Hugh Clopton, Stratford native, and Lord Mayor of London.

Guild Chapel and Guildhall.—Built A.D. 1396. In the old hall young Shakespeare could witness strolling companies performing (mentioned in Records). In chapel were discovered beneath whitewash, 1804, nural allegorical paintings, done by mediaval priests, further discoveries being made in 1932.

Hall's Croft.—Unaltered old-timbered residence of Susanna, poet's daughter, wife of Dr. John Hall, churchwarden and poet's executor.

Harrard House. — Built 1596 by Alderman Thomas Rogers, whose descendant (John Harvard) founded Harvard University, U.S.A.

Hathaway Cottage.—At Shottery, one mile from Stratford, is the little thatched farmstead, the undisturbed birthplace of Anne Shakespeare, poets wife, who bore lim three children, Susanna, Hamnet, and Judith. Contains curious Tudor and Jacobean furniture. National property, controlled by Birthplace Trustees.

Ring Edward VI. School.—Founded by Thomas Jollyffe, priest, in Henry VI. reign; incorporated by Edward VI. Here Shakespeare acquired his "small Latin and less Greek," and matchless Euglish. The Shakespeare Memorial.—Mainly due to munificence of C. E. Flower (1830-29) and his write Group comprises Lubary, with 10,000 volumes of Shakespeare editions and ana, including lare Wm. Jaggard collection. Gallery of pictures (including unique "Droeshout" portrait). Museum of antiques and relus (including Irving collection). Tower, affording views of 50 miles. Gardens, and Statuary (Lord Ronald Gower's gift). Theatre, burnt down in 1996, has been rebuilt by international subscription. Special spring and summer performances, with floral procession to tomb, commence on the birthday, April 23, each year.

New Place.—Site of the poet's retirement. Shakespeare bought this estate in 1507; letired to it about 1500; died there April 23, 1516. House was rebuilt about 1700, and demolished by Francis Gastrell, the iconoclast, 1759.

The Cage.—For 36 years the home of Judith, poet's younger daughter, who married Thomas Quiney, vintuer.

Town Hall.—Erected 1633; rebuilt 1768. Con tains details of the unbroken sequence of Bailiff and Mayors since A.D. 1292 (including the poet's father, John Shakespeare). Exhibits: Gains borough portrait of Garrick; four Corporation Maces, gilt silver of 15-16th Century, and ancient Corporate Sword.

Trinity Church.—Dates from A.D. 69s. O cathedral-like proportions. Shelters remains o poet and family.

Wilmoots.—The house of Shakespeare's mother Mary Arden, was purchased in 1930, with 60 sore of land at Welcombe, part of 107 acres bought by Shakespeare in 1605; now open to the public.

# THE PRINCIPALITY OF WALES.

PHYSICAL GEOGRAPHY.

Position and Extent.—The Principality of Wales occupies the extreme west of the central southern portion of the island of Great Britain, with a total area of 7,457 sq. miles. It is bounded on the N. by the Irish Sea, on the S. by the Bristo Channel, on the E. by the English counties of Cheahire, Salop, Hereford and Monnouth, and on the W. by St. George's Channel. The greatest length from N. to S. (Point of Air to Barry Island) is 136 miles, and the greatest breadth from W. to R. (St. David's Head to the English border) is a miles. Separated from the naminand by the Menai Strats is the Weish island-county of Anglesey or Mon (276 sq. miles), communication with which is facilitated by the Menai Suspension. Bridge (x,000 ft. long), built by Telford in x826, and by the tubular railway bridge (x,x00 ft. long) of the L. & N.W. Railway, built by Stephenson in 1850. Holyhead harbour, on Holy Isle in r850. Holyhead harbour, on may reactive for the reactive for a fast steam packet service to Kingstown and Dublin (70 miles).

Population.-The population at the Census of 1931 was 2,593,014 (inclusive of Monmouthshire

Rehef.—Wales is generally mountainous, the chief systems being those of North Wales (Snowdon 3,572 ft., Carnedd Llywelyn 3,484 ft., Carnedd Dafydd 3,426 ft.), Berwyn (Amar-fawddy 2,970 ft.), Powys (Pliulinumon 2,462 ft., Drygan Fawr 2,125 ft.), and the Black Mountain Beschool Bassense and Black Korest. Mountain, Brecknock Beacons and Black Forest ranges (Carmarthen Van 2,632 ft., Brecon Beacon 2,862 ft., Pen-y-gaver fawr 2,660 ft ).

Hydrography.—The principal river of those rising in Wales is the Severn (see England), which flows from the slopes of Pillinmon to the English border, dividing Montgomeryshire on its way. The Wife (130 miles) also rises in the slopes of Plinitumion, and flows between Radinor and Brecon on its course to England. The Urk (56 miles) flows into the Bristol Channel, through Monmouthshire. The Dec (70 miles) rises in Bala lake and flows through the Vale of Llangollen, where an aqueduct (built by Tulford in 1805) carries the Pontcysyllte branch of the Shiopshire Union Canal across the valley. The estuary of the Dee is the navigable portion, x4 miles in length and about 5 miles in breadth, and the tide rushes in with dangerous speed over the tide rushes in with dangerous speed over the "Sands of Dec." The Toxy (68 innles), Taff (50 miles), Dorey (30 miles), Taff (50 miles), and Councay (54 miles), the last named broad and navigable, are wholly Welsh rivers The largest natural lake in Wales is Bala (Llyin The Market and the Council of the Council of the Council of the Council of the Council of the Council of the Council of the Council of the Council of the Council of the Council of the Council of the Council of the Council of the Council of the Council of the Council of the Council of the Council of the Council of the Council of the Council of the Council of the Council of the Council of the Council of the Council of the Council of the Council of the Council of the Council of the Council of the Council of the Council of the Council of the Council of the Council of the Council of the Council of the Council of the Council of the Council of the Council of the Council of the Council of the Council of the Council of the Council of the Council of the Council of the Council of the Council of the Council of the Council of the Council of the Council of the Council of the Council of the Council of the Council of the Council of the Council of the Council of the Council of the Council of the Council of the Council of the Council of the Council of the Council of the Council of the Council of the Council of the Council of the Council of the Council of the Council of the Council of the Council of the Council of the Council of the Council of the Council of the Council of the Council of the Council of the Council of the Council of the Council of the Council of the Council of the Council of the Council of the Council of the Council of the Council of the Council of the Council of the Council of the Council of the Council of the Council of the Council of the Council of the Council of the Council of the Council of the Council of the Council of the Council of the Council of the Council of the Council of the Council of the Council of the Council of the Council of the Coun

The largest hautral take in wates is Bata (Llyi) Tegid) in Merionethabire, 4 unites long and about r mile wide; Lake Vyrney is an artificial reservoir, about the size of Bala, and forms the water supply of Liverpool, while Birmingham is supplied from a chain of reservoirs in the Elau and Claerwen valleys.

## EARLY HISTORY.

Celts and Romans.—The earliest inhabitants of whom there is any record appear to have been subdued or exterminated by the Goidels (a people of Celtic race) in the Bronze Age, and a further invasion of Celtic Brythous followed in the ensuing Iron Age. The Roman conquest of South Britain and Wales was for some time successfully opposed by Caradog (Caratacus), King of the

Silures, a tribe inhabiting the present counties of Glamorgan, Brecon, Radnor and Monmouth. In A.D. 78 the conquest of Wales was completed under Julius Frontinus, and communications were opened up by the construction of military roads from Chester to Carleon-on-Usk and Caerwent, and from Chester to Conway (and thence to Carmarthen and Neath). Christianity was introduced (during the Roman occupation) in the 4th century, and the faith thus established was preserved (after the withdrawal of the Roman garrison) by native effort, and was carried to by missionaries to the Hebrides and to the Orkneys and Shetlands.

Orkneys and sneusands.

The Anglo-Saxon Attacks.—The Anglo-Saxon invaders of South Britain drove the Celtic Goddels and Brythons into the mountain fastnesses of Wales, and into Strathclyde (Cumberland and S.W. Scotland) and Connwall, giving them the name of Wactuc, or Welsh (=Foreign). The West Savons' victory of Deorham (577) isolated the Waelisc of Wales from those of Cornwall, while the battle of Chester (673) similarly cut off communication with the Waelisc of Strathclyde. In the 8th century the boundaries of the Welsh were further restarcted by the annexations of Offa, king of Mercia, and counter-attacks were largely prevented by the construction of an artificial boundary from the Dee to the Wye (Offa's Dike). In the 9th century Rhodii Mawr united the country against further incursions of the Saxons by land and against the raids of Noise and Dainsh pirates by against the most of vorse and beams pirates by sea, but at his death his three provinces of Gwynedd (N. y. Powys (Mid) and Dehenbarth (S.) were divided among his three sons—Anarawd, Mervyn and tadeli—the son of the last-named being Howel Dda, who coulded the laws of the country, while Lewelyn ap Seissyllt (husband of the heness of (lwynodd) again united the provinces and reigned as Prince from rois-ross.

The Norman Conquest - After the Norman conquest of England William I, created Palatine counties along the Welsh frontier, and Robert Fitzhamon, the Norman Earl of Gloncester, randed South Wales and creeted fortresses from the Wye to Milford Haven. Henry I. intro-duced Flemish settlers into South Wales, but after his death the Welsh rose under the leader. ship of Grifith up Rhys and routed the Norman-Rlemsh forces at the fords of the Teith (Cardigan) in x136. From the cutly years of the 13th century the house Gwynedd, in the north, gamed an ascendency over the whole of Wales, and Llewelyn ap Iorwerth was in constant strife with England for recognition as an independent sovereign; but Llewelyn, the son of Iorwerth, was killed in 1282 during hostilities between the Welsh and English, and his brother David was captured and executed by the English in 1283. On Feb. 7, 1301, Edward of Cannaryon, son of Edward I, was crosted Prince of Wales, a title thenceforward borne by the heir appaient to the throne of England.

The Welsh are a distinct nationality, with a language and literature of then own, and the language and interature or men own, and the national bardie festival (Esteddiod), instituted by Prince Rhys ap Griffith in 1276, is annually maintained. These Estedifodau (essions) form part of the Gorsedd (assembly), which is believed to date from the time of Prydian, a ruling prince in an age many centuries before the Christian era

# CARDIFF.

CARDIFF (Glamorgan), at the mouth of the rivers Taff (Caer Taff), Runnney and Ely, the port of the South Wales coal fields, has a municipal area of 13,628 acres, and a population (1931) of 23,648. The principal industries include ship repairing, tope making, steel, copper, lead snip repairing, ope maning, suce, copper, cand zine works, iron and steel foundries, patent fuel works, engine wagon works, flour nulls, chemical factories, paper mills, breweries, jam, vinegar and ice factories, tin plate and paint works. The chief imports are grain, timber, picture, the chart hatter there increased the left. wood, ore, fruit, butter, cheese, frozen and chilled meat, live cattle, cauned goods, sugar, potatoes. The exports include coal, coke, patent fuel, iron

and steel manufactures, tin plates, &c

The principal buildings are Caidiff Castle, built in the 11th century, the National Museum of Wales, Public Library, the University College of South Wales and Monmouthshire, the Registry of the University of Wales, Technical College, City Hall and Law Courts, and Glamorgan County Hall. The city returns 3 members to Parliament.

The Lord Mayor (1931-32), C. W. Melhuish. Stipendiary Magistrate, W. Hugh Jones, K.C. Recorder Roland E. L. Vaughan-Williams, K.C. Town Clerk & Clk. of Peace, Cecil G. Brown, LL. B.

#### SWANSEA

SWANSEA (Glamorgan), at the mouth of the River Tawe, is the chief centre of the copper, implate and spelter industry of the United Kingdom, and contains the largest tube works in the country. The trade of the port also includes coal (the largest authracite port), mendes coal (the laigest abbhacite port), patent fuel, ores, and the import and eyort of oil (National Oil Refinence). There is also a large ship-repairing industry principally with France, Italy and Belgium. The municipal area is 24,193 acres, with remulation at the annual state of the communication of the communication of the communication of the communication of the communication of the communication of the communication of the communication of the communication of the communication of the communication of the communication of the communication of the communication of the communication of the communication of the communication of the communication of the communication of the communication of the communication of the communication of the communication of the communication of the communication of the communication of the communication of the communication of the communication of the communication of the communication of the communication of the communication of the communication of the communication of the communication of the communication of the communication of the communication of the communication of the communication of the communication of the communication of the communication of the communication of the communication of the communication of the communication of the communication of the communication of the communication of the communication of the communication of the communication of the communication of the communication of the communication of the communication of the communication of the communication of the communication of the communication of the communication of the communication of the communication of the communication of the communication of the communication of the communication of the communication of the communication of the communication of the communication of the communication of the communication of the communication of the communication of the communication of the communication of the communication of the communication of the communication of the communication of the communication o a population at the census of 1931 of 164,825. Included in the borough is the health resort of Mumbles

The principal buildings are the Norman castle (re-built in 1330), the Royal Institution of South Wales, founded in 1835 (containing Museum and Library), the University College at Singleton, and the 17th century Grammar School, founded by Hugh Gore Swansea was chartered by King John, and incorporated as a borough by Henry III. The borough returns a members to Henry III. Parliament.

Mayor (1931-32), J. B. Owen. Recorder, E. W. Milner-Jones. Town Clerk, H. L. Lang-Coath.

## THE KINGDOM OF SCOTLAND.

Position and Extent.-The Kingdom of Scotland occupies the northern portion of the main island of Great Britain and includes the Inner and island of Great Britain and includes the Inner and Outer Hebrides, and the Orkney, Shetland, and many other islands. The Kingdom iles between 60° 32′ 30° and 5° 42′ N. latitude and between 1° 45′ 33′ and 6° 42′ W. longitude, its southern neighbour being the Kingdom of England, with the Atlantic Ocean on the N. and W., and the North Sea on the E. The greatest length* of the mainland (Cape Wrath to the Mull of Galloway) is see miles and the greatest beautiful and the preparate headth. dailoway) is 274 miles, and the greatest breadth (Buchan Ness to Applecross) is 254 miles. The total area of the Kingdon is 31,250 square miles (land and water). The population (at the census of 1931) was 4,842,554, a decrease of 39,943 since the census of rosz.

Relief.—There are three natural orographic divisions of Scotland. The Southern Uplands arvisions of Scouland. The Southern Uplands have their highest points in Merrick (a, 964 feet), Rinns of Kells (a, 668 feet), and Cairnsmuir of Carsphairn (a, 652 feet), in Kirkendbilght; Hartfell (a, 652 feet) in Dunfries; and Whitecomb (a, 655 feet), in Peebles The Central Lowlands of the New Yeart - Carlo (a.g.g. tebt), in Feenies in Central Locations include the valleys of the Tay, Forth and Clyde, and the cities of Edinburgh, the capital of the Kingdom, and Glasgow, its principal scaport. The leather-clad Northern Highlands extend almost from the extreme north of the mainland almost from the extreme north of the mainland to the central lowlands, and are divided into a northern and southern system by the *Great Gien*; they contain, in the central Grampian in lills, *Ben Nevis* (4,406 feet), the highest point in the British Isles, and Ben Muich Dhui (4,596 feet). The *Cheviot Hills* form a natural boundary between Scotland and England, their highest point being Cheviot Hill (a,676 feet)

Hydrography.—The principal river of Scotland is the Clyde (so miles), one of the most important rivers in the world, with the greatest commercial estuary in Scotland The Clyde is commercial escalary in sectional The Civies in formed by the junction of Daer and Postrail water, and flows through the city and port of Glasgow to the Firth of Clyde. During its course it passes over the picturesque Falls of Clyde, the largest falls in the British Isles, (7)µde, the largest falls in the Bittsh Isles, Bonnington Liun (30 feet), Corra Liun (34 feet), Dundsff Linn (50 feet), and Stonelyres Liun (36 feet), above and below Lanark. The Tweed (36 miles) has important woollen industries ("Tweeds") in its valley. The Tay, noted for its salmon, and the longest river in Scolland (372 miles), flows into the North Sea, with Dundse (the centre of the inte industry) on the estuary, which is spanned by the Tay Bridge (a miles 73 yards), opened in 1837 to replace that destroyed by a µale (Dec. 28, 289). The Des (50 miles), a noted salmon river, flows through scenery of unequalled beauty to the North Sea at Aberdeen. The

Spey (xxo miles), the swiftest flowing river in the British Isles, and also noted for its salmon and its scenery, flows into the Moray Firth. The Forth (66 miles), navigable to Striling, is spanned by the Forth Bridge, constructed x83s-g

spanned by the Forth Bridge, constructed 1883-9 at a cost of £3,000,000, with a length of 5,330 feet (with approaches 8,395 feet). The Looks are the principal hydrographic feature of the Kingdom, both on the mainland and in many of the Islands. The largest in the Kingdom and in Great Belian in 17-11. and in many of the Islands. The largest in the Kingdom and in Great Britain is Lock Lomond. (44 miles long), with Lochs Awe, Tay, Rannoch and Ericht in the Grampian valleys; Loch New (24 miles long and Soc feet deep), with Lochs Olch and Lochy, in the Great Gleu; and Lochs Shin (so miles) and Marce in the northern Milestonic.

Highlands.
Orkney.—About 6 miles N. of the Caithness coast, separated from the mainland by the Pentland Firth, is the island country of Orkney, a group of se islands and islets ("holms" and "skerries"), of which one-third are inhabited. "Skerries", or which one-third are minanted. The total area of the group is 375% square miles, with a population (rgrz) of 25,896. Kirkwall, in Ponoua (or mainland), the largest island of the group, is the capital of the county. Many of the Orkney (and Shetland) Islands contain brocks (Pictish towers) and other Pictish and Scandinavian remains. Scapa Flow, between Pomona and Hoy, was the war station of the Grand Fleet from 1914-9 and the scene of the scuttling of the surrendered German High Seas Fleet (June 21, 1919).

Shetland.—About so miles N. of Orkney (with the detached Fair Isle at as miles N.) is the sland county of Shetland, a group of about roo islands and islets, of which so are inhabited. The total area of the group is 55x square miles, with a population (spr) of 37,9xx. lerwick, in Manulaud (the largest and pinicipal island), is the capital of the county Fair Isle, the southernmost of the group, is famous for handkuited hosiery, and Unst for the finest of the Shetland woollen work, for which the county is Intended Worker Winga, about r mile N. of Unst, is the most northerly of the group and of the British Isles (60° 51′ 30″ N. lat ).

Western Islands.*-Off the W. coast, at varying distances, and extending from Sutherland to Argyll, are over 500 islands and islets, of which 102 are inhabited. The total area of these Western Islands is a,812 square miles, with a population of close on 80,000, but owing to the mountainous surface of the land only about 300 square miles are under cultivation. The Inner square miles are under cultivation. The Inner-Hebrides include the island of Skye (64,3 square miles—capital, Portree, famous as the refuge of Prince Challie after his defeat at Culloden, Invernessshire, in 1746), which contains the Cuiltine (Sguri-na-Banachdich, 3,443 feet), Red Hills (Ben Usillich, 2,403 feet), and many other picturesque mountains; Mull (367 square miles), containing Ren More (3,185 feet), Ben Buy (2,354 feet), and Ben Creach (2,259 feet); Jurd

e Land's Kul to Joka o' Groats — The customary measurement of the Island of Great Britain is from the site of John o' Groat's bonse. near Duncansip Head, Caithness (at the N.E., extremity of the island) to Land's End Cornwall (at the S.W. extremity), a total distance of sey miles in a straight line and (approximately) see by road. But the site of the house of John de Groot (with its \$ doors and octagonal table, to solve the question of precedence between John and his y brothers) is about 4 miles S.W. of Duncansiby Head, while Dunnes Head (also in Caithness) extends farther N, than Duncansiby. John de Groot is believed to have obtained permission to settle in Caithness (from the Retherlands) in the reign of James IV (1498-1523)

^{**} The Hebrulea.—Until the closing years of the right century "The Hebrules" included other Scottish alands in the Firth of Clyde, the penissals of Kintyre (Argyllshire), the lale of Man, and the (Irish) Isle of Rathlin. The origin of the name is tated to be the tirely Scoudes, latinised as Hebrules by Piny, and corrupted to its present from. The Norwegian name Sadreyar (Southern Islands) was latinised as Sedreyar (Southern Islands) was latinised as Sedreyar (Southern Islands) was latinised as Sedreyar (Southern Islands) was latinised as Sedreyar (Southern Islands) was latinised as Sedreyar (Southern Islands) was latinised as Sedreyar (Southern Islands) was latinised as Sedreyar (Southern Islands) was latinised as Sedreyar (Southern Islands) was latinised as Sedreyar (Southern Islands) was set to be supported by the Southern Islands (Southern Islands) was set to be supported by the Southern Islands (Southern Islands) was set to be supported by the Southern Islands (Southern Islands) was set to be supported by the Southern Islands (Southern Islands) was set to be supported by the Southern Islands (Southern Islands) was set to be supported by the Southern Islands (Southern Islands) was set to be supported by the Southern Islands (Southern Islands) was set to be supported by the Southern Islands (Southern Islands) was set to be supported by the Southern Islands (Southern Islands) was set to be supported by the Southern Islands (Southern Islands) was set to be supported by the Southern Islands (Southern Islands) was set to be supported by the Southern Islands (Southern Islands) was set to be supported by the Southern Islands (Southern Islands) was set to be supported by the Southern Islands (Southern Islands) was set to be supported by the Southern Islands (Southern Islands) was set to be supported by the Southern Islands (Southern Islands) was set to be supported by the Southern Islands (Southern Islands) was set to be supported by the Southern Islands (Southern Islands) was set to be supported by the Southern Isl

(160 square miles), with a chain of hills culminating in the Paps of Jura, Beinn-an-Oir (s. 572 feet), and Beinn Cholais (s.407 feet); Islay (233 square miles), and many smaller islands. The Outer Hebrides, separated from the mainland by the Minch, include Leurs-with-Harris (770 square miles), celebrated for its homespun "Tweeds," North Uist, South Uist, Barra and other islands. Thirteen miles W. of Stornovay (the largest town of Lewis and of the Hebrides) are the "Drudical" remains of Callernish, a well-preserved series of monolithic circles, cruciform in general arrangement, but generally regarded as a heathen monument of the remote Stone Age.

Climate.—The climate of Scotland is influenced by the much indented coast line and (like that of South Britain) by the Gulf Stream Drift, which emerges from the Gulf of Mexico as a strong current about 20 miles in width, with a speed of about 4 miles per hour; the stream gradually loses its velocity and becomes shallower and cooler, until at about 35° N. lat. (off Cape Hatteras) it ceases to be a distinct stream and its surface waters are carried across the Atlantic by the prevailing westerly winds. The climate is more bracing and less treacherous than that of England, the average duration of sunshine on the east coast of England, while the south-western section is no wetter or more relaxing than the corresponding section of England. The mean winter temperature is in the neighbourhood of 35°, and that of summer about 35° Fahrenheit.

The offices of the Scottish Travel Association

The offices of the Scottish Travel Association are at 37, George Street, Edinburgh.

## EARLY HISTORY.

Prehistoric Man.—North Britain appears to have been invaded in Palacolithic times by a succession of races, who died out or were exterminated by other immigrants. The earliest race of which there is any record is that since known as the Picts, believed to be of non-Aryan origin, and stated to have been named Picts by the Romans on account of the tribal habit of painting the body. The Picts seem to have inhabited the whole of North Britain and to have spread over the north of Ireland. Picts Houses are most frequent in the northern counties of Caithness and Sutherland and in the Orkney Islands, and it is generally believed that the Picts were driven northwards by later Cettic immigrants. Celtic Goidels and Brythons arrived from Heigic Gaul during the latter part of the Bronze Age and in the early Iron Age, and except in the extreme north of the mainland and in the islands the civilization and speech of the people were definitely Celtic at the time of the Bonan Invasion of Britain.

The Roman Invasion.—In A.D. 80 Julius Agricola extended the Roman conquests in Britain by advancing into Caledonia as far as the "Grampian" Hills, but after a victory at Mons Graupus (since corrupted to "Grampias") he was recalled, and no further advance was made for about 60 years, when the Roman frontier was carried to the isthmus between the Forth and Clyde and marked by the Wall of Pius, towards which ran military roads from the Cheviots. The Roman occupation of Southern Caledonia was not so effective as that of South Britain, and before the close of the second century the nerthern limit of Roman Britain had receded to Hadrian's Wall, from the Tyne to Solway Firth, where it was maintained until about A.D. 450.

The Scots. - During the later years of the Roman occupation the garrison was continually harassed by Pictish tribes north of the Wall, aided by Scots (the Gaelic tribe then dominant in Ireland), Scota (the Green critic their dominants in research, and when the garrison was withdrawn these Picts and Scots were the principal enemies of the Celtic Brythons, who are believed to have called in the Saxons to protect them from the invasions of their neighbours. A relic of the atruggle between Pict and Brython is still to be atruggle between Pict and Brython is still to be a truggle between Pict and Brython is still to be seen in the Catrail, or Picts' Work Dyke, of Roxburgh (from Torwoodle, near Galashiels, to Peel Fell in the Cheviots). Christianity was introduced into Southern Caledonia about 350 by missionaries from Romanized Britain, who penetrated to the northern districts and islands. After the withdrawal (or absorption) of the Roman garrison of Britain there were many years of tribal warfare between the Picts and Scots, the Brythonic Waelisc (Welch) of Strathclyde (South-west Scotland and Cumberland), and the Anglo-Saxons of the Lothians. The Waelisc were isolated from their kinsmen in Wales by the victory of the West Saxons at wates by the victory of the west raxons at Chestre (Exp.) and towards the close of the 5th century the Scots under Kenneth Macalpine became the dominant power in Caledonia. In the reign of Malcoln I. (943-954) the Brythons or Whelisc (Welch) of Strathclyde were broughtinto. subjection, the lowland kingdom of the English (Lothian) being conquered by Malcolm II. (2005-2034). From the close of the 11th century until the middle of the 16th there were constant until the indidle of the 16th there were constant wars between Scotland and England, the outstanding figures in the struggle being William Wallace, who defeated the English at Stirling Bridge (1207), and Robert Bruce, who wan the victory of Bannockhurn (1314). James IV. and many of his nobles fell at the disastrous battle of Flodden (1313), and in 1603 James VI., the Stuart King of Scotland and the heir to the Tudor line of England (his mother, Mary "Queen of Scots," was the great-granddaughter of Henry VII.), succeeded Queen Elizabeth on the throne. his was the great-granddaughter of Henry VII.), succeeded Queen Elizabeth on the throne, his successors reigning as Sovereigns of Great Britain. After the abdication (by flight) of James VII. and II., the crown devolved upon William III. (grandson of Charles I.), and Mary (daughter of James VII. and II.) and, their issue failing upon Anne (second daughter of James VII. and II.). Anne's children died young and the and II.). Anne's children died young, and the throne devolved upon George I. (great-grand-son of James VI. and I.). In 1889 Graham of Claverhouse "roused the Highlands" on behalf of James VII. and II., but died after a military success at Killiecrankie. In 1715, armed risings led to the indecisive battle of Sherriffmuir, but the movement died down until 1745, when the "Young Pretender" defeated the Royalist troops "Young Pretender defeated the Royanst troops under Sir John Cope at Preston Pans and advanced to Derby in England (1746). From Derby, the adherents of "James VIII. and III." (the title claimed for his father by the Young Pretender), fell back on the defensive, and the Jacobite movement was finally crushed by the Jacobite movement was many crusned by une Royalist troops under the Duke of Cumberland at Culloden (April 16, 1746). The Hebrides did not become part of the Kingdom of Scotland until 1266, when they were ceded to Alexander III. by Magnus of Norway.

The Hebrides did not become part of the Kingdom of Scotland until 1266, when they were coded to Alexander III. by Magnus of Norway. Orkney and Shetland fell to the Scottish Crown as a piedge for the unpaid dowry of Margaret of Denmark, wife of James III., in 1469, the Danish suzerainty being formally relinquished

in 1590.

EDINBURGH.

EDINBURGH, the Capital of the Kingdom, has a municipal area of 3s,4os acres, and a popula-tion (Census of 1931) of 438,998 (over the en-larged area). The boundaries were extended in 1920 so as to include the Burgh of Leith and part of the suburban district of the County of Midlothian. The city is built on a group of hills and contains in Princes Street the most beautiful thoroughfare in the world. The principal buildings are St. Gles's Church (restored 1876-83), and St. Mary's (Scottish Episcopal) Cathedral (Sir Gilbert Scott), the Castle (which contains, in St. Margaret's Chapel, the oldest building in Scotland, Parliament House (the present seat of the judicature, containing the Advocates and Signet Libraries), the University, the General Register House (Robert Adam), Royal Scottish Academy, National Portrait Gellery, and Holyrood Palace (containing parts of the royal palace of James IV. and V.). The city is governed by a town council of 72 members, and sends 6 members to Parliament (including the member for Leith).

Rt. Hon. Lord Provost (1929-32), Sir T. B. Whitson Town Clerk, Sir Andrew Grierson, LL.D., S.S.C.,

City Chamberlain, John D. Imrie, M.A., B.COM.

#### GLASGOW.

GLASGOW, a Royal Burgh, City and County of a City, and the principal commercial centre in Scotland, has a municipal area of 30,046 acres, and an estimated population of 1,088,417. The city occupies the north and south banks of the Clyde, one of the chief commercial estuaries of the world, and its trade was valued to the commercial contracts. at £81.695,33s in 1929, the total net tonnage of the ships entering (1930-31) being 6,016,724 tons; of those cleared 6,842,469 tons. The principal industries are iron and steel works, shipbuilding, chemicals, leather, woollens, muslin-weaving, distilling, tobacco, cotton-mills and furnidistilling, tobacco, cotton-mills and furni-ture. The chief buildings are the Early English Cathedral, built early in the 12th century, and incorporating part of an earlier structure, the University (Sir Gilbert Scott), the City Chambers, the Royal Infirmary and the Western and Vic-toria Infirmaries, the Art Galleries and the Mitchell Library. The City is governed by a town council of 113 members, and sends 15 members to Parliament.

Rt. Hon. Lord Provost (1929-22), Sir Thomas Kelly.

Town Clerk, David Stenhouse, J.P. City Chamberlain, A. C. McMillan, C.A.

* The Cities of Edinburgh, Glasgow, Dundee, and Aberdeen are each a County of a City, and the Lord Provost of each is entitled, by virtue of his office, to be appointed Lord Lieutenant.

## DUNDEE.

DUNDER, a City, Parliamentary, Municipal and Royal Burgh, on the left bank of the River Tay, 42 miles N. of Edinburgh, has a municipal area of 6,678 acres, and a population (Census 1931) of 175,583 (an increase of 7,268 since 1921) The principal buildings are University College (St. Andrews University), the Technical Institute, High School, Albert Institute and the Caird Hall Buildings. One of the finest Public Baths is in Dundee. The harbout affords dock accommodation of nearly 38 acres. The principal industries are jute manufacture in all its branches, and various forms of linen weaving, the making of preserves, shipbuilding, engineering, dyeing, and brewing. The City is governed by a town council of 34 members and sends a members to Parliament.

The Lord Provost (1930-32), G. A. Johnston. Town Clerk, W. H. Blyth Martin.

## ABERDEEN.

ABREDEEN, a City and a Royal, Municipal and Parliamentary Burgh, 120 miles N.E. of Edinburgh, received its charter as a Royal Burgh from William the Lion in 1129. The numicipal area is 6,748 acres, with a population (Consus 1921) of 157,859 (an increase of 8,390 since 1921). The tonnage of the ships entered in 1290 was 95,035 tous (and fishing vessels 1,344,565 tons). The chief industries are granite quarrying and working, white fish, salmon and herring fisheries, engineering, chemicals, brewing, distilling, shipbuilding, paper-making, and woollen, jute and linen manufacture. The principal buildings are the East and West Churches of St. Nicholas, Municipal Offices, Marischal College, King's College, Roman Catholic pro-Cathedral, Public Library, H.M. Theatre, Art Gallery and Museum, and the Cathedral of St. Machar (14th century). The City is governed by a Town Council of 37 Members, and sends 2 Members to Parliament.

The Lord Provest (1930-32), James R. Rust. Town Clerk, George S. Fraser.

Position and Extent.—Ireland lies in the Atlantic Ocean, to the West of Great Britain, and is separated from Scotland by the North Channel and from Wales by the Irish Sea and St. George's Channel. The land area of the island is 32,532 sq. miles and its geographical position between 52° 56° and 32° 52° N. latitude and from 5° 25° to 70° 30° W. longitude. The greatest length of the island, from N.E. to S. W. (Torr Head to Mizen Head), is 300 miles, and the greatest breadth, from E. to W. (Dundrum Bay to Armagh Head), is 74 miles. On the N. coast of Achill Island (Co. Mayo) are the highest cliffs in the British Islands, 2000 feet sheer above the sea. Ireland is occupied for the greater part of its area by the Central Plain, with an elevation of 50 to 350 ft. above mean sea level, with isolated mountain ranges near the coast line. The principal mountains, with their highest polits, are the Sperrim Mountains (Sawel 2,240 ft.) of County Tyrone in the North; the Mountains of Mourne (Silve Donard 2,756 ft.) of County Down, and the Wickton Mountains (Lugnaquilla 3,039 ft.) in the North-East; the Derryweagh Mountains (Errigal 2,466 ft.) of County Onegal in the North-West; the Comemara Mountains (Twelve Pins 2,655 ft.) of County Galway in the West; Maogulic-cuddys Reeks (Carrantuolill 3,444 ft. the highest point in Ireland) in the South-West; and the Galtee Mountains (3,038 ft.) of County Tipperary, and the Knockmealdown (2,609 ft.) and Comeragh Mountains (2,470 ft.) of County Waterford, in the South. The principal river of Ireland (and the Ongest in the British Isles) is the Shannon (240 miles), rising in County Cavan and draining the central plain. The Shannon flows through a chain of loughs to the city of Limerick, and thence to an estuary on the western Atlantic scaboard The Slanne flows into Westford Harbour, the Luffey to Dublin Bay, the Boppe to Drogheda, the Lee to Cork Harbour, the Blackwater to Youghal Bay, and the Suir, Nove, and Barrow to Waterford Harbour. As in Scotland, the principal hydrographic feature is

Primative Man.—Although little is known concerning the earliest inhabitants of Ireland, there are many traces of neolithic man throughout the island, while the use of bronze implements appears to have become known about the middle of the 17th century B.O. In the later Bronze Age a Celtic race of Guidels appear to have invaded the Island, and in the early Iron Age Brythons from South Britain are believed to have effected settlements in the south-east, while Peter from North Britain established similar settlements in the north. Towards the close of the Roman occupation of Britain, the dominant tribe in the island was that of the Sooti, who afterwards established themselves in Scotland.

Legendary History.— According to Irish Legendary History.— According to Irish race, who came from Soythis by way of Spain, and established the Kingdom of Tara, about 500 B.C. The supremacy of the Ardir. (high king) of Tara was acknowledged by eight lessor kingdoms (Munster, Connaught, Allech, Oriel, Ulidia, Meath, Leinster and Ossory) ruled by descendants of the eight sons of Milled. The basalt columns on the coast of Antrim, eight niles from Portrush, known as the Giant's Cansensay, are connected with the legendary Instory of Ireland as the remnants of a bridge built in the time of Fina M'Coul (Fingal) to connect Antrim with Sootland (Staffa).

Christianity.—Christianity did not become general until the advent of St. Patrick St. Patrick was born in Britain about 389, and was taken to Ireland as a slave about sixteen years later, escaping to Gaul at the age of 28. In 428 he was consecrated Bishop at Auxerre and landed in Wicklow to establish and organise the Christian religion throughout the island.

Later History.—The Roman conquest of Bittain was not extended to Ireland, and little is known of the history of the country until the invasions of Northmen (Norwegians and Danes) towards the close of the 8th century A.D. The Norwegians were distinguished as Findgaill (White Strangers) and the Danes as Dubgaill (Black Strangers), names which survive in "Fingall,"

"MacDougall" and "MacDowell," while the name of the island itself is held to be derived from the Scandmavian Ina-land (land of the Irish), the names of the Provinces being survivals of Norse dialect forms (Ulaids-tir, Laigins-tir, Mumans-tir and Kunnak-tir). The out-standing events in the encounters with the Northmen are the *Rattle of Tara* (980), at which the Hy Neill king Maelsechlainn II. defeated the Scandinavians of Dublin and the Hebrides under their king Amlaib Cuaran; and the Battle of Clontarf (1014) by which the Scandinavian power was completely broken. After Clontarf the supreme power was disputed by the O'Brians of Munster, the O'Neills of Ulster, and the O'Connors of Connaught, with varying fortunes. In 1152 Dermod MacMurrough (Diaimait Mac-Murchada), the deposed king of Leinster, sought assistance in his struggle with Ruaidhri O'Connor (the high king of Ireland), and visited Henry II. the Norman king of England. Henry authorized him to obtain armed support in England for the recovery of his kingdon, and Dermod enlisted the services of Richard de Clare, the Norman Earl of Pembroke, afterwards known as Strongbow, who landed at Waterford (Aug. 23, 1270) with 200 knights and 1,000 other troops for the reconquest of Leinster, where he eventually settled, after marriage with Dermod's daughter. In 1178 (Oct. 18) Henry II. himself landed in Iteland, with a force larger than Strongbow's, and obtained homage from the Irish kings, but Anglo-Norman rule underwent many fluctuations in the succeeding centuries, being confined in the early 15th century within the English "Pale" of 600 square miles. In the reign of Henry VII.
English rule was greatly extended, and the
administration of Irish affairs was anglicised by Robert Poyning, Lord leputy of Ireland, who summoned the Paritament of Drogheda (Dec. 1494), at which were enacted the Statutes of Drogheda, afterwards known as Poyning's Law, making the legislature of Ireland subordinate to and dependent on that of England. A later parliament conferred on Henry VIII. the title of King of Ireland.

CONSTITUTION AND GOVERNMENT. UNDER the Government of Iteland Act, 1920, as amended by the Irish Free State (Consequential Provisions) Act, 1922, and the Notthern Iteland (Miscellaneous Provisions) Act, 1928, a separate Parhament and Executive Government were established for Northern Ireland, which comprises the six parliamentary counties of Antrim, Armagh, Down, Fermanagh, London-Antrin, Aringh, Down, Fermangin, Romanderry and Tyrone, and the Boloughs of Belfast and Londonderry. The Constitution of Northern Ireland is Federal in type, certain legislative

and fiscal powers being reserved to the Imperial Parliament. The Northern Irish Parliament consists of a

House of Commons of 52 elected members (who receive an allowance of £200 per annum) and a Senate of a ex-office Senators and 24 Senators elected by the members of the House of Commons on the proportional representation system. Northern lieland continues under the

Act of x920 to return 13 members to the Imperial House of Commons.

The Executive power is vested in the Governor on behalf of His Majesty the King; he holds office for 6 years, and is advised by 7 Ministers responsible to Parliament | The Cabinet Salaries and the allowances of the Members of Parliament here have voluntarily abated by 15 per cent for years 1931/32.]

Tyrone, J. Linehan, K.C. 1,400 EDUCATION.

31 there were 73 Preparatory, Intermediate and Secondary Schools recognised by the Ministry of Education, with xs.094 pupils, and xs3 Centres of Technical Instruction, with s3,94x students. The Queen's University at Belfast had xs3 Professors, Lecturers and Demonstrators, and 1,487 students in 1930-31.

FINANCE.

The greater part of the taxation in Northern Ireland is imposed and collected by the Imperial Authorities; the balance after deducting the cost of collection and of certain services reserved to the control of the Imperial Parliament is paid over to Northern Ireland's Exchequer. Northern Ireland makes a contribution to the cost of the Imperial Services, i.e., Navy, Army and Air Force, National Debt, &c.

Total revenue ...... £11,126,000 £12,233,000 Total expenditure

(including Impe-

rial contribution) £11,100,000 £12,229,000 PRODUCTION AND INDUSTRY.

PRODUCTION AND INDUSTRY.

Agriculture and Live Stoc...—In 1930 there were 3:5,350 acres under corn crops (oats, 306,809 acres), 183,565 under green crops (potatoes, 336,304), 28,507 under flax, 8,006 under fruit, and 478,044 under hay, a total acreage of 1,073,282. The production (1930) in tons was coats, 277,286; potatoes, 856,435; turnips, 753,060; flax, 5,365; hay, 835,972. The Live Stock included 672,776 cattle; 704,100 alseep; 216,315 pigs, 48,338 goats; 104,304 horses; 235 mules, and 8.209 assess

Principal Industries.—Agriculture, shipbuilding and ship repairing, flax spinning and weaving, then bleaching and finishing, distilling, line ne.

inen bleaching and finishing, distilling, linen em-broidering, fruit preserving, food cauning, mill-ing, and the manufacture of textile machinery, ropes and twine, furniture, tobacco, tweeds and woollens, shirts and collars, chemical manures, soaps and candles, clothing, hosiery, pottery, rooting felts, biscuits, matches, &c, the production of aluminium oxide, bauxite, said diatomite or kieseiguhr. Herring fishing and picking is an important industry during the summer months.

Minerals.—About 2,400 persons were engaged in the various mines and quarries in 1930, the principal output being igneous rocks (other than granite) about 415,000 tons, sandstone 187,000 78,000 tons, limestone 207,000 tons, granite 78,000 tons, limestone 207,000 tons.

Manufactures.—Belfast is the principal indus-

trial centre. Linen manufactures provided employment for over 75,000 persons in 1931, the number of spindles being 900,000 The shipyards employed about 13,000 persons in 1930, the output exceeding x68,000 tons.

Scaports.—The principal scaports are Belfast, Londonderry, Newry, Larne and Coleraine. There are regular week-day shipping services from Belfast to Liverpool, Heysham, Ardrossan and Glasgow, and from Larne to Stranraer. Other services are maintained at regular intervals and there are also indirect routes md Greenore and Holyhead and Kingstown and Holyhead.

and notyness and Angstown and Holyness.

Railways.—The principal railways are the
Great Northern, L.M. & S. (Northern Counties
Committee), Belfast and County Down, London
derry and Lough Swilly, and the Clogher Valley.

The total railway mileage in 1930 was 766 miles.

TOURIST ASSOCIATION.—The Ulster Tourist Development Association, 6, Royal Avenue, Belfast.

# Saorstat Eireann—The Irish Free State. THE GOVERNOR GENERAL.

His Excellency James McNeill, born March 27, 1869, appointed Governor General CONSTITUTION AND GOVERNMENT.

UNDER the Irish Free State (Agreement) Act, four ministers shall be members of the Chamber, 1922, the Irish Free State (Sacretat Rireann) is a and a number not exceeding eight chosen from coequal member of the Community of Nations forming the British Commonwealth of Nations. The Constitution, as issued by the Crown, June 16, 1922, contains five Sections, of which Section I. is declaratory of Fundamental Rights (1) The occupality of the 11sh Free State.

(2) Power of government derived from the people, in accordance with the Constitution (3) Irish domicile for seven years, or Irish parentage on either side, conferring Irish untionality, and men and women having equal rights as citizens. (4) Irish the national language, English being recognised as an official language. (8) No titles or honours may be conferred on any citizen, except with the approval or advice of the Executive Council. (6) Liberty of the person involable. (7) Dwelling of each citizen involable. (8) Freedom of conscience and profession of the State inalienable.

Section II. provides for a legislature (Orreachtas) of the King and two houses, the Chamber of Deputies (Dail Eireann) and the Senate (Seanad Erreann), the former elected by secret ballot and by direct vote of all citizens above the age of az years who comply with the existing electoral laws and consisting of not less than one member for each 30.000 of the population and not more than one member for each \$0.000 of the population. The latter, consisting of 56 Senators and of a Senators from each University, elected by all oftizens above the age of 30 years who comply with the existing electoral laws. Every citizen who has reached the age of 21 years is eligible for the Chamber of Deputies; the Senate is composed of citizens who have reached the age of 35 years and have done honour to the nation by reason of useful public service, or who are specially qualified as representing important aspects of the nation's life. Parliament shall hold at least one session each year. Provision is made for the "Initiative" of proposals for laws or constitutional amendments on a petition of 50,000 voters on the register; and for the of 50,000 voters on the register; and for the submission of any bill passed by both houses to a "Referendum" for the decision of the people. In this Section also Article 45 declares that the Parliament (Oreachtas) has the exclusive right to regulate the raising and maintaining of such armed forces as are mentioned in the scheduled Treaty in the territory of the Irish Free State, and every such force shall be subject to the control of the Parliament. Save in the case of national in-vasion, the Irish Free State shall not be committed to active participation in any war without the assent of the Parliament.

Section III. vests the Executive Authority in the King and provides for its exercise as in the Dominion of Canada, by the representative of the Crown. The Executive Council (Aireacht) is responsible to the Chamber, and consists of not more than twelve Ministers (Airi) appointed by the representative of the Crown, of whom

all citizens eligible for election to the Chamber. who shall not be members of Parliament during their term of office, and who, if at the time of their appointment they are members of Parliament, shall by virtue of such appointment vacate then seats; provided that the Chamber may from time to time, on the motion of the Presi-dent of the Executive Conneil, determine that a particular Minister or Ministers, not exceeding three, may be members of Parliament, in addition to the four members of the Chamber above mentioned.

Section IV. establishes a Judiciary, consisting of Courts of First Instance, and a Court of Final Appeal to be called the Supreme Court (Curr Ouchtarach) The Courts of First instance include a High Court (Ard Church, invested with full original jurisdiction in and power to deteror prohibiting religion may be passed. #### THE UNION JACK CLUB.

Waterloo Road, S.E : Tel : Hop. 35xx Patron-in-Chief His Maiesty the King. Patroness-in-Chief . Her Majesty the Queen. Patrons. H.R.H The Prince of Wales, K.G.; H.R H. The Duke of Connaught, K.G.

President : Sir Walter R. Lawrence, Bt., G C.I.E., G.C.V.O., C.B

Vice-President Colonel Sir Henry Streatfeild, G C V.O., C.B , C M.G.

Hon. Treasurer Sir George J. Marjoribanks, K.C.V O.

Comptroller of Club Brig. General Sir Frederick Gascoigne, K C.V.O , C.M.G , D.S O.

This is one of our great National Institutions, where Sailors, Soldiers and Airmen can go when on leave or passing through London; a place where they may obtain at moderate charges good meals and comfortable bedrooms and good means and compressive so a club, including Library and Writing Room, Billiard Room, Baths, Barber's Shop, and also a Club Shop in which articles of everyday me and almost everything that Service men require may be purchased. The Club is open throughout the day and night.

The Union Jack Club was erected by public subscription as a National Memorial to those who had fallen in the South African War, and with had rained in one could arrive wat, and other campaigns, and was opened on July 1st, 1907, by His late Majesty King Edward VII. Membership is open to those below the rank of Officer who are serving on the Active List of the Regular Forces, honorary membership being extended to the Colonial Permanent Forces and Powers visiting England. A limited number of ex-Service Warrant Officers, Petty Officers, N.C.

officers and men may also be elected members of the Club.

The Club is managed by a Council and a General Committee, which includes representatives of the members

A considerable extension of the Club with funds raised in all parts of the Empire to commemorate the services of our gallant fighting forces in the Great War of 1914-18 and to provide increased accommodation was completed in 1913. Since 1926 the Council has been enabled, through the anonymous gift of one of its members 1911 further to enlaws the promise.

bers, still further to enlarge the premises, bringing the number of beds available to 816, as against the original so8 when the ('lub opened.

#### THE UNION JACK HOSTEL.

Exton Street, Waterloo Road, S.E. z. Tel: Hop. 2724. Opened June, 1913. Patron-un-Chief His Majesty the King. Patroness-in-Chief. Her Majesty the Queen. Patron: H R.H. the Duke of Connaught, K.G.

President. Brig.-General Sir Frederick Gascoigne. K.C.V.O., C.M.G., D.S O. Vice-President . Sir Herbert J. Creedy, K.C.B.,

k.c.v.o. Hon. Treasurer: Sir George J. Marjoribanks, K.C. V.O.

Secretary: J. R. Hayward, M.B.E.

Warden. Miss B. B. Morris.

The Hostel provides lodging and accommodation for the wives and children (with or without their husbands and fathers) of members and ex-members of the Naval and Military Forces of the Crown, below the rank of Officer. It is managed by a Council, and though run closely in connexion with the Union Jack Club, the organisation and finances of the two institutions

# The Indian Empire.

The Indian Empire extends over a territory larger than the Continent of Enrope without Russia. Legally, "British India" means all territories governed by the King-Emperor through the Governor-General of India, or through any governor or other officer subordinate to the Governor-General of India; while "India" means British India, together with any territories of any prince or chief under the suzerainty of His Majesty, exercised through the Governor-General of India or through any governor or other officer subordinate to the Governor-General of India (Act 52-3 Viet., c. 63, s. 18). There are tracts of tribal territory on the N.W. and N.E. frontiers under the political influence, though not yet under the administrative rule, of the Indian Government.

Boundaires.—The political boundary of India marches with Persia and Afghanistan from the Gulf of Oman to Povalo Schverkovski on the Taghdumbash Panuir. From this point the frontier—in many parts not yet clearly defined—touches the Chinese Empire and Nepal, till the limits of French Indo-China are reached on the Upper Mckong. The Indian frontier, on leaving the Mckong, marches with Siam till it reaches the sea at Victoria Point, half-way down the Malay pennisha. Beyond the sea the Indian Empire includes the Andaman and Nicolar Islands, the Laccadive and Minicov Islands, Aden and Perin, besides protectorates over Socotra, Bahrein, and various chiefships along the coast from Aden to the Persian Gulf. Continental India, including Bahichistan, reaches from 8° to 37° N. latitude, and from 61° to 101° E. longitude. Delb, the new capital, lies in 77° E. long.

Area and Population.—The total area of India proper is about 1,805,000 square miles, with a population of nearly 353 millions (about three-fourths of the population of the British Empire). The British Provinces, as distinguished from the Indian States, complise 61 per cent. of the area, and nearly 77 per cent. of the population. The details of the 1931 (Tensus (revised totals) are as follows:—

In this table the population shown in the Census Tables of 1922 have been adjusted with subsequent changes of area.

• Districts and Administered Territories

Physical Features.—Excluding Burma, which forms no part of the Indian peninsula, we may broadly divide the country into three sections, viz., the Himalayan region,

the northern river-plains, and the southern table-land.

The Himalayas.—The Himalayas (which lie partly beyond the frontier), with their suthern offshoots, form the natural northern boundary of India. The Himalayan range runs for 1,500 miles from N.W. to S E, with a varying breadth of 150 to 200 miles, and attains a general height of 20,000 feet above the plain, culminating in the loftiest peaks yet measured on the globe—Mount Everest, 29,141 feet, Kunchnjunga, 28,146 feet, and Dhaulagiri, 26,826 feet, near its junction with the Hindu Kush. The line of perpetual snow is at about 16,000 feet. The Himalayas collect and store up water for the plains below. The slopes afford a representation of the tropical zone (especially on the southern slopes to the E.), the temperate zone (particularly to the S.W. of the range), and the arctic zone as the upward journey is taken from the plains. In the Himalayas are several sanatoria, including Murree, Simla, Mussoorie, Naim Tal, and Darjiling. Himalayan vegetation includes such varied species as the tree-ferm, ilex, pinc, oak, fir, deodar (cedar), rhododendron, barley, oats, millet, and many domestic vegetables. The faima are as varied as the flora, and include the bison, musk-deer, yak, wild sheep and goat, bear, elephant, monkey, and tiger, with eagles, partridges, and pheasants. Between the Himalayas and the plains to the S.E. is the great fever-haunted Tarm or Duar jungle, densely forest-covered and full of big game.

The Great Plain .- The northern river-plains, lying at the foot of the Himalayas, comprise the rich alluvial plains watered by the Indus, the Ganges, the Lower Brahmaputra, and their tributaries. At no great distance from one another, four rivers take their rise in the Himalayas. The sources of two are on the north side—the Indus, which flows westward for 1,800 miles, and the Tsan-po or Brahmaputra, which flows eastward for nearly 1,500 miles. The other two, on the southern slope, are the Sutlej, which, after flowing W. and S.W. for 900 miles and collecting various other streams, jous the Indus, and the Ganges, which, during a journey S.E. and E of about 1,550 miles, drains almost all the Bengal plain. The Brahmaputra, after flowing along the northern side as far as the eastern Bengal plant. The Diamilaryn, and including all the S., then to the W., and finally joins the Clarges or miles from where their combined streams enter the Bay of Bengal. Thus the Ganges, 75 miles from where their combined streams enter the Bay of Bengal. Thus the Himalayas supply India with the water gathered on both slopes. The India and Ganges, with their tributaries, are the source of an extensive system of irrigation by canals. The richest, most populous, and most historically famous part of India hes in the basins of these great rivers. Formerly the Gauges was the only great highway of Bengal; it is still the fertiliser and the water-carner. But a close network of railways is increasingly used for transport. The richness of the Indo-Gangetic plain, with its ample rainfall, enables it to support a dense population, almost wholly agricultural. The density of the population rises in some districts to 900 per square mile. On the other hand, in Baluchistan there are only 6 persons to the square mile. The population has increased most in the densest areas, and pressure on the soil is severe in parts of Bihar and the United Provinces. In Northern India. there are two harvests, rabi (spring) crops being reaped in March and April, kharif (nutumn) crops in October to December. In the north we find wheat, pulse, maize, millet, barley, and tea; while in the south, indigo, cotton, sugar-cane, jute, oilseeds, tobacco, opium, and spices are produced. Among the fauna are monkeys, panthers, tigers, leopards, byenas, jackals, squirrels, elephants, deer, crocodiles, and snakes. Salt, mica, and coal are the chief minerals. The Ganges delta yields rice, bamboos, and a large variety of palms. The Aravalli range, the princeval chain of India, divides Rajputana from the Central India States. To the N W. of the peninsula lies the mountainous, barren, and thirtly populated region of Baluchistan.

The Decean.—Just as the Himalayas on the N. and the Himdu Kush and Suleiman Mountains on the N W. form natural barriers of defence for Himalayan, so do the Vindhya Mountains, ruming almost due E from the head of the Gulf of Cambay, north of the Nerbudda River, form a firm southern boundary to the river-plains of Northern India. Southern India, or the Deceau, is a plateau of triangular shape and very old geological formation, bounded on two sides by the Malabar and Coromandel coasts, which converge at Cape Comorin, and on the third by the Vindhyas. The Eastern and Western Ghauts all but complete this environing triangle of mountain ranges. In the extreme N.W., south of the Vindhyas, and parallel to them, but north of the Western Ghauts, we find the Nerbudda and the Tapti flowing westwards, their basins being sharply defined by the Satpura Mountains, which he midway between them. As the Western Ghauts lie close to the coast, and afford no exit for rivers, there are no streams on the Malabar coast south of the Tapti; all the rivers flow eastwards, through defiles in the Eastern Ghauts, into the Bay of Bengal. The four chief rivers are the Malanuddy, in the extreme N.E. (520 m.), the Godavery (600 m.), the Kistna (800 m.), and the Canvery (472 m.), at intervals further to the south. The physical

geography of Southern India has shaped its history: the S.W. coast, shut in by mountains, is very primitive and moves slowly; the S.E., open and easy of access by sea and towards the interior, has made great progress. The mountain slopes of this region, especially those of the Western Ghauts, which rise to 8,000 feet in the Nilgiris, are still covered with the splendid vegetation of primeval forests. Teak, ebony, satinwood, sandalwood, palm, and bamboo abound. The jungles in the E. are very deadly. The tiger, bison, leopard, deer, and various smaller game afford sport. Snakes are found everywhere. In the valleys and on the higher plains many valuable crops are raised, chiefly rice, millet, cotton, oilseeds, coffee, tea, indigo, tobacco, and chinchona. The black cotton soil is very fertile. There is irrigation by dams, wells, tanks, and canals. The southern tableland has furnished considerable supplies of At present the minerals principally worked are coal, manganese ore, mica, minerals. monazite, and gold.

Burma.—Beyond the Bay of Bengal is the large province of Burma, watered by the Irrawaddy and its tributaries and by the Salween. The delta region is flat; further inland are hills and rolling downs, while the north is mountainous. Rice is the chief staple. Millet, cotton, sesamum, and tobacco are also grown. The forests, particularly of teak, make a considerable contribution to the exports. Petroleum is produced on a considerable scale, and jade, wolfram, and rubies are mined. The fauna include monkeys, jackals, tigers, elephants, bison, and deer.

Climate.—About half of India is within the tropics, but the greatest extremes of heat and cold are in the N.W. In the Himalayas the climate is moist and cold. In Northern India it is dry, and the winters are rather cold. In tropical Southern India the climate is more equable. Calcutta, Bombay, and Madras all have an equable climate, owing to proximity to the sea. India depends for its fertility upon the monsoon rains. The S.W. monsoon brings moisture from the ocean south of the Equator, and reaches the west coast early in June and the northern provinces late in June. The mountains arrest these currents and precipitate ramfall, which averages 60 inches in the sub-Himalayan region, 39 inches in the Indo-Gangetic plain, and 30 mehes in the Decean, but is small in Sind and Rapputana. Madras benefits by the N.E. monsoon in the autumn.

Population .- The sixth general census of India was taken on the 26th February, 1931. Population.—Ine sixth general census of minis was taken on the zone remain, 1931. The returns (revised totals) gave a population of 354,968,870, as compered with 318,942.480 in 1921 (for details see p. 641), an increase in the ten years of 10'6 per cent. The census total of 1931 is divisible into 271,749,312 (or nearly 77 per cent.) for British India, and 81,237,564 (or over 23 per cent.) for Indian States. India is not over-populated, for two-thirds of the people live on one-quarter of the area. In Burma, Assam, and elsewhere a much larger population might subsist. There were in 1931 37 towns with a population of over 100,000. Urban areas of over 5,000 people comprise only about 10 per cent. of the

total population.

Caste —Owing to the operation of the caste system India is broken up into a large number of mutually exclusive aggregates, the members of which are forbidden by an inexorable social law to marry outside the group to which they themselves belong. A caste may be defined as a collection of families, or groups of tamilies, bearing a common name, which usually denotes or is associated with a specific occupation. The boundary of a caste may be said to be fixed by the rule restricting intermarriage, but its social status depends on the occupation of its members and their habits in respect of diet. The chief

castes are:—Sheikh (33,388,000), Brahman (14,255,000), Chamar (11,225,000), Ahir (9.032,000), Rajput (8,773,000), Burmese (7,827,000), Jat (7,375,000), Maratha (6,566,000). Religious.—The population by religious in 1921 includes 216,734,586 Hindus (68 per cent. of the total), 68,735,233 Muhammadans (21 per cent.), 11,571,268 Buddhists (3.6 per cent.), nearly all in Burma, leaving nearly 7 per cent. for all other religious, including 4.754,064 Christians (seven-twelfths of whom are in Madras, Travancore, and Cochin), 3.238,803 Sikhs, 1,178,596 Jams (a decline), 101.778 Parsis, and 9,774,611 described as Primitive or Animists, who believe in magic and strive to propitiate impersonal forces. The Muhammadans, who are increasing faster than the Hindus, are influenced by the caste system and other Hindu characteristics. The number of Indian Christians has increased nearly threefold since 1872.

Occupations.—Over 72 per cent. of the population was in 1921 dependent on agricultural and pastoral pursuits. Industrial occupations support 33,000,000 persons, of whom nearly one-fourth are dependent on textile industries. The most important of these are industries connected with cotton, which employ nearly 6,500,000 persons, the majority of whom depend on hand-weaving. The public services comprise over 4,825,000 persons.

Sex -- Marriage is almost universal owing to religious obligations. The movement against infant marriage and enforced widowhood is gaining ground. There were in 1921 over 26,834,000 widows in India. The males outnumbered the females in 1921 in the

The Languages.—India has 222 vernacular languages, of extraordinary variety. languages spoken by 316,056,000 persons in 1921 are grouped in seven families. The principal languages are Western Hindi (spoken by 96,714,000 persons), Bengali (49,295,000), Telugu (23,601,000), Marathi (18,798,000), Tamil (18,780,000), Punjabi (16,231,000), Rajasthani (12,681,000), after which come Oriya, Kanarese, Gujarati, Burmese, and Malayalam. Hindustani, a dulect of Hindi, has become the literary language of Hindustan, and is the lingua franca of India. English is understood by many.

Enumeration incomplete

# A Brief Sketch of Endian Mistory.

ALEXANDER'S invasion of India (326 B C ) is the first landmark of Indian history A dim outhine of earlier events can be traced from the evidences of race and language, from the traditions contained in ancient Indian literature, from accounts by later Greek and Chinese writers, and from coins and inscriptions. The oldest Indian books are supposed to date from about 1500 B C.; they are written in Sanskiit, a language akiii to Persian and to the principal European lan-guages. The writers of these books were Aryans, grages. The writers of these mons were alyans, as lace which, as their traditions indicate, came into India from north of the Hindu Kush. They found in India, and conquered, a population of yellow-skinned type in the Himalayan districts, ;

while in the Code of Manu we find a picture of Indian society, rather as the pitestly caste of the day wished it to exist, than as it actually existed. The ascendancy of the Bahman priesthood over the soldier class of Kshetriyas is represented as fully established. The system of caste, originating in the attitude of the Aryas (kinsmen) to the dark and servile aborigines, generally prevails, and the people are organised in village communities In the sixth century B.C. a new religion arose, called Buddhism. Its founder was Gautama, a prince of the Kshetriya caste, who took the name of Buddha, the "awakened, and died about 487 B.C. His supposed remains were discovered near Peshawar in 1909. His tenets are contained in the *Tripitaka*, the yellow-skinned type in the Himalayan districts, were discovered near Pesnawar in 1900. His and a short, dail-skinned lace, of low civilsate the clon, in the rest of India. Of both these types there are still survivals. The religion and metaphysics of the Argansare to be found in the Vedas and Upanishads, their epics, the Mahabhhadata priesthood. It prevailed widely from \$20 B.C. to and Ramayana, extol their mythical heroes: \$350 AD, but was never quite general, and existed

The principal latest official publications relating to India, are:—Parliamentary Papers (Session 1930-31)—India Finance Act, 1931 (H.C. 120), Moral and Material Progress Report, 1939-30 (H.C. 112); Birma Criminal Law Amendment Act, 1931 (H.C. 120); East India Bidget, 1931-2 (H.C. 128); Constitutional Reforms (Cd. 3700, 3713); Round Table Conference (Cd. 3748, 3778, 3778, 3778); Statistical Abstract, 1931-2 of 1932, 1931-2 (I.C. 128); Constitutional Reforms (Cd. 382), Royal Commission on Labour, Report (Cd. 383), Cawnpore Riots, Report (Cd. 383), Finance and Industry Committee, Report (Cd. 3867), Biuma Rebellion (Cd. 3900); Elections in India, 1932-30 Retini (Cd. 3322) Non-Parliamentary Papers (Stationery Office Publications). Royal Commission on Labour in India, 12 vois of evidence, &c., Round Table Conference Sub-Committee's Proceedings (two parts), Revised Estimate of Revenia and Expenditure, 1930-1; Customs Regulations relating to Passengers' Baggage; Indian Military College, Committee's Report, Home Accounts of the Government of India, 1932-90; Conditions and Prospects of British Index in India, 1932-30. side by side with Brahmanism, which it never succeeded in ousting. At length it lost ground, less through persecution than through a change in popular feeling; and before the twelfth century it had become practically extinct in India itself, though it still flourishes not only in Siam, Cluna, and Japan, but also in Nepal, Burma, and Ceylon. Its decline in India was accompanied by a revival of Brahmanism, much modified.

According to Herodotus the twentieth satrapy of Persia at one time included part of the north-west of India. Alexander (326 B.C) did not penetiate beyond the tributaries of the Indus, though he sailed down the river. his death his Indian possessions fell to Seleucus, whose ambassador, Megasthenes (306 B.C.), has left an account of the country under the rule of Chandragupta, the Greek Sandracottus. gasthenes describes the democratic village communities of the Punjab, speaks of the people as have and truthful and adverse to httgation, and notes the absence of slavery. Asoka (272-231 B.C.), the grandson of Chandragupta, whose edicts on stone pillars throw light upon this period, was a convert to Buddhism, became the State religion Our last contributors to a knowledge of India before the period of continuous authentic lustory are the Buddhist pilgrims from Clima who visited the country between 399 and 695 AD.
The influence of the Greek conquest was

swept away by the Scythians, who poured in many waves, between about 165 B C and 320 A.D., over Northern India. Their imoads left a lasting influence on the character of the population, and profoundly modified the religious beliefs and domestic institutions of the lindus anyth century was a period of confusion. The emperor Harsha (606-648), after many years of fighting, made himself master of Northern India, and ended his reign in picty and peace

From about 650 to 950 anarchy prevailed.
The Arab conquest of Persia, towards the
middle of the seventh century, brought the
successory of Muhammad to the Indua, and in N.W. India they made some temporary acquistions; but three centuries were to pass before the foundations of a dinable Muhammadan empire were laid. It was in 990 that Mahmnd of Ghazni (m Afghanistan) began a long series of memsions into India, no fewer than fifteen expeditions taking place between 999 and 1027, one of which carried hun beyond the Junua, while another ended in the capture of Somnath, in Kathiawar The succeeding dynasties of Afghan kings held power in India for 500 years, but their advance was gradual, for it was not till 1206 that Delhi was taken and the greater part of Hindustan annexed by Kuthud-din, whose memory is perpetuated by the Kuth Minar, near Delhi. The first Muhammadan invasion of the Decean took place in 1294.

THE MOGLL EMPIRE. - The Muhammadan Mongols, or Moguls, after overrunning Central and Western Asia, anneed in 1219, under Genglus Khan, on the frontiers of India, but did not cross the Indus During the reign of the last monarch of the Taghlak line, the famous Tamerlane (or Timur) burst into India at the head of a mighty host, captured and sacked Delli in 1398, and laid waste a great part of Hindustan A period of weak dynasties followed, frequent invasions from without, and general misrule and anarchy within, paved the way for larger conquests by about this time, the Malnattas rapidly extended the Mogul Emperois In 1526 Babar, a direct their territory and influence, conquering Gujarat.

descendant of Timur, overthrew the last of the Afghan kings at Panipat, and founded the Moguli EMPIRE, which at his death extended from the Oxus river in Central Asia to the borders of the Gangetic delta. His son, Humanun (1530-56), lost the whole of the territory conquered by Babar, but recovered a portion of it (including Delhi) shortly before his death. His victor was Sher Shah Sur, who reigned from 1540-1545. Albar the Great, Hamayun's son (1556-1605), spent a long reign in firmly establishing the empire; at his death his dominions extended over Kabul, Kandahar, and all India north of the Nerbudda Moreover, of the Muhammadan kingdoms of the Deccan, Ahmeduagar, Berar and Bidar were also bed, and Bijapur and Gok onda forced to pay tribute. Akbai followed up his conquests by important financial reforms He was tolerant in religion, and just to all classes of his subjects. Among the great men of his time were the Hindin, Todar Mall, his able finance minister, Abul Fazl, the Instorian of his reign; and Faz, the poet Jahangar (1505 27) received in 1516 Sir Thomas Roe, the ambassador of James 1516 Sir Thomas Roe, the ambassador of James 1516 Sir Thomas Roe, the ambassador of James 1516 Sir Thomas Roe, the ambassador of James 1516 Sir Thomas Roe, the ambassador of James 1516 Sir Thomas Roe, the ambassador of James 1516 Sir Thomas Roe, the ambassador of James 1516 Sir Thomas Roe, the ambassador of James 1516 Sir Thomas Roe, the ambassador of James 1516 Sir Thomas Roe, the ambassador of James 1516 Sir Thomas Roe, the ambassador of James 1516 Sir Thomas Roe, the ambassador of James 1516 Sir Thomas Roe, the ambassador of James 1516 Sir Thomas Roe, the ambassador of James 1516 Sir Thomas Roe, the ambassador of James 1516 Sir Thomas Roe, the ambassador of James 1516 Sir Thomas Roe, the ambassador of James 1516 Sir Thomas Roe, the ambassador of James 1516 Sir Thomas Roe, the ambassador of James 1516 Sir Thomas Roe, the ambassador of James 1516 Sir Thomas Roe, the ambassador of James 1516 Sir Thomas Roe, the ambassador of James 1516 Sir Thomas Roe, the ambassador of James 1516 Sir Thomas Roe, the ambassador of James 1516 Sir Thomas Roe, the ambassador of James 1516 Sir Thomas Roe, the ambassador of James 1516 Sir Thomas Roe, the ambassador of James 1516 Sir Thomas Roe, the ambassador of James 1516 Sir Thomas Roe, the ambassador of James 1516 Sir Thomas Roe, the ambassador of James 1516 Sir Thomas Roe, the ambassador of James 1516 Sir Thomas Roe, the ambassador of James 1516 Sir Thomas Roe Sir Thomas Roe Sir Thomas Roe Sir Thomas Roe Sir Thomas Roe Sir Thomas Roe Sir Thomas Roe Sir Thomas Roe Sir Thomas Roe Sir Thomas Roe Sir Thomas Roe Sir Thomas Roe Sir Thomas Roe Sir Thomas Roe Sir Thomas Roe Sir Thomas Roe Sir Thomas Roe Sir Thomas Roe Sir Thomas Roe Sir Thomas Roe Sir Thomas Roe Sir Thomas Roe Sir Thomas Roe Sir Thomas Roe Sir Thomas Roe Sir Thomas Roe Sir Thomas Roe Sir Thomas I. Under Shah Jahan (1627-1658) the Mogul Empire reached the renith of its glory Many stately buildings, including the Taj Mahal at Agra, testify to his magnificence and taste. The close of Shah Jahan's regn was embittered by the rivalues of his four sons Amangzeb (1658-1707) defeated and killed his brothers and kept his father a prisoner till death (1666) Amangzeb had great ability and comage, but religious intolerance, distrust and dissimilation characterised his chequered career. tegn, in some respects splended, ended in failure. He brought the Mogul Empire to its greatest extent by conquering and incorporating all India as far south as Tanjore But from this time the decline of the empire began. Four sons disputed the right of succession, and Bahadur Shah (1707-12) secured the crown. After four short-lived emperors Muhammad Shah (719 48), grandson of Bahadur, came to the throne His vicetoys became rebellious, and so contributed to the success of the Mahrattas, who subdued the Decean About 1774 part of the Decean became practically independent under Nizam-ul-Mulk (ancestor of the present Nizam) In 1738, to avenge an alleged moult, Nadir Shah of Persia invaded India, captured Dellin, gave orders for a general slaughter of the inhabitants, and carried off enormous plunder All the country west of the Indus was lost to the empire On the death of Muhammad, the phantom rulers, Ahmad Shah (1748-1754) and Alamqu II (1754-1759), occupied the throne, and were succeeded by Shah Alam (1759-1806), who came to terms with the Butish.
THE MAIRATTAS.—As the Mogals declined,

the power of the Mahnattas mercased They were Hindus, and their country was in the Western Ghats, to the east of Bombay. The founder of their power was Sivan (1627-1680), a chieftain of the family of Bhonsla, who became famons by his raids in the Decean, and aimed at founding a Hindu kingdom Balap Vishranath (1712-1720) Peishwa, or Prime Minister, succeeded in making that office of paramount importance and hereditary in his family, Sivan's descendants thenceforth holding a merely nominal position. I nder the Peisliwas, aided by Scindia, Hollar, and the Gackwar, who formed independent States

Malwa, Berar, and Orissa. Although they were severely defeated at Panipat in 1761 by Ahmad Shah, the Afghan invader, they remained for some time the first power in India, and were the most dangerous opponents of the English. To-often their rule degenerated into a system of organised plunder. With the Pindaris, a horde of freehooters who followed in their train, they became a scourge to the country. It was not until both Pindaris and Mahrattas were finally overthrown in 1818 that India enjoyed the blessings of internal peace. The Mahratta empire, containing within itself the seeds of disintegration, was fated to bend before the superior sway of Europeans, who had gradually extended their

power in India.

The Sikhs.—The Punjab lay beyond the reach of the Mahrattas. There the decay of the Mogul empire gave the opportunity, not to a nation, but to a religious sect, united by military disbut to a religious sect, united by minor. The cipline, to establish territorial dominion. The founder of the Sikh religiou was Nanak Shah, a near Lahore in 1469. He Hindu reformer, born near Lahore in 1469. He preached the one God, purity of life, and abolition of caste. He had ten successors, named gurus or apostles, ending with Gowind Singh (1708). The sect, though cruelly persecuted, survived, and gradually adopted a political organisation It became a power under Ramt Sinah (1780-1833), who, revolting against the Afghau Anir, by whom he had been appointed dovernor of Lahore, founded the kingdom of the Punjab. The powerful army he had organised brought on the collision with the British, and after two wars the Sikh kingdom was annexed, and became the pro-

vince of the Punjab (1849) EUROPEAN ADVENTURE. - From time immemorial the lucrative trade of Europe with India and the farther East has enormously enriched in turn each nation that has held it. In the 15th certify the was mainly possessed by the Venetians on the European side, and by the Arabs on the Eastern side. The chief trading centres of the Arabs were Calleut, Ornuz, Aden, and Malacca. Seeing the large profits to be derived from this trade, the rising nations of Europe in the 15th century sought to obtain a share. Hence the ardour of the inavigators who set out to discover an ocean route to India The sea route round the Cape of Good Hope was discovered by Vasco da Gama, who anchored before Calicut in May, 1498. From that time until they lost Portuguese enjoyed practically a monopoly of Indian trade The first Portuguese viceroy. Francis of Almeida (1505-1559), established numerous factories and fortresses; while his successor, Alfonso de Almquerque, captured Goa (1510), and extended the Portuguese dominion, notably on the Malabar coast. This dominton for 60 years from 1542 was tantamount to an entire regulation of the Asiatic coast trade with Europe from the Persian Gulf to Japan. It was stained by great cruelty. Up to the union of the crowns of Spain and Portugal in zg8o under Philip II., the Portuguese brought Indian products to Lisbon, whence the Dutch carried them ducts to Lisbon, whence the Dutch carried them to other parts of Europe But when Philip II, on account of the Dutch revolt, shut Lisbon against them, the Dutch were driven to trade directly with the East In 1602, by amalgamating evisting trading companies, they formed "The Dutch East India Company," and the principal Portuguese settlements in the East were grantially engineed by wefer the Portuguese were gradually captured. By 1661 the Portu-

guese held only those remnants of their Indian possessions which they still hold. The Dutch, who had some small trading factories, were in turn forced by the British to relax their hold on India. French and Danish East India Companies were established in réor and 1616 respec-tively. The latter achieved little, but, as will be seen directly, the French had a brief but brilliant period of influence in the middle of

the 18th century.

ENGLISH DOMINION — At the close of the 16th century the English became eager to share in the profits of Indian commerce. After some smaller ventures, the London East India Company was incorporated by Queen Elizabeth by royal charter on 31st December, 1600. There were 217 subscribers of the capital of £68,373, and the official title was "The Governor and Company of Merchants of London trading to the East Indies." A second charter in reog made the Company's privileges perpetual The Portuguese resisted the new competitors, who nevertheless obtained a permanent footing at Surat after several stubborn engagements off Swally in z6zs In z6z5 the British ambassador, Sir Thomas Roe, supported by the Emperor Jahangir, greatly improved the position of the Company. In 1639 the English acquired a strip of land on the east coast, built a factory there, fortified it, and named it Fort St. George; in 2653 this settlement of Madras became a Presidency. Iu Charles I.'s reign rival enterprises led to confusion and piratical excesses, but in 1657 co-operation and discipline were secured by the charter granted by Cromwell to a single company comprising the whole body of merchants. The charter was renewed by Charles II., in whose reign the Company enloyed great prosperity. When, in 166s, Charles II. married Katharine of Braganza, a part of her down from Portugal was the Island of Bombay; in 1668 he trans-ferred all his rights over it to the Company for an annual payment of £10. In 1687 Bombay replaced Smat as the seat of the western Presidency. Although in 1633 the Company had obtained certain treaty rights in Bengal from the Mogul, and in 1651 a factory had learn sgraphing at Hooghie and a factory had been established at Hooghly, yet in that part of India they held no territory as in Bombay and Madras. In 1688 the Muhammadan rulers forced them to abandon their settlement, but being invited to return, they laid, in x690, amid swamp and jungle, the foundations of the Presidency of Fort William, which was destined to develop into the city of Calcutta. In r693 a new charter was granted to the company. In r698 a charter was granted to a rival company called "The English East India Company," to distinguish it from the old "London Company" After a brief period of conflict and trade losses, the rival companies came to terms in 1702; and in 1708 they were amalgamated under the title of "The United Company of Merchants of England trading to the East Indies

When Great Britain engaged in war with France in 1744, the rival Companies of England and France came into collision, with the result that Madras was captured in 1746. Had Duplets been well supported from home, he might have founded a French empire in India. The first reverses of the English were retrieved. by Clive, whose gallant defence of Arcot (1751) was followed up by a series of brilliant movements, culminating in the utter defeat of the French army by Coote at Wandiwash in 1760, and in the capture of Pondicherry in 1761, which completed the rain of the French Company. Since then the territory retained by the French in India has been insignificant, and in it they are forbidien by treaty to hold any considerable, political power with a proponderating influence military force. The tragedy of the Black Hole of throughout India. During the brief second ad-Calcutta (1756) summoned Clive from Madras, and ministration of Lord Cornecalis (1805), and that his victory at Plassey over the Nawab of Bengal

in 1757 made British influence predominant.

Clive was appointed first Governm of Bengal m 1758. In 1760 he returned home, and in 1763 the English were again embroiled in Bengal, but completely defeated their opponents at Buxar (1764). In 1765 (live (now Loid Chve) returned to Brugal as Governor, and before he left finally in 1767 he succeeded in reforming the services, in which great abuses existed. Owing solvers are the company in 1765 received Treaty of Sagonii (1816), which still regulates from the Emperor at Delh the discant or fiscal India's relations with that State. The administration of Bengal, Bihar and Orissa, annexation in 1818 of the territory of the with the Northern Circurs (Madras), and 25,000,000 people came under their government Thus were laid the foundations of England's

territorial dominion in India

After an interval of marule Warren Hastings (1772-85) was appointed Governor of Bengal, and in 1774 Governor-General, on the creation of that office under the Regulating Act of 1773. He vigorously reformed the revenue system and indical procedure. Hastings was Bittsh possessons. He greatly increased the power and tenitory of the Company, not-withstanding the opposition of his Council Mysore in 1760 had been selved by Hyder Ah, a Mussulman adventurer, and a powerful and invetrate enemy of the English. By repelling Hyder Ah's memorable invasion of the Carnatic (1780), and defeating the triple alhance of the Nizau, the Mahrattas, and Hyder Ali, Hastings probably saved British India. On his return to England he was impeached on a number of charges, but acquitted.

The first administration of Lord Cornwallis (1786-93) was marked by a thorough reform of the Company's Civil Service, by the introduction of a permanent settlement of the land revenue, by a reform of the judicial system, and by the third Mysore Wat, in which he deteated Tippoo, the son and successor of Hyder Ali. The rule of Sir John Shore (1793-98) was nueventful. The administration of the Marguess Wellesley

(1798-1805) was distinguished by many important events. Tippoo, as hostile to the English as Hyder, was in 1798 in secret correspondence with the French, who were then dominant in the military councils of the Nizam and of Semdia, were established in Mauritins, and under Napoleon, then engaged in his Egyptian campaign, were annug at a great Eastern Emphe. Lord Wellesley saw the necessity of crushing this dangerous Power, and the Fouth Mysore War ended in the capture of Serngapatan (1799), the death of Tippoo, and the conquest and isstoiation of Mysore to a representative of the family of Huidu Rajas whom Hyder Ali had dethroued. The Treaty of Bassem (1802) broke up the Mahratta confederacy, but led to the Second and Third Mahiatta Wais, which curtailed the power of Scudia and Holkar, and increased the strength and extent of the Company's dominons. Lastly, Loid Wellesley developed, if he did not initiate, a system of subsidiary break in the natural succession justified, in the alliances with Native States, which aimed at interest of the subject populations, the transfer

making the British the one paramount Power, while giving greater security than the balance of power attempted by his predecessors. Wel-leskey doubled the territories of the Company, and transformed a mercantile body into a of Sir G. Barlow (1805-7), Wellesley's policy of

subsidiary alliances was reversed Lord Music (1807-13) established peaceful relations with the Punjab, Afghanistan, and Persia, through the mediation of Metcalfe, Persia, through the mediation of Metcalic, Elphinstone, and Malcolm respectively. On the renewal of the Company's charter in 1813 the monopoly of Indian trade was sholished. Under the Marques of Hastings (1814-23) a severe stringgle with Nepaul ended with the

Mahratta Peishwa enlarged Bombay Presidency to its present dimensions Lord Hastings in the same year crushed the maranding Pindans of Central India, who had devastated the country in all directions. Reviving Lord Wellesley's policy of alliances, he settled on their existing basis the relations of the Supreme Power with the fendatory States of Rajputana and Central India He encouraged education Lord Amherst (1823-8) succeeded Lord Hastings Encroachments on Butish districts by the King of Ava and his insolent refusal of all rediess led to the first Burmese War, which cost 20,000 lives and hearly £14,000,000, but gave to India the provinces of Aracan and Tenasserim, and, practically, Assam.

While Lord William Bentinck was Governor-General (1828-35), steam communication with India was introduced, suitee (or widow-burning) was abolished, educated natives were admitted more freely into the service of the Company, and various reforms were passed affecting education, the liberty of the Press, finance, and instace. The new charter of the East India Company in 1833 abolished the remaining monopoly of Chinese trade, introduced reforms in the constitution of the Indian Government, made the North-West Provinces a separate administration, and abolished the restrictions on the residence of British subjects in India. The resolution of Lord Auckland (1835-42) to support Shah Shuja against Dost Muhammad brought on the first Afghan Wan (1839-42), and the serious disaster attendant on the fatal retreat from Cabul. The administration of Lord Ellenborough (1842-44) saw the conquest of Sind by Sir Charles Napier and its annexation (1843). Lord Hardringe (1844-48) conducted in person the lists Sikh War, and fought a series of severely contested battles, ending with Sobraon (1846).

Lord Dalhousie's administration (1848-56) was fruitful in events. The Second Sikh War resulted. after severe fighting, in the submission of the Sikhs and the annexation of the Punjab (x849). The second Burmese War (1852), deprived the King of Burma of Pegu. Lord Dalhousie promoted the introduction of railways and the telegraph. He established cheap postage, promoted steam navigation with England vid the Red Sea, and opened the Ganges Canal. His annexation policy was much criticised at home. It proceeded on the principle that British being

In 1849 this "doctrine of lapse" was applied. He took the first step in currency reform by to Satara, and in 1853 Jhansi similarly became British territory, while on the death of the last of the Mahratta Proces of Nagpur, his territory was annexed, and became the Central Provinces in 1853 In 1856, after repeated warnings to the tyramical ruler of Oudh, that kingdom was also amexed, without bloodshed or fighting.

Earl Canning (1857-62), who succeeded Lord Dalhouise, left England pledged to pursue a policy of peace, but he was destined to face the greatest crisis that has threatened British inle in India. A mutiny of sepoys broke out on the toth May, 1857, at Meerut, and spread through the whole Bengal Army Delhi was for some months in the possession of the rebels, and many chiefs joined the revolt—The siege of Delhi, the massacre at Cawnpore, the relief of Lucknow, and the Central India campaign stand out among the stiring events of that momentous Although the control of Indian affairs was vested in the Cabinet through the Board of Control, the great mutmy was laid to the charge of the East India Company, whose eventful annuls were brought to a close by the transfer of the entire administration of India to the Crown

INDIA UNDER THE CROWN—The "Act for the Better Government of India" established the authority of the Crown , and a Proclamation to the Pinices, Chiefs, and People of India, dated the xst Nov., x858, amounced the resolution of Her Majesty to assume the government of the territories in India "heretofore administered in trust by the Honomable East India Company" Legislative Councils were established Lord Canning was succeeded in 1862 by Lord Elgin, who, however, died in Nov., 1863.

Sir John (Lord) Lawrence (1861-69) reformed the finances, which had been seriously bin dened by the heavy military expenditure necessitated by the Matiny. His administration was marked by the Bhutau Wai (1864) and by the terrible Orisas Famine of 1865 He encouraged irrigation Lard Mano (1865-72) effected many adminis-

trative reforms, instituted State railways, promoted the construction of roads and causls, and mangurated the system of provincial finance, which has since been extended.

During the tenure of office of Lord Northbrook (1872-76) the late King Edward VII, then Prince of Wales, visited India. The Viceroy devoted attention to finance and to famine relief 1875 the reigning Caekwar of Baroda was deposed for misrule and disloyalty

Lord Litton's administration (1876-80) was made eventful by a terrible famme in Southern India In 1877 the and by the Second Afghan War Queen assumed the title of EMPRESS OF INDIA

The peaceful term of the Marquess of Repon (1880-84) was marked by the extension of local self-government, and by fiscal, judicial, educational, and other reforms

His successor was the Marquess of Dufferin 1884-88) In 1885-6 occurred the Third Burmese War, by which Upper Burma with the Shan States was annexed. The N.W frontier of Afghanistan was delimited, the frontier of India strengthened, and the army increased. National Congress met in 1885 The first Indian

The Marquess of Lansdoren (1888-94) continued his predecessor's policy of strengthening the army and consolidating British influence on the frontier. The Indo-Afghan boundary was defined,

of a native State to the British Government. and a serious outbreak in Manipur was suppressed. closing the Indian mints to the free coinage of silver. He reconstituted the Legislative Councils in 1892 by introducing a more popular element, and conferring a limited right of interpellation

and criticism in financial matters.

The vicerovalty of Lord Elynn (1894-99) was full of events. In 1895 an outbreak in Chitial made necessary a large unlitary expedition to relieve the garrison Plague broke out in 1896, and has raged more or less severely ever since In 1896-7 an area of 307,000 sq. ms, with a population of 70 millions, was visited by a grievous famine—In 1897 the border tribes from Chitral to Baluchistan 10se against the British garrisons. In the Tirah campaign that followed over 40,000 troops were employed. Several boundaries were settled under Lord Eigm, notably those with Russia on the Pamirs and with France on the Mekong. The fron-tiers of Afghamstan, Persia, and China were also defined. The general Customs tariff, abolished in 1882, was reimposed in 1894.

Lord Curzon (1899-1904 and 1904-5) succeeded Lord Elgin. In 1899 the pound sterling was made legal tender in India concurrently with the inpee, at the exchange of Rs 15 to £r. In 1899-1900 occurred one of the worst famines on record, the tracts affected covering 475,000 80 ns with a population of 60 nullions. Loid Curzon's term of office was a period of reform and reconstinction. He appointed Commissions of linguity on irrigation, railways, universities, agricultural banks, excise, and police, all of which suggested important reforms. instituted agricultural banks and departments, and mitiated legislation to free the cultivators from the money-lenders The famme codes were amended. A new province, under the Conneil, was created, called the North-West Frontier Province (1901) The Aden and the Frontier Province (1901) The Aden and the Perso-Afghan boundaries were delimited. An Imperial Cadet Corps of native princes and nobles was mangurated Educational policy was reviewed and reforms introduced A muchneeded reform of the police was undertaken, Lord Curron also seemed a perpetual lease of Beiar from the Nizam In 1904 a mission with a military escort proceeded to Tibet, and secured favourable treaty. During Lord Curzon's Ampthil occupied the post of viceroy. Lord Ampthil occupied the post of viceroy. Lord Curzon was renewed. The absence in England for a few months in 1904 Lord Viceroy reduced the dimensions of Bengal, and constituted a new province, called Eastern Bengal and Assam, by combining parts of Bengal with Assam. He carried out great reforms in the Army in conjunction with Lord Kitchener (appointed Commander-in-Chief in 1902), but, differing from certain proposals made by the latter, and finding that he lacked the support of the Home Govern-

ment, he resigned (Aug., 1995).

Lord Minto succeeded in Nov., 1995.

Prince of Wales (now H M. King ( George) nade a tour in India during the winter of 1905-6. For some years after 1905 there was agitation among Bengalis owing to the partition of Bengal, and a Seditious Meetings Act was passed in Nov, 1907 In his Budget speech in 1907 the Secretary of State. Viscount Morley, foreshadowed important reforms in Indian administration, designed to associate the people mo e closely with the Government. He

nominated two Indian members to his own Conneil, and an Indian member to the Governor-General's Council He appointed Commissions to inquire into railways, into the possibilities of financial and administrative decentralisation, and into the conditions of factory labour, and action was taken on their reports. In 1908 the unrest in Bengal assumed an anarchical character. To mark the fiftieth anniversary of the transfer of India to the Crown a royal proclamation was issued in Nov. 1908, promising extended self-government. Owing to the continued unrest in 1909 and 1910, a Press Act, to control printing

presses, was passed
Lord Hardinge succeeded in Nov, 1910 The Indian Legislative Council in June, 1911, pro-hibited indentined enigration from India to Natal after 1 July, 1912, and a new Seditious Meetings Act was passed. A great Dinbar was held at Delhi on 12 December, 1911, by H M King George, to announce his Coronation On this occasion the King-Emperor also made announcements of new and fai-reaching steps in Indian policy, viz., the transfer of the seat of Government from Calcutta to Dellu, and the creation of a Governorship for the presidency of Bengal, of a Lieut-Governorship for Bihar, Chota-Nagpur, and Orissa, and of a Chief Com-missionership for Assam. Delhi was chosen as the capital on geographical, historical, and political grounds The provincial changes involved a partial rescission of the partition of Bengal and the abolition of the province of Eastern Bengal and Assam created in 1905 Bengal as recon-stituted is a compact Bengali-speaking province, placed midel a Governor in Comed A new province, Bihar and Orissa, was formed, includ-ing Chota-Nagpin and the Sambalpur district Assam agam became a separate province, under the reconstituted proa Chief Commissioner vinces came into existence on r April, 1912 In pulsuance of recommendations by the Decentialisation Commission, enhanced powers in respect of appointments and expenditure were granted to local governments having a quasi-permanent provincial settlement over, greater permanency was arranged for in financial settlements with the provinces, the control of the Government of India being relaxed In Dec, 1912, the Vicercy took formal possession of the new headquarters at Delhi The State entry was marred by an attempt on the life of the Viceroy The outbreak of The the fire of the viceroy inc observas of The first War in August, 1914, was the signal for an outburst of loyalty and devotion to the King-Empleor on the part of the princes and peoples of India. Practically all the uning chiefs placed their military forces and the issources of their states at the disposal of the Government.

Following on the onthreak of war serious distinbances were started in the Punjab and elsewhere by emigrants returning from Canada and the United States imbied with revolutionary ideas Order was restored as a result of measures taken under the Defence of India Act, which was taken inidet the Defence of India Act, Which was passed in March, 1915 Lord fliatding's term of office as Viceroy was extended from November, 1915, to March, 1916 The Viceroy amounced in March, 1916, that it had been decided eventually to abolish the system of indentined emigration from India Lord Hardinge put forward proposals for post-war constitutional reforms.

of unrest and the development of an agitation for constitutional changes towards self-government, or, in its extreme form, " Home Rule for India.

The Public Services Commission, appointed during Lord Hardinge's administration, reported. Towards the end of 1917 the Secretary of State visited India in connexion with a development of constitutional progress. The Bombay Government took the first steps towards obligatory primary education, a policy of more complete local self-government was decided on by the Government of India. The influenza epidemic spread to India, and it is estimated that over 12 million deaths in British India and Indian States resulted The Industhial Commission, appointed in 1936, Issued a roport. In 1939 a bill was introduced into Parliament embodying the proposals of the Montagu-Chelmsford Joint Report," and eventually passed During the year considerable distress occurred in consequence of the partial failure of the 1918 antumn crops throughout Northern India and the Pennsula, and lehef measures were undertaken Serions disturbances in the Punjab and Dellu, resulting in many deaths, followed on a "passive restrance" movement, mangurated by Mr. Gandhi against the "Rowlatt" Bills, introduced by the Government of India, on the recommendation of the "Rowlatt" Committee, for renewing some of the powers with which the Government had a med themselves during the War to deal with sedition The inuider of the Anni and the subsequent events in Afghanistan were followed by an inroad of Afghans and some frontier tribes into India, Government of India The "Sadler" Commission on the Calcutta University reported during the year, and made diastic proposals for recasting the Indian secondary and innversity educational system The Home Parlament, by rules, laid down the details of the constitution of the new Central and Provincial Governments (see pp. 655, 657) The Annr's representatives visited India and discussed with officers of the Indian Government the possibility of a resumption of more friendly relations. Fighting with the Mahsuds on the North-West frontier continued throughout the year, in consequence of which the Vicercy amounced Government's intention to occupy Central Wazinstan, and to continue the railway from Jamind towards the Khyber. Finther steps towards employing more largely Indians in the various Government services and for the improvement of conditions of service and pay of both Emopean and Indian members of the same were taken. The recommendation of the Exchange and Currency Committee for the linking of the impec to gold and the adoption of an exchange rate equivalent to one-tenth of the gold contents of the sovereign, i, an exchange rate of Rs to to the f, was adopted A High Commissioner for India in London, with a separate establishment, responsible to the Government of India for certain agency work, previously per-formed by the India Office, was appointed. The Army in India and the Medical Services Com-mittees respectively reported. The Army in India Committee attempted to determine the part to be played by the Army in India in a scheme of Imperial Defence and to analyse the steps which must be taken to make the Army, both in its Lord Chelinsford succeeded in April, 1916 administration and its personnel, more efficient.

The year 1917 was marked by certain symptoms and more attractive to the right type of soldiers.

In January, 1921, the new Indian Legislature, Provincial Councils, and the Chamber of Princes, were inaugurated by the Duke of Connaught.

Lord Reading succeeded in April, 1921. The battle between constitutionalism and revolution continued. A conflict between Sikhs at Nankana resulted in many deaths. Mr. Gaudhi, the Ali brothers, and their associates, continued to advocate non-co-operation with the Government and boycott of the reforms. The utterances of the Ali brothers forced Government to order their arrest. The Moplahs (Muhammadan fanatics of Malabar) resisted the ordinary processes of law, and a widespread outbreak of violence ensued which forced the authorities to take strong military measures for its suppres-Frontier disturbances and fighting continued. Failure of the crops in some parts necessitated the opening of relief works. Special missions were sent to Afghanistan and Tibet. The Railway Committee reported and recommended drastic changes, including the termination of the system of management of railways by Government companies domiciled in England. The Jails Committee reported, and Government announced its intention to abolish the Andamans penal settlement.

In November the Prince of Wales visited India. In some the Government arrested Mr. Gaudhi, who was sentenced to six years' imprisonment. The Government found it necessary to give to Ruling Princes some measure of protection against attacks in the Press.

The Fiscal Commission (appointed in rost) reported and advised the adoption of a policy

of protection.

The Hon. V. Srinivasa Sasti i visited the Dominions, as a representative of the Government of India, to discuss with the leaders of political thought the disabilities of Indians in the selfgoverning Dominions. Twenty-three Acts and Regulations supplementing the criminal law were repealed. A Central Advisory Board for

Railways was established.

In 1923 Burma was constituted a Governor's Province The "Inchcape" Retrenchment Committee, appointed in 1922, reported and recom-mended a total reduction in the Budget of Rs. 1912 crores. The Government accepted the principle of Protection, but declared that it should be applied with discrimination; hitherto the Indian tariff had been a revenue tariff. A trade Convention was concluded with Afghanistan. A Bill was passed providing for the removal of existing racial distinctions in the criminal procedure applicable to Indians and non-Indians. The new frontier policy further developed by the completion of various roads for mechanical transport within Waziristan and along the Derajat border: Jandola and Razmak were held by regular troops pending the completion of this road programme. the completion of this road programme. At one imperial Conference, a Resolution was passed recommending each Dominion of the Empire concerned to set up a Commission to consider, in conjunction with a Commission of equal number from India, how far the principle laid down by the Imperial Conference of 1987. that Indians lawfully resident overseas should not suffer derogation of rights of citizenship, had been given effect to and to what extent it could be further applied. Conspiracies and methods of violence to further political aims were revived during the year, and the Bengal Government was given special powers to deal with violent crime. The Punjab was greatly disturbed by the Sikh invasion of the Nabha State. The Royal Commission on the Superior Civil Services, appointed in 1943, reported and recommended financial improvements for the Indian Civil and other Services. Further Indianisation of the Services was recommended. During the year a Legislative Council was set up in Coorg.

Early in 1925, the Swarajist leader, Mr. Dus, repudiated the policy of violence, but asked in return for the cessation of "repressive" measures. A committee was appointed to enquire into the difficulties arising from or inherent in the working of the Constitution, and recommended many alterations, particularly that the control of the Secretary of State should be relaxed in purely Indian matters. The terms of reference did not, however, extend to the larger question of a complete revision of the Constitution, contemplated in the Montagu-Chelmsford scheme of 1018. The Viceroy came home to confer with the Home Government, and on his return to India announced the decision that the moment for such an enquiry had not arrived The Government extended the policy of protection by granting a bounty on steel manufactured m India. The Khyber Pass Railway, 27 miles in length, from Jamund—some three miles from the entrance of the Pass-to Landi Kotal, on

the Afghan border, was opened. In 1926 the Finance Member announced, for the fourth year in succession, a balanced budget, and that, consequently, more expenditure on medical research, education, sanitation, &c, was contemplated. The Cotton Excise duty

was abolished.

It was decided to reconstruct the Royal Indian Marine as a combatant force so that India may ultimately undertake her own naval The Government of India decided to prohibit the export of opium for medical purposes, thus taking the lead in initiating the measures for which the Geneva Protocol provides. Lord Irwin succeeded Lord Rending as

Viceroy in April, 2026.
In the United Provinces a Bill was passed by facilitating occupancy tenune and for the prevention of unauthor el imposts by land-lords.

The Royal Commission on Indian Currency and Finance recommended that the gold value of the rupes should be fixed at xs. 6d., that the currency authority should be put under a statutory obligation to buy and sell gold or gold exchange at appropriate prices to maintain the ratio, that a central bank should be created apart from the Imperial Bank and that measures should be taken to establish a gold standard for India Government announced their intention to adopt the ratio of zs. 6d. and to pass the necessary legislation to put the matter on a statutory basis.

Following the success of the Government mission for the suppression of slave trading in the Hukawuy valley an expedition was sent to the Kachin tribal chiefs in Burma with the object of endeavouring to persuade the chiefs to agree to the abolition of the system of tril al slavery in the area lying between the head waters of the Irrawaldy. In Nepal the slave liberation scheme, formulated by the Prime Minister of that State, was completed at a cost of £275,000.
Important changes in the administration of

the State of Hyderabad were made by H.H. the

Nizam following representations by the Supreme Government.

During the year there was a recrudescence of communal and religious strife between Moslems and Hindus, and serious riots, with great loss of lives, occurred in most parts of India, particu-larly in Kohat, Calcutta and Delhi. The Government of Bengal was obliged to proclaim a state

of emergency.

The elections for the Indian Assembly and Provincial Councils were held towards the close of the year.

In 1927 a continuance of the measures for the protection of the Indian steel industry, in a modified form, was recommended by the Indian Tariff Board, whose main proposals were accepted by the Government of India. It was also decided to protect the cotton textile in-dustry against competition in cotton yaru produced under conditions which enable such yarn to be produced at a cost below that at which it can be produced in India, by an alteration in the import duty on cotton yarn, and to abolish the duty on imported mill stores, etc. An Act for the registration of trade unions came into force. The rupee was stabilised by legislation, at xs. 6d., and a bill for the establishment of an Indian Reserve Bauk was introduced. The Bombay Back Bay Reclamation Committee recommended the carrying on of a certain portion of the work, but that it should in future, as far as possible, be undertaken by

contract agency.

A substantial and progressive Indianisation of the Indian Army was recommended by the Sandhurst (Skeen) Committee in order that, by 1952, 50 per cent. of the cadre of officers should be Indians

A settlement was reached with the Government of South Africa on the question of the position of Indians in the Union. A Public Services Commission was formally constituted. The new Council House at New Delhi was opened. The Indian Princes met in conference to consider their future status. His Highness, the Maharajah of Patiala, sanctioned a scheme of compulsory education in his State. Slavery was abolished in the State of Kalat (Baluchistan).

In the Home Parliament the Indian Navy Bill and the Indian Church Bill were passed. The latter provides that the Church in India shall

be an autonomous body.

In November the Home Government au-Commission, with the ltt. Hon. Sir John Simon Report. It recommended that the Viceroy, as Chairman, to report to what extent it is not the Governor-General in Council, should desirable to establish the principles of responsible government in India, or to extend, modify or

restrict the degree of responsible government.
In 1928 the Commission visited India, but was unfavourably received by many who were dissatisfied with the terms of reference. Boycotts and sympathetic strikes were organised. Towards the end of the year the Commission succeeded in securing the offer of the co-operation of most of the political parties and groups previously Sir Harcourt Butler as Chairman, to consider the relations between the Paramount Power and the Indian States, with special reference to the financial and economic relations between British India and the States.

The Royal Commission on Agriculture in India (appointed in 1926) issued its Report and the first step to carry out its recommendations was taken by the opening of a Conference in India to draw up schemes for co-ordinated action.

In 1927 it was announced that in future, the number of direct vacancies open to Indian candidates at Sandhurst will be doubled, that a certain number of vacancies will be reserved for Indian officers holding the Viceroy's commission. and that Woolwich and Cranwell will be open to Indian aspirants for King's Commissions.

In 1929, power was given by the Appellate Jurisdiction Act to appoint Indian judges, etc., as additional members of the Judicial Committee of the Privy Council for the hearing of appeals hom India. The Statutory Commission continued its labours, but met with a considerable amount of opposition organised by some of the political groups in India. Indian leaders attempted (but with little success) to draw up proposals acceptable to the main re-cognised political parties for submission to the Commission. A bill was introduced in the Assembly providing for the removal from India of non-Indian communist agents and a few days later an attempt was made by communists to distroy members of the Assembly by throwing bombs at the Government benches. The Bill was passed later as an Ordinance owing to the refusal of the President of the Assembly to allow its discussion on the ground that some of its provisions were sub pudge in view of a trial of some conspirators then proceeding. There was considerable unrest in parts of India during the year, particularly in Bombay. An Act was passed providing for the investigation and settlement of trade disputes; under it strikes and lock-outs in utility services are penalised, strikes and lock-outs having any object than the furtherance of a trade dispute within the trade or industry in which the strikers or employers are engaged, or are designed to inflict severe general and prolonged hardship upon the community and government are illegal.

A Royal Commission was appointed to report on the existing conditions of labour in industrial undertakings in British India, ou the health, efficiency and standard of living of the workers, and on the relations between employers and employed. A Committee was also appointed to consider the general problem of road

development.

An Act was passed providing that the age of marriage shall not be less than 14 and the age of

consent not less than 16.

in future be the Agent of the Crown and that important matters of dispute between states themselves, between the states and the Paramount Power and between the states and British India should be referred to independent Committees for advice. The Committee dealt with the relationship between the Paramount Power and the financial relations between British India and the states, particularly the claim of the states for a share in the maritime customs, the proceeds of which are enjoyed at present exclusively by British India.

In view of the impending issue of the Report of the Statutory Commission it was decided to extend the term of the Central and Provincial

legislatures, thus postpouling the elections beyond the end of the year. In 1930 the outstanding event was the issue of the Report of the Statutory Commis-

sion (the Simon Commission). The report was unanimous A survey of the facts, containing an analysis of the trend of political thought in India was first published (Cind 3568), then, after a short interval, the Commission's Recommendations (Cind, 3569) These, though in no sense revolutionary, foreshadowed many changes: First, the separation of Burms, whose political association with India is not based on any natural or racial affinity, but is a mere accident of history; and, secondly, a number of radical reforms in the constitution of India proper. Broadly these may be summarised as the grant of the greatest possible measure of independence to Local Governments within their own sphere, and the substitution of a Federal system in place of the existing mrangements Measures were also proposed whereby representatives of the Indian States will join with representatives of Butish India for the discussion of matters of common concern in a "Council of Greater India," to be appointed not by Statute but by Royal Proclamation

A notable feature of the Statutory Commission's scheme was its insistence on the principle that the constitution to be framed should be such as will not require to be revised and overhanded by external authority at stated intervals, but should contain within itself provision for adaptation by a process of natural growth, to meet new circumstances and changing conditions, thus avoiding the unsettleof a federation for All-India was held up as one to be attained by degrees as the Fendatory States come to realise the desirability of entering into closer political relations with British India; and the reconstruction of the consti-tution of British India on a federal basis was advocated as an essential preparatory step

towards that ultimate objective

It was proposed that the Provinces should be provided with enlarged financial resources Their Governments would no longer be "dyarchic," as under the Montagu-Chelinsford Constitution, but unitary, every Member being required to accept joint responsibility for all acts of the Administration Ministers, whether of the Administration Ministers, whether chosen from the local Legislature or not, were to be nominated by the Governor, and would have charge of those branches of the administration which are now "reserved" to the Official Side of the Government, e.g. control of the Police and maintenance of Law and Order The Commission recommended that reserve powers should be vested in the Governor for such essential purposes as the protection of minorities and of the rights of the Services, and the carrying on of the Government in any emergency such as the breakdown for any reason of the normal arrangements; that Legislatures should be enlarged, the franchise-basis widened, and constituencies reduced to more manageable size Moreover, a certain elasticity was recognised as indispensable, and measures were indicated whereby each Province may advance towards self-government on the lines found best suited to its individual needs, provided always that the rights of minorities were not invaded by any constitutional changes thus effected.

Other recommendations were that in the Central Government the "Legislative Assembly" should become the "Federal Assembly"; the Council of State, or Upper House, to continue with its existing functions and constituent elements.

The Commission suggested that it may be desirable to treat the defence of India as a matter falling within the responsibility of the Governor-General (advised by the Commander-in-Chief as at piesent) as representative of the Imperial Authorities instead of as a function of the Governor-General in (Executive) Council in association with the Indian Legislature The possibility that this suggestion might be held to delogate from the prestige of the Indian Government was recogmsed . the Commission made it only because on any other basis they regarded the multary problem as an "almost manperable" obstacle to of the "progressive realisation of responsible government." It was submitted that so government." It was submitted that so long as British troops are required for the defence of the Indian frontier the British Parliament cannot surrender to any subordinate or independent authority effective control in this sphere

The Commission's Report, published in June, was received with a storm of disapprobation in Indian political circles, and was the signal for a recrndescence of the non-co-operation movement m an acute form There were serious riots and bomb outrages in various parts of India. In the course of the measures taken to restore order Mr. Gandhi and immerous other political leaders were brought to trial, convicted, and

sentenced to terms of imprisonment

In September the Round Table Conference was convened in London as the next stage in the process of settling the future constitution

On the North West Frontier there were reper cussions of the intest in India itself liepeated raids by tilbesinen necessitated defensive and ietaliatory measures, particularly by the Royal Air Force.

General elections to the Indian and Provincial Legislatures took place in the antumn

In 1931 the various Committees of the Round Table Conference presented their Reports, one of the most important being that of the Federal Relations Sub-Committee outlining the constitution of a Federal Government of India. The representatives of the Indian States had expressed then willingness to consider their entry into a The Conference adjourned in Federal system January. Later, there was considerable disorder in India, but eventually negotiations resulted m an agreement for the cessation of civil disobedience and of the boycott of English goods

New Delhi was inaugurated in February. The Earl of Willingdon succeeded Lord Irwin as

Viceroy in April.

The Round Table Conference re-assembled in I ondon in October, and during the month discussed the composition and functions of the proposed Federal Legislature, the Federal Court, the representation of minorities, the States' places in the Legislature, &c. On November 1 it was announced that the Federal Structure Committee's Draft Report (subject to alterations and amendments by the Committee) contained proposals for the constitution of a Federated India, with a scheme for a Legislature, consisting of (a) an Upper House (aco members), composed of representatives of the Provinces and of the States, "elder statesmen," and a small proportion of members appointed by the Viceroy; (a) a Lower House (300 members), including 100 representatives of the States elected by the free of the Royal Titles At.) Queen Victoria stituences, and special representatives of the assumed the title of Impress of India. By landloid interest, commerce and labour. Other proposals were that members should be required to take an oath of allegiance, that Bills to be commerced to the second provincial Legislative Councils were entered to the second provincial Legislative Councils were entered to the control of the council of the Governor-General to call a Joint Session in case of disagreement, and that the same comes should be followed in financial legislation.

During the year it was decided to convene a Round Table Conference to consider the future constitution of Burna and the relations of Burnia with India. The position of the North West Frontier Province in the proposed Federation was considered by a Committee appointed by the Government of India. The Royal Comnussion ("Whitley") on Labour, appointed ungg, submitted their Report and recommendations In September the Finance Minister amounced that, in consequence of the developments in the first half of the year, it was proposed to impose a temporary surcharge of as per cent, on all but one of the existing taxes, including the salt tax, applicable to all customs and excise duties, income tax and super-tax, but not to the customs duty on exports. Inland postal and telegraph rates would be increased by 50 per cent The duty on artificial silk piece goods would be raised from 20 per cent to 40 per cent.; the duties on boots, brown sugar and electric bull's would be mercased in varying degrees; machinery and dyes would be taxed to per cent, and raw cutton 1,2 anna a pound IMPRIMAL LEGISLATION—LegISLATION for India

in England is chiefly of a constitutional or financial character. The Regulating Act (1773), which created the first Governor-General, a Conneil of five members, and a supreme court with a chief judge, was the first statute that recognised the East India Company as a ruling body. Pitt's India Act (1784) left the business and most of the pationage to the Court of Directors. but gave the supreme civil and military authority to a Board of Control, whose president repre-sented India in the House of Commons In 1793 the Company's charter was renewed; in 1813, on a further renewal of the charter, the trade of India was thrown open; while on the next renewal m 1833 the Company's monopoly of the China trade was abolished, and they became a non-commercial governing body. In 1853 the Company's charter was renewed for 1653 the Company's chatter was Inferred in the last time, and the Indian Civil Service was thrown open to competition By "An Act for the Better Government of India" (1858), all the territories governed by the East India Company were transferred to the Crown, and all the powers exercised by the Company and the Board of Control were vested in the Secretary of State for India, assisted by a Council Under this Act as amended by Acts of 1889, 1907, 1915 and 1919, at least one-half of the members of Conneil must have served in India for 10 years, and must not have left India more than 5 years prior to their appointment. The number of members may be ra and must not be less than 8, and is at present 9. Their term of than 8, and is at present 9. Their term of tomar office is now 5 years, with power of extension races.

assumed the title of Empress of India. the Indian Conneils Act (1909) the inperfal and provincial Legislative Councils were en-larged, their powers of interpellation and criticism enlanced, and the elective element extended, special provision being made for the representation of landholders, the professional classes, Muhammadaus, and European and Indian traders and planters. The executive connects of Madras and Bombay were mereased in size, and power was given to constitute executive councils in provinces under Lient-Governors Government of India Act (1912) created a Governor of Bengal, established an Executive Council for Bihar and Oussa, and authorised the creation of legislative conneils in provinces under Chief Commissioners The Indian High Comts Act (rgrr) empowered the Government of India to increase the number of High Court judges from 15 to 20, to establish new High Courts, and to appoint temporary judges. An Act to consolidate the Imperial Legislation relating to the Government of India was passed in rors The Government of India Act, 1919, confers on provinces a larger measure of independence of the Government of India; it distinguishes the functions of local governments and local legis-latures from the functions of the Governor-General in Council and the Indian Legislature; it provides for the devolution of authority in respect of provincial subjects to local governments, for the allocation of revenues to those governments and for the use under the authority of the Governor-General in Council of the agency of local governments in relation to central subjects, it provides for the transfer of some provincial subjects to the adminis-tration of the Governor acting with Ministers. It gives borrowing powers to local governments. It lays down that the number provinces shall be governed, in relation to reserved subjects, by a Governor in Council, and in relation to transferred subjects by a Governor acting with Ministers, appointed from among the elected Members of the local legislative Council. It confers extended powers on local legislatures. For the Supreme or Central Government, it provides that the Legislature shall consist of the Governor-General and two Chambers, viz., the Council of State and the Legislative Assembly It provides for the appointment of an Auditor-General and a Public Services Commission on India.

By the Government of India Act, 1929, His Majesty may by Orden in Council transfer the control of the military government of Aden to such person or authority as may be specified in the Order.

INDIAN LAW—The law administered in the Indian courts consists mainly of: (z) The enactments of the Indian Legislative Councils (imperial and provincial) and of the bodies that preceded them; (a) statutes of the British Parliament applicable to India; (3) the Ilindia and Muhammadan laws of inheritance and domestic law; (4) the customary law affecting particular castes and races.

## The Gobernment of Endia.

EMPEROR OF INDIA-H.I.M. GEORGE V.

Secretary of State-The Right Hon. Sir Samuel Hoare, Bt., G.B K , C.M.G., M.P.

THE SECRETARY OF STATE FOR INDIA is the head of the Indian Administration in England, and as a member of the Cabinet he is solely responsible to, and represents the supreme authority of, Parliament. Subject to the provisions of the Government of India Act and rules made thereunder, the Secretary of State can impose his orders on the Government of India. In matters requiring secrecy (e.g., foreign policy and the affairs of Indian States) the Secretary of State can act on his own authority without consulting his Conneil, and in most other matters can overrule the majority of his Conneil. Indian Government business in England is transacted at the India Office and at the office of the High Commissioner for India (see page 24 25).

The king-Emperor appoints the Governor-General, the Governors of the 9 major Provinces, (Bengal, Madras, Bombay, the United Provinces, Bihar and Orissa, the Pinjah, the Central Provinces, Assam and Burma), the Commander-inchief, the Members of the Executive Councils of the Governor-General and of Governors, and the Judges of the High Courts. The term of these appointments, except judgeships, is usually 5

VOBI N.

Subject to the Secretary of State's direction, the supreme executive anthority in India, in both civil and military affairs, is the Governor-General in Conneil The Governor-General's Executive Council now contains 7 members including the Commander-in-Chief (three of whom must have served in India to years), as well as himself Ordinarily, the opinion of the majority prevails, but the Governor-General is empowered in special cucumstances to overrule the majority. In accordance with the Government of India Act, 1919, and rules thereunder, the Indian Legislature consists of the Governor-General and two Chambers, viz., the Conneil of State and the Legislative Assembly (see pp 655, 657 as to their constitution). Except as otherwise provided by or under the Act, a Bill is not deemed to have been passed unless agreed to by both Chambers The Act confers powers on the Governor-General of securing essential legislation in emergencies, subject to disallowance by His Majesty in Council, of returning Bills for reconsideration, and of vetoing proposed legislation affecting the safety or tranquility The Indian Budget is of British India submitted to both Chambers, and is voted on by the Legislative Assembly except in regard to certain specified heads, but the Governor-General in Conneil can act, notwithstanding a refusal or reduction of grants, where essential to the discharge of his responsibilities, and he may authorise expenditure necessary for the safety and tranquility of British India or any part thereof. Differences of opinion between the two Chambers may be referred for decision by the Governor-General to a joint meeting of members of both Chambers appointed for the Although the Government does not command a majority in the Indian Legislature, it is necessarily given the power to reject adverse votes, since its responsibility is not to the Indian Legislature, but to Parliament.

The seat of the Supreme Government is at Delhi the summer headquarters being still at Simla.

Business is conducted by 9 Departments— Finance, Foreign and Political; Home; Legislative; Commerce; Industries and Labour, Educa-tion, Health and Lands; Army; and Railway. Each Department is in the charge of a Secu-tary to Government (the Foreign and Political Department has both a Foreign and a Political Secretary), and is under the care of a member of the Viceroy's Executive Council, who has authority to deal with affairs of minor importance, and to select what is worthy of the consideration of the Governor-General and his The Governor-General himself superintends the Foreign and Political Department. The Finance Department deal, with public accounts, loans, taxation, opium, currency, banking, mints, &c. The Foreign and Political Department conducts relations with external politics, relations with Foreign States, frontier tribes, relations with Indian States and Fendatories within the limits of India, and, through its Political Residents and Agents in the various Indian States, supervises their administration and regulates their relations with the paramount Power. The Political Residents in the Persian Gulf and Muscat look after the commercial and political interests of India in those quarters. The Home Department deals in those quarters. The name Department wears with the internal politics, civil service, indical affairs, prisons, politic, &c. The Legal Member of Council takes charge of Government Bills in connexion with the Legislative Department The department of Commerce deals with trude and shipping, ports, &c. The department of Industrics and Labour deals with industries, stores, labour, public works, post-office, telegraphs, civil aviation, communications, irrigation, factories, &c. The Army is under the Army Department, of which the Commander in Chief has charge in Council. The Education, Health and Lands Department has the control of education, local government, sanitation, land revenue and surveys, agriculture, forests, foodstuffs, &c. agriculture, famine, meteorology, Railway administration is entrusted to a Radway Department, which is in the charge of the Commerce Member of

British Iudia is divided into 15 Local Governments and Administrations, viz: — Under Governments and Administrations, viz: — Under Governors, Madras, Bombas, and Bengal, still termed Presidencies, the United Provinces, the Punjab, Bihar and Orissa, the Central Provinces, Assam, and Burma; under Chief Commissioners, who are under the numediate authority of the Governor-General in Council, the North-West Frontier Province, British Baluchistan, Delhi, Almer-Meiwara, Coorg, and the Andaman and Micobar Islands.

The Governors of Madras, Bombay and Bengal are permitted to communicate direct with the

Secretary of State.

The unit of administration throughout British India is the District, the executive head of which is the District Officer, called Collector-Magistrate or Deputy-Commissioner, as the case may be. In subordination to a Commissioner, who corresponds direct with the Provincial Government,

he has control in every department of administration, and is the responsible head of his and Ondh, the Punjab and Burma, and a Chief jurisdiction. There are 273 Districts in British Court in Oudh. Appeals may be carried to the Eng-

tration, and is the responsible head of his jurisdiction. There are 273 Districts in British India.

There are 273 Districts in British India.

There are separate High Courts for both civil and Court in Oudh. Appeals may be carned to the English Privy Council. The Central Provinces, Berar, Corr, Sind, and the North-West Frontier Procriminal cases in Madras, Bombay, Bengal, Bihar vince have each a Judicial Commissioner's Court.

#### CONSTITUTION OF THE TWO CHAMBERS OF THE INDIAN LEGISLATURE. COUNCIL OF STATE.

## President, Sn Henry Monorieff Smith, C.I.E.

## LEGISLATIVE ASSEMBLY.

## PROVINCIAL GOVERNMENTS AND ADMINISTRATIONS.*

Under the Government of India Act, 1919, and rules made theremoder, the local governments are given a large measure of independence of the Supieme Government. The Act distinguishes the functions of local governments and local legislatures of the Provinces from the functions of the Governor-General in Council and the Indian Legislature. The Supreme Government is given authority over certain subjects, classified as "Central," such as defence, political relations, italiways, taniffs, &c. Other administrative heads, classified as "Provincial"—viz., local self-government, public health, education, public works, water supply, land revenue administration, famine tellef, agriculture, exise, administration of justice, &c., are wholly or partly landed over to Provincial Governments with responsibility, subject to certain limitations, within their own areas, for administering them. In the nine major or "Governors" Provinces—i.e., Madras, Bengal, Bombay, the United Provinces, Bihar and Onissa, the Central Provinces, the Punjal, Assan and Bimma—provincial subjects are finithed divided into "reserved" and "transferred subjects," the administration of, and responsibility for, which rests with the Governor and hims Eventive Conneil and with the Governor and Ministers respectively. Ministers are chosen from among the elected members of the

* The areas and populations of the separate provinces are for British territors only. The population figures are according to the Census of 1932

Under the Government of India Act, 1919, and alles made therennder, the local governments are given a large measure of independence of its Supreme Government. The Act distinguished the functions of local governments and inshes the functions of local governments and including the Provinces from the inchons of the Governor-General in Council the discharge of the repossibilities and the Indian Legislature. The Supreme The Act legislates for a transition from a

The Act legislates for a transition from a bureancratic to a self-government system and for the gradual transfer of more subjects to the Ministers. Matters of departmental or minor importance are dealt with, as a rule, by the Governor, his Council, and the Ministers sitting in conclave, but the decision on reserved subjects rests with the Governor in Council, and that on transferred subjects with the Ministers, subject to the Governor's intervention and control ject to the Governor's intervention and contol

Legislative Councils have an elected majority, and normally a life of three years, but may be sooner dissolved by the Governor The pievions sanction of the Governor General in Council is required to the introduction of certain classes of Provincial Bills. The Governor has powers of veto in regard to proposed legastation affecting the safety or tranquility of his Province or any part of it, or of another Province, and can seeme legislation essential to the discharge of his responsibilities for reserved subjects. Such Bills minst be sent to the Governor-General for the signification of this Majesty's pleasine, but in emergencies the Governor-General may ascent to them, subject to disablewance by His Majesty in Conneil. The

Governor has powers of assenting to, of withholdovernor has powers or assenting to, or within our assent to, or of returning for reconsideration, other Bills, but must in certain circumstances send them for consideration to the Governor-Gueral, who may reserve them for His Majesty's pleasure

Provincial Budgets are voted on by the Legis-

lative Councils, but the Governor has power to act, in respect of a demand for reserved subjects, notwithstanding a refusal or a reduction of grants, if the demand is essential to the discharge of his responsibilities for the subject, and in cases of emergency he can authorise such expenditure as may be necessary for the safety or tranquility of his Province. Certain heads of expenditure do not require an annual vote, a deadlock is thus avoided in case of irresponsible action by the Legislative Council

in the matter of supply

Of the members nonmated to the Indian Legislature and Provincial Legislative Councils some represent certain communities and interests. Males over 21 (18 m the case of Burma) years of age possessing certain qualifications (residence within the constituency and the possession of certain property qualifications, the payment of land revenue, rent, local taxes, income-tay or municipal rates) are eligible for the franchise Women are not qualified for registration, but the disqualification may be removed in certain culmistances in any Province, or m all. The franchise is low, and gives the vote to small cultivators and some wage carners The electorate of the fourth general election comprises over 8,744,802 persons, of which nearly 398,000 are women.

(1) MADRAS (area, 142,260 sq miles; pop 46,748,644) was not only the oldest, but the most important of the three original Presidences before Chive's conquest of Bengal, though it was small in extent until the annexation of the Crimatic in x801 With a const-line of 1.730 miles the province has no good natural harbour, but an artificial harbour has been constructed at Madias at great expense The province is not naturally fertile, though irrigation systems in the river deltas have enormously increased the produce of the soil, and have yielded a large profit to the State Rice, millet, and other food-grams, otlseeds, cotton, indigo, spices, tobacco, tea, &c , are cultivated. Manganese ore is mined and exported Madras is served by the South Indian and by the Madras and Southern Mahratta Rulways, the latter connecting it with Bengal on the north and Bombay on the west Bengal on the north and Bonnay on the west About 89 per cent. of the people are Hindus. There are 1,770,328 native Christians, mainly Roman Catholics Many natives of the Presidency emigrate to Binima and Ceylon, some only temporarily. The languages principally spoken are Tainil, Telingu and Malayalan Madinia (182,007) and Trichinopoly (141,640) famous for their Hindu temples, are the chief cities after the capital

(3) BENGAL (area of newly-constituted province, 76,843 Eq. miles, with population of 50,122,550) was placed under a Lieutenant-Governor in 1854. The old Bengal Presidency included practically all Northern and Central India, but subsequently the province consisted of part of Bengal proper with Bihar, Orissa, and Chota-Nagpur. Fifteen districts of Eastern Bengal were detached in 1905 and combined with Assam, while one district from the Central Pro-Assam, while the district from the Central Tro-vinces was added to Bengal. This partition was revoked in 1911, and Bengal now includes five Bengali-speaking divisions. About 51 per cent.

Indian Midiand) eastwards; south-eastwards is of the population are Muhammadaus and 43 per the Madras and Southern Mahratta system; cent. Hindus The principal languages are Rencent. Hindus The principal languages are kengali and Western Hindi For the most part the province is a great alluvial plain, very populous and productive The chief products are rice, jute, olisceds, sugar, tobacco, silk, tea, and coal. The Rast Indian Railway is the great artery of the Ganges Valley. The Eastern Bengal Railway, running north, and the Bengal-Nagpur, south, from Calcutta, are also important. Important cities are Dacca (138,518), now the second capital, and Howrah (222,488), a great jute-manufacturing centre adjoining Calcutta

These figures include the Shan States and Chin These figures include the Shan States and Chin Hills. Many miningrants come from Bengal, Madhas, and China. Tenasserim and Arakan were amnexed after the first Burinese warm 1826, Pegin after the second war in 1852, and Upper Burina and the Shan States after the third war in 1885. The Shan States form a minor administration distinct from that of Burina though under the same Executive Government and not subject to the jurisdiction of Burina though under the same Executive. tion of the Burna Legislature. The province is thinly peopled, but, owing to remarkable prosperity, the population has increased xx per cent in 10 years The mhabitants belong to numerous tribes, who are distinguished by a variety of manners, languages, and religious Burmese and Shangale are the chief languages Buddhism, now almost confined to Burma, so far as the Indian Eminie is concerned, is the religion of 85 per cent of the people. The Burmese are much better educated than the natives of India proper, education being conof Lower Burma is flat but above Prome there is upland, hilly country Rice, the main product of the delta tegion, is largely milled at Rangoon and exported The principal export after rice is teak, which comes from the extensive foiests of Burma and the Shan States, and overland from Siam. Burma is fauly rich in minerals, especially petroleum, rubies, jadestone, and wolfram, The Irrawaddy and its chief tributawolfram. The Irrawaddy and its chici triouta-ries, the Chindwin, the Shweli, and the Myttinge, form important waterways. The main stream is navigable beyond Bhama, 900 miles from its month, and carries much traffic. There are considerable exports by land to Western China The Burma Railways have reached Myitkyina, on the Upper Irrawaddy, while a branch has been built to the Shan States, which lie in the Salwm basm.

The districts it comprises (81b., Quetta, Pishin, Thal-Chotlah, Nushki, Zhob, Chagai, Nasnabad and the Bolani were acquired partly from Afghanistan by the treaty of Gindaniuk (1899), partly from the Khan of Kalat by minangement. Baluchistan consists largely of mountains and sandy deserts, and is sparsely populated. A large pair of the people lead a pastoral, nonad life. In religion they are Smini Muhammadans, and Pashto is the chief language The Afghan-Baluch frontier was demarcated in 1896-7. To Chaman, on this frontier, a railway runs vid Quetta and is continued to Minjawa. The Khan of Kalat, the head of a loose confederacy, receives about £79,000 per anium for quit-rents, subsidy, &c. British troops occupy Quetta, commanding the Bolan Pass, and have the treaty right to occupy any other position.

1911, to move the capital of India and its seat of Government from Calcutta to Delhl

Aden and Perm —From old time the pening of Arabia and lyng on the Red Sea tradeoute between Enrope and the East, has been an important trade centre. It stude decayed after the Portuguese discovery of the Cape route, but with the opening of the Sucz Canal it regained more than its old importance. It was occupied by the Butish in 1839. It is mow a great cooling-station and port of call, and an emportum for the trade of the adjacent African and Arabian coasts. It is the only tortified point between Egypt and Bombay, and may be regarded as an outpost of the Indian Empire. Aden and Perm —a small infortified island serving as a coaling-station at the southernentaine to the Red Sea, occupied in 1852—form part of the Bombay Presidency, and have an area of 80 square inters and a pomination of 50,809. Aden is a free port. The chief industries are salt and eigenetic manns and animumition is subject to special regulations. The total seaborne trade in 1920-30 was £10,173,000. In 1920-30, 1,712 Vessels called at Aden, and 556 at Perm. The Bitish Government has treaty engagements with, and subsatises, the neighbouring Arab tribes, both inland and along the coast (Hadramaut), from the Staats of Babel-Mandeb to Muscat territory at Ray San

Aden: Political Resident, Lt.-Col. B. R. Reilly, CIR, O.B. K. (activa) . per mensen Rs. 3,500 The Kuria Muria Islands, to the S of Oman, have been in British possession since 1854. In 1834 the East India Company occupied Solicita (area, 1,400 Sq. miles), 150 miles from Cape Giardafni, which has a pastoral Muhammadan population roughly estimated at 5,000, mainly Arabs. A formal protectorate was established in 1886. The Sheikh receives a small subsidy, and is pledged not to cede the island to any foreign Power.

## INDIAN APPOINTMENTS.

THE higher civil administration of Butish India is recruited from four sources—x Open competitive examination in Rugland and India a The Indias Army. 3. The patronage of the Secretary of State. 4 The patronage of the Local Governments.

The Civil Service of Indus.—The annual examination ordinarily commences in Jondon July-Angust Candidates must be over 21 and under 24 on Aug. 1 in the year of examination. Application for permission to compete must

on NYMENTS.

be made on or before June 1, on forms that can be obtained from the Secretary, Civil Service Commission, London, W. 1. Examination fee, £3. Selected candulates are on probation in England for one or two years, and receive an allowance of £300 if of European donlicile, of £350 if of Indian domicile, if they pass their probation at one of the Universities or Colleges approved by the Secretary of State, conduct themselves well, and comply with all the rules laid down for

their guidance A thal examination is held in Indian law, language, &c. A first-class passage to India will be engaged for selected candidates. or to execute the usual covenant and to prois not extensive. Appointments of Chaplanis
ceed to India, all allowances received must of the Church of England and the Church
be refunded. The salary of a covenanted civil
of Scotland to the Indian Ecclesiastical estabislaments are normally made, on the comments of the Church
is not extensive. Appointments of Chaplanis
of Scotland to the Indian Ecclesiastical estabislaments are normally made, on the comments. be held in India can be obtained from the India Office, London.

The Indian Army.-Copies of a pamphlet giving full information regarding conditions of service may be obtained, on application, from the Military Department of the India Office The following is a summary of the principal points. Candidates for commissions in the Indian Army are required to pass the Army Entrance Examination held by the Civil Service Commissioners Candidates must be between 18 and 19 years of age (in the case of Indian candidates the age limits are 18 and 20 years). Of the cadetships for the and 20 years) Of the cadetships for the Indian Army offered, some are allotted to King's India ('adets nominated by the Secretary of State for India, the remainder being offered to candidates in the order of their passing the entiance examination. A few direct appointments to the Unattached List for the Indian Army are made by the War Office from candidates nonnuated by the principal Universities in the United Kingdom. A few direct appointments are also offered to officers of the Territorial Army and Supplementary Reserve between the ages of az and 25 who undertake the final examination of the Royal Military College, Sandhurst, under arrangements made by the War Office. At the end of the period of training at Sandhurst, cadets recommended for commissions are gazetted to the Unattached list for the Indian Army. On appointment to an Indian regiment, an officer s mitial pay is at the present moment Rs 486 (£36) per month. Regulations and examination papers can be obtained from His Majesty's Stationery Office, Imperial House, Kingsway, W.C.

Indian Police Force (Higher Grade) .- A competitive examination is usually held in London and other centies in June of each year in conjunction with the Army and Air Force Examination A fee of £4 is required from candidates examined in London, and a fee of £5 from those examined in other centres Save as provided in the regulations a candidate must be a European British subject Indian and Burmese candidates are eligible if they have been resident in the United Kingdom have been resident in the united ainguon for not less than five years. Candidates must be above 19 and under 21 years of age on Aug x; must be unnarried, and if they many before reaching India must forfeit their appointments. Applications to compete at the examination must be made on forms to be obtained from the India Office, Whitehall, London Successful candidates are required to undergo a strict medical examination, are examined as to their ability to ride. tion, are examined as to their ability to ride. Free passage to India is granted to probationers. Their initial pay is Rs. 350 per month, plus an overseas pay of Rs. 100 per month in the case of probationers with non-Indian donnele. The pay proceeds by annual merements to Rs. 200, plus overseas pay of £30 a month, and thence to Rs. 1,350 per month, with

overseas pay of the same amount, subject to efficiency bars, with prospects of promotion to higher posts

from amongst candidates nominated by the Indian Chaplanicies Board of the Church of England and the General Assembly's Committee on Indian Churches respectively. Church of England candidates must be between 27 and 34 years of age, and Church of Scotland candidates must be under 34 years of age. On appointment chap-lains receive a salary of Rs. 600 per month, using by annual increments to Rs. 1,050 per month, plus

overseas pay of £30 a month.
Indian Railway Service of Engineers.—The Secretary of State in Council from time to time makes a number of appointments of Asst Executive Engineers on Indian State Railways, In making these appointments he acts with the In making these appointments he acts with the advice of a Selection Committee Application forms can be obtained from the Secretary, Services and General Dept., India Office, Whitchall, London. Every candidate must have attained the age of zr, and not attained the age of z5 on Jan. 1 of the year in which the examination is held. Candidates must produce evidence that they have obtained one of the Invasity degrees of presend one of the contractive degrees of presend one of University degrees or passed one of the caaminations specified in the Regulations, and must have had at least one full year's practical experience of civil engineering. Those whose qualifying diploma has been obtained without a college course must have had a full three years of such practical experience. Every European candidate must be a British subject of non-Asiatic domicile. All selected candidates are on probation in the first instance on an initial pay (including overseas pay) of Rs 525 a month and are required to execute agreements for three years, at the end of which period, if they have given satisfaction, their services are ictained. The pay rises by increments to Rs 1,025 in the 9th year and to Rs 1,675 in the 24th year of service, with possibilities of promotion to higher posts. From time to time a number of appointments of Asst Executive Engineers in the Public Works Dept. in India are made under regulations, which are generally the same as for the Indian State Railways

Indian Forest Service -- In making appointments, the Secretary of State for India in Council acts with the advice of a Selection Committee Applications for appointment must be made on a printed form to be obtained from the India Office, printed form to be obtained from the India of the Wintehall, London, S.W. r. The normal age huits are over so and under 24 on the rat May of the year of candidature Candidates must be British subjects and must not marry before reaching India. Any breach of this condi-tion will entail forfeitine of appointment. Vacancies are few in number, and do not occur

every year Further information regarding these and other Indian appointments can be obtained on application, from the Services and General Department, India Office, Whitehall, London, S.W. z. Pay, Leave, and Pension Regulations of the Indian Services are contained in the Civil Service Regulations and other Statutory Rules, which can be consulted at the India Office,

# THE FINANCES OF INDIA (CENTRAL GOVERNMENT AND PROVINCIAL GOVERNMENTS) FOR THE YEAR ENDED MARCH 31, 1930.

(In lakhs of rupees )*

# SEPARATION OF CENTRAL AND PROVINCIAL FINANCES

The Government of India Act, 1919, was designed inter alm to secure a greater measure of independence for Provincial Governments, and to this end provision was made, in the Act and in Rules subsequently published under authority of the Act, for the dehnutation of the functions of Government as between the Government of India and the chief Provincial Governments, and for the definite assignments to each of these Provincial Governments of specific revenues of their own Effect has been given to these measures of devolution in the mne "Governor's Provinces," viz.: Bengal, Madras, Bombay, the United Provinces, the Punjab, Bilian and Orissa, the Central Provinces, Assam and Burma and in the Province of Coorg As regards these provinces the functions of Government have been classified as either "central subjects" or "provincial subjects." A general authority to control all matters coming under the latter head, subject to certain expressed provisos, is devolved upon the Local Governments concerned.

The sources of revenue available to Local Governments for the purpose of defining their administrative charges consist, in the main, of the receipts from those provincial subjects which are levenue-producing, the principal heads being Land Revenue, Irigation, Stamp Duties and Excess In addition, a local Government is given a small share in any expansion of Income Tax (otherwise a "central" source of revenue) that may be due to an increase of the total assessed incomes within the Province over that of reac-zi.

When the division of the sources of revenue was made between the Central and Provincial Governments, it was realized that the Central Government would be left insufficiently provided It was therefore arranged that an annual contribution should be made by eight of the local Governments to the Central Government. The annual contributions fixed at the outset aggregated 933 lakins of rupees. They were not, eacept in case of emergency and with the sanction of the Secretary of State, to be subject to increase, and should reduction of the aggregate be found possible, reductions were to be made in fixed proportions from the quotas of the several Provinces. The general policy pursued has involved a progressive reduction of the provincial contributions with a view to their intimate cessation. The Budget for 1928-29 provided for the remission of those portions of the contributions which had not been per manently remitted at the close of the previous year.

The revised financial arrangements outlined above came into force from April x, rgax, as from that date all "provincial" revenue and expenditure ceased to be included in the estimates and accounts of the Central Government. In the case of Coorg the separation was made on April x, rga4.

various railways taken over on the transfer of the lines, and the capital value of liabilities undergoing redemption by way of terminable annuities. The interest-bearing obligations and certain interest-bearing assets of the Government of India amounted to Rs. 643 crores (£483 million) in India and £387 8 million in Eugland. The excess of interest-bearing obligations over interest yielding assets amounts to Rs. 194 erores (£145 million) Apart from Rs 29 of erores in cash, bullion and securities held on I leasury Account, the Central Government held on March 31, 1930, £40 million in the Gold Standard Reserve.

LAND REVENUE -This is the oldest and the most important source of revenue The State is the paramount landlord in India, and the land revenue is the State's share in the rent of the soil. In most of Bengal and Bihar and Orissa, about one-fourth of Madras, and part of Assani the land revenue has been permanently fixed, elsewhere generally the assessments, or settle-ments, are revised periodically (usually once in The nature of the settlements zo or 30 years) varies in different provinces In parts of Bengal and Bombay, the greater part of the United Provinces, the Punjub, the N.W. Frontier Province, and the Central Provinces the settlement is with large proprietors or proprietary village communities (zamindari), and the estate is assessed as a whole. Elsewhere (especially in Butma, Berar, Bombay and Smd, Assam, and most of Madras) the rangatwari tenure prevails, and each raigat, or peasant proprietor, holds direct from the State In temporarily settled zamindari districts the land revenue usually amounts to about 50 per cent. of the rental pad to the landlord by the cultivating tenant, while in temporarily settled ralyatwari districts the revenue varies from 20 per cent. of the gross produce down to much smaller proportious, averaging about 8 per cent Private improvements are exempt from assessment. The gross land revenue paid to the State (Central and Provincial Governments) in 1929-30 amounted to Rs. 3,347 laklis (£25,103,000).

THE OPIUM REVENUE—Poppy may now be grown only in parts of the United Provinces and in the Central Indian (Malva) States Except in these States the manifacture is a Government monopoly. Bengal opium is citlier sold direct to the Governments of Borneo, Netherlands Indies, Hong Kong, Straits Settlements, &c. or issued to the Evense Department for local consumption In addition a substantial quantity is supplied to the Medical Department for medical purposes, and by export to the United Kingdom for sule to chemists The gross revenue from Bengal opium, including the value of opium sold by the Excise Department for consumption in ; India, was £3,287,000 in 1929 30. The expenses of production, &c , were £356,100. Formerly, most of the opium exported from India was consumed in China; but the Government of India, in furtherance of the efforts of the Chinese Government to suppress the growth and cousumption of opium in China, decided in root to reduce progressively the amount of Indian opinin exported to Chua, and as from March 31, 1927, export of Indian opium to China is prohibited. In 1926 the Government of India announced its intention to restrict the export of opium except for medicinal purposes

Excise -Licence fees and duties are levied on the manufacture and sale of intoxicating liquors,

opium, and other drugs. The revenue amounted to Rs. 2,041 lakhs (£15,309,000) gross in 1929-30 (Central and Provincial Governments).

CUSTOMS. - The net receipts amounted The net receipts amounted as s. s.r. lable (£38,458,000) in rosp-30. (For tariff see p 671) The export duty on rice yielded rry lakins (£387,000). The export duty on jute produced 464 lakins (£3.478,000) The duty on motor split and keroseue amounted to 374 lakhs (£2,808.000). The protective special duties on iron, steel, &c, yielded 320 lakhs

(£2,326,000)
INCOME TAX is levied on non-agricultural incomes at the following rates:-Rate of Tax

In the case of companies and registered firms, whatever the total meome, the rate is a6 pies in the super

Super-tax is leviable in addition to ordinary income tax on meomes of Hindu individed families at lates ranging from 1 anna 3 pies to 6 annas 3 pies in the rupce on meonics over Rs. 75,000, and on the taxable incomes of companies above Rs 50,000 at a flat rate of ranua in the rupee. In the case of individuals, unregistered firms, and other associations of individuals not being a registered firm or a company, the rate ranges from 9 pres to 6 annas 3 pies on incomes in excess of Rs. 30,000 Rs 1,706 laklis (£12,798,000) were received from taxes on income in 1929-30.

STAMPS.—Stamps yielded 1,4xx liklis gross £x0,593,000) in 1929-30. About two-thirds of the revenue is from court fees and one-third from commercial stamps

SALT.—The salt duty was reduced from Rs 21/2 SALT.—Ine sait duty was reduced from Rs 2½ to Rs. 28 manud (821b) in 1903, to Rs 1½ to 1905, and to R 1 m 1907. It was mereased to Rs. 1½ on March 1, 1915, to Rs 2½ from March 1, 1923, and reduced to Rs. 1½ from March 1, 1924. Its 676 lakhe (£5,073,500) were received from salt in 1929—30.†

Forests -About 107,000 square miles of forests are reserved and scientifically worked by the State, while about 123,000 square nules besides are under State control The revenue from are under State control

The revenue from forests amounted to Rs 613 lakhs (£4,594,000) in 1929-30. A third of the revenue comes from

POSTS AND TELEGRAPHS -The Post Office in 1929-30 conveyed 1,392 million of letters, postcards, newspapers,&c , and issued over 40 million of money orders. Inland letter rates are the lowest in the world. The length of telegraph wire, including cable, in India on March 31, 1930. wire, including cable, find and match 32, 1936. was 563,400 miles, and the number of paid messages sent in 1929-30 was 19½ milhon The capital outhly amounted to Rs. 1,455 lakhs (£10,912,000) at the end of 1929-30. The Indian Postal and Telegraph services were amalganuated on April 1, 1914. The combined services showed for the year a loss of 62 lakhs (£468,300).†

o 12 pass = 1 snna, 16 annas = 1 rupee, 13; rupecs = £1 (statutory rate) † See p 633 as to the proposed increase of duties and charges

RAILWAYK.— Nearly all the railways in India are owned by the State and administered by and worked by companies. The mileage open for traffic on Maich 31, 7930, was 41,794 Of the mileage open about 50 per cent was on the standard gange (5½ ft.), and about 42 per cent on the metre gange. On March 31, 1930, the total capital at charge was 18 85g cores (£62,550,000). The net earnings of the railways in 1939–30 amounted to 4,059 lakhs (£30,445,000), showing a percentage of 47 on total capital at charge. The number of passengers "originating" was 634 million long Raids of 47 on total capital at charge. The number of passengers "originating" was 634 million, and the goods traffic amounted to 874 million long. Rates are very low, third-class passengers travelling on the average about four miles for a penny "The net gain to the Central Government from "Budget Lines" administered from funds under its direct control was 4 to crores in 1939-30. To meet the contribution (6 x crores) payable to general revenues, 2-08 crores were withdrawn from the Reserve Fund. The total capital expenditure on State and other railways in 1939-30 was 3,252 lakhs (£4,171,000).

IRRIGATION.—The total capital outlay on State irrigation works up to Maich 27, 1939, was \$59,790,000, which, apart from the advantages to cultivators and protection against famme, yielded a profit to the State, after payment of interest charges, of about £1,852,000. The area irrigated by Government irrigation works, evoluting the Indian States, in 1928-29 amounted to 30 7 milhon acres, while the annual value of the crops raised amounted to over 11/5, times the total capital evpended on the works. Two-fifths of the irrigation revenue comes from the Punjab.

HOME CHARGES—The net expenditure in 1292-30 to £25,167,000. The main items were.—Interest on Railway Debt and Annutics, £8,652,000. Interest on Ordinary Debt, £4,862,000 Interest assumed in respect of British 5 per cent. Wal Loan, £836,000, Stores, £3,646,000, of which £3,469,000 was for Mainic and Military Stores; payments for British forces, troop service, &c., £3,659,000, Army non-effective charges, £3,597,000; Civil annutics, civil and unlitary, £2,278,000; Find longly payments, civil and unlitary, £2,278,000; Inome administration (£412,500 less £117,500 contributed by HM Trensury), £304,640 in connection with new offices, Aden contribution, £247,000. The expenditure of the Indian Government in England is met by bills or telegraphic transfers drawn on India by the Secretary of State, and sold by him in London for stelling

CURRENCY—The principal com in use is the silver inpec, containing 165 grains of fine silver and 15 grains of allox, and weighing in all 180 grains toy. Up to 1893 the Indian Mints were open by law for the unrestricted comage of silver into rupces. Owing, however, to the almost continuous fall in the value of the rupce from 187x to 1893, legislation in the latter year closed the mints to the public, with a view to eventually fixing the eveluance. For a time the rupce continued to fall, but sib-sequently it rose, and between 1898 and 1916, was practically stable at 18.4. The Act of 1899 made the British sovereign legal tender in India at the ratio of 15 rupces to the sovereign, the rupce, however, remaining also legal tender to any amount, but the 1140 was

altered to to rupees in 1520. In 1509 it was decided that half the profit on silver coinage should be applied to capital expenditure on railways; the other half of the profit, and the whole of the interest, being added to the Gold Standard Reserve. In June, 1512, it was decided that no portion of the profit was to be used for railway purposes until the total sterling assets of the Gold Standard Reserve amounted to \$25,000,000. From April 7, 1521, the interest on investments in the Gold Standard Reserve, when that Reserve reaches \$4,000,000, is appropriated in reduction of the rupee securities created for the special purpose of the Currency Reserve. The total receipts from profit on coinage, interest and discount, and profit by exchange up to March 31, 1523, and profit by \$2,001,876 Of this sini \$1,123.655 has been used for capital expenditure on railways, \$2,886,217 has been transferred to the Paper Unrency Reserve in reduction of created inpessecutities and \$12,444,795 has been transferred to Revenue, \$442,715 to the Revenue Equalisation Fund (of which \$23,748 has since been transferred to the Gold Standard Reserve On March 31, 1537, the investments of this fund in sterling securities amounted to \$23,759,000 (estimated value), while \$1,085 was held in cash in England, and \$2,125,000 deposited in gold at the Bank of England and \$6,247,200 held in gold in India. India has a paper currency. The \$1,22,55,50,500 deversible of the Royal Mint was established at Boulbay \$6,100 held in mintal and the received of the Royal Mint was established at Boulbay \$6,100 held in mintal and \$6,000 held in Boulbay \$6,100 held in Boulbay \$6,100 held in Boulbay \$6,100 held in Boulbay \$6,100 held in Boulbay \$6,100 held in Boulbay \$6,100 held in Boulbay \$6,100 held in Boulbay \$6,100 held in Boulbay \$6,100 held in Boulbay \$6,100 held in Boulbay \$6,100 held in Boulbay \$6,100 held in Boulbay \$6,100 held in Boulbay \$6,100 held in Boulbay \$6,100 held in Boulbay \$6,100 held in Boulbay \$6,100 held in Boulbay \$6,100 held in Boulbay \$6,100 held

ARMY -The sanctioned strength of the Army in India 18 . British troops and officers, 68,900; Indian troops and officers, 155,300; Army in India Reserve of Officers, 1,55,300, Alan Army Reserve, 40,000. Anxilary Force, 36,000; Indian State Forces, 44,700; and Indian Territorial Force, 19,000. For police duties and frontier service the regular military is supplemented by frontier militar and local levies. During the period (1902-9) when Loid Kitchener was Commander-in-Chief, considerable changes were effected in the organisation and training of the Army. On June 1, 1907, there was a redistribution of the Army of India. The net military expenditure (including marine) has risen from about £20,000,000 in 1912-13 to about 5,510 lakhs (£41,325,000) in 1929-30 The estimated net expenditure for 1931-32 is 4,740 lakh (£35,550,000) liming the Great War of 1924-18 the Government of India recruited on a voluntary basis over 800.000 combatants and more than 400,000 non-combatants, giving a grand total of about 1 3 million men. 1,215,000 officers and men were sent on service overseas from India . the total Indian casualties were ror, ooc. In ror7 the har hitherto precluding the admission of Indians to King's Commissions was removed, the pay and pensions of the Indian soldiery were improved India has an Anxiliary Force on a volunteer basis. Ague is the chief cause of sickness among British troops, and enteric fever the chief cause of death.

The ROYAL INDIAN MARINE consists of no sca-going vessels, and numerous smaller steamers and launches.

In 1926 it was decided that the Royal Indian Marine shall be abolished, and that the vessels shall be transferred to the Royal Indian Navy, which will be constructed as a combatant force to enable India to enter upon the final stage of her development, and ultimately to undertake her own naval defence. The fact will consist, in its first stage of development, of four sloops, two patrol-craft vessels, four trawlers and two survey ships, together with one depôt ship. Indians will be eligible for commissioned rank.

EDUCATION —Elementary education is based, so far as possible, on an adaptation of indigenous institutions and traditions. Higher education is an imported product. It is popular, and has undoubtedly been attended with beneficial results. As is natural with an imported product, its development is marked by some crudities, and its influence has to some extent been unsettling It has appealed to the natural intellectuality of the people, and has succeeded only partially in stimulating practical application. There are 15 Universities, viz., those of Calcutta, Madras, Bombay, Allahabad, Beuares (Hindu), Patna, Dacca, Aligarii (Muhammadau), Lahore, Hyderabad, Mysore, Lucknow, Rangoon, Nagpur and Delhi. In State institutions education is secular. The institutions in 1928-29 numbered 258,000, and the scholars 12,166,000, including 1,386,000 females. Of the institutions, about 50 per cent are maintained by the State or aided by rants, the rest being private and unaided. Of the total expenditure on education in 1928-29, (£20,305,000), £4,335,000 came from fees, and £12,842,000 from flow enument revenues on local and municipal funds. The census of 1921 showed that only 130 males and az females per thousand are literate, in the sense of being able to write a letter and read the reply thereto.

LOCAL SELF-GOVERNMENT, municipal

£9,220,200 from rates and taxes (octroi, taxes on houses and lands, water, lighting, and conservancy rates, &c) and £12,612,800 from other sources. Out of 12,722 members of municipal bodies 870 were officials and 12,852 non-official. n almost all districts in British India there are local district boards, partly representative. Nearly 33 per cent. of their total expenditure of about £ 12, 294, 790 in 1928 29 was devoted to civil works, 36 per cent. to education, and the remainder largely to sanitation and hospitals.

JUSTICE, POLICE, AND PRISONS—There are 8,342 officers and 19,108 honorary judges and magistrates exercising civil and criminal jurismisgistrates exercising civil and criminal juria-diction. Many of the superior and the great majority of the inferior officers are Indians. In 1928, 2.435,233 civil suits were instituted; 2.578,884 persons were tried, and 1,238,424 con-victed, in criminal cases, of whom 796 were sentenced to death and 739 executed, 1,938 to transportation, and 180,496 to imprisonment. The strength of the police in 1928 was 14,814. officers and 183,371 men. There were 1,156 prisons, with a daily average of 138,014 prisoners. At the convict settlement of Port Blair (Andamans) there were 6,985 prisoners on March 31, 1929.

VITAL STATISTICS.—The reporting of vital occurrences is still defective. The recorded death rate for British India in the decennium ended 1913 ranged between 38'as per 1,000 in 1908 and 28'72 in 1913; it was 35'9 per 1,000 in 1908 and 25'73 in 1913. There were over 12 million deaths from influenza during 1918-19. Fevers of various kinds are by far the commonest cause of death, cholers, dysentery and diarrhea, smallpox, and (since 1896) plague being other chief causes. The reported deaths from plague up to the end of 1938 were about 12,152,000 in India as a whole The ratio of births per 1,000 of the population was 36.79 in 1938. In 4,571 hospitals and dispensarios, maintained mostly from public funds, rural, m its present form, is a product of British rule. The municipal title statch end of 1928-19 pensarios, maintained mostly from public funds, numbered 776, with a total population 50,119,000 patients were treated in 1928. The of 19 million, and receiving an income of number of persons vaccinated in 1928-29 was

SURVEYS—The Survey Department superintends forest and cadastral surveys, as well as trig-enometrical and topographical surveys, special explorations, and map production. Marine, geological, butanical and archwological surveys are in operation. The Meteorological Department is of great service in forecasting rainfall.

TRADE OF INDIA—Among the countries constituting the British Empire India comes second to the United Kingdom itself in the volume of its sea-borne trade, which almost equals that of Canada and Australia combined. The ordinary course of Indian trade shows yearly a large net export of merchandise and a net import of treasure. The table (n. 570) exhibits the leading figures for the last five years in thousands of pounds sterling (Rinpees being converted at the rate of x2\times to the Last.)

During the year 1930-31 as compared with 1929-30 the value of the imports (excluding tiovennment stones and treasure) decreased by Rs 7,597 lakhs (£56,979,000), or 32 per cent, while the total exports (including to-exports but excluding treasure and Government stores) fell by Rs 9,233 lakhs (£69,249,800), or 29 per cent

The principal commodities of export from India are, in the order named Raw cotton and cotton goods. Inte (including guinay bags and cloth); food-grains, especially rice and wheat, tea; and oliseeds. All these showed substantial decreases as compared with the provious year. The principal imports, again in the order named, are maintar tined cotton goods, iron and steel, machinery and mill-work, signa; immeral oils; motor vehicles. There was a marked falling off during the year under review in all of these and other commodities.

The bulk of the imports consists of manufactured articles, while two-thirds of the exports consist of food, tobacco, and naw materials.

The following statement shows the chief articles of the foreign trade of India in 1930-31 (converted at Rs  $x_3^{1/3} = \pounds x$ ):—

CUSTOMS DUTIES - The general import tariff is so per cent ad valorem. The principal exceptions are as follows:—Cotton twist, yain and thread pay 5 per cent or x½ As per lb., whichever is higher, yarns and taxtle fabrics so per cent., cotton piece goods so per cent. if of British manufacture, a5 per cent. if not, plain grey, 1 e., not bleached or dyed in the piece, pay duty at the same rates or 3½ annas per lb. whichever is higher Arms and certain "luxiny" at ticles, including gold and silver manufactures, &c., and silk piece goods, pay40 per cent, inotor cars 30 per cent., singar a5 per cent, plus Rs. 2. As z2 per cwt., cigais 90 por cent, cigaiettes Rs. 8 As. 8 per x,coo, spirits generally Rs. 30 a gallou, sait R. 1 As. 8½ a manuf (82 lb.), gold and silver plate 40 por cent., kerosene As. 3, and motor spirit 8 As. per gallon, inineral oil so per cent. (an excise duty of As. 8 per gallon is levied on motor spirit and an excise duty of As. 2 p. 3 per

gallon on kerosenc produced in India), coal As. 8 aton. Some machinery and certain iron, steel and railway muterials pay 12% per cont.: a tritical silk yarn, 10 per cent. There are protective duties at special rates on coal tubs, and on iron and steel and certain manufactures thereof. The duty on manufactured tobacco is Rs. 3 per lb., natches Rs. 1 As. 8 per gross, splints for match-making 4½ As. per lb., veneer for making match boxes 6 As. per lb., veneer for making match boxes 6 As. per lb., beer 12 As. per gallon, perfumed spints Rs. 48 a gallon Gold metallic ores, hving animals, raw index, skins, raw cotton and wool, certain agricultural requisites, quinner, textile machinery, printing materials, and a few other aiticles are fee There are export duties of 2 As 3 Pers a mained on rice, Rs. 4% per bale of 400 lb on raw jute other than cuttings, for which the rate is Rs. 1% per lale; Rs. 20 per ton on jute sacking, Rs. 23 per ton on hessians, and 5 per cent. adealoren on raw index and skins.

SHIPPING.—In 1930-31 the number of vessels engaged in the foreign trade which entered and cleared with cargoes at posts in British India was 6,473, with a tomage of 15 510,000. Of this tomage, nearly 67 per cent, was under the British flag

Ports - The cluef ports are Bombay, Calcutta, Rangoon, Karachi, and Madras

AGROULTURE is by far the most important occupation of the people of India. In British territory in 1938-29, 262, 328, 200 acress were sown, or 228, 250,000 acress excluding area sown more than once of the total area sown approximately to per cent was under wheat, 32 per cent under rice, and 36 per cent under officeds, and pulses, 7 per cent under officeds, and 8 per cent under cotton, jute, and other thines. Sugar, tea, and tobacco are other important crops. The total area under irrigation was 49 million acres.

Banks —In addition to the Imperial Bank of India, which is closely associated with the Government, there are joint-stock banks. Emopean and Indian, and many small native banks. In 1928 there were 28 Indian joint-stock banks, whose head offices are located in India, in addition to 128 exchange banks with head offices outside India, and 18 Indian co-operative banks, with capital and reserve of Its. 5 lakhs and over. The capital of the Imperial Bank of India was Rs 262 lakhs; ieserve, Rs. 539 lakhs, deposits, Rs. 7,928 lakhs; ieserve, Rs. 539 lakhs, deposits, The corresponding figures for the Indian Joint-stock banks were: capital, Rs. 648 lakhs; reserve, Rs. 435 lakhs, deposits, Rs. 6,25 lakhs; cash balance, Rs. 850 lakhs. The 18 exchange banks with head offices not located in India had:—capital, £95 unillion; reserve, £92 million; deposits, £1,359 million outside India, and Rs. 7,173 lakhs in India; cash balances £237 million outside, and Rs. 866 lakhs in India of Rs. 171 lakhs; a reserve of Rs. 46 lakhs, deposits, Rs. 90 lakhs; a reserve of Rs. 46 lakhs, deposits, Rs. 90 lakhs; and cash balances amounting to Rs. 78 lakhs; and cash balances amounting to Rs. 78 lakhs; in depolity was —1376 in the case of labilities on depolit was —1376 in the case of

gallon on kerosene produced in India), coal As. 8 the Imperial Bank; xx% for exchange banks aton. Some machinery and certain non, steel doing a considerable portion of their business in and railway nuterials pay xx½ percent.; at titleral | India; xx% for other exchange banks; and xx to slik yarn, xo per cent A few other articles pay | xx% in the case of Indian joint-stock banks

CO-OPERATIVE CREDIT SOCIETIES — In 1979-30 there were in Butish India and Indian States 1,880 central, 92,031 agricultural and 12,26 non-agricultural societies, with a total membership of 4,781,204 and a capital of £69,128,000. The Provincial and Central Banks showed a profit of £440,000, and a gricultural and non agricultural societies £1,369,000.

MINERALS—The output of coal in India in 1928 was 22,543,000 tons. The production has much me crassed in recent years. Nine-tenths of the total comes from Bengal and Blina and Onesa The production of crude petolenn in India (cheffy Burma) has mereased from 19 million gallons in 1897 to 306 million in 1928. The production of salt is about 1,515,000 tons. The production of salt is about 1,515,000 tons. The production of inanganese ore was about 978,500 tons, and of saltpetic 4,500 tons export figures) The vield of gold (nearly all from Mysoce) was about 376,100 oz. Monazite and timpsten ore have now taken an important place in the list of minerals of economic value produced in India. The output of the former in 1928 was 103 tons, and of the latter 622 tons

MANUFACTURES—In India the ancent village handicrafts still survive (totton-weaving is by far the most important hand industry. There were 7,863 factories in 1928 subject to the Indian Factories Act, employing 1,520,000 persons, including 25,000 women and 50,000 children (12 to 15 years of arc), the percentage of factories maintaining a week of 48 hours or less for men is 27, the corresponding percentage for women is 25, the corresponding percentage for women is 25. The maximum weekly hours for children are 36. There were 25 cotton mills at work in British India and Indian States in 1928-29, mostly in Bombay and Ahmedabad. In 1928-29, the production was 648 million ib, of yain (mostly of low counts) and 446 million ib of woven goods. The 95 jute mills, mostly situated in or near Chilatta, contained x 103,147 spindles and 52,409 looms. There wire, in 1928, 17 woollen and 9 paper mills, 13 breweires, and various other factories.

JOINT STOCK COMPANIES.—In 1928—29 there were 6,330 joint stock companies registered in British India and in the Indiau States, with a patd-up capital of Rs 27,931 lakins (£209,481,000). The companies were classified as follows:—Trading and manufacturing, 2,336. banking and loan, 1,632; tea and other planting, 604; imfining, 227, cotton unils, 294, cotton ginning mills, 199; jute mills, 63; other mills and presses, 77; estate, &c., 125, insmance, 100; rallway transport, &c., 220; navigation, 25; singar, 35; others, 383

#### FRONTIER TRADE

A new system of registration of the land frontier trade of India came into force in April, 1925. Only the traffic in selected articles at certain railway stations adjacent to the more important trade routes across the frontier is registered. The principal imports were metals and manufactures of metal, grains and pulses, fruits, provisions and raw silk. The principal exports were cotton goods, metals, provisions, grains, salt and sugar.

## STATES OF THE RULING PRINCES AND CHIEFS OF INDIA.

THE States in India whose chiefs are in subordinate alliance with, or under the suzcrainty of, the King-Emperor, comprise about two-fifths of the area, but only two-ninths of the population of India. Their administration, with a few unimportant exceptions, is not under the direct control of British officials, but it is subject, in varying degrees, to the Supreme Government. The chiefs are entitled to British protection, but have no power of making war and peace, or of sending ambassadors to one another or to foreign States; the millitary force they maintain is strictly limited; no European is allowed to reside at any of their courts without special sanction; and in case of misrule the Supreme Government can dethrone the chief or

temporarily suspend him from the exercise of his powers. In matters of Imperial interest, trade, main lines of rallway, &c., the Supreme Government has jurisdiction. Some States pay tribute, most do not. Tributes aggregating £54,80.0 (£183,705 from Mysore) were paid to the Government of India in 1999-30. Generally speaking, the States are governed by their Princes, Ministers, and Councils, with the advice of a political officer of the Supreme Government. This officer may have charge, as British Resident, of one large State, or may be the Agent for a group of States. A common characteristic of all Indian States, important or insignificant, is that in their territory British Indian law does not run. For them the Indian Legislature or the Provincial

Legislative Councils cannot legislate: and over them the High Courts or Chief Courts of the Provinces have no jurisdiction.

The Assigned Districts of Mysore (Bangalore), Kalat (Quetta), and Berar are still technically Indian States territory. The Shan States, on the other hand, are technically part of British India, though administered by local Sawbwas or petty chiefs. Excluding these territories, the Indian States have a combined area of 711,032 square inites, and a population of 72,939,287. They maintain in the aggregate a considerable body of troops of inferior military organisation in addition to their Indian State forces. Many treaties provide that States shall furnish troops on the requisition of the Supreme Government, and troops of Indian States served in almost every Indian campaign of the 19th century. Lord Curzon mangurated an Imperial Cadet Corps of Indian princes and nobles States vary greatly in size and importance Hyderalad is nearly as large as Great Britam, and the Nizam enjoys a very large revenue. On the other hand, in Kathawar and elsewhere, where family criston has led to minute sub-division, there are many chefs of single villages. In these petty estates the nominal chief may have some very limited magisterial powers, but the administration is regulated and carried on by the Supremo Government in its executive capacity. amount of control thus exercised over an Indian State in its internal affairs depends on a number of considerations, and varies from State to State. The rulers have not necessarily any religious or tribal connexion with the importy of their subjects. Thus the Nizam of Hyderabad is a Muhammadan, but most of his people are Hindus. Although the Indian States, large and small, number 663, only about soo are of any real importance. The majority represent the scattered military chiefships which sprang from the rnins of the Moghul Empire in the 18th century. The rulers of Gwalior, Indore, and breads and disconsistance of the second control of the second control of the second control of the second control of the second control of the second control of the second control of the second control of the second control of the second control of the second control of the second control of the second control of the second control of the second control of the second control of the second control of the second control of the second control of the second control of the second control of the second control of the second control of the second control of the second control of the second control of the second control of the second control of the second control of the second control of the second control of the second control of the second control of the second control of the second control of the second control of the second control of the second control of the second control of the second control of the second control of the second control of the second control of the second control of the second control of the second control of the second control of the second control of the second control of the second control of the second control of the second control of the second control of the second control of the second control of the second control of the second control of the second control of the second control of the second control of the second control of the second control of the second control of the second control of the second control of the second control of the second control of the second control of the second control of the second control of the second control of the second control of the second control of the second control of the second control of the second control of the second control of the second control of the second control of the second control of the second control of the second Baroda are all descendants of successful generals who then rose to power. Most of these States are of more recent origin than the British power in India. A unique step was taken in 1910, when a new Indian State was created out of the family domains of the Maharaja of Benares.

The salutes enjoyed by the Indian princes indicate their relative importance. Those with eleven guis or more are addressed as His Highness. On pages 673-674 are the names of 86 ruling chiefs who have salutes of eleven guns or more, with some particulars of their States. Some well-known Indians of title, such as II H. the Aga Khan, GCSI, GCIF, GCV.O, and the Maharajah of Burdwan, GCIE, K.CS.I., are

not ruling chiefs
The States of Hyderabad, Mysore, Baroda,
Kashmir, Sikkim, and Kalat, and those belonging to the Rajputana and Central India Agencies, 175 in all, are under the direct supervision of the Governor-General in Council. The remainder, chiefly minor States, are under the supervision or control of various Provincial Governments The States of first magnitude, which have a superior Resident, are Hyderabad, Mysore, Baroda, Kashmir, Jaipur, Udaipur, and Gwalior.
The Indian States may be thus classified —

The ruling dynasty is of Turkoman origin, and is descended from Asaf Jah, who became Viceroy of the Deccan in 1712, and then independent of the Mogul Emperor. Telugu and Marathi are the chief languages. Wheat, rice, and cotton are produced. The Nizam's Guaranteed Railway is the principal line. z. Myeore This State, situated on a plateau in Southern India, was administered by the Indian Government from 1831 to 1881, when it was restored to native rule, under a somewhat strictly framed instrument of transfer. In Dec., 1913, the instrument was replaced by a new Treaty putting the relations between the British Government and the State on a footing more in consonance with the actual position of the Maharaja among the Feudatory Chefs of India. Kanarese and Telugu are the chief languages. There is a Mysore State Railway. Millets, pulses, and rice are the principal crops. Mysora has important goldfields. 3. Baroda, situated in Western India in Gujarat and Kathiawai and much interlaced with British districts. The reigning Gaekwar was the adopted districts. The reigning Gackwar was the adopted hefr of the ruler deposed in 1875 for misgovernment and misconduct. 4. The Himalayan Hill States, west of Nepal, including Kashmir. The miportant fronter State of Kashmir (capital, Srinagar, pop. 141,735) was granted to Gholab Sing by Lord Hardinge, after the First Punjah War (1846). It complises Jammir, Kashmir, Ladakh, Ghgit, and Baltistan. A force stationed at Gligit watches the northern passes and controls the fendatory chiefiships of Himza and Nagar; while on the slips of Hunza and Nagar; while on the west the subordinate chiefship of Chitral is occupied by Bitish troops, depending for their support on the Peshawar border 5. Skkim, a frontier State situated on the borders of Tibet, between Nepal and Blintan, acknowledged the British protectorate in 1800, when also the boundaries of Thet were defined by the Sikkim Thet Convention. 6 The Sikk States, in the Suhind plain, south of the Sublej. The most important of these is Patiala. 7 Rajputana, compusing the ancient sovereignties lying between Sind and the United Provinces. Rajputana tween Sind and the United Provinces. Rapputana, (pol. 9,84,384) extends some 460 miles from north to wonth, and is 530 miles in breadth, and is larger than the British Isles. About half of the area is desert. It comprises so States of varying sire and importance. Of these 27 are ruled by hereditary Rajmu Chiefs, two by Jat chiefs, and one by a Muhammadan. The Governor-General's Agent's headquarters are at Amer; he has under him Residents for Eastern and Western Raimstan and Justice these and Western Raipntana, and about twenty other officers, distributed among the States to supervise the administration, and give advice when it is annimistration, and give acover when it is required. The most important States are Jodhyna (Marwar), Udaynar (Marwar), and Jaynar. The Rajmt dynastics, the most ancient in India, go back before the Mogul Empire, and resemble fendal monarchies. 8. The States of Central India, lying to the north of the Neubudda and to the south and east of Rajputana, although to the south and east of Rajpitains, atmough in the aggregate one-third less in extent than those of Rajpitains, are nearly four times as immerous. All but r7 are petty chiefships. The most important are Greater and Indox, which include between them one-half of the whole area. The 3r minor States of Bundelkhand (largest, Reva) are in political relation with the Central India Avency. Rhoral one of r. Hyderabad, the premier State in India. (capital, Hyderabad, pop. 404,187—the fourth city in India.) This State is in the centre of the Deccan or central plateau of Southern India.

1. Hyderabad, the premier State in India. (capital Hyderabad, pop. 404,187—the fourth city with the Central India Agency Bhopal, one of the principal Muhammadan States in India.

1. Hyderabad, the premier State in India. (capital Hyderabad, pop. 404,187—the fourth city with the Central India Agency Bhopal, one of the principal Muhammadan States in India.

1. Hyderabad, the premier State in India. Cochia, lying together in S.W. India. These important States, attached to Madras Presidency, represent ancient Hindu dynasties. 2c. The three northern Mulianmadan States of Khairpur (Sind), Bahawaipur, and Bampur. 2r. Kalat (including Makran and Kharan) and Las Bela, with tribal areas in the possession of the Marri and Bugti tribes. 2s. Gujarat, including Kutch and the numerous petty chiefabips of Kathiawar. 23. The Southern Mahratta States. 2s. The numerous Afghan and Baluch tribes of the N.W. frontier, inhabiting the mountains from the north of Peshawar to the base of the Suleiman range, a distance of 800 milles. The names of some othese tribes, Waziris, Orakzais, Afridis, &c., have become familiar owing to the many expeditions against them. 2s. The aboriginal Gond and Kol tribes, under petty princes of aboriginal or Rajput blood, in Chota-Nagpur, Orissa, the Central Provinces, and the Japur (Vizagapatam) Agency. 26. The Indo-Chinese group of States, and the numerous hill tribos of the N.K. frontier.

# Countries Contiguous to Endia. NEPAL.

Sovereign, His Majesty Maharaja Dhiraja Tribhuhana Bir Bikram Jung Bahadur Shah Bahadur Shamsher Jang; suc. 1911.

Prime Minister, His Highness Maharaja Sir Bhim Shunnshere Jung, Bahadur Rana, C.C.S.I., K C V.O., Honorary Lieutenant-General of the British Army, Honorary Colonel of the 4th P.W.O Gukhas, Prime Minister, and Supreme Commander - in - Chief. (Personal salute in British India, 19 guus)

Nopal (area, about \$4,000 sq. nules; pop. 5,000,000) lies between British India and Tibet on the 8, slopes of the Himalayas, and includes Mt. Everest (29,221 ft). Amid the sterile mountains lie many fertile valleys. The lower hills are covered with jungle, in which wild animals abound. Rice, wheat, &c., are grown. Nepal is divided into four provinces. It a exports to British India are estimated to amount to about £4,000,000, and its imports to £3,000,000 a year. The chief trade route is that between Kathmandu and the Bhar and Olissa frontier (27 miles). Nepal exports rice and other grains, hides, olisseds, \$\textit{ght}\$, cattle, jute, large quantities of timber, &c., and imports cotton goods and yarn, sugar, sall, spices, metals, &c. The revenue, realised chiefly from land rent, forests, customs, &c., is over £1,000,000. The alorigines are Mongolian in type, and their religions are Buddhism and Hinduism. The country was conquered in 1769 by the Gurkhas, who are Hindus and claim to be Rajputs. Their frequent aggressions led to a war with the British in 1814-6. Relations have now long been friendly. The policy of seclusion is, however, consistently followed by the Nepal rulers. The real political power rests with the Prime Minister. This office is always held by a member of his family, the succession being determined by special rules. The army numbers about 45,000. By arrangement with Nepal, India obtains many fine recruits for its Gurkha regiments. During the Great War, and in the subsequent Afghan war, the Nepal Government rendered unstinted and unconditional assistance to the British Government in men, money and material. A new Treaty was concluded in December, 1923, between the British and Nepalese Governments, by which witer alia the internal and external independence of the State was reognised.

#### BHUTAN.

Bhutan (area, about 20,000 Sq. miles; pop. about 250,000, mainly Buddhists) also lies on the S.E. of the Himalyays, and its products resemble those of Nepal. In 263, owing to outrages on British subjects, portions of it were annexed to India, an annual allowance being paid by the Indian Government as compensation. By a treaty in 250 this allowance was fixed at £6,667, and Bhutan agreed to be guided in its external relations by the advice of the British, who, however, will not interfere in its internal affairs. The former dual government of a spiritual chief and a temporal chief came to an end when the Tongas Penlop, the chief councillor and virtual ruler, the late Sir Ugyen Wangchuk, K.O.S.I., G.O.I.E., was chosen hereditary Maharaja in 2507. He has a salute of 25 guns in British territory. The estimated annual revenue is £13,000. Bhutan's total trade with India is estimated at over £65,000 a year. There is no British Resident.

CAPITAL, Punakha.

#### THE PERSIAN GULF.

For three centuries England has taken the lead in the Gulf trade. She has suppressed plracy, slavery, and inter-tribal warfare on land and sea, made surveys, and laid down buoys and cables. Vigorous measures have been taken against gunrunning England and India still have the lion's share of the trade, the bulk of which is couted by Indians, who make Bonbay their entrepot. The Arabian shores are low-lying deserts, the Persian coasts mountainous; at the head of the Gulf are great alluvial plains. The heat is intense in summer. Natural harbours are few.

The ruler of Bahrein (capital, Manama) has been in treaty relations since 1820 with the Government of India, who have a Political Agent at Bahrein. In 1880 he engaged not to make treatics with any other State.

The Sultan of Oman (Muscat) is in treaty relations with, and subsidised by, the Government of India, who have a Political Agent and Consul at his Court.

The independent tribes on the Pirate (Arah) Coast from Ras-cl-Kheima to Odeid are bound under treaties with the Indian Government (dating from 1820, and confirmed in 1823 by a Treaty of Perpetual Peace) to maintain a maritime time for the prevention of piracy and slavery, and for the cassation of hostilities at sea. Hence their chiefs are sometimes called the "Tranal" chiefs The British Political Resident in the Persana Unit is the recognised arbiter and adviser of these tathes, and peace is maintained by the British flag. In 1826 these tribes agreed not to enter into relations with, or cede territory to, any other Power than the British. The trade of the Arab coast ports largely consists in exports of pearls to India via Lungah and Bahreu.

Important caravan routes converge at Koueit, which has an excellent harbour. The Sheikh is under treaty obligations with the Indian Government.

PERSIA (q.v.) borders on Baluchistan and Afghanistan. The demarcation of the Perso-Baluch frontier, partially carried out in 1872 and 1895, was completed in 1905.

ASIATIC RUSSIA.—A portion of what was once the Russian Empire is conterminous with Persia and Afghanistan. The Trans-Casplan Railway runs, viá Merv, to Samarkand and Andijan, with a branch to Tashkent. The Mnrghah Valley branch from Merv to Kuskh on the Afghan frontier, opened in 1898, brings the Russian railways within 70 miles of Herat, and within 420 miles of the Chaman terminus of the Indian railways. Another important strategic line connects Tashkent directly with Orenburg. The Annu-Darys, or Oxus, which separates Bokhara from Afghanistan for 330 miles, is navigated by Russian steamers.

CHINA.—India is in contact with two dependencies of China, Chinese Turkestan and Tibet, and one province, Yunnan.

Chinese Turkestan is surrounded by the mountains of Tianshau, the Panurs, and Knenhm. There are three difficult passes into Russian Turkestan and two still more difficult ones into India. The boundary between Kashmir and Chinese Turkestan has not been officially defined There is a British consul-general at Kashgar. Trade with India is chiefly carried over the Karakoram Pass (18,500 feet) vid Ladakh, in Kashmir.

Tibel, a plateau soldom lower than 10,000 feet, forms the northern irronter of India (boundary imperfectly defined), from Kaslımır to Burma, but is separated iterefrom by the Himalayas. India imports from Theet wool, borax, salt, and musk, in exchange for cotton and woollen goods and grain. Trade passes from Bengal (through Sikkim) and from the Punjab and the United Provinces. Under the Anglo-Chinese Sikkim Convention of 1890, a trade mart was opened at Yatung, but as the Tibetaus persistently disregarded the Convention, a political mission was despatched from India, with a military escot. It reached the capital, thasa, after shap philating, on August 3, 1904. A new Convention was signed (Sept. 7), providing for the erection of boundary pillars between Sikkim and Tibetan sgents; for unestricted traffic by existing routes; and for payment of an indemnity. The Tibetans pledged themselves not to alenate any territory or grant concessions to, or permit the intervention of, any foreign Power. By the Convention of Peking (April, 2906) China accepted the Conventions of 1890 and 1904, and declared that no foreign State should Interfere in Tibet, while England

also undertook not to interfere in the administration of Tibet or annex territory. By the Anglo-Russian Convention of Aug., 1907, both Powers recognised the suzerain rights of China in Tibet, agreed to maintain its territorial integrity, to refrain from intervention in its internal administration, to treat with Tibet only through the Chinese Government, not to send representatives to Lhasa, not to assign any territory to either Power, and not to obtain railway, mining, or other concessions; but direct railway between British commenced to the concessions. between British commercial agents and Tibetan authorities under the Conventions of 1994 and 1996 are permitted. In Dec., 1995, the ruler of Thet, the Tashi Lama, visited Ludia. The Dalai (or Sacred) Lama, who fied before the British advance on Lhasa, returned to Tibet in Jan., The Chinese had meanwhile strengthened their hold over the administration, despite the opposition of the Lamas, or monks, who resented the loss of their authority. In Feb., 1920, the Dalai Lama again fied to India, pursued by Chinese troops. He was then deposed by the Chinese Emperor. The British Government refused the Dalai Lama's appeal for their intervention, but allowed him to remain at Darjiling. He left India in June, 1912, for Lhasa, where sharp fighting occurred between the Chinese and Tibetans, the former being worsted. In August, 1913, the British Minister at Peking presented a Note to the Chinese Government, urging that China should not actively intervene in internal administration in Tibet. To this the Chinese Government agreed, and representatives of the British, Chinese and Tibetan Governments met in conference at Simla in Oct., 1913, to discuss the relations between the three countries A convention, the terms of which have not been made public, was initialled by the three representatives, but the Chinese Government have so far refused to ratify it.

Tamaan is a Chinese province to the N E. of Burma. By Anglo-Chinese agreements of 1894 and 1897 a boundary was fixed between Burma and Yunnan, and arrangements were made regarding trade, extradition, &c. Part of the boundary is still undefined. By an agreement of 1896 Great Britain and France agreed to share equally all privileges or advantages that might be conceded by China in Yunnan. Trade with Yunnan is chiefly by a difficult route from Bhamo, in Upper Burma. Burma imports from Yunnan hides, raw silk, &c., and exports cotton goods, &c. Teng-yueh and Sunnao, near the Burma frontier, are treaty "ports." There are British consuls at Teng-yueh and Yunnan-fu.

(Sept. 2), providing for the erection of boundary pillars between Sikkim and Thet; for three trade marts, with British and Tibetan spagets; for unrestricted traffic by existing routes; and for payment of an indemnity. The Tibetans pledged themselves not to alienate any territory or grant concessions to, or permit the intervention of, any concessions to, or permit the intervention of, any of Binnia and N.W. Siam was demarcated in foreign Power. By the Convention of Peking (April, 1906) China accepted the Conventions of Suam west of the Menam basin, including 1800 and 1904, and declared that no foreign within the British sphere of influence.

Canada was originally discovered by Cabot in 1497, but its history dates only from 1534, when the French took possession of the country. The first settlement (Quebec) was founded by them in 1608. In 1759 Quebec succumbed to the British forces under General Wolfe, and in 1763 the whole territory of Canada became a possession of Great Britain by the Treaty of Paris of that year. Nova Scotia was ceded in 1713 by the Treaty of Utrecht, the Provinces of New Brunswick and Prince Edward Island being subsequently formed out of it. British Columbia was formed into a Crown colory in 1858, having previously been a part of the Hudson Bay Territory, and was united to Vancouver Island in 1866. By the British North America Act, passed in 1867, the Provinces of Canada (Ontario and Quebec), Nova Scotia, and New Brunswick were united under the title of THE DOMINION OF CANADA, and provision was made in the Act for the admission at any subsequent period of the other provinces and territories of British North America.

The Dominion of Canada occupies the whole of the northern part of the North American Continent (with the exception of Alaska and part of the coast of Labrador), from 49° North Intitude to the North Pole, and from the Pacific to the Atlantic Ocean. In Eastern Canada, the southernmost point is Middle Island in Lake Eric, at 41° 41′ (approximately the

latitude of Rome, Italy).

Relief.—From a physical point of view Canada may be divided into an eastern division, a western division, the Red River Valley, in long. 970, forming the separating line, and a northern division. The eastern division comprises two areas, presenting radically distinct aspects:—(1) The south-eastern area, bounded by the line of the Gulf and River St. Lawrence, from Belle Isle to Montreal, thence by a line running directly south to Lake Champlain, which is generally hilly, and sometimes mountainous, with many fine stretches of agricultural and pastoral lands. (2) The southern and western area, presenting, in the main. a broad, level, and slightly undulating expanse of generally fertile country, with occasional step-like ridges or rocky escarpments. The main hydrographical feature is the chain of lakes, with an area of 95,000 square miles, contributing to the great river system of the St. Lawrence. The northern division, embracing nearly two-thirds of the Dominion, with an average elevation of 1,000 feet above the level of the sea, is pre-eminently a region of waterways, and including the great Laure tian plateau. In this area are found the other great river systems, the Nelson and the Mackenzie. The western division referred to may also be said to possess two areas equally distinct in character. The first stretches from the Red River Valley to the Rocky Mountains. Here, between lat. 490 and 540, is the great Prairie Region, rising to the west in three terrace-like elevations, the lowest of which is 700 feet, and the third about 3,000 feet above the level of the sea. North of the 54th parallel the country passes again into forest. The second area, from the western edge of the Prairie to the Pacific coast, is a distance of 400 miles, and contains the Rocky Mountains (Mount Robson, 12,972 feet) and the Selkirk and Cascade Ranges, whose summits are from 4,000 to 16,000 feet high, the country being on the whole densely wooled. The highest mountain peaks in Canada are Mount Logan, 19,850 feet, and Mount St. Elias, 18,00

Climate.—The climate in the eastern and central portions of the Dominion presents greater extremes of cold and heat than in corresponding latitudes in Europe, but in the south-western portion of the Prairie Region and the southern portions of the Pacific slope the climate is milder. Spring, summer, and autumn are of about seven to eight months' duration, and the winter four to five months. The soil is generally fertile and all the products of the temperate zone are cultivated.

#### GOVERNMENT.

Canada is a self-governing Dominion within the British Empire, its constitution resting on the British North America Act of 1867, under which the Dominion of Canada came into being on July 1, 1867 (Dominion Day). The Executive power is vested in a Governor-General appointed by the Sovereign and aided by a Privy Council.

#### Governor-General and Staff.

#### THE EXECUTIVE.

The executive government and authority are vested in the King, and exercised in his name by the Governor-General, aided by a Privy Council.

BRITISH HIGH COMMISSIONER IN CANADA.

British High Commissioner, Sir William Henry Clark, K.C.S.I., K.C.M.G. (Earnscliffe, Ottawa).

#### THE LEGISLATURE

Parliament consists of a Senste and a House of Commons. The Senate consists of 96 members, nominated for life by the Governor-General, distributed between the various provinces thus: at for Ontario, at for Quebec, to for Nova Scotia, 70 for New Brunswick, 4 for Prince Edward Island, 6 for British Columbia, 6 for Manitoba, 6 for Alberta, and 6 for Saskatchevan; each Senator must be thirty years old, a resident in the province for which he is appointed, a natural-born or naturalised subject of the King, and the

owner of a property qualification amounting to \$4,000. The Speaker of the Senate is chosen by the Government of the day. The House of Commons is elected every five years at longest, and the Parlianent consists of 245 members, elected as follows: Se for Ontario, 65 for Quebec, 14 for Nova Scotia, 11 for Neve Brunswick, 17 for Mantoba, 14 for British Columbia, 4 for Prince Edvard Island, 16 for Alberta, 21 for Nexatchewan, and 1 for Yukon. The House of Commons is also composed of natural-born or naturalised subjects of the King; 10 property qualification is necessary, its members are elected upon a very wide suffrage, and at the General Election in Dec. 1921 women exercised the franchise on the same terms as men for the first time in a Federal Election. For electroate purposes each province is divided into districts, returning a member on a majority of votes taken by ballot. The members of the House themselves elect their Speaker, and twenty, including the Speaker, form a quorum. Members of the Upper and Lower Houses receive \$4,000 per Session, with travelling expenses and deductions for non-attendance.

The Houses of Parliament were destroyed by fire on Keb. 6, 1916, the new buildings being started the same year; the foundation stone was laid by H.E.H. the Duke of Connaught (Gov. Gen.), Sept. 1, 1927, and the corner stone of the main tower by H.E.H the Prince of Wales, Sept. 1, 1919. The Speaker's chair in the new House of Commons (a replica of that at Westminster) was presented in 1921 by Viscount Ullswater (exspeaker of the House of Commons of the United Kingdon) on behalf of the Empire Parliamentary Association of the Houses of Lords and Commons

#### The Senate.

Sergeant-at-Arms, Lt -Col. H. J. Coghill.	
(and allowance \$600)	4,520

#### THE JUDICATURE.

The Judicature.—Justice is administered, as in England, by judges, police magistrates, and justices of the peace, of whom the first-named are appointed by the Governor-General, for life, from among the foremost men at the Bar in the several provinces. The highest court is the Supreme Court of Canada, composed of a Chief Justice and six puisne judges, and holding three sessions in the year at Ottawa. The only other Dominion Court, viz., the Exchequer Court of Canada, is presided over by separate judges, and its attlings may be held anywhere in Canada.

The Provincial Courts include the Court of Chancery, Court of King's Bench, Court of Error and Appeal, Superior Courts, County Courts, General Sessions, and Division Courts. The duties of corouers are generally analogous to those in Gorce in England, as are also methods of civil and criminal procedure, while trial by jury prevails.

#### DEFENCE.

The Canadam Militia is composed of the Active Militia consisting of the Canadian Permanent Force (a small body of all arms) and the units of the Active Militia of the several branches of the service which are organized and perform annual training. The Reserve Militia consists of reserve units and of all able-bodied citizens between the agos of 18 and 66, with certain well-defined exceptions. The total establishment of the Non-Permanent Active Militia (1930) is 9,050 officers and 176,548 other ranks.

Expeditionary Force in the Great War.—The number enlisted up to the cessation of hostilities was 595,447, of whom 448,05 were sent overseas. Over 80% of all enlistment was voluntary. The total outlay for the War is estimated at \$3,000,000,000.

## Royal Canadian Navy.

The Royal Canadian Navy consists (1931) of a Destroyers and 3 Mine-sweepers. The authorized complements are rost officers and 752 men of the Permanent Force. There is also a Naval Reserve of 70 officers and 450 men and a Naval Volunteer Reserve of 70 officers and 930 men.

#### Royal Canadian Air Force.

The strength of the Royal Canadian Air Force, permanent service, was on Jan. 1, 1931, 177 officers and 724 airmen.

#### Royal Canadian Mounted Police.

Liaison and Intelligence Officer, Col. C. F.

Hamilton.

Secretary, G. T. Hann.

#### EDUCATION.

Education is under the control of the Provincal Governments, the cost being met by local taxation, aded by grants from the several Provincial Governments. There are (1930) 31,866 public elementary and secondary school districts (attendance at the former being compulsory except in the Province of Quebec), with a, 100,637 pupils. In addition there were 89,062 pupils in private elementary and secondary schools. Higher education is conducted in 23 universities and rox colleges with an enrolment, in 1930, of 74,183.

In 1930 the live stock included 3,295,000 horses, 8,937,000 cattle, 3,696,000 sheep, 4,000,000 swine,

a,937,000 caurie, 3,09,000 silver, 4,000,000 swine, and 60,795,000 politry.

In dairy produce the Dominion output of creamery butter in 1930 was 187,121,147 lb, valued at \$57,177,798 There was also produced 84 337,000 lb, of dairy buttervalued at \$50,710,000. The cheese production, home-made and factory, for the same period totalled 129,402,458 lb. valued at \$18,169,395.

valued at \$18,169,395.

Fur Farming.—A comparatively new industry, but one which is assuming appreciable proportions, is that of fur farming. There were \$,523 fur farms in the Dominion in \$299, 4.493 of which were tox farms, the remainder being divided between mink, raccoun, marten, skunk, fisher, Karakul sheep, beaver, muskrat, chinchilla rabbit, coyote, budger and Stheriau hare. The total number of hadger and Siberian hare. The total number of animals on the farms at the end of 1929 including estimates of the numbers of muskrats and beaver was \$23,059, valued at \$32,303,025; born in captivity,485,787; sold from faims,35,422, value \$4,474,953, pelts sold, 38,311, value \$8,304,910; the total sale for live animals and pelts being

56 779,863 as compared with \$6,226,446 in 1928.
Fisheries.—The fisheries are an important source of wealth, and include salmon, cod, halibut, whitefish, herrings, mackerel, and lobsters. The total value of the catch marketed in the calendar year 1930 was \$47,804,216, as against \$55,518,521 in 1938 and \$60,259,744 in 1938, the banner year of the fisher year year. capital invested in vessels, &c., engaged in catching operations and in fish-caming and curing establishments in 1930 was \$54,005,297, and the number of men employed 29.535. The number of cauning and curing establishments

in operation in 1930 was 713

Lumbering.—The value of production, includ-Lumbering.—The value of production, including (a) primary forest production and (b) the value added by manufacture in sawmilis and pulpmilis, was \$337,649,078 in 1992, as compared with \$323,624,008 in 1998. The principal items of production in 1999 were sawn lumber \$123,349,886, shingles \$9,423,363, lath \$2,860,759, and wood pulp £129,033.154.
Industrial Statistics.—Industrial establishments of all kinds in 1999 had a total capital of

\$5,083,014.754, the gross value of the products being \$4,053,987,879. These industries employed 693.816 hands, the total pay roll for whom was \$573,049.848.

Minerals.—Some minerals produced in 1930* were as follows: Gold, a.o89,766 oz. £43,199,000); copper, 301,021,767 lb. (\$38,687,000); lead, 329,033,532 lb. (\$12,02,02,00); nickel, 103,782,000] lc. (\$34,449,000); silver, 65,772,652 nz. (\$20,057,000); zinc, 259,700 &49 lb. (\$9,393,000); cobalt. 694,163 lb. (\$51,44,007); coal, 14,925,000 short bons (\$53,000,000); natural gas, 29,565,000 Åt. cu. ft. (\$10,561,000); crude petroleum, 1,500,000 bris. (\$51,20,000); asbestos, 244,000 tons (\$8.600.000); gyjsum, 1,060,000 hons (\$3,875,000); natural control (\$1,575,000). The total value of the mineral output in 1930 was \$276,865,000

Agriculture and Live Stock .- The total area is \$34,163,200 acres, and in 1929 the area of cleared land was about 15,000,000 acres, of which 10,e20,294 acres were under field crops. The estimated total value of all field crops in rese was \$236.651,277. Cheese factories produced 79,816,828 lb. of cheese in 1929 valued at duced 79,856,888 lb. of cheese in 1989 valued at \$14,513,547, and creaments made 59,785,194 lb. of butter valued at \$23,623,174. In 1929 there were 606,505 horros, 2,671,594 cattle, 1,130,395 sheep, 1,681,263 pigs, and 22,045,002 poultry. Free grants of land are obtainable in the great clay belt of Ontario, opened up by the Temiskaming and Northern Ontario railway. Improved farms, orchards and small holdings can be hought on reasonable terms in holdings can be bought on reasonable terms in the older settled parts of the Province. There is a scheme of land settlement, with free land and fluancial assistance for returned soldiers, both Imperial and Canadian. There is always a demand for farm workers.

Lumbering.—The value of production including primary forest production and the value added by manufacture in pulp-mills and saw-

mills in 1929 was \$x11.000,000

mills in 1929 was parameters.—Ontario is the chief manuacturing province of Canada. The total value of its manufactures in 1925 was \$1,527,124,660. There were, in 1925, 262,482 employees, an invested capital of \$2,925,593,482, and an annual manual in of \$207,304,007. The chief manufacturing and in the control of \$2,925,593,482, and an annual manual in the control of \$2,925,593,482, and an annual manual in the control of \$2,925,593,482, and an annual manual in the control of \$2,925,593,482, and an annual manual in the control of \$2,925,593,482, and an annual manual in the control of \$2,925,593,482, and an annual manual in the control of \$2,925,593,482, and an annual manual in the control of \$2,925,593,482, and an annual manual in the control of \$2,925,593,482, and an annual manual in the control of \$2,925,593,482, and an annual manual in the control of \$2,925,593,482, and an annual manual in the control of \$2,925,593,482, and an annual manual in the control of \$2,925,593,482, and an annual manual in the control of \$2,925,593,482, and an annual manual in the control of \$2,925,593,482, and an annual manual in the control of \$2,925,593,482, and an annual manual in the control of \$2,925,593,482, and an annual manual in the control of \$2,925,593,482, and an annual manual in the control of \$2,925,593,482, and an annual manual in the control of \$2,925,593,482, and an annual manual in the control of \$2,925,593,482, and an annual manual in the control of \$2,925,593,482, and an annual manual in the control of \$2,925,593,482, and an annual manual manual manual manual manual manual manual manual manual manual manual manual manual manual manual manual manual manual manual manual manual manual manual manual manual manual manual manual manual manual manual manual manual manual manual manual manual manual manual manual manual manual manual manual manual manual manual manual manual manual manual manual manual manual manual manual manual manual manual manual manual manual manual manual manual manual manual manual manual manual ma wage bill of \$307,304,007. The clief manufac-turing centres in 1922 were Toronto (\$447,098,824), Hamilton (\$122,305,950), ()ttawa (\$31,303 494), Oshawa (\$47,529,284), London (\$32,201,399), and Ford (\$41,389,677)

Minerals.--Ontario is the leading mineral

minerace.—Ontario is the leading mineral Province in the Dominion, the output in 1929 being \$1:6,558,911 The principal metals are: gold, \$33,543,913; silver, \$4,649,375; nickel, \$37,125,61; and copper, \$14,649,375; nickel, \$47,125,125; nickel, \$17,125; nickel, \$17,125; nickel, \$17,125; nickel, \$17,125; nickel, \$17,125; nickel, \$17,125; nickel, \$17,125; nickel, \$17,125; nickel, \$17,125; nickel, \$17,125; nickel, \$17,125; nickel, \$17,125; nickel, \$17,125; nickel, \$17,125; nickel, \$17,125; nickel, \$17,125; nickel, \$17,125; nickel, \$17,125; nickel, \$17,125; nickel, \$17,125; nickel, \$17,125; nickel, \$17,125; nickel, \$17,125; nickel, \$17,125; nickel, \$17,125; nickel, \$17,125; nickel, \$17,125; nickel, \$17,125; nickel, \$17,125; nickel, \$17,125; nickel, \$17,125; nickel, \$17,125; nickel, \$17,125; nickel, \$17,125; nickel, \$17,125; nickel, \$17,125; nickel, \$17,125; nickel, \$17,125; nickel, \$17,125; nickel, \$17,125; nickel, \$17,125; nickel, \$17,125; nickel, \$17,125; nickel, \$17,125; nickel, \$17,125; nickel, \$17,125; nickel, \$17,125; nickel, \$17,125; nickel, \$17,125; nickel, \$17,125; nickel, \$17,125; nickel, \$17,125; nickel, \$17,125; nickel, \$17,125; nickel, \$17,125; nickel, \$17,125; nickel, \$17,125; nickel, \$17,125; nickel, \$17,125; nickel, \$17,125; nickel, \$17,125; nickel, \$17,125; nickel, \$17,125; nickel, \$17,125; nickel, \$17,125; nickel, \$17,125; nickel, \$17,125; nickel, \$17,125; nickel, \$17,125; nickel, \$17,125; nickel, \$17,125; nickel, \$17,125; nickel, \$17,125; nickel, \$17,125; nickel, \$17,125; nickel, \$17,125; nickel, \$17,125; nickel, \$17,125; nickel, \$17,125; nickel, \$17,125; nickel, \$17,125; nickel, \$17,125; nickel, \$17,125; nickel, \$17,125; nickel, \$17,125; nickel, \$17,125; nickel, \$17,125; nickel, \$17,125; nickel, \$17,125; nickel, \$17,125; nickel, \$17,125; nickel, \$17,125; nickel, \$17,125; nickel, \$17,125; nickel, \$17,125; nickel, \$17,125; nickel, \$17,125; nickel, \$17,125; nickel, \$17,125; nickel, \$17,125; nickel, \$17,125; nickel, \$17,125; nickel, \$17,125; nickel, \$17,125; nickel, \$17,125; nickel, \$17,125; nickel,

tario is well supplied with water power, having available about 7,000,000 lt.p. The chief power rivers are the Niagara, the St. Lawrence and the Ottawa. One of the worlds largest and most successful electrical undertakings—the largest publicly-owned—is operated by the Hydro-Electric Power Commission of Ontario, which generates and trausmits power to more than 600 co-operating nunicipalities and serves about 75 per cent. of the population of the Province. The aggregate peak load exceeds x,200,000 h,p, The undertaking represents a capital investment

of about £70,000,000 (\$335,000,000).

Principal Cities.—CAPITAL, TORONTO, population 652,000, with great shipping interests on the Lakes, and the chief centre of industrial and commercial activity; Hamilton, the "Bir-mingham of Canada" (126,000); Ottawa, the Federal capital (121,000), with a large lumber trade and woodenware manufactories; London (67,000); Brantford (33,000); Kingston (23,000); Peterborough (22,000); Windsor, connected by tunnel beneath Detroit River with Detroit, Mich., U.S.A. (67,000): Fort William (24,000); Kitchener (26,000); Guelph (20,000); St. Catharine's (24,000); Sault Ste. Marie (23,000).

# QUEBEC.

Area and Population .- The Province of Quebec contains an area estimated at 594,434 square miles, with a population (1921) of 2,351,199, an increase since the last Census of 355,423. In 1987 the Province was diminished by 112,400 square miles by the award of the Imperial Privy

Council in the controversy between the Dominion of Causda and Newfoundland with regard to their boundary in the Labrador Peninsula.

Government.—The Government of the Province

is vested in a Lieutenant-Governor, the Council of Ministers, a Legislative Council consisting of 24 members appointed for life, and a Legislative Assembly of 90 members elected for five years to represent the 90 electoral districts of the Pro-

Finance.-The actual revenue for the year 1988-19 1988 \$39,976,183 and the actual expenditure \$35,964,487. The bonded debt (June 30, 1998) was \$80,334,791 and the net funded debt

\$56,751,141.

Production and Industry.-The gross value of manufactured products in 1928 was \$1,073,162,291 hannactured products in 1988 was \$1,793,102.31.

He principal manufacturing centres being (1988):

Montreal (\$554,311,571), Quebec (\$44,668,105),

Three Rivers (\$45,411,69), Shawhigan Falls
(\$33,326,961), Valleyfield (\$6,782,146), Sherbrooke
(\$19,009,741) and Hull (\$11,705,232). The lumber
industry is still by far the most important trade. but the settled portion of the country has been too much denuded of wood, and the provincial Government has found it necessary to organise an effective service of rangers to prevent the destruction of trees by forest fires. The forest lands cover an area of over 120,000,000 acres, of which si,000,000 are under licence to cut timber. The wood pulp industry is assuming greater importance every year. Several large mills have recently been built, and during 1928 the production reached a,ox8,566 tons, valued at \$67,467,348. The Province produces more than half of the total output of the Dominion In 1928, 1,628,872 tons of paper were manufactured, valued at \$704,887,657 (mainly newsprint). Unimproved lands may be bought from the Government at 60 cents per acre, and the purchase-money paid in five instalments The area of land subdivided for the purpose of settlement unsold on June 30, 1938, was about 8,250,000 acres. In 1938 the production of dairy 

Catholic and a Protestant Committee, each under a deputy head, is invested with the central control of Education. The schools, both Roman Catholic and Protestant, are maintained partly by local taxation and partly by Government grants. There were, in 1928, 8,145 schools with 611,783 scholars, including the high and superior schools and so normal schools supported by the State. There are also Schools of Agriculture, Dairying, Polytechnic, Fine Arts, Rangers, Historic Guides, Blind and Deaf, Nursery, Com-mercial and Classical Schools, and four Uni-versities—two Protestant (McGill University, Montreal, and Bishop's College, Lennoxville); and two Roman Catholic (Laval University,

Quebec, and Montreal University).

Principal Cities.—CAPITAL, QUEBEC (population, 131,000), historic city visited annually hy thousands of tourists, and one of the great seaport towns of Canada; and Montreal (population). lation, 989,835), the commercial metropolis, and the principal centre of the Canadian grain export trade, situate at the confluence of the Ottawa and St. Lawrence Rivers. Ocean-going steamers ascend the St. Lawrence as far as Montreal. Other important cities are Hull (27,087), Sher-brooks (26,200). Trois Rivières (25,000). Verdun

brooke (26,300), Trois Rivières (35,000), Verdum (46,477). Population figures from "Municipal Statistics of the Province of Quehec" (1928).

Brunswick by a low fertile isthmus about thirteen miles wide. It comprises an area (with Cape Breton Island) of 3:,488 square miles (350 miles of which consists of lakes, rivers and inlets of the sea) with a total population, at the Census of 1931, of 53,337, an increase since the last census of 31,499 persons. Estimated population (1989) 550,000.

Government.—The Government is administered by a Lieutenant-Governor, aided by an Executive Council and a Legislative Assembly of 38

Agriculture and Line Stock .- About 8,000,000 acres are fit for tillage, and the soil is of good average fertility. The climate is delightful, the winter being less severe than in most of other parts of the Dominion. In 1930 there were about 5,000,000 acres of land occupied, of which about 735,000 acres were under crop, 3,000,000 acres in pasture and partially wooded lands, and about 70,000 acres in gardens and orchards. Fruit is extensively cultivated, and orchards. Finit is extensively cultivated, and the estimated apple crop for 1930 was 1,200,000 harrels, the principal fruit helt being the Annapolis Valley. The products of the fields and orchards in 1930 were valued at \$30,000,000. Improved farms of 100 to 350 acres, with house and buildings, may be obtained at from £100 to £1,000, whilst the Government offer uncleared Crown lands at \$300 per 100 acres, or \$50 per acre for any additional, not to exceed 150 acres in all. Through the Land Settlement Ant. the Government cities practical assistment Act, the Government gives practical assistance to skilled farmers. There is a Government agricultural college and experimental farm at Truro for men and women, and a well-equipped technical college at Halifax. In 1930 the live stock included 51,530 horses, 285,000 cattle, 289,621 sheep, 43,593 swine, and 1,145,983 poultry.

Manufactures .- In rose the gross value of the NOVA SCOTIA.

Area and Population—Nova Scotta is a peninsula between 42° as' 49° N. lat. and 59° 40′— setted was \$1:7,526,497, and 15,638 hands were peninsula between 42° as' 49° N. lat. and 59° 40′— setted was \$1:7,526,497, and 15,638 hands were peninsula between 42° as' W. long., and is connected with New Sydney (\$zs,96z,021) and Halifax (\$zo,700,999). Figheries.—The total value of the fisheries in 1927 was \$9,500,000, and the number of persons employed was about 20,000.

Minerals.—Mine products in 1927 were valued at \$35,950,000; the coal deposits are extensive and are estimated to last for 200 years. 6,445,042 gross tons were produced in 1930. Iron ores are plentiful, and extensive manufactures of iron and steel are carried on at Sydney and Sydney Mines, Cape Breton.

Principal Cities.—Capital, Halifax (population 58,37s), one of the terminals of the Canadian National Railway, with a magnifecnt harboun, is one of the principal winter poits of Canada, and the entrepot of a large trade with the West Indies and South America. A shippard to the building of large ocean-going steamers, with a dry dock, is one of the leading industries. Sydney in Cape Breton has a population of 22,545, and Glace Bay 27,000.

### CAPE BRETON ISLAND.

Cape Breton Island, formerly a distinct Colony, now incorporated with Nova Scotia, contains an area of 3.975 square niles, with a population of about 130,000, inhabitants. The chief city, Sydney (pop. 22,545), on the custern coast, has valuable collieries in the neighbourhood and is the sate of the largest steel works in Canada. The Canadian National Railway connects the island with the mainland by rail ferry.

#### NEW BRUNSWICK.

Area and Population—New Brunswick is situated between 45°—48° N lat. and 53° 47′—69° W long, and comprises an area of 27,085 square miles, with a population in 1921 of 387,876, an increase since the last census of 35,087 persons It was first colonised by British subjects in 1763, and in 1783 by the inhabitants of New England, who were disposseesed of their property in consequence of their loyalty to the British Crown.

Government.—The Government is administered by a Lieutenant-Governor, assisted by an Executive Council, and a Legislative Assembly of 48 members elected by the people.

were \$4,933,029, and the ordinary expenditure
\$4,037,237.

Agriculture and Live Stock.—The total land area is x8,65,000 acres, of which 900,033 acres were under field crops in x935. The total value of the field crops in x937 was \$x8,4x3,500. The live stock (x937) included 2x6,693 cattle, x53,097 sheep, 77,307 pigs, 5x,304 horses, and 956,093 poultry Free grants of land are ordered, and settlement encouraged. Improved farms are obtainable at reasonable rates The fisheries include salmon, cod, mackerel, herring, and shad; value of the fisheries (x925) \$4,795,859. In x937 the cheese factories in operation produced \$00,000 h, and the cleameries x,885,262 lb. of butter.

Manufactures —The gross value of the ontput of manufactured goods in 1924 was \$57,45,656, the principal manufacturing centre being \$57,45,656, the principal manufacturing centre being \$5. John (\$26,552,152) The chief industrial pursuits arise from the produce of the forests and the fisheries. Natural gas has been found in minimize quantities in Albert County, and the south-eastern section of the Province is remarkably lich in oil shales. Coal is found; also silver, lead, antimony, coppier, fron, manganese, and other valuable minerals in considerable quantities.

Principal Cities. — CAPITAL, FREDERICTON; population (1921), 8,114. St. John (pop 69,093) is one of the principal winter ports of Canada, and is connected by C.P.R. and Canadam National Railways with Montreal, Moneton (17,488).

# MANITOBA.

Area and Population—Manitoba, originally the Red River Settlement, is situated in about the centre of the continent, between 49°—50° N. lat, and 95°—ror' W. long., with a total area of 257,832 square miles and a population (1936 (Census) of 639,056, an increase since the last census of 25,938.

Government.—The Government is administered by an Executive Council of 8 Ministers, who are members of the Legislative Assembly of 55 members, each in receipt of an annual sessional allowance of \$5.000.

The lands on being

Agent-General in London, F. P. Buiden, British Columbia House, x Regent Street, S. W.1.

Finances.—The receipts of the provincial government in 1923-30 were \$26,083.727, and the expenditure \$26,219.156.

Agriculture and Live Slock.—The agricultural production of British Columbia in 1930 was valued at \$55.957,734. Liv. stock in 1930 included 65,686 horses, 404,389 cattle, 196.65 sheep, 65.68a swine, and 3,692,736 poultry. The butter output totalled 6,503,301 lb., valued at \$2.906,933, and the cheese 564,837 lb., worth \$2.77,343.

Production and Industry.—The gross value of the output of manufactures in 1929 was \$275.850.524, the principal manufacturing centres being Vancouver, Victoria, New Westminster, and Prince Rupert. The yield of other industries was, in 1930: minerals, \$55.331.939; forest products, \$569.727.000: flabories, \$32,103.800. There are extensive coal measures, and a vast and compact are of merchantable tumber; the mines have produced over \$1.237.847.577, and are still in the early stages of development. Only one-tenth of the available agricultural and fruit lands is at present settled, and there are undeveloped deposits of magnetite and hematite iron. The climate is healthful and temperate. The principal exports are fish, coal, gold, silver, minerals, timber, fruit, pulp and paper.

Principal Cities.—CAPITAI, VICTORIA. Population 1931, 36,441. Other centres are Vancouver (445,307 in 1931), New Westminster (17,524), Prince Rupert (6,326).

### PRINCE EDWARD ISLAND.

Area and Population.—Prince Edward Island has in the southern part of the Gulf of St. Lawrence, between 46°-47° N. lat. and 62°-62° 32° W. long. It is about 130 nmles in length, and from 4 to 34 unlies in breadth; its area is 3,164 square miles (ather larger than that of the English county of Norfolk), and its population (Consus, 1921) 83,675 (47,069 males and 46,659 females in 2012), a decrease from the last census of 5,123 persons. The island was first settled by the French, who held it for many years as a fishing station. The British took it from them in 1945, but afterwards restored it; they seized it again, however, during the Seven Years' War (1956-1962) and compelled the greater part of the French inhabitants to leave, and from that time it has remained British.

Government.—The Government is vested in a Lieut.-Governor and an Executive Council, and a Legislative Assembly of 30 members elected by

Agriculture and Live Stock.—Saskatchewan is the largest wheat-producing province of the Dominion, and one of the most productive grain areas in the world. In 1930 the grain yield totalled 381,154,000 bushels The approximate. totalied 353.154,000 bushels The approximate value of grain crops was \$117,74,000, of field crops \$9,084,000, livestock 19,293,000, poultry product \$12,201,000, fur \$1,133,000, and garden produce \$1,500,000. The live stock included 1,077,234, mules and lorses, 1,214,785 cattle 20,888 sheep, and 497,927 swine.

Industries.—The capital invested in manufacturing quietrifies in 100 was \$200,000.

facturing cuterprises in 1930 was \$45,000,000, and the value of the manufactured products \$80,501,159, the principal industrial centres being Regina, Moose Jaw, Saskatoon and Prince Albert.

In 1930 there were 4,917 public elementary schools with 220,286 pupils and 9,000 teachers, and zo Secondary schools with 8, 248 pupils.

CAPITAL, REGINA. Population (1939), 67,000. Other large centres are Saskatoon (50,000), Moose Jaw (24,000), Prince Albert (10,000), Swift Current (5,500), North Battleford (6,200), and Yorkton (5,500).

# TERRITORIES.

THE YUKON TERRITORY was constituted a separate political unit in 1898. It is governed

_________

by a Gold Commissioner and a Territorial Council of three elected members. The area of the Territory is 207,076 square miles. The population in 1921 was 4,157 (2,819 males and 1,338 females). Mining is the chief industry. The gold output for the year ending Dec. 31, 1930, Was \$659,394.

Gold Commissioner, Geo. Ian MacLean. Judge, Hon. C. D. Macaulay.

THE NORTH - WEST TERRITORIES (1,309,682 square miles, population 12,000—inclinding 7,100 Eskimo, and 3,800 Indians) comprise the territories formerly known as Rupert's Land and the North-western Territory (except such portions thereof as form the provinces of Manitola, Saskatchewan and Alberta and the Yukon Terripossessions in North America and all islands adjacent thereto not included within any province, except the Dominion of Newfoundland and its dependencies. For administrative pur-poses the Territories were subdivided into the provisional districts of Mackenzie, Keewatiu and Franklin The Commissioner in Council has power to make ordinances for the Territories under instructions from the Governor-General in Council or the Minister of the Interior.

#### TERRITORIAL COUNCIL.

(Appointed by the Governor-General in Conneil.) Commissioner, Hugh Howard Rowatt. Deputy Commissioner, Roy Alexander Gibson.
Councillors, Charles Camsell; Oswald Steiling
Finnie; Duncan Campbell Scott; Gen. J. H MacBrien, C.B., C.M.G., D S O.

Acting Secretary, David Livingstone McKeand.

### PHYSIOGRAPHY.

The Island of Newfoundland is situated between 46° 37'-51° 37' N. latitude and 52° 44'-59° 30' W. longitude, on the north-cast side of the Gulf of St. Lawrence, and is separated from the North American Continent by the Straits of Belle Isle. The island is about 317 miles long and 316 miles broad, and is triangular in shape, with Cape Bauld (N.), Cape Race (S.E.), and Cape Ray (S.W.) at the angles. The coart is extremely rugged, and the coastal regions are mountainous, the north and cast being cold during winter and early spring owing to the quantities of ice brought down from the Greenland seas. The interior is indulating and is covered with tolts (round hills) interspersed with lakes, rivers, and swamps, but containing many fertile valleys, where the climate is favourable to agriculture, and a great wealth of forests, mainly of spruce, fir, pine, and birch. The climate is salubrious, and the people are a strong, brave, healthy, hardy, industrious race. The thermometer seldom falls below zero in winter, and ranges in the shade in summer from 70° to 80°.

# GOVERNMENT.

Newfoundland, the oldest English colony, was discovered by John Cabot on June 24, 2497; the first land seen was hailed as Pranativa—the present (ape Bonavista. The island was afterwards visited (1500) by the Portuguese navigator Gaspar de Cortercal, and soon became the centre of an extensive fishing industry, with settlements of Portuguese, Biscayans, and French. In August, 153, the island was formally occupied by Sir Humphiey Gilbert, in the name of Queen Elizabeth, and by the Treaty of Utrecht (1713) the whole island was acknowledged to be British. A Governor was first appointed in 1798, and in 1855 "Responsible Government" was accorded to the island.

The executive is entrusted to a Governor, appointed by the Crown, aided by an Executive Council, with a Legislature of two houses.

#### GOVERNOR.

# THE MINISTRY (Nov. 17, 1928).

Colonial Secretary, Hon. Arthur Barnes, B.Sc , Ph.D	
Finance & Customs, Hon. P J. Cashin Posts & Telegraphs, Hon W W. Halfyard	4,000
Solicitor-General, Hon F G Bradley, K C.	4,000

The print pal imports are flour, tettiles, coal, hardware, and provisions; the principal exports are codfish, cod and seal oil, pulp and paper, herrings, seal-skins, tunned lobsters, fron pyrites, and other minerals; the total value of the fishery products in 1929-30 was upwards of \$24,953,004.

# PRODUCTION AND INDUSTRY.

The inhabitants are chiefly located on the coast-line of the shore and bays, nearly ro, oco being engaged in fishing—for cod in summer and seal fishing in winter and spring. Agriculture, mining, and lumbering are also engaging attention and affording means of employment, while large pulp and paper mills have been erected. The larger portion of the interior is practically in a state of nature, but the rallways have opened up large tracts. A valuable discovery of copper has been made at Little Bay, about see miles from St. John's.

#### COMMUNICATIONS.

Ratiways.—There were gog miles of railway open in 1926 and 47 miles of private line. The trans-insular line runs to Port-aux-Basques, with Exploits River and Bay of Islands, with branch connexions to Placentia, Bonavista, Bay de Verde, Hearts Content, Trejassey, the principal settlements in Conception Bay, and to Lewisporte (in Notre Dame Bay). Communication between various points on the coast and Sydney, C.B., is maintained by a fleet of xx first-class steamers.

Posts and Telegraphs.—There were 385 post offices in 1930 (165 of which were also telegraph offices and 75 telegraph offices additional, dealing with 8,500,000 letters and post-cards, 4,000,000 newspapers and hooks, and 688,644 parcels. 740 telephone stations are open, mostly in post offices. There are 4,830 miles of telegraph line and 1,300 miles of postal telephone wire. Postal revenue, \$410,739; Customs duty collected, \$210,540; telegraph revenue, \$20,497.

Shipping.—On Dec. 31, 1930, the Mercantile Maine of Newfoundland consisted of \$1,501 sailing vessels of 102,728 tons, and 255 steam and motor vessels of 41,670 tons. In 1930-30 the tonnage of vessels entered and cleared at Newfoundland ports was 3,375,499 tons, of which 1,820,223 tons were British.

#### TOWNS.

The CAPITAL, ST. JOHN'S (population 1930, 42,143; with suburbs, 58,811), contains two cathedrals, several banks, and numerous public buildings. Other towns are Harbour Grace (3,828), Bonavista (4,052), ('arbonear (3,320), and Twillingate (3,327).

# HIGH COMMISSIONER.

High Commissioner in London, D. J. Davles, C.B.R., B Sc. (Acting). Office, 58, Victoria Street, S.W. 1.

# LABRADOR,

Labrador, a dependency of Newfoundland, forms the most easterly part of the North American continent, and extends from Blanc Sablon, in the Straits of Belle Isle, on the south, to Cape Chidley, at the entrance to Hudson's Straits on the north. The boundary between Quebec and Labrador came up for settlement before the Judicial Committee of the Privy Council in Oct., 1965. By the judgment given in March, 1967, the boundary was defined as a line drawn due N. from the eastern boundary of Blanc Sablon as far as 18 N. Lat., and from thence W. along that parallel to the Bomaine River, and thence N. along the east bank of that river and its headwaters to their source, and thence due N. to the crest of the watershed or height of land there, and thence W. and N. along the crost of the watershed or height of land there, and thence W. and N. along the crost of the watershed of the rivers flowing into the 4tlantic Ocean until it reaches Cape Chidley. The territory thus contirmed as under the jurisdiction of Newfoundland has an area estimated at 120,000 square miles. Labrador possesses valuable cod, herring, trout, and salmon fisheries. One of the grandest spectacles in the world is provided by the Grand Falls on the Hamilton River. The inhabitants are mainly Eskimos, engaged in fishing and hunting. There are no towns, but there are Moravian. Mission stations at Makkovik, Hopedale, Nain, Okak, Rebron, and Killinek.

Australia was separated from the other great land surfaces at a remote period, and exhibits therefore some very archaic types of fauna and flora. It may be regarded as the largest island or the smallest continent, being surrounded by the following waters:—North, the Timor and Arafura Seas and Torres Strait; East, Pacific Ocean; South, Bass Strait (which separates Tasmania from the Continent) and Southern Ocean; and West, Indian Ocean. The total area of the Continent is 2,948,366 English square miles, the island of Tasmania having an area of 26,215 square miles, and making a total area for the States and Territories of 2,974,58r square miles. The coast-line of Australia is approximately 12,220 miles, and the geographical position of the Continent is between 10° 41′-39° 8′ South latitude and 113° 9′-153° 39′ East longitude; the greatest length East to West is 2,400 miles, and from North to South 1,971 miles. Its nearest distance to England is about 11,000 miles. From a physical standpoint the continent of Australia is divisible into an eastern and a

western area, the former containing a regular coast-line with a good harbourage, roadsteads, rivers, and inland waterways, and a greater development of fauna and flora; the latter a broken coast-line with estuaries rather than rivers, and but little inland water communication. whole continent is, roughly speaking, a vast, irregular, and undulating plateau, part of which is below the level of the sea, surrounded by a mountainous coast-line, with frequent intervals of low and sandy shore on the north, west and south. The Great Barrier Recf extends parallel with the East coast of Queensland for 1,200 miles, at a distance of about 60 miles from the mainland. A large part of the interior, particularly in the west, consists of sandy and stony desert, covered with spinifex, and containing numerous salt-marshes, though reaches of grass-land occur here and there. The geological formation of Australia is remarkable for its simplicity and regularity; the strike of the rocks is, with a single exception, coincident with the direction of the mountain-chains, from N. to S.; and the tertiary formation to be found in the N., S., and W. develops in the S.E into a gigantic tertiary plain, watered by the Darling and the Murray Rivers. Nearly all round the coast, however, and in eastern and southeastern Australia, stretching far inland from the coastal range, is a fertile area devoted partly to agriculture, partly to dairying, while the inland districts particularly are admirably adapted to the rearing of sheep. The most extensive mountain system takes its rise near the S.E. point. and includes a number of ranges known by different names in different places, none of them being of any great height. The highest peak, Mount Koscinsko, in New South Wales, reaches an elevation of 7,328 feet. The principal rivers are the Murray, which debouches on the south coast, after receiving the waters of its tributaries the Murrumbidgee, Lachlan, and Darling, in the S.E. part of the island: on the east coast, the Hawkesbury, Hunter, Clarence, Richmond, Brisbane, Mary, Burnett, Fitzroy, and Burdekin; on the west, the Swan, Murchison, Gascoyne, Ashburton, Fortescue, De Grey, and Fitzroy; on the north, the Drysdale, Ord, Victoria, and Daly; and the Roper, the Flinders, and Mitchell, which debouch into the Gulf of Carpentaria. Lakes are numerous, but nearly all are salt; the scarcity of the natural water supply has been, however, mitigated by successful borings and by the construction of large dams. The work of conserving the vast quantities of water which run to waste in the wet season is being vigorously prosecuted by a system of locks and weirs on some of the rivers. Minerals comprise gold, silver, copper, zinc, iron, and coal in large quantities, antimony, tin, gypsum, magnesite, osmiridium, opal, sapphires, &c., and there are abundant supplies of building stones, clays, &c. The potentialities of the country in regard to its supplies of metals and minerals have not yet been fully tested.

Climate.—The seasons commence about March 21 (Autumn), June 21 (Winter), Sept. 22 (Spring), and Dec. 22 (Summer). The climate is extremely dry, but, except in the tropical const-land of the north, the continent is everywhere highly beneficial to Europeans, the range of temperature being smaller than that of other countries similarly situated.

GOVERNMENT.

The Government is that of a Federal Commonwealth within the British Empire, the executive power being vested in the Sovereign (through the Governor-General), assisted by a Federal Ministry of ten Ministers of State and such honorary Ministers who may be appointed thereto. The Commonwealth was constituted by an Act of the Imperial Parliament dated July 9. 1900, and was inaugurated Jan. 1, 1901. Under the Constitution the Federal Government has acquired and may acquire certain defined powers as surrendered by the States, residuary legislative power remaining with the States. Trade and customs passed under Federal control immediately on the establishment of the Commonwealth; posts, telegraphs and telephones, naval and military defence, lighthouses and quarantine on proclaimed dates. The Commonwealth also now controls such matters as old age pensions, patents and copyrights, naturalization, navigation, &c. The right of a State to legislate is not abrogated except in connexion with matters exclusively under Commonwealth control, but where a State law is inconsistent with a law of the Commonwealth the latter prevails to the extent of the inconsistency.

# GOVERNOR-GENERAL.

Governor-General, His Excellency the Rt. Hon Sir Isaac Alfred Isaacs, P.C., Military Secretary, Capt. L. F. Bracegirdle, D.S.O., R.A.N.

A.D.C., Lieut. N. R. Forrest. ....£10,000

# Executive Council.

(Oct. 22, 1929.) Prime Minister, Munister for External Affairs, and Munister for Industry, Rt. Hon. James Henry Scullin, P.C. Treasurer, Theodore. Hon. Edward Vice-Pres. Executive Council, Senator Hon John Barnes ...... Attorney-General, Hou. Frank Brennau . Postmaster-General and Minister for Works, Hon. Albert Ernest Green ...... Minister for Markets and Transport, Hou. Minister for Home Affairs, Hon. Arthur Minister for Defence, Hou. Joseph Bene-

Joseph Daly, John Braidwood Dooley, Lucien Lawrence Cunningham .. .....

COMMONWEALTH OFFICES IN LONDON, Australia House, Strand, W.C a.

High Commussioner, Maj Gen. Hon. Sii G de L. Ryric, K.C.M.G., C.B., V.D. .. £2,250 Official Scoretary and Financial Adviser, 653

C.M.G , C.B.E. ..... 1.550 Commissioner-General for Australia in

Official Secretary, D McK. Dow,
"Cunard Building," 25, Broadway, New York ..... Commercial Representative for Australia in Canada, L. R. McGregor, 36 Youge Street, Toronto.

# THE LEGISLATURE.

The Federal Parliament consists of a Senate and a House of Representatives. The Sounte contains 36 mombers, six from each of the Original States, elected for six years by universal suffrage The House of Representatives, similarly elected for a maximum of three years, contains members proportionate to the population, with a minimum of 5 Representatives for each State. The House of Representatives, 1931, is made up of a5 for New South Wales, as for Victoria, 10 from Queensland, 7 from South Australia, 5 each from Tasmania and Western Australia, and z (entitled to debate but not to vote) from the Northern Territory. Members of the Upper and Lower Houses receive £800 per annum, with travelling expenses.

President of the Senate, Hon. Walter Kingsmill. Speaker, House of Representatives, Hon. Norman John Oswald Makin.

# THE JUDICATURE.

There is a Federal High Court with a Chief Justice and 5 Judges, having original and appellate jurisdiction, subordinate to the Judicial Committee of the Privy Council.

Chief Justice, Hon. Sir Frank Gavan Duffy, K.C.M.G.....£3,500 Judges, Hon. George Edward Rich; Hon. Hayden Erskine Starke; Hon. Owen Dixon . Hon. Herbert Vere Evatt; Hon, Edward Aloysius McTiernan each Court of Conciliation and Arbitration, Chief Judge, His Hon. George James Dethridge ... ......

Judges, Their Hons. George Stephenson Beeby; Edmund Alfred Drake-Brockman, C.B., C.M.G., D S O., V.D.....each Federal Court of Bankruptcy, Judge, Hon.

Lionel Oscar Lukin.....

# DEFENCE. Navy.

The Australian fleet consists of the Cruisers Australia, Canberra, Brusbane, Adelade, 4 sloops, 5 destroyers, seaplane carrier, and several auxiliaries. The personnel of the fleet is mainly Australian in character, although still supple mented to some extent by Imperial officers and men. The sea-going forces of the Royal Australian Navy on February 15, 1931, consisted of 560 officers and 3,013 men. There is also a R. A. N. Brigade composed of members of the Citizen Naval forces.

# Armv.

From 1912 to 1929 the defence policy was based on the universal compulsory training of a Citizen Army, but from November 1st, 1926, the constitution of the forces on a voluntary basis was adopted Under this system men from 18 to 40 years of age may be enlisted in the Militia Forces, and youths from 14 to 17 years in the Semor Cadet Corps. On April 30th, 1931, 31, 88 were undergoing training.

The permanent strength of the Australian Air Force in April, 1931, was 104 officers and 768 airmen; and of the Citizen Air Force, 60 officers and ago airmen. The Air Force and the Civil Aviation expenditure (excluding war services) for the year 1929-30 was £708,956.

Labour Statistics.—In 1930 there were 35s Trade Unions, with 845,787 members, of whom 120,000 were women. The estimated total number of employed persons over so years of age in 1930 was 1,313,000 males and 311,600 females. The number of unemployed members of trade unions averaged 19'3 per cent. Employers' Associations number 534, with membership of 134,660. Retail Price Index No. for food, groceries and rent (4 and 5 rooms) (6 Capital Cities) 1930 (haze 1933-1937-21,000) 975; including clothing, fuel, light and other miscellaneous household expenditure (hase 1933-1937-237-2,000) 975. Melbourne Wholesale Price Index 1930 (hase 1911-1,000) 1,590. Nominal Weekly Wage Index No., Australia, males (base 1911-1,000) 1,590. Nominal Weekly Wage Index No., Australia, males (base 1911-1,000) 1,887-961 96. Number of industinal disputes in 1930 was 183. involving 54,222 persons in a loss of 1,511,847 working days and £1,523,342 in wages.

### COMMUNICATIONS.

Railways.—Total length of Government (and private) railways open for general traffic at June 30, 1030, private lines being included in the totals and shown in parentheses:—

	HIPCH OPCI	
New South Wales Victoria Queensland South Australia Western Australia Tasmania	6,090 4,738 6,726 3,939 4,842 821	(116) (25) (279) (34) (277) (141)
Federal Capital Territory Northern Territory	316	=
Total	27,477	872

The gross earnings of all Government lines in 1993-30 were £45,778,437, working expenses £37,963,434, and net earnings £7,783,292, being at the rate of 28 3d. per train mile, and representing a return on the total cost (£329,500,024) of 236 per cent., as against 3,43 per cent. in 1988-29. In 1989-30 passenger journeys numbered 353,832,000 and 21,207,000 tons of goods and live stock were carried, the train miles run being £6,775,000. The electrification of the Sydney suburban system is in progress.

Tramways.—There are 64x miles of tramways in Australia, 572 miles of which are of electric,

4s of steam, 26 of cable, and 1 of horse traction Extensive conversions to electrical traction have been made and more are in progress. The several Governments control 400 miles; municipal antihorities, 185 miles; and the remaining 47 miles are operated by private companies and individuals. The total capital cost of tramways at June 30, 1930, was £28,56,602. The revenue of electric tramways for the year 1929-30 was £7,844,511, working expenses £6,408,041, and net revenue £1,436,470, or 4'80d, per car nile. 71,812,42 car miles were run and 653,778,000 passenger journeys recorded.

Shipping.—The entrances and clearances of vessels engaged in oversea trade at the various Australian ports in 1920-30 were: entered, 1,522 (5,444,446 tons); cleared, 1,539 (5,499,681 tons). Of the vessels entered, 1,077 of 3,997,870 tons were under the British flag and 445 of 1,446,576 tons under foreign flags.

tons under foreign flags.

The total including local shipping entering the ports of the capital cities during 1929-30 was: Sydney 6,192 vessels of 8,940,535 tons, Melbourne 3,475 (7,030,192), Brisbane 1,151 (3,607,591), Adelaide 2,958 (4,697,886), Fremantic 788 (3,754,409), and Hobart 586 (891,368). At December 31, 1930, there were 2,386 vessels of a total net tournage of 377,384 on the shipping registers of the several States.

Posts and Telegraphs.—In year ended June 30, 1930, there were 8,507 post offices: there were 9,327 telegraph stations, with 150,414 miles of wire, transmitting 15,724,146 telegrams, receiving 728,339 and dispatching 781,98s cablegrams A Beam wireless station, giving a service to and from Great Britam, was opened for traffic in April, 1927. At the end of year 1929-30, 520,169 Telephones were connected with 6,094 telephone exchanges; approximately 420,540,000 "local" and 33,384,725 "trunk line" calls were recorded for the year. 311,632 wireless broadcasting listeners' licences were issued in 1920-20

Motor Vehicles.—At June 30, 1930, there were 655,314 motor vehicles registered in the several States. These comprised 466,930 cars, 84,837 motor cycles, and 104,487 commercial vehicles; revenue derived from motor registration fees and motor tax, &c., in 1939-30 was £4,54,898. Motor omnibus services are extensively operating in urban areas.

Cini Aviation.—220 neroplanes of various types were registered with the Department of Civil Aviation at Junc 20, 2920 During the year 128,926 flights of a total duration of 42,963 hours were effected: 3,243,297 miles were flown, and ro4,226 passengers carried. On the subsidized aerial mail routes 29,205 lbs. of mail were carried; Western Australia, 25,649 lbs.; Queensland, 2,733 lbs.; and 82z lbs. on Adelaide (S.A.) and Cootamundra (N.S.W.) and branch services. Three subsidized companies are now operating machines over approved routes (approximately 5,900 air miles), while several unsubsidized companies have commenced commercial services over additional routes totalling 2,250 miles.

CAPITAL.—CANBERRA, in the Federal Capital Territory, transferred to the Commonwealth by N.S.W. on Jan. z, yex, has been laid out as the capital of the Commonwealth. At the latest available date the population of the Federal Capital Territory amounted to 8,459, of which 7,390 were living in Canherra.

THE MORTHERN TERRITORY.

The Northern Territory has a total area of sag. sea square miles, and lies between rag-180 sat longitude as far as 26°8 outh latitude. The administration was taken over by the Commonwealth on January x, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1911, 1

Agricultural development is increasing both in the number of individual landholders and the acreage under crop. The success of peanut growing during the last two years is mainly responsible for the improvement, and it is believed to presage a definite era of agricultural progress in the Territory. This applies to the land situated north of so'S. lat. Agriculture is practically negligible in that part south of soo S. lat. Agricultural leases are granted in per-petuity at nominal rentals, which are subject to re-appraisement every 21 years. They may be converted to freehold at any time after commencement of lease, subject to easy and liberal conditions. Most tropical products can be grown, and the potentialities for pig raising and bacon curing are excellent. The stanle industry is pastoral : cattle raising north of soo 8 lat. and is pastorial: cacter raising north of so is an anical cattle, horse, and sheep raising south of so S. lat. Until railways are constructed, however, little, if any, improvement is expected in the pastorial industry in that part north of so S. lat., owing to the distance between the eastern and southern Australian markets. The position south of 20° S. lat. is more hopeful, as a result of the extension of the railway from the Adelaide (South Australia) market to Alice Springs. The whole of the Territory is capable, under proper conditions, of carrying successfully and profitably a great expansion of the beef cattle industry. There are vast areas of magnificent country which could be so utilised. From the Queensland border to the Western Australian border, a distance of over 600 miles, there are many thousands of square miles of country splendidly grassed and growing edible shrubs. The chief rivers are Vic-toria, Adelaide, Daly, Roper, Liverpool, Goyder, MoArthur, and the Robinson. The first five are navigable, from 40 to 100 miles from their en-trance, for boats drawing 4 feet. Pearl fishing is carried on round the coast, the shell being of good quality. There are considerable mineral resources, gold, silver, lead, tin and mica being indicated, and when communications are opened up the industry will become important, only railway is from Darwin to Bi from Darwin to Birdum

(315 miles).
Darwin, North Australia, occupies an elevated

site 8e feet above high-water mark, overlooking Port Darwin. Alice Springs, Central Australia, is situated in the MacDonnell Ranges, and boasts a splendid climate.

Administrator of Northern Territory, Col.

Deputy Administrator of Central Australia, V. G. Carrington.....

# PAPUA.

The Territory of Papus, which was placed under the authority of the Commonwealth of Australia in 1505, comprises a part of the New Guinen mainland situated between the meridiaus of 141° and 150° 5€. longitude, and between the 5th and 12th parallels of South lattinde; also the Trobriand Group of islands, Woodlark, the d'Entrecasteaux Group, the Louislades, the Conflict Group and the Langulan Group. The total area of Papua is 90,540 sq. miles, of which 87,786 are on the mainland. There is an Excentive Council of nine members who, with five non-official members, form the Legislative Council. The white population in 1931 was 1,128. The official estimate of the native population is 275,000. On Dec. 31, 1930, 88,902 acres were under crops (47,827 coco-nuts, 9,075 rubber, 750 sisal hemp and 348 coffee). Owing to heavy rainfall Papua is well watered in most parts and possesses a large number of streams. The best known rivers are the Fly (650 miles long and navigable by steam launch for 500 miles) and the Purari. The climate is favourable to the cultivation of tropical products.

# TERRITORY OF NEW GUINEA.

The part of "German Now Gninea" over which Australia was given a mandate is situated in latitude between the Equator and \$28., and in longitude between 141° E. and 125° E. It consists of the N.E. portion of New Guinea to 141° E. (70,000 sq. miles), Bismarck Archipelago including New Britain, New Ireland, and islands adjacent to both (19,200 sq. miles), and the two northernmost Bolomon Islands (4,100 sq. miles) (Bougainville and Buka). The principal river in N.E. New Guinea is the Sepik, which is navigable for 250 miles.

The climate is hot and moist along the coast, with a steady drop as the higher altitudes are reached. It is suitable to the growth of all tropical products. In 1252-30 there were 204,000 acres under crops (coco-unta, 125,000). The white population in 1230 was 2,663; the native

# NORFOLK ISLAND.

This island is about 930 miles from Sydney and 400 miles from New Zealand. It is about five miles in length by three in breath, and was discovered by Capt. Cook in 1774. Its area is 8,388 acres and circumference so miles. The climate is mild, with a mean temperature of 68° and an annual rainfall of 55 inches The descendants of the mutineers of the Bounty were brought here from Pitcairn Island in 1856. The population in July, 1931, was approximately 1,000. Administrator, Col. A. J. Bennett, CM.G., D.S.O , V D

President Executive Council, E C. Robinson.

# States of the Commonwealth.

# I,-NEW SOUTH WALES.

The State of New South Wales is situated almost entirely between the 29th and 37th parallels of S, lat. and 141st and 154th meridians of E. long., and comprises an area of 320,372 square miles (inclusive of 940 square miles of Erritory)—1.c., more than five times that of England and Wales, and over three times the size of Great Britain and Northern Ireland.

POPULATION.—The estimated population at 31st March, 1931, was Males, 1,23,158 Total, 2,596,086

Births. Deaths, and Marriages.

_			
Year	linths	Deaths	Marriages

#### Religious.

All religions are free. There is no State Chinch About three-fourths of the people are Protestants, the members of the Church of England in New South Wales, according to the Census of 1921, number 1,027,410, to the Census of 1921, number 1,027,410, Roman Catholic 502,815, Presbyterian 219,932, Methodist 185,977, Congregational (Independent) 22,235, Empires 24,722, Salvation Army 9,490, and Hebrew 10,150.

# PHYSIOGRAPHY.

The Eastern or coastal district is traversed by The Eastern or coastal district is traversed by the Great Dividing Range, the various portions of the Range in N.S.W. being (from N. to S.) Macphetson, New England, Liverpool, Main of Bine Mountain, Cullarin, Gourock, Monaro and Municong Ranges—the highest points being Mount Kosenisko, 7,28 feet, and Townsend, 7,266 feet. The eastern or coastal district is watered by the Tweed, Richmond, Clarence, Belinger Namburca, Macleay Hastings Camdon linger, Nambucca, Macleay, Hastings, Camden Haveu, Manning, Wollomba, Hunter, Hawkesbury, George, Shoalhaveu, Clyde, Moruya, Tuross, Bega, Towamba, and Snowy Rivers. The western por-

tion of the country is not so well watered, but immense reservoirs are being constructed for irrigation purposes, and there are many artesian bores. The Darling, x,609 miles, and the Murrumbidgee, 98x miles, are both tributaries of the Murray, which has a total length of x,609 miles, 1,303 miles forming part of the boundary between the States of New South Wales and Victoria.

other inland rivers are: Lachlan, Bogan, Macquaire, Castlereagh, Namoi and Gwydur.

Chonate.—New South Wales is stuated entirely in the Temperate Zone The climate is dry and very healthy. At the capital (Sydney) the average mean shade temperature is 63 22.

The mean temperature ut the shade for the most temperature for the copt is 65° to 70°, south coust 50° to 65° The mean temperature to the shade for the north coast 56° to 52°, northern tableland 57° to 60°, southern tableland 46° to 58°; noth-western slopes, the mean anunal temperature ranges from 52° to 64°, south-western slopes 60° to 64°, south-western slopes 60° to 63°, and in the Western Plains and Rivenna Division from 52° to 69°. The Seasons are as follows: Spring during September, October and November: Summer during December. and November; Summer during December, January, and February; Autumn during March, April, and May; Winter during June, July, and August.

### GOVERNMENT.

New South Wales was first colonised as a New Solini water was into colonized as a British possession in 1788, and after progressive settlement a partly elective legislature was established in 1843 in 1855 "Responsible Government" was granted, the present Constitution being founded on the Consolidating Act of 1902. The executive authority is vested in a Governor (appointed by the King), assisted by a Conneil of Ministers.

GOVERNOR.

Governor of New South Wales, His Ex-cellency Air Vice-Marshal Sir Philip Woolcott Game, G.B K., K C.B., D S o.

Official Secretary, H. S. C. Budge, C. M. G. . . ...£5,000 Private Secretary, Brig.-Genl. A. T. Anderson, c M a.

Lucutenant-Governor, Hon. Sir Philip Street, K.C.M.G., born 1863.

#### EXECUTIVE COUNCIL.

H.E. the Governor presides: The Ministry:

A new Labour Cabinet was formed Nov 4.

1930, and reconstructed from June 17, 1931, 48 follows:-

Mows:—
Premier and Treasurer, J. T. Lang.
Mines and Labour, J. M. Baddeley.
Attorney-General, J. Lamaro.
Agriculture and Forests, W. F. Dunn.
Colonial Secretary, M. Gosling.
Education, W. Davies.
Lands, J. M. Tully.
Justice, W. J. McKell.
Public Works, M. A. Davidson.
Heatth, W. T. Ely.
Local Government, J. McGirr.
Vice-President of Executive Connect, J. M.
Concannon, M.L.C.

Allowances, amounting in the aggregate to £19,907 per annum, are payable to members of the Ministry.

These allowances, also all salaries and allowances shown below, have been reduced, under the Public Service Salaries Reduction Act (No.3, rogs, for a period of twelve months from August 5, rogs, by an amount arrived at by deducting sums langing from 15 per cent. on the portion of salary below £500 to 32% per cent. on that portion of salary which exceeds £1,500.

THE LEGISLATURE.

Parliament consists of two Houses, the Legislative Council and the Legislative Assembly. Members of the Legislative Council (36 in August, 1931) are appointed by the Crown for August, 1931) are appointed by the Crown for the Members are not entitled to remuneration, but travel free on the State railways and transways. The Legislative Assembly consists of 50 nuembers. Each member of the Legislative Assembly receives £742 152, per annum, and members travel free over the Government railways and transways in the State, and are provided with official stamped envelopes for the free transmission of correspondence through the post. The Women's Legal Status Act, 1918, removed disqualification regarding the election of women to be members of the Legislative Assembly. Natural-born or naturalised persons 21 years of age, who have resided 6 months in the Commonwealth, 3 months in the State and one month in the electoral district, are entitled to the franchise. At the State General Election in October, 1930, there were 719,999 male and 11,0549 female electors, making a total of 1.430.648 enrolled and qualified to vote; of these 1,356,423, or 94'94 per cent, voted.

President of the Legislative Council, Pro-

Chairman of Committees, Legislative Assembly, Major H. J. Connell, D.S. O., M.O. 947 125. Clork of Assembly, W. R. McCourt 1,140 Librarian, J. J. Quinn 870

# THE JUDICATURE.

The indicial system includes a Supreme Court (with a Chief Justice and eight Puisne Judges), Land and Valuation Court, Industrial Commission, District Courts, Workers' Compensation Commission, Courts of Quarter Sessions, Petty Sessions and Children's Courts and Fair Rents Courts. Trial by jury has been in force since 1824.

1927 1928 *1929 *1930 *1931	£ 44,149,566 44,198,978 20,703,940 19,750,801 17,422,051	£, 42,690,624 45,293,968 20,110,771 21,130,064 20,296,315	£ 227,724,466 245,247,907 256,791,944 259,589,967

Co-operative Societies.—There were 370 registered societies in existence at June 30, 2330. During the year ending on that date the sales of 92 rural societies amounted to £14,769,572, and the sales of 47 trading societies amounted to £3,553,038. Building Societies advanced

60 £3,55,50.5. Duffing Societies advanced £747,316 to members Shipping.—Excluding coastal trade, s,63 vessels entered ports of N.S.W. during the year ended June 30, 1930. For the year ended June 30, 1931, the shipping entries at Sydney, including State coastal, were 5,682 vessels of 8,468,882 net tomage. The dock accommodation at Sydney includes four large graving docks, five floating docks, and seven patent slips. At Newcastle there are five patent slips.

Motor Vehicles — At June 30, 1930, there were 154,096 registrations of motor-cars in force, and

68,007 of other motor vehicles
**Rativacys.**—The railways and tramways of New
South Wales, with the exception of a few short
lines, representing about 113 miles, are controlled
by the State. At June 30, 1930, the mileage of
the State railways open for traffic was 5,974, the
capital cost amounted to £125,378,326, and the
net earnings for the year 1929-30 to £2,364,269.
There were also 212 miles of State tramways,
the capital cost being £12,764,974, and the net

earnings £27,906.
Roads and Bridges.—A Main Roads Board, of two engineers with special knowledge of road construction and a president, was constituted in rogs. Municipal councils are assisted in the construction and maintenance of the main highways with the object of developing vacant lends, feedling the railways, and giving pnimary

producers access to markets and providing better facilities for motor traffic. There are 112,595 miles of roads in New South Wales. At June 30, 1927, Irliges over so ft. span numbered 4,972, the total length being 404,381 feet. The total expenditure other than on Sydney Harbour Bridge, in 1928-30 was £4,939,199 (including loan moneys expended by Main Roads Board). The construction of an arch bridge over Sydney Harbour is in course of erection, and will be completed early in 1932. This bridge will carry a roadway 57 ft. wide, two footways each 10 ft wide, and four lines of railway. At mean high water there will be a headway of 172½ feet. At June 30, 1930, the Government expenditure in connection with the bridge amounted to £6,463,943. Of this sum £1,212,361 had been expended on resumptions and £1,139,265 on

approaches.

Posts, Telegraphs and Telephones —The postal, telegraphic, and telephonic services are administered by the Commonwealth Government. At June 30, 1930, there were 2,676 post offices in New South Wales The postal matter curried during 1926-29 (the latest year for which the information is available) included 252,038,712 letters and postcards, 81,305,900 newspapers, 65,164,500 books, packets and parcels. During the year ended June 30, 1930, 6,842,976 telegrams and cablegrams were transmitted, exclusive of telegrams from other States of the Commonwealth of Australia. The telephone line connections numbered 150,666.

TRADE.

The oversea imports into New South Wales during 1930-31 were valued at £26,288,121, and the oversea exports were £31,376,904.

PRODUCTION AND INDUSTRY.

Agriculture is one of the principal industries of New South Wales; 5,499,408 acres, excluding 1,538 acres double- cropped, were under cultivation during the year ended June 20, 1930, producing 34,407,000 bushels of wheat, 3,035,850 bushels of naize, 2,528,610 bushels of oats, besides other kinds of grain, with 23,907 tons of potatoes, 686,650 tons of hay, and 1,934 cwt, of dried leaf tobacco. Sugar-cane to the extent of 14,412 tons was crushed; and 1,933,700 gallons of wine, 171,720 cases of bananas, and 28,403 dozen of pineapples obtained; almost every kind of fruit and vegetable is grown. The estimated total area under wheat in the year 1930-31 was 5,664,600 acres, of which 5,123,100 acres were harvested for grain, and 25,000 acres for large and 25,000 acres were fed off. The estimated production of wheat was 65,811,000 bushels of grain and 570,750 tons of bay.

Jand Alteration.—The total extent of land alterated and in process of alleration on June 30, 1330, was 67,500,324 acres, while the area of land held under lease, &c., was 13,326,336 acres, and the balance, 16,800,8xs acres, coinsisted of reserve and other lands neither alterated nor leased; the total area of the State, exclusive of Federal Capital area (Canberra), being 198,036,360

Lave Nuck.—The country is admirably adapted for sheep-farming, and several breeds of sheep are depastured, including the celebrated merino, which was introduced in 1797. On June 39, 1239, there were 534,945 horses, 1,039,949 dairy ows, 1,645,183 other cattle, total cattle 1,685,123; 48,720,000 sheep, 323,499 swine,15,651 goats, and 534 camels. A pieliminary estimate of the

o'The figures relating to revenue and expenditure for the years 1999, 2992 and 1932 are not comparable with previous years, the Metopolitan Water Board being excluded from Comodidated Revenue from April 2, 1992, other Bushness Undertakings from July 2, 2992,

number of sheep at December 31, 1930, is 49,870,000. In 1929-30, 459,970,000 lb. (stated as in the grease) of wool were produced, 105,022,376 lb. butter, 6,345,785 lb. cheese, and 21,564,72 lb. bacon and ham. The production of wool in rago-31, according to a preliminary estimate, was 430,000,000 lb. During 1939-30 there were 126,271 persons permanently engaged in rural in-

135,37; persons permanently engaged in rural industries, 116,43; being males, and 9,848 females. Values of Rural Industries.—The agricultural production was valued in 1929-30 at £15,438,000, dairying and farm; yard produce at £19,796,000, and pastoral production at £28,511,000, a total

of £38,745,000.

Forests, Fisheries and Trapping.—The value of these industries in 1929-30 was £4,131,000,

and 6,303 persons were engaged.

Mining Industry.—The goldfields were opened in 1831. The principal minerals are coal, copper, silver. lead, zinc, tin, iron, opal and platinum. silver, lead, zinc, tin, iron, opal and platinum. The total value of minerals won during 1930 was £9.782,606, exclusive of Portland cement £926,792, lime £52,365, and color £526,345, coal accounting for £5.192,922, silver, silver lead and ore £2.083,790, and gold £53,066. The value of the mining plant and machinery was £7,068,630. The mining hidustry gave employment to a rop operand during the war. ment to \$5,010 persons during the year.

Factories.—In 1999-30 there were 8,208 factories; the employees numbered 157,690, of whom 125,769 were males and 41,921 females, the amount of £34,875,905 being paid in salaries and wages. Male workers, exclusive of working proprietors, received on an average an amount of £323 v3. Od during the year and females £121 v6e. 7d. The capital value of land, buildings and fixtures amounted to £53,785,339, and of plant and machinery £53,515,368. The full capacity of the machinery was 1,304,964 h p., including steam, 868,526 h.p.; gas, 15,400 h.p.; oilectricity, 373,893 h.p.; water, 90,218 lb.p.; oill, 27,927 h.p. The power actually used was, on the average, 783,266 h.p. The value of output was £36,250,618, materials used, £94,364,658, and fuel consumed (including motive power rented), £6,038,350; the production, £., value added to raw materials, was £66,847,610. There are large from and steel works at Newcastle, Lithgow and Port Kembla. proprietors, received on an average an amount and Port Kembla.

The total value of the production of the primary industries in 1929-30 was £70,375,000, making, with factory production, a total for all industries (as far as it is recorded) of £137,223,000, which is equal to £55 78. 7d per head of population.

# LOCAL GOVERNMENT.

For purposes of Local Government, with the exception of an area of 125,950 sq miles in the sparsely-populated western division, the State is divided into x8x municipalities and x38 shires, governed by councils which are elected triennially. The councils are empowered to levy rates on the value of land, to float loans, to acquire land and works, to construct and maintain streets, jetties, wharfs, &c., to make regulations regarding cattle slaughtering, main-

regulations regarding cattle staughtering, mainstenance of public places, traffic, street and road lighting, public health and safety, management of parks, &c.

The basis of rating is mainly on the unimproved capital value of land, which in rasps was £srx,324,326 in unmnicipalities, including the city of Nyduey, and £166,627,924 in shires.

The total income of the municipal bodies was

£14,821,211, and the expenditure on works and services, &c., £14,794,988.

SYDNEY, the chief city and capital, stands on the shore of Port Jackson, with a water frontage of 188 miles; the depth of water at the Heads is not less than so feet, and at the wharves from so to go feet. There are extensive plants for loading ships, and for storing and loading grain in bulk; also for replenishing coal and oil bunkers. For 12 miles Sydney Harbour extends when the first harbour in the grain and is inland, the finest harbour in the world, and is surrounded by scenery of surpassing beauty. The principal wharves are situated in close proximity to the business centre of the city. The total area of water in the port is 14,284 acres, or about as square miles, of which 3,000 acres have a depth of from 35 feet to 260 feet; the rise and fall of the tide 18 from three to six fect. The city extends four miles north and south by three miles east and west, and contains a population of rog,500 (Dec , 1930); contains a population of respace (Dec., 1930);
oi, including suburbs, a population of
1,a51,366.* In addition to the Government
buildings, there are the University and Colleges,
National Art Gallery, musenms, botanic gardens,
2001ogical gardens, free public libraries, observatory, conservatorum of missic, two cathedrals,
numerous churches and some large public hospitals. The parks within the metropolitan area are 82,272 acres in extent, and include the National Park which measures 33,800 acres, Kuring-gai Chase 35,300 acres, Kurnell 248 acres, Centennial Park 474 acres, and Parramatta Park #52 acres. Other towns are Newcastle (with suburbs), ro4.ryo; Broken Hill, 22,990, Lith-gow, r5,300; Maitland, E.& W., rr, 820; Goulburn, r2,560; Katoomba, r0,020; Bathurst, 9,690; Lisra, 500; Ratonino, ro, 520; Bathinat, 9,090; Lis-more, ro, 370; Albury, 9,320; Cessnock, 23,630, Wagga Wagga, 8,520, Liverpool, 6,240; Kairfield, 7,840; Grafton and South (Trafton, 6,950; Wollongong, ro, r30, Orange, 8,550. Tanworth, 7,690; Armidale, 7,090; Dubbo, 6,280; Glen Innes, 4,680; Forbes, 5,720. Approximate time in transmission of mails from London to Swidey, 88 days.

Banking, da.—There were (June 30, 1931) 15 tality, 48 as per 1,000 hirths, being one of the banks (including Commonwealth Bank) with lowest rates in the world.

total assets £125,672,975, within the State, and liabilities £125,612,525. The savings bank deposits (including amounts deposited in the Commonwealth Savings Bank) at June 30, 1931, principal religious denominations were as followed. amounted to £63,242,527.

### PRODUCTION AND INDUSTRY.

Agriculture.—Of the 8,651,930 acres under cultivation in 1939-30, 3,565,135 were wheat crops and 630,234 oats, and 865,015 acres were cut for liny. In 1920-30, 1,363,575 gallons of wine were produced. The estimated value of production in 1929-30 was (including manufacturing values)

500,593,185.

Live Nuck.—There were in 1930,619,416 milch cows, producing 90,639,652 lb. of butter and 6,953,949 lb. of cheese; and 715,826 other cattle, 17,427,203 sheep, 26,978 pigs, and 393,015 horses.
Minerals.—The gold production in Victoria has declined very considerably, the amount produced in 1930 being 24,119 02. (£202,456).
Other minerals raised consisted principally of coal (black and brown), kaolin, tin and gypsum.
Trads and Industry.—Wool, wheat, flour, butter, live stock, fruits, condensed milk and

poultry are the staple productions of the State; and the manufactures (8,195 factories, &c., employing 151,009 hands in 1939-30) are mainly for home consumption. The chief exports oversea are: wool, butter, wheat, flour, skins and hides, tallow, milk and cream, preserved and frozen meats and fruit (dried and fresh). The principal oversea imports of the State are iron and steel. machines and machinery, metals and metal manufactures, silks, volvets, &c., apparel and attire, bags and sacks, tea, cottons and linens, woollens, timber, petroleum spirit and paper.

# CITIES AND TOWNS.

MELBOURNE, the capital city, which is an episcopal see, was originally laid out in the year 1837 with wisdom and foresight; its wide statests, public gardens, university, public library, nuiseum and large churches are the principle features of the city. Melbourne and anhurbs cover an area of 125,742 acres and contained (December 31, 1930) a population of 1,038,500. Other cities are Ballarat, 45,050; (feelong, 43,400; Bendigo, 33,600, Warnambool, 8,100. The chief towns are Castlemaine, 7,170; Wonthagg, 7,000; Mildura, 6,000; Hamilton, 5,300; Ararat, 5,300, and Shepparton, 5,500. Transmission of mails, approximate, 30 days. Melbourne, distant from London 2x,207 miles;

transit, 30 to 35 days.

# III.-SOUTH AUSTRALIA.

The State of South Australia is situated between 26° and 37° S. lat. and 129° and 141° E. long., the total area being 380,070 sq. miles.

POPULATION -In 1931 the population numbered g8s,928 (300,828 males and a8s,100 females). Increase of the People.

Year.	Births.	Deaths.	Marriages

principal religious denominations were as follows:—Church of England, 165,968; Mothodista, 222,634; Congregationalists, 15,289; Baptists, 23,033; Lutherans, 24,666; Roman Catholics, 64,054; Presbyterians, 22,699; and Churches of Christ, 15,039. principal religious denominations were as fol-

### PHYSIOGRAPHY.

The eastern portion of the State is divided longitudinally by the *Flinders Range*, which extends from the eastern side of the Gulf of St. Vincent to the Lakes Torrens and Eyre. The north-western portion is partly desert which can never be brought into cultivation. The northern portion of the State, between Lake Eyre and 26° South latitude, is also unpromising in comparison with the fertile land that surrounds the hill country of the eart. Except for the Murray, which flows for some 250 miles through the south-eastern corner into the Southern Ocean, there are no rivers of importance in South Australia.

Climate.—The mean annual temperature at Adelaide is 63°, the winter temperature (July-August) averaging 53°, and the summer (Newember-March) 72°. During the summer mouths the maximum temperature at times exceeds 200°, but owing to the purity and dryness of the atmosphere the inconvenience is comparatively atmosphere the inconvenence is comparatively slight. The average annual rainfall at Adelakle, derived from 92 years' record, is 2109 inches. This total is rather higher than the approximate average annual rainfall over the whole of the agricultural areas extending from Melrose to Cape Northumberland. In the Mount Loft, Itanges the mean yearly rainfall in places exceeds to inches, while on the Adelaide plains the precipitation has fallen as low as 16 inches.

### (FOVERNMENT.

South Australia was proclaimed a British Province in 1836, and in 185x a partially elective legislature was established. The present Constitution rests upon a Law of Oct. 24, 1826, the executive authority being vested in a Governou appointed by the Crown, aided by a Council of 6 Ministers, and the Lieutenant-Governor.

# GOVERNOR.

Governor of South Australia, His Excellency Brig. Gen. Hon. Sir Alexander Gore Atkwright Hore - Ruthven, 1863 (1916)

THE MINISTRY (Oct. 30, 1930). (£6,200 is allotted as salaries to Ministers, less so per cent, for 12 months.)

Premier and Treasurer, and Minister of Education, Hon. Lionel Laughton Hill.

tion, Holl. Laust Laughton Line.
Attorney-General and Minister of Railways,
Hon. William Joseph Denny, M.O.
Chief Secretary and Minister of Agriculture and Commissioner of Forest Lands, Hon. Stanley R. Whitford.

Commissioner of Crown Lands and Minister of Mines and Marine, Hon. Robert Stanley Richards.

Commissioner of Public Works and Munister of Industry, Labour and Employment, Hon John McInnes.

Minister of Local Government, Immigration, Repatriation and Irrigation, Hon James Jelley.

AGENT-GENERAL IN LONDON. Agent-General in London, Hon. Sit H. N.

Barwell, K.C M.G., Australia House,

Secretary and Trade Commissioner, 850

THE LEGISLATURE.

Parliament consists of a Legislative Council of so members elected for 6 years, one-half returing every 3 years, and a House of Assembly of 46 members, elected for a maximum duration of 3 years. Election is by ballot, with universal adult suffrage for the House of Assembly for all British subjects, male and female, there is a small property qualification for electors to the Legislative Council, who numbered 132,29; in 1930, those

The deposits at the same date amounted to £37,044,028. The Commonwealth Bank of Australia also has a brauch in Queensland with assets June 30, 1930, £7,718,195, and Inabilities £9,177,163
Lepositors balances in Queensland £9,177,163 Depositors balances in Queensland branch of the Commonwealth Savings Bank £23,901,136, averaged £47 148. od. to each of the 501,074 depositors.

# PRODUCTION AND INDUSTRY.

Agriculture and Live Stock .- Of the total area Agriculture and Live Stock.—It the total area of 459, 250,000 acres the Government have parted with the fee simple of 28,642,703, and 88,592 acres have been granted without payment under a system of deferred payment, 6,860,667 acres more are in process of allenation, and an additionall area including programmial part mileton. additional area including preferential pastoral leases of 200,726,050 acres leased out for sheep and cattle runs, 75,961,276 acres for grazing farms and homesteads, 21,168,520 acres are held under occupation heence, 256, 593 acres under goldmining and mineral lease, 635,417 for special purposes, 3,903,261 acres perpetual lease selections, scrub selections x2,348 acres, 12,342 acres held as auction perpetual leases, puckly pear leases x2,636,240 acres, reserves and roads 20,856,574 acres, leaving 67,282,507 unoccupied Wheat, oats, and barley flourish on the Daning Downs while lews away and downstally acres. Downs, while large areas are devoted to maize, which yields an average crop of about 26 52 bushels peracre. Both English and sweet potatoes are cultivated, as also are coffee, cotton, oranges, peaches, pineapples, grapes, banams, coco-nuts, mangoes, plums, and various English fruits. India-rubber and sisal hemp planta-tions have also been recently started. In the year 1930, 516,783 tons of sugar were produced. The live stock in January 1931 included 5,463,724 cattle, 22,542,043 sheep, 481,615 horses, and 217,528 pigs. Wool, meat, sugar and butter are the principal products.

Climate.—The Bureau of Seasonal Forecasting of the Council of Agriculture, Turbot Street, Brisbane, makes researches into the climatic sequences of Queensland and issues forecasts, the beneficial nature of the work being much appreciated by farmers and graziers in Queens-land and the adjoining States.

Forestry.—There are about 24,000,000 acres of commercial timberland in Queensland, of which there have been reserved for forestry purposes | 5,330,980 acres. In 1929 30 the wealth produced by the timber industry of Queensland was between three and four million pounds, and there were 3.867 hands employed in the sawmills and plywood mills. At June 30, 1930, the total area of reforestation plantations was 4,927 acres, and in addition 54,230 acres had been treated for pendents, and 5,332 Baptists.

natural regeneration by the State Forest Service, which employs age persons, and is engaged actively in timber farming and wood-trading operations. An area of 160,611 acres has been reserved for National Parks.

Minerals.—The total mineral output in 1930 was £ 1,253,256. There are rich deposits of gold, copper, tin, lead, silver, antimony, limestone, ironstone, and wolfram, while coal is found in several districts. The gold output in 1930 was several discrete. In gold output in 1930 was valued at £33,242, sliver, £5,527; copper, £174,675; tim £49,708; coal, £52,856, wolfram, £1,407; molydenite,£308; lead, £4,156; opals and gems, £5,748; arsenic, nil, cobalt, £973; zinc, nil; fluorspar, £1,439.

Commerce.—Thechlef articles of export oversea,

the produce of the State, in 1939-30 were Wool, £6,914,819, meat, including extract, and bacon, hams, and pork, £2,646,603; hides, £341,904; skins, sheep, £177,406; skins, other, £459,93; tallow, £258,695; butter, cheese, and mik, £2,980,461 , sugar, £2,194,245.

CAPITAL, Brisbane, with an area of 385 square miles. Population Census, April 4, 1921, 210,032. Estimated Dec. 37, 1930, 373,251 The status of the chief magistrate of Brisbane was raised to that of Lord Mayor in 1930.

The contour of the Queensland coast-line and the relative position of its mland parts operate against any centralisation similar to that at Melbourne, Sydney, or Adelaide, and numerous ports of considerable size extend along the ports of considerable size extend along the const.—Brisbane, Rockhampton (30,000), Maryborough (12,000), Townsville (31,800), Port Douglas, Mackay (9,330), Thursday Island (1,200), Cooktown, Canns (9,750), Ihowen (3,050), and Bindaberg (11,250), Gladstone (2,525). Other places of importance are Inswich (26,335). Toowoomba (25,45), Charters Towers (9,200), Gyinpie (9,588), Mt. Morgan (4,000), Warwick (2,000), Roma, (4,000) and Chounty.

# Religions.

There is no State aid to religious At the Census of 1921 there were 153,285 persons belonging to the Church of England, 64,488 Roman Catholics, 39,116 Methodists, and 28,377 Presby terians.

Presny terians.

Physical Features—Large areas of the State, for some hundreds of unles inland, are hilly and even mountainous, although the altitude, so far as ascertained, rises nowhere above that of Mount Bruce (4,024 ft) in the north-west division or that of Bluff Knoll (3,640 ft.) in the Stirling Range in the south-west. The coastal regions of the west and of the north are undulating, with an interior slope to the unsettled central portion of Australia. Darling and Hamersley ranges of the west have a western slope to the Indian Ocean, into which flow many streams, notably the Swan, Murchson, Gascoyne, Ashburton, Fortescue, and De Grey In the north the Fitzroy flows from the Leopold range into the Indian Ocean, and the Drysdale and Ord into the Tunor Sea. The greater portion of the far interior may be described as a great tableland, with an altitude of from 1,000 to 2,000 ft. above sea-level, the surface of which consists in parts of sand-dunes, varied by wide stretches of clayey soils The climate is one of the most temperate in the world. The total rainfall at Perth during 1930 was 39 30 inches, the average for the past 55 years being 34 70 Of the area of Western Australia, which is equal to more than half that of European Russia, probably about two-thirds is suitable for pastoral purposes, immense tracts having already been proved eminently so.

# GOVERNMENT.

Western Australia was first settled by the British in 1829, and in 1870 it was granted a partially elective legislature. In 1890 responsible government was granted, and the Administration vested in a Governor, a Legislative Council, and a Legislative Assembly. The present constitution rests upon an Amending Act of 1899, further amended by the Constitution Acts
Amendment Act, 1911; the Executive is vested
in a Governor appointed by the Crown and
aided by a Council of responsible Ministers.

#### GOVERNOR.

Governor of Western Australia, (vacant). Private Sec., Maj. B. Kerr-Pearse, C.M.G., M.V.O. His Excellency John Alfred Administrator, Northmore (June, 1931.)

EXECUTIVE COUNCIL. Premier and Treasurer, Hon. Sir James Attorney-General, Hon, Thomas A.L. Davy. 1,500 Minister for Railways, Mines, Police, Forests and Industry, Hon John Scaddan, M.L.A. Manister for Public Works and Labour, Hon 1,500 John Lindsay, M.L.A. ..... Chief Secretary and Minister for Educa-1,500 tion, (Nacaut).
Minister for Country Water Supplies and Trading Concerns, Hon. Charles F. Baxter, M.L.C. 1,500 Munster for Agriculture, Hon. Percy D. Ferguson, M L.A. ..... 1,500 AGENT-GENERAL IN LONDON. Agent-General in London, Hon. William C. Augwin. Offices, Savoy House, 115-116, Strand, W.C. 2. ..... £a,000 Secretary, C. B. Rushton, I S O. .....

THE LEGISLATURE Parliament consists of a Legislative Council of 30 members elected for 6 years, and a Legislative Assembly of 50 members elected for 3 years by universal adult suffrage, the electorate of the Council is restricted by a property qualification, that of the Assembly being subject to residence and registration

President of the Legislative Council, Hon. Sir John Waters Kirwan . ....... S, eaker of the Legislative Assembly, Hon.

THE JUDICATURE.

There is a Supreme Court presided over by a Chief Justice and three Puisne Judges, which has complete jurisdiction in all criminal and common law matters. There are courts known as local courts which have limited civil jurisdiction There are Courts of Session, dealing with criminal matters outside Petth, and there are Magistrates' courts and Children's courts. Chief Justice, Hon, J A. Northmore (acting).

Prome Judges, Hons. J A. Northmore, T P. Draper, C B R, and J P. Dwyer, each £2,000

EDUCATION

Education.—Education is compulsory and free, and numerous elementary schools are under the control of the Muister of Education There are a training college, technical schools, a school of mines and a Goldfields High School at Kal-goorlio (State Secondary Schools in various centres and the capital), and a University. The total amount expended on education during the year ended June 30, 1931, was £673,202; in addition, a grant of £31,000 was made to the University.

# FINANCE.

Revenue and Expenditure and gross public Debt for 5 years ended June 30:-

Year	Revenue.	Expenditure	Debt.
1927 1928 1929 1930	9,750,833 9,807,949 9,947,950 9,750,515 8,686,756	£, 9,722,588 9,824,415 10,233,919 10,268,518 10,107,294	£ 70,606,175 76,427,764 69,355,449 70,174,350 75,465,110

# 710 Australia-Western Australia, Motor Vehicles Production.

Banking.—There were, including the Commonwealth Bank of Australia, so cheque-paying banks, formerly banks of issue, in the State on June 30, 1931, with total assets \$55,505,800 and liabilities \$74,554,454. The amount due to depositors in the State Savings Bank at June 30, 1932, was \$7,900,300; in the School Savings Bank, \$26,700; and in the Commonwealth Savings Bank the amount due to depositors in Western Australia on March 31, 1931, was \$5,720,090.

#### PRODUCTION AND INDUSTRY.

Crops and Live Stock.—Of the total area (624,528,800 acres) 4,794,500 acres were under crops in 1930-31, wheat for grain accounting for 3,958,313 acres. In 1930 the live stock included 811,844 cattle, 9,874,970 sheep, 100,654 pigs, 19,007 goats, and 156,973 horses. There were about 5,000 acres of vincyards.

Manufacturing Industries.—There were on June 30, 1930, a total of 1,466 industrial establishments in the State employing either machinery or at least four hands. The total number of persons employed in them was 19,643. The combined output of these establishments for 12 months ended June, 1930, was computed at £16,821,482.

Forestry.—The forests contain some of the very finest hardwoods in the world. Two of these, jarrah (Fucaliphus marginata) and karri (Eucalyphus diversicolor), are largely exported. The quantity of timber cut during the ramonths ended June, 1930, is computed to have been 159,642,788 super feet.

Minerals.—The groups of the Coolgardie goldfields (covering a vast portion of the interior and extending to the resth meridian), as well

as other fields, are being constantly worked, the production of gold being 445,350 ozs. in 1930. The total amount produced in the State from 1886 to June 30, 1931, is 38,520, nor fine ozs. Magnetic iron, lead, copper and tin ores exist in large quantities, as also coal.

Trade.—The principal ports are Fremantle, Albany, Bunbury, Geraldton, and Broome. The opening of the Trans-Australian Railway in Oct. 2017 afforded another means of ingress and egress, both for travellers and merchandise. The imports chiefly consist of machinery, vehicles, manufactured hardware, clothing and textilies, tobacco, cigars and cigarettes, also (mainly from the sister states of the Commonwealth) provisions. Principal exports for the year ended June 30, 1931:—Gloid, £5,788,495; Wool, £3,386,538; inniber, £53,696, sandalwood, pearls and shell, hides and skins, £488,192; wheat, £5,288,323, flour, £635,518; and fresh fruit, £302,085.

#### Lowes

CAPITAL, Perth. Population (1930) of Metropolitan area, including Fremantle, 204,780.

Persy the capital, stands on the right bank of the Swan Tiver estuay, 22 miles from Fremantle. The King's Park (approximately 1,000 acres), on a hill overlooking the city and the wide estuarine reaches of the river, possesses unique natural beauty Other towns are Fremantle (including suburbs, 33,535), Albany (3,950), Kalgoorlie and Boulder (10,500), Bunbury (5,570), Claremont (6,500), Geraldton (4,627), Middland Junction (5,300), Northam (4,975), and Collie (3,720).

Transmission of mails from London to Perth, approximate, 27 days.

#### WORLD MOTOR VEHICLES PRODUCTION, 1929 AND 1980.

THE following table shows the production of motor vehicles in the five principal producing countries in 1929 and 1930; the figures are those published in the United States Commerce Reports, May 25, 1931, with the exception of those relating to the United Kingdom, which have been provided by the Society of Motor Manufacturers and Traders, Limited. The figures relate only to complete vehicles manufactured by companies strictly national in character, and not to the output of assembly plants in various countries.

# THE DOMINION OF NEW ZEALAND.

(By the Rt. Hon. G. W. FORBES, P.C., Prime Minister.)

New Zealand has been aptly described as the "Britain of the South Seas" in that, while far remote from the Homeland, the Dominion still retains to a marked degree the national characteristics of the early settlers who, scarcely more than one hundred years ago, came to her shores from various parts of the British Isles. Even at the present time the population of the Dominion is probably more distinctly British than any other part of the Empire, the latest available census figures in this connection showing that approximately 99 per cent. of the population is of British nationality.

New Zealand is primarily an agricultural and pastoral country, her chief exports being in the following order:—butter, frozen meat, wool, cheese and hides. Approximately 85 per cent. of the Dominion's exports are disposed of within the Empire, about 74 per cent. being exported direct to the United Kingdom, while imports to the extent of 68 per cent. of the total are derived from British sources. I venture to suggest that from an imperial point of view no other part of the Empire can show better results than these. New Zealand's total external trade per head, I may mention, is higher than that of any other country in the world.

The importance of the United Kingdom and of the British Empire as a market for the raw materials and foodstuffs which the Dominion can produce is fully realised by the Government and the people of New Zealand, and it is realised also that the prosperity of the United Kingdom depends to a large extent upon the fullest possible extension of inter-Empire trade—It is the carnest desire of the Government and of the people of New Zealand that every facility be given to permit of this development, and as a practical expression of this desire the Dominion grants to British-made goods a very substantial measure of preference by means of differential rates of customs duties.

New Zealand is also noted for its humanitarian legislation, and, in fact, was one of the first countries in the world to introduce a national system of old age pensions. Reference may also be made, in passing, to the Industrial Conciliation and Arbitration Acts, whereby industrial disputes have been reduced to a minimum.

Finally, enjoying an equable clumate and a diversity of scenic attractions and natural phenomena unsurpassed in their variety by those of any other country, New Zealand offers unlimited scope to the tourist. In the North Island is found the world-famed thermal region, while in the South Island, in addition to lake and mountain scenery and the famous fiords, what has been justly described as the "finest walk in the world" is accessible to the tourist. In addition, the attractions from the sportsman's point of view, the deep-sea fishing, the angling thrills of the numerous lakes, rivers, and coastal waters, and the opportunities for excellent deer stalking, all combine to make the Dominion's scenic resorts one of its most important natural resources.

Look Torker

Prime Minister of New Zealand.

# PHYSIOGRAPHY.

The Dominion of New Zealand is distant about 1,200 miles south-east of the mainland of Australia, and consists of three main islands in the South Pacific Ocean, known as the North, South, and Stewart Islands, having a length of 1,100 miles, between 340 22' and 47° 18' South latitude and 162° East longitude -173° West longitude, with several groups

47° 18' South Intitude and 102" East longitude -173" west longitude, what several groups of smaller islands lying at some distance from the principal group.

Geographical.—The two principal islands of New Zealand have a total length of 1,040 miles, the total coast-line reaching 4,330 miles. A large portion of the surface is mountainous in character. The principal range is that of the Southern Alps, having its culminating point in Mount Cook (12,349 ft.). The North Island mountains include several active and dormant volcanoes. Mt. Ruapeliu (9,175 ft.) and Mt. Nganruho (7,515 ft.) are the most important. Of the numerous clusters in the South Island, the Tasman are the most important. Of the numerous glacters in the South Island, the Tasman (18 miles by 14) is the largest. The North Island in particular is noted for its hot springs and geysers. For the most part the rivers are too short and rapid for considerable use in navigation. The more important include the Warkato (220 miles in length), Wanganui (140) and Clutha (210). Lakes (Taupo, 238 sq. miles in area; Wakatipu, 112; and Te Anau 132) are abundant; many of them of great beauty.

Meteorological .- Owing chiefly to its great length, New Zealand's climate varies very considerably in its different divisions. In general it is mild with an abundant rainfall. Snow is rarely seen except upon the higher levels. Annual averages:—North Island, mean temperature 57° F., rainfall 47 in. (days with rain 163), sunshine, 2,134 hours; South Island, mean temperature 52° F., rainfall 56 in. (days with rain 145), sunshine, 1,956 hours.

# GOVERNMENT.

The west coast of the South Island of New Zealand was discovered by Abel Jansen Tasman, the navigator (voyaging under the direction of the Netherlands' East India Company), on December 13, 1642. The islands were visited in 1769 by Captain Cook, who returned to them in 1773, 1774, and 1777. In 1793 the Government of New South Wales despatched H.M.S. Daedalus to the islands on a diplomatic mission. The first settlement of Europeans was made in 1814, but no colonisation took place until 1825. In 1840 British sovereignty was proclaimed, and on May 3, 1841, New Zealand was, by letters patent, erected into a separate colony distinct from New South Wales. On Sept. 26, 1907, the designation was changed to *The Dominion of New Zealand*. The Constitution rests upon the Act of 1852, under which the executive anthority is entrusted to a Governor (now Governor-General) appointed by the Crown and aided by an Executive Council, with a Legislature of two houses.

WHITAKER'S ALMANACK, 1932.

Members of the Executive Council travelling within the Dominion on public service are entitled to an allow-ance not exceeding £2 tos per drein when so engaged, but not during attendance at a session of the General Assembly. A house allowance of £62 is also paid where a Government residence is not provided. § Salaries subject to 2 per cent cut.

# THE LEGISLATURE.

Parliament consists of a General Legislative Council appointed by the Governor (prior to 1891 the appointments were for life; since that date for 7 years only), at present consisting of 40 members; and a House of Representatives consisting of 80 members elected for 3 years. Four of the members are altaris elected by the natives. Women are entitled to vote and to be elected Mombers of the House of Representatives (Women's Parliamentary Rights Act, 1919) Members of the Upper House receive £383 ros per annum, in each case with travelling expenses and deductions for non-attendance.

### THE JUDICATURE.

The judicial system comprises a Supreme Court and Court of Appeal; also Magnetrates Courts, having both civil and criminal jurisdiction. Chief Justice, Hol. Sir Michael Myers,

h.C.M.G. Language Hons. Sir A. L. Herdman, J. R. Reed, C.B. F. A. S. Adams, W. C. MacGregor, H. H. Ostler, A. W. Blair,

MacGregor, H. H. Ostler, A. W. Blair, D. S. Smith, R. Kennedy. ..... each Judge, Court of Arbitration, Hon. F. V.

### POLICE.

On March 31, 1931, the strength of the Police Force was 1,152 of all ranks equivalent to 1 for every 1,892 of the population. Average cost of police protection per inhabitant was, in 1930-31, 68.  $0\frac{1}{2}rl$ .

# LOCAL GOVERNMENT.

For purposes of local government the bominion is divided into counties and ridings, with incorporated boroughs, under elected county and municipal councils, town, road, electric power, and harbour boards.

For cities or boroughs, any adult of either sex resident in the town may register as an elector. Non-resident ratepayers may also exercise the franchise.

For counties, adult ratepayers of either sex may register as electors, and may have one, two, or three votes according to the value of their property.

#### PASSPORTS.

With certain exceptions, no person over 15 years is permitted to laud unless in possession of a passport issued by a competent British authority.

# DEFENCE.

# Army.

The New Zealand Defence Forces consist of the Permanent Force, the Territonial Force and the Senior Cadets.

Units of the N.Z. Permanent Forces are the New Zealand Staff Corps, the New Zealand Permanent Staff, the Royal New Zealand Permanent Force, the New Zealand Permanent Air Force, the New Zealand Army Ordnance Corps, the New Zealand Army Medical Corps. The compulsory territorial system (including Senior Cadeta) is at present in abeyance, for reasons of economy. It has been replaced by a volunteer system on a reduced scale. Recruitment for volunteer units is at present in process.

#### Navy.

In 1900 New Zealand presented the battlecruiser New Zealand to the Imperial Government.
The Naval Defence Act, 1913, provides for the
establishment of a New Zealand Naval Force by
voluntary enlistment for a prescribed period (fixed
at 12 years on intil age 30), members on discharge
to be diafted into the New Zealand Royal Naval
Reserve for such period as may be prescribed
for service only in time of war: the ships and
personnel formling the Force to pass under the
control and to be at the disposition of the
imperial Government in time of war. A Naval
Board controls all matters relating to the Naval
Forces, and is vested with the executive command of the Naval Forces. By Order-In-Council
of the soth June, 1921, it was provided that the
ships and personnel shall be described respectively as forming and belonging to "The New
Zealand Division of the Royal Navy." Expenditure on naval defence 1930-31, £621,240. The
New Zealand Division comprises the cruisers
Immede and Dunchan, the depth ship Philomel,
the trawler Wakakura, and oil-tanker Nucula.
Two shoops, Feronica and Laburnum, are maintained by the British Government for duties in
the South Pacific within the limits of the New

Bankung.—At the end of 1933 there were six banks of issue doing business, two of which were at Onskaka and Parapara, near Nelson.

Kow Zealand banks. Total assets (average of four quarters of year), £63,948,071; liabilities, £63,954,419; value of notes in circulation, £63,855,727.

Post-office and private savings banks had, at the close of the year 1930-31, 1,081,510 depositors, having £57,355,133 to their credit.

#### EDUCATION.

The State system of education is free, secular, and compulsory. There were (December, 1930) 2,503 public primary schools, with 6,433 adult teachers and 220,813 scholars: there are also 306 registered private primary schools, with 26,452 scholars, and, in addition, 28 village schools for the Maoris with 2,000 scholars. The higher education of boys and girls in the cities and large towns is carried on in 46 endowed colleges and grammar schools, in at technical high and technical day schools. In addition there are 8s secondary depts. of district high schools, and a junior high schools, 48 private secondary schools, and rz secondary schools for Maoris. The University of New Zealand consists of Auckland University College, Victoria University College, Canterbury University College, and the University of Otago, the four colleges having 4,8ox students in r930, and has power to confer degrees. technical day schools. In addition there are 81

# PRODUCTION AND INDUSTRY.

Agriculture and Forestry -The total area of the Dominion (excluding annexed islands) is the Dominion (excluding annoved islands) is 65,300,25a acres, and, apart from boroughs and holdings under r acre, 43,368,653 acres of this were in occupation in 1930, this acteage representing 85,167 holdings. New Zealand is a pastoral rather than an agricultural country, but the quantity of wheat and oats grown is sufficient for the Dominion's requirements. The area under wheat in 1930,300 areas acres giving a vield of 2,300,556 was 33,942 acres, giving a yield of 7,839,556 bushels An area of 67,722 acres of oats was threshed, the yield totalling 3,022,288 bushels; unresnen, the yield totaling 3,023,282 bushels; while 190,072 acres were converted to chaff, hay, or enallage. Other acreages in 1929-30 were: barley, 18,631; peas, 9,855; rye-grass, 30,055; and potatoes, 23,214. An area of 485,773 acres was sown in turnips and mangolds. Amongst the forest productions are the Kauri pine (found only at the northern extremity of the islands), much valued for shipbuilding and for its resun (Kauri gum) New Zealand flax is used for the manufacture of topes and twine.

Live Stock—The cattle in 1930 numbered 3,765,668; sheep, 30,841,287; pigs, 487,793; and horses, 297,195. Sheep in 1931 numbered 29,792,506. The pastures of the South Island produce the celebrated sheep of the Canterbury

Manufactures .- Statistics of factory producmanufacture.—Summer on factory produc-on show (1939-30) 5,277 factories in operation, employing 85,797 hands. Value of output for year, £93,464,526.

Minerals.—Coal-mining is one of the largest industries, the output in 2929 being 2,535,864 tons, the approximate total output to the end or 1939 being 71,299,000 tons. Gold-mining, both alluvial and quartz, is an important industry in many districts, and rich iron ore, in the form of ironsand, occurs in great abundance

# COMMUNICATIONS

Railways—In March, 1931, there were 3,388 miles of Government railway lines in working order, and more under construction; and 117 miles of private lines, together with an excellent system of road service cars. The number of passengers carried on Government lines in 1930-31, including season-ticket holders, was 22,873,708, and in addition 3,187,554 on railway road motor services, while goods carried amounted to 6,963,073 tons. Operating revenue and expenditure were £6,782,388 and £6,406,144 respectively.

Shipping.—During 1930 the vessels entered inwards numbered 592 (tonnage, 2,267,074), and those entered outwards 607 (tonnage, 2,357,166), exclusive of coasting vessels

Posts and Telegraphs.—The annual postal ofrculation was (1930), 322,732,067 letters and post-cards, 47,647,098 newspapers, 165,180,054 books and packets, and 6.447,194 parcels, and the work is effected by 1,773 post-offices. There are 13,585 miles of telegraph line, with 63,656 miles of wire. The telephone service is highly efficient and universal in all centres. Telegrams transmitted during year, 17,222,462.

#### NWN

CAPITAL, WELLINGTON, in the North Island. The estimated population of the Urban Areas, at April 30, 1931, was as follows:—Wellington, 143,000; Auckland, 217,000; Christchurch, 127,300; Dunedin, 86,500; Wanganui, 27,850; Invercargill, 24,000; Palmerston North, 22,800; nvercargiii, 44,000; raimerston North, 28,800; Napler, 19,300; Timaru, 18,350; New Plymouth, 18,200; Hamilton, 18,100; Hastunga, 16,750; Giaborne, 16,250; Nelson, 22,500; Masterton, 8,600; Oamaru, 7,600; Whaugatel, 7,600, Greymouth, 6,180; Ashburton, 5,380; Blenheim, 5,330; Rotorua, 5,270.

### THE ISLANDS OF NEW ZEALAND.

The following islands form part of the Dominion proper:—North Island and adjacent islets, Swith Island and adjacent islets is Stewart Island and adjacent islets, and Chatham Islands, hetween 43° 30° 8. lat and 173° 40° 179° 35° W. long. Chatham Islands have a population of 6so, half of whom are Maoris and half castes. They support large flocks of sheep and some cattle.

The following are included in the geographical boundaries of New Zealand as proclaimed in 1847:—The Three Kings (discovered by Tasman 1847:—The Three Kings (discovered by Tasman on the Feast of the Epiphany), m 34° 9′ 8. lat and 272° 8′ 8″ E long. (uninhabited). Auckland Islands, about 290 miles south of Bluff Harbour, in 30° 32′ S. lat. and 166° 13′ E long. The islands contain several 2000 harbours, but are uninhabited. Campbell Island (uninhabited). Antipodes Group (49° 41′ 25″ S. lat. and 178° 43′ E. long.) uninhabited, and Bounty Islands (47° 43′ S. lat., 179° 0′ 30″ E. long.) uninhabited.

The following islands have been annexed to New Zealand :-

The Kernadec Group, between 29° 10' to 32° 30' S. lat, and 127° 43' to 125° W. long, includes Bunday, Macaulay, Curtis Islands, and L'Espérance, and some islets. The group is uninhabited.

Cook Islands, included in the boundaries of New Zealand since June, reor, consist of the islands of Rarotonga, Aftutaki, Mangala, Aftu Mauke, Mattaro, Matuae and Te Au-o-tu), Takutea, Palmerston, Penrhyn (or Tongareva), Manahiki, Rakahanga, Pukapuka (or Danger), Niue (or Savage), Suwarrow, and Nassau. The population at the Census of 1926 numbered 13,877, all except 313 being Natives. The chief products are bananas, oranges, and other tropical fruits, copra, coffee, pearl-shell, and hats (Nûe). The trade is chiefly with New Zealand and the United States of America. The exports (1930) United States of America. The exports (1930) were valued at £125,315, and the imports at £125,026. Rarotonga is the chief island, with a native oppulation of 3,721, and a population other than native of 25. The government is administed locally under the direction of New 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 1222 and 12 Zealand. The Island Council of the Cook Islands is under the direction of the Resident Islands is under the direction of the Resident | Administrator, W. A. Newman (address, Commissioner at Rarotonga. The five Arikis of Nauru, Central Pacific).

Rarotonga are of equal rank and are all members of the Council Randongs is a place of call for the mail steamers between Sydney, N.S.W., and Wellington, N.Z., and San Fran-cisco, U.S.A.

Resident Commissioner, Rarotonga, H. F. 

Ross Dependency—By Imperial Order in Council of July 30, 1923, the coasts of the Ross Sea, with adjacent island and territories, were proclaimed a British Settlement under the control of the Governor-General of New Zealand.

Tokelau or Union Islands.—A group of atolls (population 999), transferred from Gilbert and Ellis Islands Colony in 1926, and now administered on behalf of New Zealand by Administrator of Western Samoa

The Mandated Territories are :-

Western Samoa, consisting of the islands of Savai', Manono, Apolima, Upolu, Fanuatapn, Namua, Nuutele and Nuulua (the remaining islands of the Samoan group belonging to the U.S.), have a total area of 1,135 square miles and a population at the Census of 1926 of 40,229. 36,880 were Samoans, 1,079 Chinese and Melanesians, and 2,270 half-castes and Europeans. The largest islands are Savat'ı (703 square nules) and Upolu (430 square nules). Upolu contains the inrgest islands are Savar's (rog square miles) and Upolu (ago square miles). Upolu contains the harbours of Apla and Saluafata, of which the former is the capital. In 1889 a very heavy sea set up by a cyclone wrecked three U.S. A. warships and the Eber and Adler of the German Navy, H.M.S. Callsope, of the British Navy, effecting its escape. The disaster is recorded in "A Footnote to History," by R. I. Stavenson whose home was escape. The disaster is recorded in "A roothouse to History," by R. L. Stevenson, whose home was at Vailima (near Apia). The natives of the islands are Christians of different denominations, including a few adherents of the Latter Day Saints (Mornnons). Coco-unta (copra), cocoa, and analysis are the about revolute. bananas and rubber are the chief products of the islands. The exports were valued in 1930 at £284,515 (copra £166,221), and the imports at £875,355.

Administrator, Brigadier-General H. E. Hart, C.B., C.M.G., D S O , V.D.

# NAURU ISLAND.

Nauru Island, situated in longitude z66 degrees east, and a miles south of the Equator, was proclaimed German territory on Oct. x, 1888, and was administered as part of the (German) Marshall Islands group until its surrender to the Australian Forces in 1914. The island was included in the cession of colonies made by Germany in 1919, and is now administered by the United Kingdom, the Commonwealth of Australia, and the Dominion of New Zealand under a mandate from the Allied and Associated Powers, 1919, the first and second Administrators having been appointed by agreement by the Australian Government. island has a population (April 1, 1930) of 2,684, of whom 147 are Europeans. There are valuable deposits of phosphates on the island, and in rose the exports of phosphates were 326,125 tons (valued at £346,052). The value of the imports in 1929 was £101,692.

† Preliminary figures

A law (No. 17 of 1923) amending and consolidating the pre-Union Acts in force in the four Provinces was passed and came into force as from the 1st January, 1924. Under this law registration of all European, Asiatic and Coloured (as distinct from Native) births and deaths was compulsory throughout the Union. Registration of Native births and deaths is compulsory only in urban areas. Only marriages solemnized under the prescribed civil laws are subject to registration.

# PHYSIOGRAPHY.

Boundaries.—The provinces of the Union extend from the southernmost point of the African Continent to the course of the Limpopo River, i.e., from 34° 50′ – 22° South latitude, and include all the British territories within those limits, with the exception of Basutoland and the Swaziland and Bechnanaland Protectorates, while provision is made for the future inclusion within the Union of those territories and of the territories of the British South Africa Company.

Relief.—The southermost province contains many parallel ranges, which rise in steps towards the interior. The south-western peninsula contains the famous Table Mountain (3,532 feet), while the Great Zwarte Bergen and Lange Bergen run in parallel lines from west to east of the Cape province. Between these two ranges and the Roggereld and Nieuwereld to the north is the Great Karroo Plateau, which is bounded on the east by the Sneeuwhergen, containing the highest similar in the province (Compassiver, 7,800 feet). In the east are ranges which join the Diakensbergen (11,000 feet) between Natal and the Orange Free State.

The Orange Free State presents a succession of undulating grassy plains with good pasture-land, at a general elevation of some 3,800 feet, with occasional hills or kopies. The Transvaal is also mainly an elevated platean with parallel ridges in the Magalies and Waterberg ranges of no great height. The veld or plains of this northermuost province is divisible into the Hooge Veld of the south, the Banker Veld of the centre, and the Bush Veld of the north and east, the first and second forming the grazing and agricultural region of the Transvaal and the last a mimosa-covered waster. The eastern province of Natal has pastoral lowlands and rich agricultural land between the slopes of the Drakeusberg and the coast, the interior rising in terraces as in the southern provinces.

Rivers.—The Orange, with its tributary the Vaal, is the principal river of the south, rising in the Drakensbergen and flowing into the Atlantic between the Protectorate of South West Africa and the Cape of Good Hope. The Limpopo, or Croccolile River, in the north, rises in the Transvaal and flows into the Indian Ocean through Portuguese East. Africa. Most of the remaining rivers are furious torrents after rain, with partially dry leds at other seasons.

### HISTORICAL SKETCH.

The Cape of Good Hope was discovered in 1486 by Bartholomew Diaz, the commander of one of the many expeditions sent out by successive Kings of Portugal to discover an ocean route to India. Diaz merely doubled the Cape and returned home. Eleven years becan fonce to find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a find a f shores of Table Bay, established a fort, and occupied the adjacent lands, in order to be always ready with supplies for their passing ships. In 1814 the Cape was formally ceded to the British Crown.

Natal derives its name from the fact of its discovery on Christmas Day, 1497, by the celebrated Portuguese navigator, Vasco da Gama. The first European settlement was formed (1824) by a small party of Englishmen, who came by sea and established themselves on the coast where Durban now stands. Natal was then a part of the great Zulu kingdom under T'Chaka. Between 1835 and 1837 another settlement was formed by a large body of Dutch Boers, who came with their waggons overland from the Cape Colony and settled in the northern districts, where to this day the Boers preponderate. In the year 1843 Natal was proclaimed as British and annexed to the Cape Colony. In 1856 it was erected into a separate colony, with representative institutions, and in 1893 acquired responsible government.

The Transvaal was formed as the South African Republic by parties of Dutch Boers from the English colonies who "trekked" into the interior of the continent and wrested the land across the Vaal river from the native chiefs. The discovery of the goldfields within its borders led to the settlement of large numbers of foreigners, and eventually to hostilities with the British Government. A war of nearly three years' duration was fought with great tenacity, and its close was marked by the inclusion of the South African Republic within the British Empire, "responsible government" being granted almost immediately.

The Orange Free State was founded, in much the same way as the Transvaal, by Boer emigrants from Cape Colony, and its independence was granted in 1854. Its subsequent

history is identical with that of the Transvaal.

Delville Wood.—The title deeds of Delville Wood, containing the graves of South African troops who fell there during the battles on the Western Front in France in the Great War, are held by the Government of the Union of South Africa, and Delville Wood is part of South Africa.

# GOVERNMENT.

The Union of South Africa is constituted under the South Africa Act, 1909 (9 Edw. VII., cap. 6), passed by the Parliament of the United Kingdom on September 20, 1909. In terms of that Act the self-governing Colonics of the Cape of Good Hope, Natal, the Transvani and the Orange River Colony became united on May 31, 1910, in a legislative Union under one Government under the name of the Union of South Africa, those Colonies becoming original Provinces of the Union under the names of the Cape of Good Hope, Natal, the Transvani and the Orange Free State respectively.

The Union Government is seised of all State property, and the Railways, Ports, Harbours and Customs are administered by Union Commissioners for the benefit of a Consolidated Revenue Fund. The former debts of the Provinces are administered by and form a first charge upon the funds of the Union. Provision is made in the Act of 1000 for the admission to the Union of Rhodesia, and for the transfer to the Union Government of the administration of protected and other native territories. The Union was inaugurated by H.R.H. the Duke of Connaught, K.G., in 1910.

The Government publishes annually an "Official Year Book of the Union of South Africa," giving full statistics and descriptive information on all matters of public concern.

The seat of the Government is Pretoria; the seat of the Legislature is Cape Town. The Executive is vested in a Governor-General appointed by the Sovereign, and aided by an Executive Council, with a Legislature of two Houses.

Governor-General (Cape Town and Pretoria), The Right Honourable the Earl of

# THE LEGISLATURE.

D S.O.

The Senate consists of 40 members For ten years after the establishment of Union eight were nominated by the Governor-General-in-Council and 32 were elected, eight for each Province. The first election was made prior to the establishment of the Umon by the two Houses of each of the Colonial Legislatures sitting as one body, and a vacancy was filled by the choice of the Provincial Council in respect of whose Province a vacancy occurred Since 192x the Provincial element has been elected, according to the system of proportional representation with the single transferable vote, by the Members of the House of Assembly and of the Provincial Conneil for each Province sitting together and presided over by the Administrator of such Province. Vacancies amongst elected Senators are filled in the same manner, but only for the period which the Senator in whose place the new Senator is elected would have held his seat Originally, under Section 24 of the South Africa Act, nom-nated Senators held their seats for a period of ten years, but this provision was amended by Act No. 54 of 1936, and nominated Senators are now required to vacate their seats on the dissolution of the Senate or upon a change of Government. Of the eight nominated Senators, four are selected on the ground of their thorough acquaintance, by reason of their official experience or otherwise, with the reasonable wants and wishes of the coloured races.

The House of Assembly consists of 148 elected members, 28 of whom represent the Cape of Good Hope, 17 Natal, 25 Transvaal, and 18 the Orange Free State. Members of both Houses must be

the following constituencies: Cape of Good Hope, 58; Natal, 17; Trafusvaal, 55; Orange Free State, 18.

#### LOCAL GOVERNMENT.

A Provincial Council in each Province has power to legislate by ordinance on certain subjects specified in the Act, and on such other subjects as may be delegated to it. All ordinances passed by a Provincial Conneil are subjected to the veto of the Governor-General in Council. Members of the Provincial Council are elected on the same system as Members of Parliament, but the restriction as to European descent does not apply. Provincial administration is in the case of each Province vested in an Administrator, with an Executive Committee of four members. The Provincial Council in each case consists of the same number of elected members as there are electoral divisions of such Province for the House of Assembly, unless that number is less than as (as in the cases of Natal and the Orange Free State), when the number is as. Each Council exists for a period of three years. Direct taxation is permitted for Provincial pur-poses, and legislation is authorised on certain specified subjects.

### DEFENCE.

The South Africa Defence Act, 1912, became law on June 14, 1912. This Act, as amended by the South Africa Defence Act Amendment Act of 222, provides for the establishment of Defence Forces comprising:—

1. The South Africa Permanent Force, which

consists of :

(i) The South African Staff Corps.(ii) The South African Instructional Corps.

(m) The South African Naval Service

(iv) The South African Field Artillery (v) The South African Permanent Garrison

Artillery. (vi) The South African Engineer Corps.

(vii) The South African Air Force. (viii) The South African Service Corps. (iv) The South African Medical Corps.

(x) The South African Ordnance Corps. (xi) The South African Veterinary Corps.

(xii) The South African Administrative, Pay, and Clerical Corps.

The South African Naval Service includes the officers and men of the South African Division of the Royal Naval Volunteer Reserve engaged for whole-time service.

2. The Coast Garrison Force, which consists

(i) The South African Garrison Artillery.
(ii) The South African Coast Defence Corps.

3 The Citizen Force, which consists of .-

(1) The Active Citizen Force.

(n) The Citizen Force Reserve. (iii) The National Reserve.

4. The South African Division of the Royal Naval Volunteer Reserve.

### s. Special Reserves.

Every citizen between the ages of 17 and 60 is liable to render personal service in time of war, and those between 17 and 25 are liable to under go a prescribed peace training with the Active Citizen Force spread over a period of four consecutive years. The Act states, however, that only so per cent. of the total number liable to peace training shall actually undergo that training nuless Parliament makes financial provision for the training of a greater number.

The establishment of Rifle Associations, under the Citizen Force Reserve, is a marked feature of the Act; citizens between the ages of sx and sg who are not entered for peace training with the Active Citizen Force are to be compelled to undergo training during these four years in a Rifle Association, thus ensuring that, in course of time, all citizens will at least know how to handle and use a rifle.

Provision is made in the Act for the cadet

training of boys between 13 and 17 in urban and other populous areas, where facilities can conveniently be arranged.

The Union is divided into 6 military districts. To each military district has been allotted various units of different arms, to which the citizens entered for peace training in their acth and sist years are posted.
EDUCATION.

In the South Africa Act, Section \$5 (iii.), it is provided that "Education, other than higher education, for a period of five years and thereafter, until Parliament otherwise provides, shall be and remain under the jurisdiction of the respective Provincial Councils"

Under Act No. 5 of 1922, a definition is given of the term "higher education." Section 12 of that Act, as amended by Section 14 of Act No.
46 of 1925, reads as follows:—The expression
"higher education" as used in Section 85 of the South Africa Act, 1909, shall include inter dia:

(a) Education provided by universities and university colleges incorporated by law; (b) education provided by the South African education provided by the South African Native College; (c) education provided by such technical institutions (including schools of art, music, commerce, technology, agriculture, mining and domestic science) as the Minister of Education may declare to be places of higher education; (d) such part of the education provided by other technical institutions as the Minister of Education may, after consultation with the provincial administration concerned, declare to be higher education; (*) any other education which, with the causent of the provincial administration concerned, the Minister of Education may declare to be higher education

In terms of clauses (c), (d) and (e) above, the Provinces have been relieved of all vocational education (technical, industrial and agrienitural), and the Department of Education under the Minister is therefore now concerned with-

I Universities and university colleges comprising the following. South Africa, with the z. Um versity of

following constituent colleges

Potchefstroom University College, Potchefstroom.

Grey University College, Bloemfontein Rhodes University College, Grahamstown. Hugnenot University College, Weilington,

Natal University College, Pietermantzburg

University of Capetonon.
 University of Stellenbosch.

University of the Witwaterwand.

University of Pretoria

11. Technical colleges which have been established under Act No. 30 of 1933 at Capetown, Durhau, Johannesburg, Port Elizabeth East London, Pretoria, Pietermaritzburg, and Bloem-

III. Industrial, trade and agricultural schools (State and State-sided) at various centres throughout the Union.

The number of students at universities and university colleges for the year 1930 was 6.990. The State expenditure on higher education as above defined during the financial year 1930-31 WAS £857,300.

Primary Education and Education other than Higher Education.—The central direction of public education (other than higher education) is exercised by the Provincial Education Depart ment in each of the four Provinces of the Union. Each Department is controlled by a Director or Superintendent of Education. In the Cane In the Cape

5,759 060

Province practically all the schools are Stateaided. In Natal they are partly State schools and partly State-aided. In the Transvaal and Orange Free State they are in the main State schools. In all Provinces primary education

### UNION FINANCE.

The ordinary Revenue and Expenditure of the Umon (exclusive of subsidies to Provincial Administrations and interest on Railway capital) for the five years ended March 31, 1930, are stated as under -

Year	Revonue	Expenditure.
1925-1926 1926-1927	£, 26,986,778 28,577,003 30,094,004 30,501,650 30,486,458	£ 21 014,444 21,850,419 22,840,768 23,180,076 24,414,770

DEBT. The Funded Debt of the Union at March 31, 1930, was £235,372,357 and the Floating Debt £14,278,840
PROVINCIAL FINANCE

Since their establishment in 1910 the powers and functions of the Provinces have undergone various alterations, and their powers of taxation have been limited from time to time. An Act (No. 46, 1925) to amend the laws regulating the financial relations between the Union and the Session of Parliament, and as from April 1, 1925, the sources of revenue available to the Provinces are

(1) A subsidy from the Union Government based upon the average attendance of pupils receiving education within the Province, and the extent of other educational functions carried on by the Province

(z) Certain scheduled and limited taxes.

(3) Certain taxes collected by the Union and assigned to the Provinces without power to legislate in regard thereto.

(4) Special grants of £75,000 each to the two

smaller Provinces of Natal and the Orange Free

The requirements of the Provinces in regard to capital expenditure are supplied by the Union Government by way of loans Special loans repayable in to years have been made by the Central Government to finance the deficits on the Provincial Revenue Funds at March 31,

The ordinary Revenue and Expenditure for six years ended March 3r, 1930, were as

CO	MMUNICA	TIO	NS.	

Railways.—The first railway in South Africa was commenced in April, 1859, the first sod being turned by the then Governor of the Cape of Good Hope, Sir George Grey This was very shortly followed by Natal, which started the construction of a line running from Durhan. Another two lines finally linked up at Heidelberg in 1855. The Cape line was opened for public traffic to Stellenbosch in 1865 and to Wellington in 1865, while a track to Wynberg was opened to traffic in 1864. Little progress was, however, made in succeeding years, and it became evident that the development of the country could not be left to private enterprise. The existing Cape lines were therefore purchased by the Government on Jan. 1, 1873, and in 1876 Natal followed by acquiring the railways in that colony. Increased working at once took place, and the construction of four lines was pushed inland from Cape Town, Durban, Port Elizabeth, and East Loudon. Bloemfontein was reached in 1890, and two years later a line to Germiston linked up with the system already established in the Transvaal.

The total open mileage of Govornmentowned lines at the end of March, 1930, was 18,873 miles (comprising Cape 5.094, Orange Free State 18,95, Transval 3,881, Natal 1,472, and South-West Africa 1,421), of which 11,977 miles are 3 ft. 6 in. gauge and 896 miles a ft. gauge. The capital expenditure on Government rail-

ways up to March 31, 1930, amounted to £143,327,941. The gross callings for the year ending March 31, 1930, were £26,730,549, and the net profit, after payment of interest, £63,491. Working expenditure (excluding depreciation) amounted to £16,683,365, or 72.59 per cent. of the gross revenue, as compared with £18,798,664, or 72 to 59 er cent. of the gross revenue for the previous year. The Cape to Cairo Ravincay, projected by Ceoil Rhodes, had advanced to Bullwayo by 1902, 1,365 miles from Cape Town and 3,600 miles from Cairo. Through communication by rail is now available from Cape Town to Port Francoui in the lower Congo, 3,300 miles, all 3' 6" gauge. The Trans-Zambes Railway, from Dondo (on the Berra-Mashonaland line) to the Zambesi, was opened July 1, 1922, thus placing the Union in direct communication with Nyasaland.

Posts and Telegraphs.—On March 3z, 1931. there were 3.260 post and a,840 telegraph offices open in the Union. During the year 1930-31, 376,480,000 airticles of mail matter, including 3,537,000 registered articles, addressed to places within and without the Union, were handled an Air Mail service in conjunction with incoming and outgoing European mails operates between Cape Town and Fort Elizabeth, with branches to Durban and Germiston. The number of money orders issued was 6x0,266, valued at £2,723,78z, were paid. 4,370,324 postal orders were issued, and 3,884,563 postal orders paid The number of depositors in the Savings Bank was 441,816, with £6,861,625 standing to their ciedit. 5,644,638 inland telegrams (including press messages) were received and despatched during the year. 35,075 miles of telegraph wire were in use. There are 5 wireless telegraph stations in the Union, which during the year received from and tansmitted to ships 16,828 messages, in respect of which £6,804 accrued to the revenue of the Department. The telephone system consists of 405,033 miles of wire, with 104,050 telephone instruments in the service of 77,964 subscribers, by whom approximately 170,54 million (inclusive of 17 million trunk) calls were made through departmental telephone exchanges. The combined cash revenue from Poats, Telegraphs and £1,025,071; Telegraphs £505,275, and Telephone £1,506,921. The combined cash expenditure totalled £3,203,153.

Shipping.—In 1930, 5,702 vessels (15,699,478 tons) entered, and 5,692 vessels (15,678,302 tons) cleared at the ports of the Umon of South Africa.

RAILWAYS AND HARBOURS BOARD. Chairman, Hou C W. Malan, M.P., Minister of Railways and Harbours

Members, A. Knit, R. B. Waterston, and D. Hugo

Secretary, P. D. Troskie.

The railways, posts, and harbours of the Union are administered and worked under the control and authority of the Governor-General in Council, exercised through a Minister of State, who is advised by a Board consisting of three Commissioners

The management and working of the railways and harbours are subject to the control of the Minister of Railways and Harbours, carried on by the General Manager, who is governed by such regulations as the Minister may from time to time frame, after consultation with the Board.

South-West Africa.

(Studwes-Afrika)
Administered under Mandate as an integral part of the Union of South Africa.

Administrator, Albertus Johannes Werth.

Secretary, H. P. Smit. SOUTH-WEST AFRICA lies between S. lat. 1 s₃ and the Orange River, with a narrow strip between 18°-18° 30' S. lat. extending from sτ° to π5° E. long., known as the Caprivi Zipfel, and gives access to the Zambesi. The estimated area of the country is 223,394 square miles, and the population (2920) is approximately 275,528, of whom approximately 21,526 are Europeans. The estimated native population (1930) is distributed as follows: Territory proper, 100,603; Ovamboland, 117,000; Kaokofeld, 4,309; Okawango, 14,000; Caprivi Zipfel (eastern portion only) 14,000; Caprevi Zipfel (eastern portion only) 8,024. Running more or less parallel to the coast, and roughly at a distance of 60 to 100 miles from it, is a broken range of mountains, from which there is a gradual slope to the sea. country between these mountains and the coast is barren desert except towards the North, and is known as the Namib Towards the East from these mountains the land slopes eastward and forms the western edge of the great Kalahari Plateau. The boundaries are the Okavango and Kunene Rivers, in the north, and the Orange River, in the south, all perennal streams of considerable volume. On the Orango are the Aughraines Falls, twice the height of Niagara.

The native races are :- In the South, Hottentots. In the centre, Hereros and Bergdamaras, with the exception of the Rehoboth district, which is occupied by a mixed race known as the Bastards; and in the North, Ovambos To the North and East there are many small bushmen tribes, some pure bushmen, but the remainder a mixture of aboriginal native tribes and bushmen. The Kaokoveld (the North-Western area) is very scantily inhabited by Hottentots and Ovatyimbas; the only Europeans are those allowed for minerals. It is very mountainous, and in many places well supplied with water.

The Administration of the country is exercised by the Governor-General, who has, however, delegated most of his powers to an Adminis-trator appointed by the Umon Government. The territory is divided into 17 Districts ruled over by Magistrates as the representatives of the Government The territory of Walvis Bay. which is actually part of the Cape Province of the Union, is administered so far as possible as a portion of South West Africa, and its magnificent harbour will undoubtedly in the future prove of and privately owned Lines 74 miles, a total of great benefit. The constitution granted under Union Act No 42 of 1925 provides for a Legislative Assembly consisting of 12 elected and 6 nominated members, an Executive Committee of 4 members elected by the Assembly The with the Administrator as Chairman. powers of legislation granted exclude the following matters which are permanently reserved to the Union Government:

earnings of natives

(d) Mines, mineral, mineral oils and precious

of the moneys derivable therefrom or

the Assembly as required by the Constitution Act.

as share of the produce thereof or any taxation in connection therewith;

(c) The acquisition, construction, management, regulation, control and working of railways and harbours in the territory; and the organization, discipline and conditions of em-ployment of and the payment of pensions, re-tiring allowances and financial benefits to persons in the employment of the railways and harl ours administration :

(d) The organization of and discipline and conditions of employment of persons in the public service who are serving in the territory, and the payment of pensions, retiring allow ances and financial benefits to such persons;

(c) The constitution and jurisdiction of courts of justice, whether superior or inferior, and the practice or procedure to be observed therein;

(f) The administration, management and working of the postal, telegraph and telephone services .

(g) The establishment or control of any military organization in the territory,

(h) The movements or operations of any unit of the South African Defence Forces within the territory;

(i) The entry of immigrants into the territory or of other persons;

(i) Tariffs of customs and excise duties and the control and management of customs and excise;

(k) Currency and banking and the control of banking institutions.

The following matters are reserved for a period of three years,* after which period the Assembly may by resolution assume control thereof:

(a) The establishment or control of any police force in the territory;

(b) Civil aviation:

(c) Primary or secondary education in schools supported or aided from the revenues of the territory;

(d) The establishment, management or control of any land or agricultural bank in the territory (e) The allotment, sale, lease or disposal of Government lands in the territory

In regard to finance, the Assembly may not mitiate any ordinance imposing taxation unless recommended to it by the Administrator

The railway system in South-West Africa, now controlled and worked by the South African Railways and Harbours Administration, and connected with Union Lines (De Aar to Makop Protectorate border 343 miles), comprises Union Lines 398 miles, S W Territor, Lines x,482 miles,

1,954 imiles.
The Capital of the Protectorate is Windhoek, The Capital of the Protectorate is Windhoek, which hes practically in the centre of the country at 5,500 ft. above sea-level. (Urban white population, 1926, 3,800.) Other minut towns are Keetmanshoop (Urban white population, 1926, 1,129). Aroab, Bethanie, Gibeon, Gobabis, Grootfontein, Karibib, Okahandja, Omathe Union Government:

(a) Native affairs or any matters specially and Maltahoehe. The ports are Walvis Bay affecting natives, including the imposition of (Urban white population, 1926, 66s) and Luderiz taxation upon the persons, land, habitations or Bay (Urban white population, 1926, 1934).

### Probinces of the Union of South Africa.

### CAPE OF GOOD HOPE.

The Province of the Cape of Good Hope reaches in S. lat. from 25° to 34° 50′, and in E long, from 25° at 0 30°. The extent of the country is, N.E. to S.W. 750 miles, and from N.W to S.E 800 miles, with a coast-line of nearly 1,300 miles.

Education.—Local School Administration is conducted by school loants and school committees, the unit of administration being the school district. The Province is divided into xxx school districts, each under the control of a School Board, a portion of the members being elected by the ratepayers and a portion partiy mominated by the Provincial Administration and partly by the Local authorities. Education is compulsory for children of European parentage. The necessary grants are provided from Provincial Council revenues, education up to the

age of 12 being free.
State and Aided Schools, Dec. 31, 1930, 4,766
There are 139,990 European pupils and 11,990
non-European. Total number of teachers 11,637
(6,438 in European schools and 5,552 in non-European schools). Provincial Government expenditure on education, exclusive of Higher Education (for which see Union of S.A.), for 1230-31, £3,413,712.

Hospitals.—The daily average number in all hospitals (1989) was 1,692'88; ordinary revenue £157.176, ordinary expenditure £308.558, Government grants in aid £136.649.

Harbours and Works.—There are magnificent harbours at Table Bay (Cape Town), Port Elizabeth, East London, and Mossel Ray. There are electric trainways in Cape Town, Port Elizabeth, East London, and Kimberley.

Administration.—The Province is administered by an Administrator, appointed for five years by the Governor-General, aided by a Provincial Council of 58 members (elected for three years). There is an Executive Committee of four members in addition to the Administrator, who is Chairman of the Committee.

Local Government.—There are 128 municipalities, each governed by a Mayor or Chairman and Councillors, a certain number of whom are elected annually by the ratepayers. There are 92 Divisional Councils and 86 Villago Management Boards and so Local Boards.

Administrator, Hon. J. H. Conradie . . £2,500

Executive Committee, J. I. Mann: P. J. Du

Plessis; A. B. Chunngham; B. Muller. Prov. Sec., A. S. Weisbecker.

Superintendent-General of Education, M. C. Botha, M.A.

Professional Assistant, W. de V. Malan, Ph.P. Secretary, P. A. Millaid.

Capital, CAPE TOWN. Total population (1926), European (with suburbs), 120,568. Cape Town is 5,979 miles from Southampton; transit, 16 days.

### NATAL

The Province of Natal comprises an area of 35,384 square miles (including Zululand, 10,427 square miles), with a semboard of 360 miles. In 1236 the Emopean population was 158,926 (males 81,170, females 77,746).

In 1928 the European births registered numbered 3,514, deaths 1,498, and marriages 1,525. The race question in Aatal is complicated by the presence of large numbers of Indian subjects of the Crown, brought over during the latter half of the mineteenth century to supply the deficiency of local labour.

Education.—There is a University College at Pietermaritzburg, and there are responsible schools (ecclusive of zef farm schools), and s8 beyond primary schools for European children. There are also a technical colleges, r physical culture school, a mpt continuation classes, r tianing school for teachers, 8a Asiatic schools, 696 native schools, and as other coloured schools, which are maintained or aided by Government, and a large number of private schools.

Administration.—The Provincial government is administered by an Administrator aided by a Provincial Council of as members (elected for 3 years). There is an Executive Committee of 4 members.

Administrator, Hon. H. Gordon Watson, I.S.O. Executive Committee, F. C. Hollander; Copt. G. M. Botha; J. Macaulay; T. N. Wadley. Provincial Secretary, A. E. Charter, O.B.E.

PIETERMARITEBURG, the capital and sent of the Provincial Government, is situated about 54 miles inland from Port Natal. Total popula-tion (European and coloured), 36,023 in 1921. The 1926 Census figures for the European population of Pietermanitzburg are 19,748.

In Durban (nopulation, 1921, 151,642; for 1926 European population of Durban was 70,883), or Port Natal, is the only harbour of any importance on the south-east coast. The entrance is nowsafe and navigable for any vessel at any time; the average low-water depth at the entrance, L.W.O.S.T., the har being no longer existent, for 1927 being 37 feet.

Natal, 6,800 miles; transit, 20 days.

### ZULULAND.

Ziduland, annexed in 1897, comprises about twothirds of the country formerly under Zulu kings, and is bounded on the south and south-west by the Tugela River; on the south-cast by the Indian Ocean; on the north by the Portuguese possessions; and on the west by the new territory (formerly Utrecht and Vrijheid districts of the Transvaal) and Swaziland. The Amagutaland Protectorate, created by proclamation of Nov. 22, 1897, was annexed to Zululand on Dec. 27, 1897, and now forms part of the Province. The Northern Districts territory (consisting of the Magisterial Divisions of Vrifheld, Utrecht, Paulpietersburg, and Babanaugo) was annexed to Natal on January 27, 1903.

### THE TRANSVAAL

In 1931 the European population numbered

695.963 (males 357,470, females 338,492) The Province of the Transvaal has a total area of 110,450 square nules, about 20,000 square miles lying within the tropics. The Census of rozz showed a population of 2,087,636, of whom 1,159,430 were males and 928,206 females. In 1929 there were 18,227 European births, 6,389 European deaths, and 7, 101 European marriages

Religion .- The religious statistics for rozz are -

### BERMUDA.

The Bermudas, or Somers Islands, are a cluster of about 100 small islands (15 or 16 only of which are minabited, the rest being mere rocks) situated in the west of the Atlantic Occan, in 32° 15' N lat an 164° 51'N, long., compilsing an area of about 19 square miles, with an estimated population (1938) of 30.884 (15,536 white and 15,338 coloured) These islands derive their mane from Bernudez, a Spaniard, who sighted them in 1537; but they were first colonised by Admiral Sir George Somers, who was shipwrecked here in 1609, on his way to Virginia. The nearest point of the mainland is Cape Hatteras, in North Carolina, 580 miles distant.

The Government is administered by a Governor, who is also Commander-in-Chief of the military forces. He is advised by an Executive Council of 7 members, appointed by the Crown. There is also a Legislative Conneil, composed of 9 members appointed by the Crown; and a representative Chief. Assembly counseling of 56 members

a Legislative Conneil, composed of 9 members appointed by the Crown; and a representative House of Assembly consisting of 36 members. The climate is mild and healthy. There are no streams or wells, and the lunabitants are dependent on the rainfall stored and preserved in tanks. Vegetation is prollife, the principal trees being the Bermuda codar (juniper), formerly of great importance for shipbuilding. The islands produce large quantities of onnois potatoes, and green vegetables, which are largely exported, together with cut flowers and lily builds, to New York. Arrowroot and bananas are also grown, but meat, flour and other at ticles of consumption are imported from the U.S and Canada. Fish are plentiful round the coasts. The islands are much frequented as a health resort by Americans and Canadians.

#### BORNEO.

Borneo is a large island in the Eastern Archipelago, extending from lat. 7' 4' N to 4' 2o' S. and from long. 108' 50' to 120' 2o' E. It is about 850 miles in length and 650 in breadth, and contains an area of 284,000 square miler, divided by the equatorial line into two nearly equal portions. The population is probably about 1,846,000, consisting chiefly of Dyaks, Malays, Kyans, Papus or Negritos, Chineso, Bajans, Dusuns, Muruts and Brigs (the aboriginal Celéles). The island was discovered by the Portugueso in 1521, and at the present time rather more than two-thirds of the Island is included within "Netherlands India". The remainder of the island is under British protection

### BRITISH NORTH BORNEO,

The territory of British North Borneo occupies the northern part of the island, with a total area of about 23,000 square illes, and a coast-line of about 900 miles. The population is 270,043, consisting mainly of Muhammadan settlers on the coast, about 201 miles miland, and a large number of Chinese traders, artisans, and agricultural labouters. The interior is mountamous (Mount Kinghalu, 23,445 feet) and is densely timbered.

The two chief towns are Sandakan, on the north-east coast, and Jesselbun, on the west coast. All legislation is passed by the Legislative ('ouncil, which consists of 9 official and functional members, who have the local title of Honourable. The appointment of the Governor is subject to the approval of the Secretary of State. For adm instrative purposes the whole State is divided into 4 Resultences. The laws are based on the Indian codes of criminal and civil procedure, amended and adapted by local ordinances. There is an linear's Court for Mulanimadan law.

The chief products are tumber, tobacco, rubber, copra, cutch, birds'-nests, salt fish, damar, ago, coro-inuts, rattains, and all varieties of jungle and sea produce. The country is suitable for the enthvation of singar, taploca, coco-onuts, kapok, ground nuts, rubber, pepper, and gambier on a large scale. Gold has been found. Coal of good quality is now being produced at the rate of 3,500 tons per mouth at Schattik, in the south-eastern corner of the territory.

A railway runs from Jesselton, the chief port

A railway runs from Jesselton, the chief port on the west coast, and down the coast to Beaufort, the centre of the rubber industry, where it turns inland to Melalap, in the interior; there is a branch from Beaufort to Weston (ao miles). There are several wireless stations. There is a State bank at Sandakan with a branch at Jesselton.

There is an Armed Constabulary numbering 676 all ranks, composed of Indiaus and Natives under European officers, armed with S M.L.E. rifles and Lewis guns. There is a Church of England and a Roman Catholic mission, and churches at Sandakan, Kudat, and Jesselton.

A native State on the north-west coast of the island of Borneo. The total area is about 2,500 square miles, the population being 30,162 (April, 1931), of whom 26,997 are Malays and Bornean races. The territory was placed under British protection in 1888, and on Jan. 2, 2005, the Sultan accepted by treaty a British Resident to assist and advise him in the administration.

· Exclusive of land sales

The chief town, Brunel, has a population of nearly 12,000. Native industries include fishing, cloth-weaving, brass foundries, and silversmiths' work. The chief imports are rice, cloth, tobacco, sugar, petrolemm, and sundres; the exports are chiefly cutch (mangrove extract), rubber, jelutong, and sago.

### BRITISH GUIANA.

which includes the Counties of Demerara, Essequebo, and Berbice, is situated on the northeast coast of South America and has a total area of 89,480 square miles, with a seaboard of more than 300 miles. The population, Dcc 31, 1930, than 300 miles The population, D.c. 31, 2930, was estimated at 314,489, of whom 130,075 were East Indian immigrants. The birth-rate was 33'4, and the death-rate as 0 per 1000 of the population The colony is bounded on the south by Brazil, on the east by Dutch Gulana, on the west by Venezuein, and on the north and N.E. by the Atlantic Ocean The colonia atthough hot fer diseased and butter. clim te, although hot, is pleasant and healthy. The cultivated portion of the country, amounting to about 155,852 acres (of which 57,244 acres are in sugar-cane and 49,702 in rice), is conflued to the sea-coast and to a short distance from the rivers. The constiand is very like the Netherlands, being below the level of the sea, and intersected with canals constructed by its former Dutch owners. At the junction of the boundaries of British Guiana and Venezuela is Mt. Roraima, a flat-topped mountain 8,740 feet above sea level, and on the Potaro River (a tributary of the Essequebo) are the Kausteur Falls, with a clear drop of 741 feet and a total fall of 822 feet. The seasons are divided into dry and wet, the two dry seasons lasting from the middle of February to the end of April, and from the middle of August to the end of November. The meteorological records taken on the coast-lands during a period of 84 years on the constraints during a period of \$4 years show, as regards temperature, that the climate is a very equable one. The mean temperature is \$6 4°, its recorded extremes during this long period ranging between \$6° and \$2°, but these extreme temperatures are very rarely recorded, the usual extremes during a year being 70° and 80°. In the interior the mean temperature is 85°. In the interior the mean temperature is higher—8s° its extremes ranging from 66° to roz. The yearly rainfall is, on the contrary, subject to marked variation, its mean on the coast lands being gree inches distributed over coast lands being 51 on inches distributed over ros days of the year, and its range from \$2.7 to 135 inches per year. In the interior the average recorded rainfall is \$8.5 inches per year, ranging from 45 to 80 4 inches per year. The chief product is sugar, which forms 53 per cent. of the export trade. The leading exports are sugar (\$5.1,185,594 in 1930), rum, diamonds, gold, timber, balata, bauxite, rice and copra. There are about 9,000 aboriginal Indians; they

8.000

6,760 7,300 7,300

are occupied largely in fishing, hunting, and raising crops of cassava.

The British Guiana Order in Council, 1928, providing for the Government of the Colony and for the Countitution of a Legislative Council in place of the Court of Policy and Combined Court which have been determined, came into operation on July 18, 1918 The Legislative Council consists of the Governor as President, of 10 Official Members and of 19 Unofficial Members Executive and administrative functions are exercised by the Governor and an Executive Council. There are 3.94 miles of post-office telephone wire, with 13 miles of aerial, and 23 of submarine, cable, and 55 of telegraph lines, with 73 post-offices and postal agencies. There are 95 miles of railway.

### BRITISH HONDURAS.

British Honduras, in Central America, lies within 18° 29′ 5″ to 15° 53′ 55″ N. latitude and 89° 9′ 22″ to 88° 10′ W. longitude. Its extreme

During 1950 no loans were issued either locally or by the Crown Agents. Debentures amounting to £100,723 were reliemed. Advances made to the colony by the Crown Agents amounted to £300,000 at Dec 21, 1950.

length and breadth are approximately 174 m. and 68 m. respectively; it is bounded on the north and north-west by Yucatan (Mexico), on the west and south by Guatemals, and on the east by the Caribbean Sea. The total area is east by the Caribbean sea. The other area shout 8,598 sq. miles, with a population (Census 1931) of 55,347—25,524 males and 25,283 females. The climate generally is damp and hot, but not unhealthy. The temperature ranges from 50° to 58°. The average lies between 39° and 80°, but this is considerably tempered by the prevailing sea-breezes In September 1931 a dis-astrous hurricane devastated the capital of the nsurous nurroane devastated the capital of the colony, with a loss of nearly x,ooo lives, a Mansion House Fund being raised for the sufferers. The country consists chiefly of primeval forest, with savannahs and so-called "pine-ridges," which are open sandy plains covered with a wiry grass and dotted with pine-reas affording fair was for action 12. trees, affording fair runs for cattle. The ground is level and swampy along the coast-line, and generally flat for about ten or twenty miles inland; after which hills from 500 ft. to 4,000 ft. high succeed each other to the western boundary.

The staple products are the natural woods of the colony, principally mahogany and logwood. Sugar, rubber and cacao grow readily Fruit, in-cluding bananas, plantains, coco-nuts, pineapples, oranges, and mangoes also grow well, while inland there are extensive regions of good pasturage. About 60,000 acres are under cultivation The best description of cacao trees grow wild in the bush. There are \$2 primary schools in the colony, and 4 schools with secondary departments in Belize. The shipping entered and cleared at the port of Belize in 1930 was \$2,500 tons. There is a radio-telegraph station at Belize in 1930 was \$2,500 tons.

British Honduras is governed as a Crown colony There is an Executive Council of 3 official and 4 appointed members and a Legislative Council of 5 official and 7 appointed members. The Governor is President of both Councils.

### BRITISH WEST INDIES.

The West Indies, so named in 1492 by Columbus who believed the islands to form the western limits of India, are a number of islands and islets, some of them mere rocks, attuated between το 'to sy' North and so' 3o' to 85' West. The whole archipelago extends in a curve from the Florida Channel (North America) to within miles of the coast of Venezuela (South America), and is divided into three main groups: America), and is divided into three main groups; I. Greater Antilles, which contain the largest islands, Cuba (44,000 sq. niles) and Hispanula (85,000 sq. miles), being Independent; Jamaica and its dependencies, British; and Puerto; Rico, a dependency of the United States II. Baramas, which are entirely British. III. LESSER ANTILLES, which are divided among the United States and Venezuela. The total was of the united States and Venezuela. The total was of the northwester in the United States and Venezuela. The total was of the northwester in section of the content of the northwester is section. area of the archipelago is nearly 100,000 square miles, of which 73,000 square miles are Inde-pendent, 12,300 British, 3,890 United States, 1,350 French, 430 Netherlands, and 90 Venezueland, Trade Enquery Ofice in London, The West

India Committee, 14, Trinity Square, E.C. 3.

### THE BAHAMAS.

The Bahamas (or Lucayos) are an archipelago of the British West Indies, lying between at a 47 42 - 27 24 N lat. and 72 40 - 79 5 W long, and extending from the coast of Florida on the north-west to Haitl on the south-east. The group consists of about twenty inhabited islands. and an immense number of islets and rocks, comprising an area of about 4.404 square miles, and a population in 1939 of 60,848, the most part being descendants of liberated Africans. The principal islands are New Providence (containing the capital, Nassau), Cat Island, Abaco, Giand Bahama, Long Island, Eleuthera, Exuma, Har-beur Island, Inagua, Andros Islands, San Salvador or Watling Island, Rum Cay, Long Cay, Ragged Island and Binnins. Originally settled by Englishmen, the Bahanas were, in 1782, sur-prised by the Spanish but at the peace of Ver-sailles were restored to the English. The climate is salubilous, and in the winter Nassau, which is outside the tropics, is frequented by many Americans. The chief industry is sponge-gathering; the exports of sponge in 1930 being valued at £75,351. Tomatoes are cultivated in large 575.332. Tomatoes are cultivated in large quantities for shipment to the United States. Mahogany, lignum -vits, mastic, ironwood, abony, logwood, and satinwood are found throughout the islands. A fibre industry is largely established. The imports are chiefly facility contained. The imposs are careful foodstuffs, wines, spirits, cotton, silk and worsted fabrics, and hardware.

The Government is vested in a Governor, aided

by an Executive Council of 9 members, a nomi-nated Legislative Council of 9 members and an elective Representative Assembly of ag members.

Barbados, distant 3,635 miles ; transit, 13 days.

aboriginally Xaymaca, or Land of Wood and Water-an island situate in the Caribbean Sea, about 90 miles to the south of Cuba, within zy' 4z'-z8 3z' North lat and 76° zz'-78'z3' W. long It is the largest and most valuable of the British West Indian Islands, being 144 miles in length and 49 in extreme breadth, containing an area of 4,450 square miles, and a population, in April, 1921, of 858, rz8 (males, 40r.973; females, 436, r45); whites, r4,476; coloured, r57, r23; blacks, 660,420; East Indians, r28,620; Chimese, 3,696; not specified,

Jamaica was discovered on May 3, 1494, by Columbus, who called it St. Jago. It was taken possession of by the Spaniards in 1500; but in 1655 a British expedition, sent out by Oliver Cromwell, under Penn and Venables, attacked the island, which capitulated after a triffing In x670 it was formally ceded to resistance.

England by the Treaty of Madrid.
From the sea-level on all sides of Jamaica a series of ridges gradually ascend towards the central ranges, dividing the large rivers, and attaining, in the culminating Peak of the Blue Mountains, in the eastern part of the island, an elevation of 7,388 feet. From these mountains at least 70 streams descend to the north and south shores, but none are navigable except the Black River, and that only for small craft. There are several excellent harbours, and the island is inter-sected by good roads. There are are niles of railway open. Telegraph stations and post offices are established in every town and in very many villages; the number of accounts open in the Govt. savings banks was xo8,834 (1930). Most of the staple products of tropical climates are raised. Sugar and rum are manufactured and exported the latter is still counted the best in the world : and the coffee raised in certain districts of the Blue Mountains fetches a high price. There is an extensive trade in fruits and nuts, cliefly bananas, oranges and occonuts, with the U.S.A. and U.K. Maize and Indian corn grow luxuri-

antly. The Guinea grass, from four to six feet in height, grows wild, and is superior to any other for pasturage, while the woods furnish an abundance of rich dye-stuffs, drugs, and spices, and there are some rare cabinet woods. The Governor is assisted by a Privy Council not to exceed 8 members; the Legislative Council consists of the Governor, the Senior Military Officer, the Colonial Secretary, the Attorney-General, the Director of Public Works, and the Collector-General (all exogueio), of zo Nominated Members, and of 14 elected by the people, being one for each parish of the island. The island is divided into three counties, Surrey in the east, Middlesex in the centre, and Cornwall in the west. The principal city is Kingston, the seat of government and the largest port and town, pop (Census, 1921) 62,707; the next in importance are Spanish Town, pop. 8,694: Montego Bay, 6,580; and Port Antonio, 6,272. Chief exports(1930): bananas, £2,309,741; sugar, £591,806; coffee, £161,621; pimento, £192,502; cocoa, £81,323. 1929-30 1030-31 Public general revenue ... £3,392,869£2,197,572 Expenditure from income. 2,310,502 2,322,613 Public debt ..... 5,237,909 5,117,449 Total imports......£7,027,013 £6,101,513 Total exports .... 4,669, 273 4,092,573 Captain-General and Governor-in-Chief, His Excellency Sir Reginald Edward Simms, M.V.O. ...... ..£1,200 to 1,400 Superintending Medical Officer, Hon. (a) ST. KITTS-NEVIS WITH ANGUILLA. The islands of St. Kitts, Nevis, and Anguilla were united in 1882 to form one Presidency, and

were united in 188a to form one Presidency, and taken together they have a population (Dec. 3r, 1893) of 35,365 and a total area of about 130 square miles. The climate is decidedly healthy for the tropics, the temperature being from 66° to 88°.

St. Kitts (population Dec. 3r, 1995, 17,978), the principal island, is the oldest colomy in the West Indies; it is situated in lat. 17° 28° N. and long. 63° 48° W., and comprises an area of 68 square miles, its greatest length being 28 miles, and greatest breadth about 5 miles. It is one of the most effectively cultivated sugar islands in the West Indies. a continuous line of green the West Indies, a continuous line of green estates sweeping up all round the coast from the sea towards the central range, which rises to a height of 3,711 feet (Mount Misery). Cotton is also grown to a considerable extent. The capital,

Basseture, is a port of registry.

Nevis (population 12,593—probably an overestimate) is separated from St. Kitts by a strait some 3 miles wide and has an area of 50 square miles. Cotton and oncomits are exported, and cattle and vegetables are raised. Its greatest elevation is 3,56 feet. The chief town, Charlestown, is a port of entry.

Augustia (population 4,794) is about 60 miles N.W. of St Kitts, 16 miles in length, and varies in breadth from z to 3 miles, containing an area of 35 square miles. There are no hills. Salt is the principal product, and small stock are raised.

(3) DOMINICA, the largest island of the colony, and the loftiest of the Lesser Antilles, is situate between 12° 20′—12° 45′ N. lat. and 6x° 12′—6x° 20′ W. long., 95 miles 5. of Antigua, and is about 20 miles long and 15 broad, comprising an area of 305 sq. miles, or 195, 300 acres, of which about 70,000 acres are under cultivation. The island is of volcanic under cultivation. The island is of volcanic erigin and very mountainous and picturesque, abounding in streams fairly well stocked with fish, and the soil is very fertile. The temperature varies, according to the attitude, from 55° to 85°. The cultivation of sugar has been practically replaced by occoa, limes, occo-nuts, vanills, and fruit. The population was estimated at 45,343 on Beo. 27, 1822 included in this total are 450 on Dec. 31, 1930; included in this total are 400 Caribs, of whom about 100 are of pure blood. The climate is healthy, and during the winter months very pleasant. Yellow fever is unknown, and very pleasant.

from November to June the island is suitable as a health resort for pulmonary and rheumatic invalids. There is an Executive Council composed of official and unofficial members, and a Legislative Council consisting of the Adminisrator, who sits as President, and 6 official and 6 non-official members, 4 of whom are elected, and a nominated by the Governor. The principal towns are Roseau, on the south-west coast, population 7,04s, and Portsmouth, population 3,069.

### (4) MONTSERRAT

is situated in 16° 41' N lat and 62° W. long., 26 miles S.W. of Autigua. It is about 12 miles as miles S. W. of Audigua. It is about 12 miles in length and 7 in breadth, comprising an area of 32½ square miles, with a population (1930) of 12,196. Discovered by Columbus in 1493, it was settled by Irishmen, conquered and held by the French for some time, and finally confirmed to Creat Entleth in 1882. It is instituted. 137 assigned to Great Britain in 1784. It is justly considered one of the most healthy and beautiful of the Antilles; it contains three active soufrières of the Abhilles; it contains three active sourieres and several hot springs, while the so, nery is charmingly diversified. About two-thirds of the island are mountainous, the reas well cultivated. A great part of the island was devastated by hurricanes in 1924 and 1925. The chief exports during the year 1920 were cotton-seed meal, cotton, cotton-seed oil, onions, lines and its products, sugar, tomatoes and animals of all kinds. The chief town is Plymouth, with a population (1920) of 1920. A witeless station. population (1921) of 1,709. A wireless station was opened in 1925.

### TRINIDAD AND TOBAGO.

Trinidad, the most southerly of the West India Islands, lies close to the north coast of the continent of S. America, the nearest point of Venezuela being 7 miles distant. The island is situated between ro 3'--ro 50' N. lat. and 60 gg ' -61° 56' W. long, and is about go miles in length by 37 in breadth, with an area of 1,862 square on 37 in including when a facts of 1,000 square inlies, and a population at the Census of 1,921 (including Tobago) of 365,973, estimated at 413 119, on Dec 31, 1930. The island was discovered by Columbus in 1498, was colonised in 1588 by the Spannards, and capitulated to the 1584 by the Spannards, and capitulated to the 1584 by the Spannards, and capitulated to the 1584 by the Spannards, and capitulated to the 1584 by the Spannards and 1584 by the Spannards and 1584 by the Spannards and 1584 by the Spannards and 1584 by the Spannards and 1584 by the Spannards and 1584 by the Spannards and 1584 by the Spannards and 1584 by the Spannards and 1584 by the Spannards and 1584 by the Spannards and 1584 by the Spannards and 1584 by the Spannards and 1584 by the Spannards and 1584 by the Spannards and 1584 by the Spannards and 1584 by the Spannards and 1584 by the Spannards and 1584 by the Spannards and 1584 by the Spannards and 1584 by the Spannards and 1584 by the Spannards and 1584 by the Spannards and 1584 by the Spannards and 1584 by the Spannards and 1584 by the Spannards and 1584 by the Spannards and 1584 by the Spannards and 1584 by the Spannards and 1584 by the Spannards and 1584 by the Spannards and 1584 by the Spannards and 1584 by the Spannards and 1584 by the Spannards and 1584 by the Spannards and 1584 by the Spannards and 1584 by the Spannards and 1584 by the Spannards and 1584 by the Spannards and 1584 by the Spannards and 1584 by the Spannards and 1584 by the Spannards and 1584 by the Spannards and 1584 by the Spannards and 1584 by the Spannards and 1584 by the Spannards and 1584 by the Spannards and 1584 by the Spannards and 1584 by the Spannards and 1584 by the Spannards and 1584 by the Spannards and 1584 by the Spannards and 1584 by the Spannards and 1584 by the Spannards and 1584 by the Spannards and 1584 by the Spannards and 1584 by the Spannards and 1584 by the Spannards and 1584 by the Spannards and 1584 by the Spannards and 1584 by the Spannards and 1584 by the Spannards and 1584 by the Spannard British under Abercromby in 1797. The chief town and port of entry, Port of Spain (pop. 69,534), is one of the finest towns in the West Indies with sewerage, electric lighting, tram and telephone services. Other towns of importance are San Fernando (pop. xx,978), about 30 imles south of the capital; Princestown (pop. 5,856), and Arima (pop. 4,7xx). A remarkable phenomenon is the asphale lake, xx acres in extent, near the village of La Brea, from which (1930) 118,055 tons of asphalt (£313,397) were exported. The soil of Trinidad is nich and productive, the most important products being sugar, cocoa, molasses, rum, copra, limes, and coco-inits, and various kinds of timber and fruits. The chief exports (1930) were petioleum £2,750.695; cocoa £1,363,789; and sugar £775.167. On Dec 37, 1930, there were 14 companies actively engaged in the production of oil, the loyalties payable on oil won from Crown Lands being £77,260 Coal, ron. graphite and gypsum exist in small quantities; and traces of gold have been found in the Northern Range. On Dec. 31, 1930, there were 187 Elementary and Intermediate Schools, 43 being Government and 244 Assisted, Trinidad having 151 and 170 ago, in addition to 7 colleges for higher education, which also receive a grant-in-aid. There are 118 miles of rallway open, and the island important products being sugar, cocoa, molasses, are 128 miles of railway open, and the island is in communication with Tohago and the mainland by telegraph and wireless. The Government is vested in a Governor, an 13 official and 13 unofficial members, 6 of the latter being nominated by the Crown and 7 elected. Executive Council, and a Legislative Council of

### THE WINDWARD ISLANDS.

12 days to U K. : 5 days to U.S.A.

The Government of the Windward Islands is made up of the three colonies of G enada (the seat of government), St. Vincent, and St. Lucia, with their dependencies, the Grenadines being divided between Grenada and St. Vincent. The total area is 508 square miles, with a population (2981) of 168,854. There is one Governor for the three lislands; but there is no Goneral Legislative Council as in the Leeward Islands, and no common tariff or treasury. Each island retains its own institutions, and in the Governor's

absence is governed by an Administrator sub-ordinate to him.

Governor and Commander-in-Chief, Sir Thomas Alexander Vans Best, K.B.E.,

C.M.G. (1930) ..... £3,000 Transit to Grenada from London about 14 days.

### GRENADA AND THE GRENADINES.

Grenada is situated between the parallels of rs 30'-rr 58' N. lat and 6r so'-6r 35' W. long, and is about ar miles in length and rs miles in and is about ar miles in length and ra miles in breadth, it is about of miles north of Thindad, 68 miles S.S.W. of St. Vinceut, and roo miles S.W. of Barbados. Area, about 85, res acres, oppulation (including some of the Grenadines), 66,3cs (Census of 1921). The country is mountainous and very picturesque, and the climate is healthy. Grenada was discovered by Columbus in 268, and named Conception. It was originally colonised by the French, and was definitely ceded to Great Britain by the Treaty of Versailles in 1782.

of Versailles in 1783.

The soil is very fertile, and coons, spices, rubber, cotton, coffee and fruit are grown. The forests are rich in tumbers—The imports chiefly comprise dry goods, bread-stuffs, hardware &c. The Legislative Conneil consists of 16 members, 8 of whom are officials, 3 nominated and 5 elected

St. George's, on the south-west coast, is the chief town, and possesses a good harbour.

ST. LUCIA, the largest and most picturesque of the Windward group, situated in x2°54°N. lat. and 60°59′V. long., at a distance of about 90 miles W. N. W. of Barbados, at miles N. of St. Vinceut, and 24 miles S. of Martinique, is at miles in length, with an extreme breadth of 14 miles. It comprises an area of \$33 square miles, with a population (Dec. 31. 1930) of 38,404. It possibly possesses the most interesting history of all the smaller islands. Fights raged hotly around it, and it constantly changed hands as between the English and the French. It is mountainous, its highest point being 3,44 feet above the sea, and for the most part it is covered with forest and tropical vegetation. The principal exports (1930) are sugar, e000a, occo-nuts, copra, limes, lime-juice, lime-oil, logwood, molasses, syrup, and fruit. The chief

places are Castries, the capital (pop. 1981, 5,899),

and Soufrière (pop. 1921, 3,480.)
Port Castries, one of the finest in the W.I., is a coaling depot. In 1930, 335 steamers (tonnage 874,520) entered Port Castries.

### ST VINCENT

an island about 95 miles west of Barbados, situate in 13' 10' N. lat and 60° 57' W. long, is 18 miles in length and 11 in breadth, comprising an area, with its dependencies, of 150 sq. miles, and a population (Census of 1521) of 44,447. In 1846 a large number of Portuguese labourers, amounting to 2,400, entered the island, and proved a valuable acquisition. St. Vincent is more thoroughly English than the two other islands of the group, though it has been the scene of warfare. In 1783 it was secured to Great Britain.

The chief products are arrowroot, cotton, molasses, rum, cassava, cocoa, coffee, and spices, Its chief imports are linen, cotton and woollen manufactures, Canadian flow, fish, lumber, &c. Steps have been taken to settle the labouring classes on lands acquired for the purpose.

### CAMEROONS.

### (Joint Franco-British Administration.)

The German Protectorate of Kamerun on the west coast of Africa between (British) Nigeria and French Congo (the Spanish Muni River Settlements occupying a small intervening area), was obtained by conquest by Franco-British forces during the War of 1914-18, and at the conclusion of Peace its administration was confided by the Supreme Council of the Allied Powers to Great Britain and France jointly.

The approximate geographical limits are between so-zao N. lat. and 80 48'-zoo E. long., and the area is about 187,596 square miles, containing a population estimated at 2,144,000.; of which total the French sphere is 123,546 square miles, with 1,550,000 inhabitants. The coast-line extends from the Rio del Rey to the Muni River. The territory occupies the north-

^{*} Includes Imperial Grants of £6,664 and £8,400.
† Incl £8,240 Colonial Development Fund

west corner of the Central African Plateau, by the Dutch. In 1796 the British took possession with Cameroon Peak (13,350 feet) near the of the Inutch settlements on the island, and capital, on the coast, and the Chebchi and annexed them to the Presidency of Madras; alandara Mountains on the north-west frontier. but six years after, in 1862, Ceylon was formed The Sanaga is a considerable river flowing into the Atlantic opposite Fernando Po; the Sanga and Dacha (or Ngoko) are tributaries of the Congo, and the Logone-Shari flows into Lake Chad. The inhabitants are Bantus and Sudanese, with some Haussas and Fula tribes, of whom the latter are Muhammadans and the remainder pagans. Cocoa cultivation is a highly successful industry of recent origin, and the Protectorate is ruch in forest produce. The exports are rubber, pain oil, pain kernels, cocoa and dried fruits; the imports are chiefly clothing and textile goods, meat, fish and provisions.

In 1920 the whole area was divided into a British Sphere and a French Sphere.

The British Sphere has between Nigeria and French Cameroons. The total area is 34,655 sq miles, and the total population is 700,050. It is a narrow stip of land reaching from the Atlantac Ocean to Lake Chad, and lies diagonally between parallels of latitude 4° N. and 12° 30° N. and parallels of longitude 8° 30′ and 12° 20° N. and parallels of longitude 8° 30′ and 12° E. The nature of the country varies to a remarkable extent from the coastal mangrove swamps and thick forest belts to the grasslands at heights of 4,000 ft. to 7,000 ft and over, yet another contrast may be seen in the sandy and swampy areas in the region of Dikwa and Lake Chad The highest point is the Cameroon Mountain, which rises to a height of 13,350 ft. It is volcanic, but has not been active since 1922. The Northern section is administered by the Residents of the adjoining Nigerian Provinces of Adamawa and Borini; the Southern section by the Nigerian Government as a separate Province, the capital being Buea on the slopes of the Cameroon Mountain. The principal ports are Victoria (in Ambas Bay) and Tiko. Victoria is connected by railway with the capital, and Tiko connected to Victoria by motor road. 225 ships cas,848 tons) arrived in Victoria in 133 and ros ships (86,477 tons) entered Tiko, a total of 217 ships (309,325 tons).

### CEYLON.

an island in the Indian Ocean, to the south-east of the peninsula of Hindustan, is situated between  $5^\circ$   $55^\circ$   $-9^\circ$   $50^\circ$  N lat and  $79^\circ$   $48^\circ$   $-81^\circ$   $53^\circ$  E. long its area is (with onlying relands) 35,338 square miles, or more than three-fourths of that of Ireland. Its greatest length is from north to south, 270 miles, and its greatest width 140 miles. The climate varies with the altitude of the district; but on the whole, though tropical, it is healthy, except in the low-lying jungle. The coolest months are December and January; the

bottest me April and May.

The population (Census of 1931) was 5,312,548 (including military and shipping), the most important element being the Sullalese, descendants of colonists from the valley of the Ganges, who first settled in the island about the Reputation of the Population of the Population of the Population of the Population of the Population of the Population of the Population of the Population of the Population of the Population of the Population of the Population of the Population of the Population of the Population of the Population of the Population of the Population of the Population of the Population of the Population of the Population of the Population of the Population of the Population of the Population of the Population of the Population of the Population of the Population of the Population of the Population of the Population of the Population of the Population of the Population of the Population of the Population of the Population of the Population of the Population of the Population of the Population of the Population of the Population of the Population of the Population of the Population of the Population of the Population of the Population of the Population of the Population of the Population of the Population of the Population of the Population of the Population of the Population of the Population of the Population of the Population of the Population of the Population of the Population of the Population of the Population of the Population of the Population of the Population of the Population of the Population of the Population of the Population of the Population of the Population of the Population of the Population of the Population of the Population of the Population of the Population of the Population of the Population of the Population of the Population of the Population of the Population of the Population of the Population of the Population of the Population of the Population of the Population of the Population of the Population of the Population of the Population of the Population Ganges, who first settled in the island about tonstituen.

1. C. 543. In 1505 the Portuguese landed in Ceylon and formed settlements along the coast; but about 150 years later they were dispossessed (Rs 32,452,83) and Expenditure (Rs 23,551,478).

5 Exclusive of Ceylon Government Randway Revenue but about 150 years later they were dispossessed (Rs 26,583) and Expenditure (Rs 26,528).

but six years after, in 180s, Ceylon was formed into a separate Crown colony. In 1815 the King of Kandy was deposed and banished; and his dominions, which had up to that time maintamed their independence of European rule, were annexed to the Butish Crown.

The staple products of the islands are agricultural. The most important for home consumption is rice in its two forms of paddy and husked grain. The principal exports are tea, rubber, products of the cocount palm, plumbago, cacao, cinnamon, citronella oil, cardamons, areca nuts, elony, and a little vanilla.

About one-fifth of the island is under cultivation, and the approximate areas in 1930, in acres, were :- Rice, 800,000; other grain, 105,000; tea, 457,000; coconuts, x,x00,000; rmbber, 534,000; cinnamon, x6,000; cacao, 34,000; and tobacco, 14,000. The live stock in x930 included x,660,000 horned cattle, 57,000 sheep, 181,000 goats, 45,000 pigs, and x,200 horses. Among the more important native industries are gold, silver, brass, forcy and tortoiseshell work, pottery, mats, fans, and wood-carving. Ceylon is famous for precions stones, especially catseyes, jubies, &c.; and for the pearl fishery in the Gulf of Manuar, off the N W. of the island. The manufacture of

on the N w. of the island. The manufacture of salt is a Government monopoly.

There are 95x miles of railway open, 834 being 5 ft. 6 in. ; and 844 post offices, 445 money order offices, and 36x telegraph offices, with x2,5xx nules of telegraph whe.

The government of Ceylon is administered by a Governor, aided by a State Council of *46 members (elected on a territorial basis) with members (elected on a territorial basis) with 8 nominated unofficial members, and 3 Officers of State ('Inef Secretary, Legal Secretary and Financial Secretary). The elected and nominated members are divided into 7 Executive Committees. (x) Home Affairs, (x) Agriculture and Lands, (3) Load Administration, (4) Health, (5) Labour, Industry and Commotee, (6) Education and (7) Communications and Works, each with an elected Chairman who is the Minister for the subject dealt with. The Chief Secretary is in claure of Enternal Affairs. Secretary is in charge of External Affairs, Defence and the Public Services, the Legal Secretary and the Fmancial Secretary in charge of Legal and Financial Affairs. The Officers of State and the Muisters form a Board of Ministers which prepares the Estimates of Revenue and Expenditure in consultation with the Financial Secretary.

For administrative purposes the island is divided into 9 provinces, at the head of each of which is a Government agent. The larger towns have municipalities, Viban District Councils, or local boards, and in the country districts the Ceylonese retain their village councils and tribunals for matters of minor importance.

The MALDIVE ARCHIPELAGO lies to the S.W. of Ceylon, a few degrees north of the equator. Male, the seat of government, is about 400 miles distant from Ceylon, to which the islands have always been nominally tributary. The Sultan acknowledges his allegiance by sending an annual embassy to Colombo. The natives are Muslims. The Islands are unnealthy, and the main exports are dried fish, cowrie shells, coco-nut coir, and tortoiseshell.

Colombo, distant from London (overland) 5,868 miles: transit, 19 days.

### THE CHANNEL ISLANDS.

situated off the north-west coast of France (at distances of from ten to thirty miles), are the only portions of the *Dukedom of Normandy* now belonging to England, to which they have been belonging to Eugland, to which they have been attached ever since the Conquest. They consist of Jorsey (28,717 acres), Guerusey (15,654 acres), and the following dependencies of Guerusey-Alderney (1,956 acres), Brechou (74), Great Sark (1,035), Little Saik (230), Herra (320), Jethou (44), and Lithou (38), a total of 47,083 acres, or 73-8 quare miles. The 1937 Census population of Jersey was 50,455, and of Guerusey, &c., 42,666 (Guerusey 40,470, Alderney 1,506, Sark 575, Herra 53, Jethou 2).

The climate is nild, and the soil exceptionally productive. The land under cultivation in 2016

productive. The land under cultivation in 1916 was 49,678 vergées (2½ vergées = 1 acre), the principal product of the soil of Jersey being potatoes, tomatoes and wheat, and of Guernsey green crops and cats, fruits tomatoes and flowers. The famous Jersey and Guernsey breeds of cows have earned a well-deserved celebuty. The principal officer in each island is the Lieut.-Governor, who omes in each island is the held--overhol, who represents the King-Emperor (the Duke of Normandy). French is the official language of the local legislatures, called the States, and of the Royal Court, and is still spoken by the people, but English is now permissible in the Legislative Assembly. The Bailiff, appointed by the Crown. presides over the States and over the Royal Court or judicial body. The islands being all but exempt from imperial taxation they possess a very large trade. The chief town of Jersey is St. Helier, on the south side, the principal town of Guernsey is St. Peter Port, on the east coast.

The trade of the Channel Islands is principal town.

#### CYPRUS

is an island in the Mediterranean Sea, between N. lat. 34° 33° and 35° 47°, and E. long. 33° 20° and 34° 35°. It is about 40 miles distant from the nearest point of Asia Minor; and 60 miles from Latakia, on the Syrian coast. The distance to Port Said, at the entrance of the Suez Canal, is 238 miles. The larger part of the island is an irregular parallelogram, 100 miles long and So to 30 broad; from which a narrow penin-sula, 5 or 6 miles wide, trus out for 40 miles towards the north-east. The area is 3,54 square miles. The population at the ceusus of 1931 mines. The physician about 18 per cent were Muhammadans, and the remainder mostly members of the autocephalous Church of Cyprus, which is a branch of the Otthodox Eastern Church. The principal productions are gram of various kinds, sesame, linseed, flax, wine and spirits, silk, olives, locust-beans (carobs), cotton, wool, hides, grapes, oranges, pomegranates, ashestos, anisced, sponges, sumac leaves, terra umbra gypsum, salt, pyrites, and chrome In 1930 the wine export was 1,372,728 gals, and that of spirits 10,183 gals, the wine going to Egypt, the U K, Syria, the Dodecanese, and Maita, and spirits to Egypt, kyria and Castellorizo. The climate varies in different localities In the plains the summer heat is very great, and the British troops suffered when first stationed in the island. Excellent summer quarters were, however, found in the hills; and, owing to the enforcement of various samtary measures, the death-rate of the whole island is nearly as low as that of any European country

as low as unated in the mirroran commany.

Cyprus was formally annexed to the British

Empire in 1914 The inhabitants have been

granted a political franchise, every man paying

direct taxes having a vote. The government is administered by a Governor, assisted by a Legislative Council composed of 24 members, 9 being official and 15 elected. The island is divided into three electoral districts each returning one Muliammadan member, and 12 electoral districts each returning one non-Muhammadan member.

For administrative purposes the island is divided into six districts, in each of which the executive government is represented by a com-missioner. For judicial purposes it is divided into three judicial districts. The law courts nuo enree junciai districts. The law courts were reconstituted in rgay, and there are now a supreme court, 3 divisional courts, 3 assize courts, 3 district courts, and also magisterial and assistant district judges ("bristian and Moslem) taken nut. There are also a Mosulman and Moslem) take part. There are also 3 Mussulman religious

tribunals, styled Sheri Courts, and a Sheri Tribunal of Appeal

bunal of Appear
The capital is Nicosia (Lefkosia), near the
centre of the island, with a population of \$3,507
in \$232; the other principal towns are Larnaca
(population \$1,872), Liniassol (15,346), Famagusta
(8,979), Kyrenia (2,137), Paphos (4,517), and Morphou (4,335).

Important works at Famagusta have rendered the inner harbour accessible to steamers, and a narrow-gauge railway connecting the harbour with the capital (36 miles) was opened in 1905, and was extended to Morphou, as miles, in 1907, and to Evrykhou, 15 miles, in 1915. ## FALKLAND ISLANDS.

These, the only considerable cluster in the South Atlantic, lie about 300 miles east of the Straits of Magellan, between 52° 15'—53° 8. lat. • Exclusive of Grant-in-and (£92,800), † exclusive of share of Cyprus of the Turkish Debt charge (£92,800).

(islets, rocks, and sandbanks), comprising in the aggregate 4,6:8 sq. miles, and a population in xsax of z,044. Mount Adam, the loftlest peak in the colony, rises z,27 foct above the level of the sea. The Falklands were discovered by Davis in 1352, and visited by Hawkins in 1354. A settlement was made by France in 1764; this was subsequently handed over to Spain, but the latter country recognised Great Britain's title to a part at least of the group in 1772 In 1820 the Argentine Republic established a settlement, which was destroyed by the Americans in 1831. In 1833 the islands were again taken possession of by the British for the protection of the seal-fisheries, and colonised, being the most southerly organised colony of the British Empire On Dec. 8, 1914, a British squadron under Adm. Sir Doveton Sturdee defeated a German squadron (von Spee) off the Fakkand Islands A memorial erected in the harbour of Port Stanley in commemoration of this victory was unveiled on Feb. 26, 2527. The climate is cold, the thermometranging in winter from 20 to 50°, and in summer from 40° to 65° and in summer from 40° to 65° and the summer from 40° to 65° and the summer from 40° to 65° and the summer from 40° to 65° and the summer from 40° to 65° and the summer from 40° to 65° and the summer from 40° to 65° and the summer from 40° to 65° and the summer from 40° to 65° and the summer from 40° to 65° and the summer from 40° to 65° and the summer from 40° to 65° and the summer from 40° to 65° and the summer from 40° to 65° and the summer from 40° to 65° and the summer from 40° to 65° and the summer from 40° to 65° and the summer from 40° to 65° and the summer from 40° to 65° and the summer from 40° to 65° and the summer from 40° to 65° and the summer from 40° to 65° and the summer from 40° to 65° and the summer from 40° to 65° and the summer from 40° to 65° and the summer from 40° to 65° and the summer from 40° to 65° and the summer from 40° to 65° and the summer from 40° to 65° and the summer from 40° to 65° and the summer from 40° to 65° and the summer from 40° to 65° and the summer from 40° to 65° and the summer from 40° to 65° and the summer from 40° to 65° and the summer from 40° to 65° and the summer from 40° to 65° and the summer from 40° to 65° and the summer from 40° to 65° and the summer from 40° to 65° and the summer from 40° to 65° and the summer from 40° to 65° and the summer from 40° to 65° and the summer from 40° to 65° and the summer from 40° to 65° and the summer from 40° to 65° and the summer from 40° to 65° and the summer from 40° to 65° and the summer from 40° to 65° and the summer from 40° to 65° and the summer from 40° to 65° and the summer from 40° to 65° and the summer from 40° to 65° and the summer from 40° to 65° and the summer from 40° to 65° and the summer from 40° to 65° and the summer from 40° to 65° and the summer from 40° to 65° and the summer from 40° to 65° and the summer from 40° to 65° and the summer from 40° to 65° and th are chiefly bog-land, and have proved suitable for sheep, 606,88a being carried in 1930; the output of wool is about four million ib annually The population is mannly British, and is principle. pally engaged in sheep-farming. The chief cayorts are wool, tallow, hides and sheepskins; seal oil is also produced and exported. The only important settlement is Port Stanley, at the head of Port William, on the coast of East Falkland.

The government of the Falkland Islands is vested in a Governor, aided by an Executive Conneil of 3 official and z unofficial members, and a Legislative Council, of 4 official and 2 unofficial members.

Dependencies of the Falkland Islands.

The total area of land and sea included in the dependencies of the Falkland is over 3,000,000 square miles. South Georgia, an island 800 miles east-south-east of the Falkland Group, with an area of r,000 square nules, is the only part of the dependencies which is permanently habitable, there being a Resident Magistrate and other officials, and a permanent population (engaged in the whaling industry) at Grytviken Harbour. In the South Shetlands, Deception Island contains a harbour at Port Foster, ice-free for about five months in the year, with a land

· Colony only

and 57° 40'—62° W. long. They consist of East station which arrives and departs with the Falkland (area 2,580 sq. miles), West Falkland whaling fleet. The South Orkneys also have a (2,038 sq. miles), and upwards of 200 small islands seasonal land station, and the Argentine Government have, with the permission of H.M. Government, established a meteorological station, in connexion with a discovery that a cold winter in the Weddell Sea is a preemrsor of drought in the naize and cereal area of Argentina 3/4 years later. The other dependencies, of which the principal units are the South Sandwich Islands, and a part of the Antarctic, or South Polar, continent known as Graham's Land, are even more inhospitable than those already named, being nearly covered with snow and ice and almost completely destitute of plant life. In spite, however, of the climatic and other disadvantages, the revenue derived from all the dependencies in 1930 amounted to £84.547. The local expenditure was £21,597, the surplus (after meeting administrative expenses at Port Stanley) being devoted to local research and development. The trade is considerable, the exports being valued at f=,726,x75, and the imports at £499,829 in x930. The whaling industry carried out from these dependencies as greate than that of the test of the world combined Friteen companies (3 British, 12 Norwegian) (anghi 10,755 whales in the 1259-30 season, the landed value of the oil being £3,166,450.

claim was made by Norway to Thomson and Boutet Islands in the Antaictic and by Argentina to the South Orkneys; these claims were not admitted by the British Government, but Bonvet Island was ceded to Norway in

November, 1928, as an act of grace.

Port Stanley is distant about 8,x30 miles; transit, 26 days from Liverpool Telegrams by cable and wireless telegraphy rid Monte Video and roi Bergen

### FEDERATED MALAY STATES (See MALAYA).

### FIJI.

This is a group of see to see islands (of which This is a group of soo to ago islands (of which some are, however, mere uninhabited islets and rocks) in the South Pacific Ocean, about 2, 200 miles north of New Realand, which extend 300 miles from east to west, and 300 north to south, between 25° 45′—22° 20° 8, lat. and 275° E—278° W. long The gross area of the group is about 7,083 square miles. The islands are of volcame origin, with lotty mountains and well wooded The principal are Viti Levu (Great Kiji) and Vanua Levu (Great Land) The chimate is comable and remarkably healthy for climate is equable and remarkably healthy for cimmate is equable and remarkably healthy for Emropeanis; the average temperature in the shade in the cool season is 7z°, rising to 8z° in the hot season, extremes hing between 6o° and 9z°. Vegetation is remarkably luxuriant, the chief products being bread-fruit, bananas, plantains, pea-nuts, yams, and dalo (taro), coco-nuts, sugar-cane, rice, maize, and cotton. The principal exports are sugar, copra-hananas. The principal exports are sugar, copra, bananas, trocas shell, molasses, maize, fresh fruit and vegetables, and bêche-de-mer. The Governor is regetables, and beche-de-mer. The Governor is appointed by the Crown, and is assisted by an Executive Conneil consisting of 7 members. Laws are passed by a Legislative Conneil (of which the Governor is president) containing 13 nominated members, 6 European elected members, 3 native members, and 3 Indian elected members. Native administration is carried on through the

### GAMBIA

The West African river Gambia, which is navigable for some 300 miles from its mouth, was discovered by the Portuguese in 1447, and m 1588, the year of the Spanish Armada, Queen Elizabeth, being then at war with Spania and Portugal, gave a charter to a British Company to trude with the Gambia, and as early as 1618 an effort to do so was made, but it was not successful. In 1686 a fort was built upon a rocky island, and, in honour of the new King, was named Fort James, but the English merchants had formidable rivals in the Portuguese and French, and it was not until 1763 that the river was recognised, by the Treaty of Veracilles, as British. The Colony had no regular political institutions until 1807, when it was put under the Government of Sierra Leone. The Colony of the Gambia was created in 1843, and was constituted a separate government in

Mary, British Kombo, Albreda, the Ceded Mile, MacCarthy Island, and various other and territories on the banks of the river. The total area is estimated at 4,728 84, miles. The population of the Island of St. Mary, at the Census of April 24, 223, was 9,23, and that of the Protectorate 201,303. The climate is unhealthy during the rainy season, viz, from June to October; but during the rest of the year it is less unhealthy. The chief export is ground nuts, which form ninety-five per cent. of the total exports; they are sent chiefly to Marseilles, where the oil is extracted and used for the same purpose as olive oil. Palm kernels, hides, and calabashes are also exported; and rice, cotton, malze, and a kind of millet called kons are produced in the countries bordering the Gamba, but not in sufficient quantities to meet local requirements. The chief imports are cotton goods, kola nuts, rice, soap, spirits, hardware, singar, wine, and tobacco. A Company of the W A F F. (4 officers and zeo non-commissioned officers and men) is stationed in the Colony, and there is an armed police force in the settlement (numbering ros mon), which performs both civil and military duties. There performs both civil and military duties are 4 Government wireless stations. The Government, which is that of a Crown Colony, is vested in a Governor, assisted by an Evecutive Conneil consisting of 3 official members (besides the Governor), and by a Legislative Conneil of sofficial unoficul members noninsted

### GIBRALTAR.

regular political institutions until 1807, when it was put under the Government of Sieira Leone.

The Colony of the Gambia was created m 1843, greatest elevation, near the southern extremity and was constituted a separate government in of Span, with which it is connected by a low 1868. It now consists of the Island of St. | isthmus. It is about 14 miles distant from the

opposite coast of Africa. Gibraltar was captured in 1904, during the war of the Spanish Succession, by a combined Dutch and English force, under Sir George Rooke, and ceded by the Treaty of Utrecht, 1713. Since that time it has remained continuously in possession of the British. Of the many attempts to retake it, the most celebrated was the great sign in 1779-83, when General Elliot, afterwards Lord Heathfield, held it for 3 years and 7 months against a combined French and Spanish force. The town stands at the foot of the promontory on the N.W. side. Gibraltar is a free port, and enjoys the advantages of an extensive shipping trade, and is becoming a popular tourist centre. During the year 1930 4,000 vessels (including 6s tourist steamers) entered, with a total tonuage of 7,257,828. The chief sources of revenue are the port dues, the rent of the Crown estate in the town, and duties on wine, spirits, tobacco, beer, motor spirit and perfumery. There is an enclosed Admiralty harbour with an area of about 440 acres, containing three graving docks. The estimated civilian population (1930) was 16,558.

The Governor is in command of the garrison,

and is aided in the administration by an Executive Council of 7 members, there is no Legisla-

tive Council.

GOLD COAST.

The Gold Coast comprises a portion of the coast of the Gulf of Guinea from about 3° 7' W. to 2° 24' E. of Greenwich. It is divided into three parts:—Gold Coast Colony, 23,937 sq. miles; Ashanti, 24,379 sq. miles; and the Northern Asianti, 24,379 sq. miles; and the Northern Territories; 30,465 sq. miles-a total area of 78,8cs sq. miles. It extends along the coast line about 334 miles and inland to an average distance of 440 miles, or to the xro of N. latitude. It is bounded on the west and north by the It is bounded on the west and norm by the French colonies of the Ivory Coast and French Sudan, and on the east by Togoland. The population (April 1931) was: Gold Coast Colony, 1.545,140. Ashanti, \$82,866; Northern Territories, 717,283; total, 2.845,289, excluding 3.139 Non-Africans. The natives are almost all Pagans, but there are many Muhammadans, and the number of Christians is readly increasing. the number of Christians is steadily increasing.

The trade in 1930 was principally with the United Kingdom (44 per cent.) U.S. (14), Germany (16), Netherlands (10) and France (3 per cent.) Gold is found in considerable quantities, and diamonds were discovered in 1919; there are also large deposits of high-grade manganese. The principal product is cocoa, more than half the world's supply being produced in the Colony. The principal exports in 1930 were: cocoa, £6,970,385; gold and gold dust, £1,055,634; manganese £477,490; and diamonds, £658,994. The chief imports are appared, building materials, action, cocoa, providing the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the c The chief imports are appared, burning materians, cotton goods, provisions, kerosene, hardware, motor spirit, motor cars and motor lorries, beer, ale, stout and poster, sugar and tobacco. The clumate, generally, is hot and moist, but as becoming annually less unhealthy by the aid of medical science and santation. The Government assists the missionaries in educational matters and has established many schools of its own, and a college and school at Achimota, 6 miles from Accra, have been built and opened. Great efforts are being made to improve the sanitary condition of the coast towns. Accra, Kuması, Sekondı (ıncludıng coast towns. Accra, Kumasi, Sekondi (including Takoradi), Kofondina, Winneba and Tamale are highted by electricity, and there are pipe-borne water supplies at Accra, Sekondi (including Takoradi), Cape Coast and Winneba; similar supplies are being installed for Kumasi and Tamale. 4.411 miles of telegraph land wre and 7.396 miles of telephone trunks have been established. Exchanges have been opened in the principal towns and are served by 2,840 miles of underground and overhead line wire. There is a wireless station at Tokoradi. A Government railway runs from Schondi through Tarkwa, the centre of the gold-mining industry, to Kumasi and thence to Accra (362 miles), with branches (590 miles in all). In 1928 a harbour was opened at Takoradi

The seat of government is Accra (population 59,895) Coast The other principal towns are: Cape 50,055 (27,685), Ada (4,450), Elinina (4,797), Sekondi (75,748), Tarkwa (3,321), Keta (6,362), Kufani (35,600), Saltpond (6,360), Koforidia (19,634) and Winnebah (10,990). The government of the Colony is administered by a Governor, aided by a nominated Executive Council. There is a Legislative Council of 15 official and 14 unofficial members, for the Colony, excluding Ashanti and the Northern Territories.

ASHANTI	
ľ	ont ion
Ashanti was placed under British prot	couon

Ashantt was placed under britain protection on Aug. 27, 1896. Under Orders in Council of Sept. 26, 1901, the country was definitely annexed by Great Britain, the Governor of the Gold Coast Colony being appointed Governor of the Ashantt, though only some of the laws and ordinances of the Gold Coast Colony apply to the and bounded on the N. by the Shum Chun River.

annexed territory. The area is 24,379 square miles, with a population (census of 1931) of 582,856 (Europeans 447). Kumasi, the chief town, has about 36,000 inhabitants. In 1930 there were 1,207 children in the Government schools, and 3,978 in the mission schools; students were in residence (1930-21) at the Agricultural and Forestry Training centre. Police force (1930-37) s65; prosecutions (1930-30) 4,203, but there is little serious crime. There are 2,33 miles of motor roads. Agriculture is extending; large areas are under eacao, and coffee and collage also cultivated. Local receipts (1930-31) £65,158 (exclusive of royal-ties); local expenditure (excluding railway, posts and telegraphs) £384,000. In 1290-31 the export of cacao was 66,721 tons, and the gold output £675,513 (129,019 oz.). In the western parts of the colony are rich forests of mahogany, cedar, &c., and trees yielding fuits, oil, rubber and gum copa!. Practically the whole of Ashauti is now connected by motor road with Kumasi and with the main trade routes to the north. The country is well watered, and with proper restraint it could contain inexhaustible supplies of valuable forest products. On the eastern side the forests are sparser, though timber and oil trees are common and game fairly plentiful; the products there are chiefly maize, yams, cocoyams, bananas, ground-nuts, and caeao, the plantations of which are rapidly extending. Chief Commissioner, H. S. Newlands .....£z,600 Deputy Chief Commissioner, E. A.T. Taylor 1,350 Prominent Commissioners:

Eastern Province (Kuman) (vacant) .... 1,200 Western Province (Sunyani) Capt. E. T. 

NORTHERN TERRITORIES. In 1901 the Northern Territories lying to the north of the parallel of 8° N. lat., bounded on the west and north by the French possessions and on the east by Togoland, were placed under British protection They are administered, under the Governor, by a Chief Commissioner with his headquarters at Tamale. By the census taken in 1931 the population was 717,365. The Muhammadans have substantial mosques; there is a Roman Catholic mission ment schools have been established at Tamale, Gambaga, Salaga, and Wa. There are 3,030 miles of good permanent roads. The Northern of good permanent roads. The Northern Territories are capable of producing various agricultural crops (cereals, shea-butter, ground-nuts, indigo, tobacco), and are said to contain

wide auriferous nieas. Chief Commissioner, Maj F.W.F. Jackson, C.M G., D.S O . ... . . .....£1,600 Provincial Commissioners -

### HONG KONG.

Hong Kong is an island about xx miles long and from a to 5 miles broad, with a total area of square miles; it lies close to the mainland, bein separated at one point by a narrow strait (Lye moon) not more than a quarter-mile wide, as was first occupied by Great Britain in Januar 1841, and was formally ceded by the Treaty Nankin in 1842; British Kovilona was su sequently acquired by the Peking Convention 1860; and the New Territories, being a peniusu in the southern part of the Kwangtung provinc by a lease signed June 9, 1898. The whole color comprises an area of about 391 square mile with a population (Census, 1931) of 849,47 The non-Chinese residents, excluding naval ar

military, numbered x9,369.

The capital the colony is Victoria, which li along the nort ern shore of the island, facing the mainland; and between the mainland as the city is the harbour, which is one of the finest in the world, with a water area of some square miles. With the exception of liquo tobacco and motor spirit the port is free, and fortified. It possesses excellent docks, capab of holding the largest vessels for the purposes repair. There is a considerable ship repairing and construction industry. Shipping entere railway, of which sal/4 miles belong to the Government, runs from Kowloon to Canton is the length north of the Shum Chun River (which is the honndary of the British territory) is controlled by the Chinese Government. Good road connect the principal districts with the railwa

The island is broken in shape and mountainou the highest point being Victoria Peak, which about x,8so feet high. The Peak District is about the place of residence, and is reserved for Europeans. The New Territories contain peaks from 1,800 to 3,000 feet. The hot season last from May to October. During the winter months, from November to March, the climate months, from November to March, the climate is cooler, drer, and more unitgorating. The average daily maximum temperature ranges from 37° in July to 63° in February, and the average daily minimum temperature from 76° in July to 55° in February. The average annual rainfall is 36 in, of which no less than 75 per cent, falls between May and September, when the S.W. monsoon prevails.

Hong Kong is the centre of a vast trade in many kinds of produce, clucity camplior, coal, cottons, flour, gunnics, hides, in on and steel goods, leather matches, oils, rice, silks, sugar, tea and tin.

Much encouragement is given by the Government to education in the colony. In 1930 there were x,o24 schools subject to Government supervision, attended by 6x,o22 pupils. The University (opened in x922) includes faculties of

medicine, engineering, and arts.

Hong Kong is a Crown colony, and its government is administered by a Governor, aided by an Executive Council of 9 members, together with a Legislative Council of 18 members, including himself, a representative from the Chamber of Commerce, and a representative of the Justices of the Peace. There is also a Samtary Board, partly elected, which controls certain sanitary measures

### THE ISLE OF MAN (MONA),

an island in the Irish Sea, in lat. 54° 3′ - 54° 25′ N. and long. 4° 18′ - 4° 47′ W., nearly equidistant from England, Scotland, and Ireland. The total land area is 145,325 acres (27 80, miles), with a population (1931) of 49,338 (22,459 males, 26,549 females). In 1293 the births numbered 667 and the deaths 727. The cultivated area (1931) was 79,001 acres, and the live stock included 3,417 horses, 19,477 cattle, 91,153 sheep, and 4,172 pigs. In the 9th century a body of 4.172 pigs. In the 9th century a body or malcontents from Norway emigrated to the

western isles of Scotland, and their prosperity drew upon them the auger of the Norwegian monarch Harold, who in the year 870 sent forth a great expedition and conquered the Orkneys and the Shetlands, the Western isles, and Man For three centuries the Norwegian rule remained intact, but when, in 1263, Alexander 111 defeated the famous Haco, at the battle of Largs, all these islands fell under Scottish rule. On his accession to the English throne, Henry IV seized on the Isle of Man, and in 1406 bestowed it on the Stanley family. In 1827 the Crown purchased it for the

sum of £417,144
The land is such in minerals, lead, iron, blende and slate, and exports large quantities of agricul-tural produce—Forty-seven miles of railway have been constructed, and about 25 miles of electric

tram road

Man is governed by a separate Legislature, called the Tynwald, consisting of two branches—the Governor and Council and the House of Keys. The Council consists of the Governor, the Bishop of Sodor and Man, the two Deemsters, the Attorney-General, a members appointed by the Governor, and 4 members appointed by the House of Keys, The House of Keys (possibly from the Scandmavian kerse = chosen) is one of the most ancient legislative assemblies in the world. It consists of 24 members, elected by the male and female owners and occupiers of property, 16 from the six sheadings, 5 from Douglas, and z each from Castletown, Peel and Ramsey. Bills after having passed both Houses are signed by the members, and then sent for the Royal Assent. After 1e ceiving the Royal Assent, a Bill does not become law unless promulgated within the ensuing twelve months, and on the first "Tynwald lay" (July 5) following it is announced in the English and Manx languages on the Tynwald Hill. On the promulgation taking place a certificate thereof is signed by the Governor and the Speaker of the House of Keys. An annual contribution of £10,000 is made to the Imperal Government. In 1921 Tynwald accepted lia bility for the redemption of £250,000 War Stock as a contribution to the Imperial Government towards the cost of the Great War. In ross liability for a further sum of £500,000 of War Stock was accepted in flual settlement of all responsibility to the Imperial Government in respect of the cost of the Great War.

### KENYA.

Kenya Colony and the Kenya Protectorate are situated in Eastern Equatorial Africa. The eastern boundary has been settled by agreement with Italy, to whom the Province of Jubaland

(35,812 sq. miles) was ceded by treaty in 1925; and on the north by an agreement with Abyssinia in 1908. On the west the Colony adjoins Order in Comerl in 1926 to include in Kenya an area on the west of Lake Rudolph and north of the River Tinkwel, stretching from Mt. Elgon to Mt. Zula (on the boundary of the Sudan), which was formerly part of the Uganda Pro-tectorate On the south Kenya adjoins the mandated Tanganyika Territory The population of the Colony is estimated at 3,025,084 (Europeans 16,84z, Indians 39,594, Goans 3,959, Arabs 12,16z, Africans 2,951,196, and others 1,33x). The area is 224,960 square miles.

A great portion of this vast region consists of pastine lands or barren wastes, but there are not lacking extensive districts of great natural fertility in the interior, as well as on the coast. The Colony is divided for administrative purposes into 9 previnces, which are subdivided into districts.

The districts most suitable for settlement by Enropeaus are those of Kyambu, North Nyeri, Lankipa, Nakuru, Naivasha, Kerucho, Uashi Gishu, and Trans-Nzom. There is also a considerable region still undeveloped

Kenya Protectorate also includes the Witu Protectorate, a small tract of country at the

month of the river Tana.

The telegraph and telephone systems of Kenya have x2,480 miles of wire Telegraph lines connect Monibasa with Lamn and Witu, Monibasa with Gazi and Tanganyika Border along the coast and mland between Mombasa and Entebbe, t ie capital of the Uganda Protectorate. There are also extensions to Kahe, Lake Magadi, Machakos, Nyeri, Nanyuki, Menu, Isnolo, Narok, Rumuruti, Kericho, Chenagael, Songhor, Eldama Ravine, Lake Solai, Eldoret, Kitale, Endebess, Kimmi and Moileu. Communication between Mombasa and ships at sea, Italian Somalijand and with Zanzibai (for Government traffic only) is maintained by radio-telegraphy. A short-wave wireless station (owned and maintained under licence from Government) is established at Nairobi and provides communication between the Colony and Protectorate and Great Britain. Telephone communication exists in the majority of the settled areas of the Colony. The Kenya and Uganda railways and harbours are Stateowned, the railway, which is metre gauge, has a owned, the railway, which is metre gauge, has a total route mileage of open lines of r.5a5 miles, made up as follows —Main Line (Monthasa—Kampala) 884, miles; Pracepat Lines — Nakiri Junction—Kisminu (132 miles), Tororo-Soroti (100 miles), Voi—Kahe Junction (or miles), Voi—Kahe Junction (or miles), Winor and Branch Lines, Rongan—Lake Solai (25), Kisuniu—Bittere (23), Lesetu—Kitale (40), Mbulamiti—Narmasagali (18), Kampala—Port Bell (6), Giligii—Thomson's Falls (40), Narrobi—Naryuki (145)

The Konza—Lake Magadi Line for miles) is worked but not owned by Govern (or miles) is worked but not owned by Govern ment. In addition, the Administration operates a manne service on Lakes Victoria, Kioga and Albert, and on the River Nile, with a route mileage of 3.676 miles.

The principal imports are cotton piece goods and manufactures, textiles and textile manufactures motor cars, parts and accessories, motor spint, eigarettes, ergais and tobacco, cutlery, hardware, instruments and implements china and glass ware; motor lorries, parts and accessories, industrial machinery, and wearing apparel. The principal exports are coffee, raw 450

The Settlements forming what is known as the 1,300 Colony of the Straits Nettlements consist of the island of Sugapore (with its dependencies, including the Goos or Keeling Island and Christinas Island), Penang (including Province Wellesley and the Dindings), Malacca, and the Lindau, These Settlements have an entire area of about 1,535 square miles, with an estimated

population (1931) of 1,113,992.
The Government consists of a Governor, assisted by an Executive Council of zz members, and a Legislative Council of 13 official and 13 unofficial members, appointed by the Crown. the unofficial members xx are nominated by the Crown and z are selected by the Chambers of Commerce at Singapore and Penang. The law of the colony is the common and statute law of England as it was m 1826, qualified by local ordinances The Supreme Court consists of the Chief Justice and 3 pulsue judges, and constitutes also a court of appeal, from which there is yet another appeal in certain cases, viz., to the Privy Council. The jurisdiction of the Supreme Court includes that of a Colonial Court of Admiralty. There are also in each Settlement district courts with limited civil and criminal jurisdiction, and the usual police magistrates and coroners' courts. An ordinance passed in 1931 provided for the establishment of a Court of 1,000

Criminal Appeal.

The climate of the colony is almost uniform throughout the year, and foliage is perennial.

There is railway communication from Singapore, across the Straits of Johore, to Bangkok, vid Penang (West Coast) or Kelantan (East Coast.

The principal imports in 1930 were areca nuts cigarettes, coal, copra, cotton piece-goods, fish (dried and salted), machinery, milk (condensed and sterilized), rubber, pepper, petroleum, lubricating oil, rattans, rice, sago, sarongs, sugar and tin ore. The principal exports in 1930 were areca nuts, petroleum, lubricating oil, copra-cotton piece-goods, cigarettes, the (dried and salted) milk (condensed and sterilized), pepper,

it to congreted by a narrow etrait about three-
it is separated by a narrow strait about three- quarters of a mile in width; its length is about
ar miles, and its breadth 14 miles; it comprises,
sy miles, and its breadth 14 miles; it comprises, with the adjoining islets, an area of 225 square
mules and a nonvilation (see ) of ses See It
was first occupied in 1819, and formally ceded
To the British Government by the Sultan of
was first occupied in 1819, and formally ceded to the British Government by the Sultan of Johore in 1814. The seat of government for all the settlements is the town of Singapore,
situated on the south side of the island in lat.

r° 17' N. and long. 103° 50' E., with 445,778 inhabitants in 1931. The climate is fairly healthy for Europeans, except for the absence of any marked change of temperature throughout the year.

The number of merchant vessels entered and cleared in 1930, exclusive of native craft, was 18.148, with a tounage of 31,889,100. The total for the whole colony was 27,889, with a tounage of 46,588,885. The total native craft entered and 45,585,59. The total native crait entered and cleared at all four ports, Singapore, Penang, Malacca, Labuan, during the same year was 53,668 (tonnage, 1,943,704). The harbour, in the extent of its shipping, is one of the greatest ports in the world, being a port of call for vessels trading between Europe or India and the Far East, Australia, and Netherlands Indies, and is strongly defended. The Tanjong Pagar and is strongly defended. The Tanjong Pagar docks and wharves were taken over by Government in 1905 at a cost (fixed by arbitration) of \$39,00,000 (£3,300,000). The King's Dock (opened in 1913) is the largest east of Suez, being 879 feet long, 100 feet wide, and 34 feet deep; its cost was \$3,500,000. Singapore is a free port; no duties are levied, but excise is collected upon the release for consumption of collected upon the release for consumption of opium, tobacco, spirits, wines, malt liquors, and petroleum.

Labuan is an island of the Malayan Archi-pelago, situated about 6 miles off the north-west coast of Borneo, in 5° 16' N. lat. and 155" 25' R. long. Its area is about as square miles and its population is 7.538 (1931). It was ceded to Great Britain by the Sultan of Brunei in 1846, being at that time uninhabited and was incorporated in that time unimassical and was incorporated in the Straits Settlement in 1972. The island has a separate Settlement in 1972. The island has a good halbour. The principal export is sago. Victoria Harbour. in the south-east, is the principal inlet, and affords good anchorage. There is a cable station of the Bastern Ex-tension Telegraph Company on the island.

Resident, C. P Smith, M C S.

The Cocos-Keeling Islands are a group of about 20 small islands about 700 miles southwest of Sumatra, and form part of the Settlement of Sungapore. The population is x,z4s, and the islands export about 800 tons of copra. There is a station of the Eastern Extension Telegraph Company on Direction Island.

Christmas Island, in the Indian Ocean, azz miles S. of Java, and 529 miles E. of the Cocos-Keeling Islands, has an area of about 6s square miles and a population of 1,059 (1931). A District Officer is stationed on the island, which contains enormous phosphate deposits worked by the Christmas Island Phosphate Company.

The amount exported in 1930 was 119,933 tons

Penang is the northernmost of the Settlements It includes Penang or Prince of Wales's Island (pop. 1931, 198,788). on the eastern side of which is Georgetown, the port and capital, on when is deorgeown, the pole and capital, and the strip of mainland opposite, known as Province Wellesley (pop. 1931, 150,959), and the territory of Dindings, west of Perak. Penang Island, about 15 miles long and 9 broad, is situated off the west coast of the Malay Pening. situated on the west coast of the Malay Peninsula, in lat. 5° 24' N, long roo' 24' E, and was ceded to the Government of India in 2785 by the Raja of the neighbouring territory, Kêdah. Area, 211 square nuiles. At the time it was founded, Penang was the only British settlement in further India; now it is the emporium for all the trade of the northern and more progressing of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the pr · Including \$19,000,000 from Currency Guarantee Fund. | perous parts of Sumatra and the Malay Peninsula.

Province Wellesley is a strip of coast about as miles in length with an area of ses square miles, ceded by the Raja of Kédah in 1800, with some land S. of the Krian River acquired more recently. The province is in a high state of cultivation as compared with the neighbouring territory, containing rice, spices, tapioca, rubber, and coconut plantations.

The Dindings Territory, coded by the State of Perak in 1874 (area 182 square miles, pop. 1831, 19,539) is at present little developed; but it contains what is considered the best natural port on the western side of the peninsula. The headquarters are at Lumut, where a District Officer is stationed, and ateamers call regularly at Pangkor and Lumut. The territory comprises a group of islands (of which Pangkor is the largest), and a strip of the mainland on the west coast of the peninsula, cut out of the State of Pérak, and measuring about as miles long by about 10 miles in width.

Malacca, the largest of the Settlements, situated on the western coast of the peninsula, between Singapore and Penang, and about mo miles to the N.W. of Singapore, comprises an area of alkont 637 square miles. It is one of the oldest European settlements in the East, having been captured by the Portuguese in 1211, and held by them till 1541, when the Dutch drove them out. In 1795 it was captured by the British, and retained till 1818, when it was restored to the Dutch; it finally became a British possession. In pursuance of the treaty with the Netherlands, March 17, 1824, being exchanged for the British settlement of Bencoolen in Sumatra. The population in 1931 was 186,694. Singapone, the capital of the Strats Settle-

SINGAPORE, the capital of the Stratts Settlements, is distant from London 8,700 miles; transit, ms days. Penang, no days; and Malacca, az days.

### (a) THE FEDERATED MALAY STATES.

These States are situated on the mainland of the Malay Pennisala, and are closely connected with the Straits Settlements; they consist of the States of Pērak, Sēlāngor, Negri Sembilan, and Pahang, which have by treaty (1895) lenewed their engagements with the British Government, and are administered under the advice of a Chief Secretary to Government, with Residents in each State, subject to the instructions of the High Commissioner, who is also Governor of the Straits Settlements. The total area of the Federation is 27,648 square miles, with a population in 1921 of 1,324,890. The principal towns are Kuala Limpur (Sel.), pp. 80,424; Ipoli (Pk.), 28,585; Talping (Pk.), 28,787; Kampar (Pk.), 12,835; Serembau (N.S.), 17,272; Klang (Sel.), 22,585; and Telink Anson (Pk.), 10,859.

The first three States are on the west coast, and

extend from the border of Province Wellesley to that of the independent State of Johore. Paliang is on the east coast. All are governed by their native rulers under the above-mentioned

control.

There are 1.68 route miles of tailway, practically all of which have been constructed from revenue. This mileage includes the Johore State Railway (127 miles), which is leased from the Johore Government. The line is of metre gauge throughout, and extends from Singapore (in the South) to Padang Beaar (on the Siamese frontier), where

it is connected with the Royal State Railways of Siam, affording direct communication with Bangkok. The journey between Singapore and Penaug occupies as hours, and that between Prai (Penaug) and Bangkok 32 hours (compared with a sea journey of 6 days). The railway runs direct between Singapore Island and the main-land, crossing the Straits of Johore by a causeway. At Gemas there is a branch from the main Singapore-Penaug line running northwards through Negri Sembilan, Pahang and Kelantan as far as Tumpat. At Sungel Golok this line is connected with the Royal State Railways of Siam. There are 2,80 miles of metalled roads, 256 miles of unmetalled roads, and 2,850 miles of bridle-paths, while the principal rivers are

navigable for small boats.

The Federated Malay States contribute largely to the supply of raw materials of the British Empire, and although production of plantation rubber and the predominates, figures given below show that other products are produced and exported in large quantities, chiefly in Palana, and about half a million tons of coal are annually mined in Selangor and need locally. While with the growth of the rubber industry there has been a tendency to neglect some of the older agricultural products, such as indigo, coffee, sugar, pepper, nutmegs and other spices, it has been proved that large areas in the Federated Malay States are smitable for the cultivation of the oil palm, and 19,000 acres have already been planted and nearly 30,000 acres alienated for this cultivation.

Chantre conditions show little variation, and though the days are sometimes oppressive, owing to the high humidity, the nights are generally cool. The mean maximum shade temperature is about 50° F. inland, and rather lower on the coasts, while the mean maximum is about 72° F., inland and a little higher on the coasts. The average yearly rainfall varies from 65 inches at the driest places to 165 inches at the wettest. Although there are no clearly defined wet and dry seasons, there are well-marked seasonal variations in the rainfall. At inland stations and along the West Coast the months of January, February, June, July and Angust having at inland stations considerably less rainfall than the remaining months; along the East coast the middle of the year is usually dry, while from November to March is a period of heavy and persistent rain.

The States are policed by a mixed force of Indians and Malays, officered by Europeans.

an area of 92% square miles. The colony includes also the adjoining island of Gozo, with an area of a4% square miles; COMNO—the site of the Suttan's disaster in 289 and several islets. The civil population of the whole group, on April 20, 1921, was 241,681. In religion the Maltese are Roman Catholics. The lower orders are mainly Pruits in race. The Maltese language which is Punic in race. The Mattess language, which is generally spoken by all classes, is of Semitic origin, and is held by some to be derived from the Carthaginian and the Phoenician tongues There is a Maltese order of nobility, recognised by the Crown, consisting of so families.

The island of Malta is said to have been converted to Christianity on the occasion of the shipwreck of St. Paul in 58 A.D. In the Dark Ages it was taken by the Moors, its commerce was destroyed, and it was used mainly as merce was destroyed, and it was used mainly as a base for piratical expeditions. In rego it was again brought under Christian rule, being conquered by the Norman Count Roger of Sicily. For 440 years it followed the fortunes of that kingdom, but was in 1230 handed over to the Knights of St. John, who made of it a stronghold of Christianity. In 1255 it sustained the famous siege, when the last great effort of the Turks was successfully withstood by Grand Master La Vallette. The Knights expended large sums in Cortifying he island and carrying out many magfortifying the island and carrying out many magnificent works, until they were expelled by Napoleon in 1798. The Maltese rose against the French garrison soon afterwards, and with the assistance of some British and Neapolitan troops, compelled the French to capitulate in 1800. The islands were then ceded to Great Britain, the cession being confirmed by the Treaty of Paris of 1814.

of 1814.
The climate, although not tropical, is very hot in summer. The mean temperature for the summer months in 1920 (June, July, August and September) was 81.7°. In winter the mean temperature was 51.3°. The islands are highly cultivated. The chief products are corn, oranges, suggest forms cumping seed only in melons, grapes, forage, cummin seed, onions, and potatoes; figs and honey are plentiful. The principal occupation of the people is in connexion with shipping

Citta Vecchia, the former capital of the island, contains the ancient palace of the courts of justice, the Cathedral, and the Seminary; its population has now dwindled to 982, but its auturb, Rabat, has 9,950 inhabitants. Citta Veccha has been entirely cellpsed in importance by the modern capital of Valletta, which was founded in 1566. The principal harbour is one of the finest in the world; it is very deep, and large vessels can anchor alongside the shore. is an important port of call for vessels passing to and from the East and the Suez Canal, being about half-way between Gibraltar and Port Said. There is an extensive arsenal and important dockvard, Malta being the headquarters of the Mediterranean Fleet.

Malta possesses a University and Lyceum; so clementary and infant schools, 6 central schools, a secondary schools, and 60 might schools; in addition there are garuson schools, a Dockyard school, and 49 private schools of which 15 receive grants-in-aid from the Government.

Under the Constitution of rear the Legislature consists of a Senate and a Legislative Assembly. MALTA, an island in the Mediterranean Sea, 58 miles from Selly and about 126 from the African coast, about 77 miles in length and 9 in breadth, and having of Commerce and the Trade Union Council, the

700

other 7 being elected by a special electorate.
The Legislative Assembly consists of 3s, returned
by 8 electoral districts, each represented by
4 members. The method of voting is that of
Proportional Representation under the system
of the single transferable vote. The Governor is
assisted by two Councils—an Executive Council
consisting of such of the Ministers as he selects
and a Nominated Council consisting of the
Lieutenant-Governor, the Legal Adviser and
three officers chosen from the Navy, Army and
Air Force. The Governor may summon these two
Councils to sit together as the Privy Council of
Malta. When any legislative or administrative act
is done which, in the Governor's opinion, affects a
reserved matter, he may submit the consideration
of it to a Joint Committee consisting of three
members of the Nonmated Council appointed
by himself and three members of the Executive
Council appointed by the Head of the Ministry
The Constitution was temporarily suspended by
an Order in Council (June <b>a6</b> , 1930) which em-
powers the Governor to make laws for the peace,
order and good government of Malta.
In 1930 the Port of Valletta was entered by

### MATERITIES

Mauritius is an island lying in the Indian Ocean, so miles east of Madaguscar, between \$7° 27'-57' 46' E. long, and S. lat. \$1° 58'-20' 33', and comprising an area of 720 square miles. The permanent population at the Census of 1932 was 393,478, made up of Indrans, Europeans (mainly French), and natives of mixed descent.

Mauritius was discovered between the years 1507 and 1528 by the Portuguese, but they never formed any settlement on it. The Dutch visited it 1,004 in 1508 and named it Mauritius, in honour of the Stadtholder, Prince Maurice of Nassau. In 1644 they established a small colony on the shore, but in 1710 they alsaudoned the island, and in 1715 the French took possession of it and changed the name to He de France. Under the French it 2,000 became a great centre of trade, but in 1736 the seat of French Government in the East was removed to it from Pondicherry, and it was taken by a British force in 1810. The French language and French law have been preserved under British rule when the ancient name, Mauritius, was restored.

Of the total cultivated area of 171,075 acres, 700 | 136,875 are under sngar, 20,000 under fibre, and 14,200 under other crops; the necessaries of life have all to be imported from abroad. Rice and grain are obtained from India, flour from Australia and India, oxen from Madagascar, 600 and minor imports from South Africa and elsewhere. 70 per cent trade of the Island is with Great Britain and British Dominions. Being just within the tropics it has a hot climate, but, except in Port Louis and some of the low-lying districts, it is not unhealthy. The island is districts, it is not unhealthy subject to cyclonic disturbances, and a hurricane in 1892 was particularly severe; a cyclone lasted from March 5 to 7, 1930, and did considerable damage to sugar plantations and buildings. There is an excellent harbour on the N.W. coast, on which the capital, Port Loms, stands, and the annual trade of the island passes entirely through Port Louis. The shipping entered and cleared, in 1930, amounted to 1,009,212 tons In. 1230 there were 144 miles of railway (120 of 4 ft. 8)/2 m. gauge and 24 of 2 ft 6 in ), 59 post-offices, 49 telegraph offices and 10 telephone offices in the island, with 545 miles of telegraph, meluding block telegraph for the railway, and 150 miles of the part of the part of the part of the part of the part of the part of the part of the part of the part of the part of the part of the part of the part of the part of the part of the part of the part of the part of the part of the part of the part of the part of the part of the part of the part of the part of the part of the part of the part of the part of the part of the part of the part of the part of the part of the part of the part of the part of the part of the part of the part of the part of the part of the part of the part of the part of the part of the part of the part of the part of the part of the part of the part of the part of the part of the part of the part of the part of the part of the part of the part of the part of the part of the part of the part of the part of the part of the part of the part of the part of the part of the part of the part of the part of the part of the part of the part of the part of the part of the part of the part of the part of the part of the part of the part of the part of the part of the part of the part of the part of the part of the part of the part of the part of the part of the part of the part of the part of the part of the part of the part of the part of the part of the part of the part of the part of the part of the part of the part of the part of the part of the part of the part of the part of the part of the part of the part of the part of the part of the part of the part of the part of the part of the part of the part of the part of the part of the part of the part of the part of the part of the part of the part of the part of the part of the part of the part of the part of the part of the part of the part of the part of the part of the part of the part of the part of the part of the part of the part of the miles telephone wnes (Government).

The Government is administered by a Governor, alded by an Executive Council of four official members, and of such other persons in the service of the Government as the Governor, through instructions of the Secretary of State, may from time to time appoint, and a Legislative Council of 27 members, eight being ex-office, nine nominated by the Governor, and zo elected by a moderate franchise Port Louis has two members,

and each of the country districts one
The inhabitants of European descent are
mostly Roman Catholic. Education has two
branches—(1) Superior or Secondary Instruction, to which is attached the Government Royal College and the Associated Schools; (a) Primary Instruction, consisting of the Government schools and the grant-in-aid schools. The estimated expenditure on education for 1931-32 is Rs 1,424,674.

DEPENDENCIES OF MAURITIUS.

(1) RODRIGUES, 350 miles almost due east of Mauritius. Population (Ceusus 3921), 6,584. Area, 40 square miles. Cattle, beans, salt fish, and goats are the principal exports. The island is under the administration of a magistrate from Mauritins, who takes his orders from the Governor of Mauriting.

Magistrate, R. Brouard (acting) Rs. 9,000 to 12,000 (a) OTHER DEPENDENCIES Most of the scattered groups of coral islands belonging to Great Britam in the Indian Ocean are administered by the Mauritins Government, being visited periodically by two magistrates, whose duty it is to inquire into the condition of the labourers, and settle any disputes which may be referred to them The chief product is coco-unt oil. The most important is Diego Garcia (pop 1921, 445), one of the Chagos Archipelago, which hes on the one of the thanks Archipengo, which has on the ducet route from the Red Sea to Australia, and possesses a good harbon. The total population of the "Other Dependencies" (1921) is 1,365.

Transit from London to Mauritius, 30 to 35 days.

### NIGERIA.

The Colony and Protectorate of Nigeria includes the territories situated on the Bight of Benin, between Dahomey on the west and the Kamerius on the east The Protectorate (Head-quarters, Lagos) is in two main divisions, the Northern Provinces and the Southern Provinces, of which the northern group coincides with the former Protectorate of Northern Nigeria, and the southern group with the former Protectorate of Southern Nigeria. The area of the whole territory (including the mandated area of the Cameroons) is about 372,841 sq miles, and the population is 18,765,790.

By 0i der in Council of Nov 1922 (amended 1928)

By Order in Council or Nov 1924 (anichae) there is a Legislative Council for the Colony and the Protectorate The the Southern Provinces of the Protectorate Legislative Council consists of the Governor as President, 27 official members, 3 nonlinated official members, 3 elected members representing the numeral area of Lagos (Dr. C. C. Adenny Jones, Enc O Moore, and T A Doberty), x elected member representing Calabar (C. W. Clinton) and 14 nominated unofficial members. The Governor continues to legislate for the

Northern Provinces

The chief industry is agriculture, and crops consist of cotton, cocoa, ground-mits, kola-mits, maize, gninea-corn, millet, rice, coffee, yams, cassava, and tobacco The export trade relies mainly upon certain staple articles of great value, principally palm oil and kernels, ground outs, cocoa, cotton lint, and tin. The Udi coalfields cocoa, cotton lint, and the The Udr coaffields are of great extent and the coal is of excellent quality. A milway is in operation comprising (1) a Western line from Lagos to Kano (704) miles), crossing the Niger by bridge at Jehha, with branches from Minna to Baro (xxx miles), and from Zaria to the Banchi tin fields (108) (133 miles, light railway); and from Zaria to Kaura Namoda (137 miles), and from Ifo to Idogo (27 miles). An extension of the main line beyond Kano was opened as far as Ringim (45 miles) in 1929 and completed and opened to N'Gmri (a further 100 miles) in 1930. (a) an Eastern line (569 miles) from Port Harcourt to Kaduna on the Western Railway, crossing the Benue by train ferry at Makurdi with a branch line connecting from Kafanchan 18,000 junction (mile 4581/4) with the tinfields (Jos)

#### NYASALAND PROTECTORATE.

This country was proclaimed a British Protectorate on May 14, 1891. The Protectorate complies the western shore of Lake Nyasa and the country southwards nearly to the Zambesi. The population of the Protectorate (Dec. 31, 1930) was 1,396,848, including 1,995 Europeans and 1,599 Asiatics, and it has a total land area of 37,890 square miles. The principal exports are tobacco, cotton, chiles, coffee, ground-nuts, fibe, and tea. The cultivation and export of tobacco is considerable, ten cotton fibre and rubber are also

The principal exports are tolanceo, cotton, chillies, tofies, ground-nuts, fibre, and tea. The cultivation and export of tolsacco is considerable, tea, cotton, fibre and rubber are also exported in fair quantities. The principal imports are soft goods, provisions, and hardware. On Lake Nyasa there are three steamers. A nalway from Port Herald (the "inland port" of the Protectonate) to Blantyre (signales) is open for traffic. An extension from Port Herald to Chindro (the terminus of the Central Africa Railway) on the Zambesia Italiway, from Beira to Vimaça (on the southern bank of the Zambesia River) was opened in April, 1922; the terminus is opposite to Chindro, and the line (174 miles) thus establishes direct railway communication between Bennaud Blantyre. A further extension to Lake Nyasa is under construction. Main roads and "carrier" roads are open all over the Protectorate, the total mileage being 3,500. A road from Salisbury to Blantyre wa Tete (Portuguese E. Africa) is open for light cars and is freely used during the dry season.

Mails to and from England are despatched every week vm Cape Town and Befra. Between Berra and Enrope the means of communication are the Union-Castle Mail 8 S. Co., Messrs, Rennic's Line vn Natal, the British India Steam Navigation Co., and other lines. The Protectorate is connected by telegraph overland with the Cape vn Salishny The telegraph lines extend northwards as far as Tukuyu, in Tanganyka

ganyiga The chief towns are Blantyie (population about 600 Europeans and 7,000 natives), Limbe (near Blantyre), and Zomba, the headquarters of the

PALESTINE

Palestine, extending from the Mediterranean on W. to an eastern boundary formed by the Wady Arabah, Dead Sea, River Jordan and Sea of Therias, and from the Egyptian frontier on S. to the French Mandatory Sphere of the Great Tabapor or N. to budge in addition. Lebanon on N, includes, in addition, a large area E of the Jordan and S. of the Yarınuk.

Palestine is under British administration since the conquest of the country by the forces of General Alleuby in 2018. The Administration is conducted under a Mandate from the League of Nations which entered officially into force on Sept. 29, 292. The country consists of a W maritime low land, the mountain region of Judea (which forms the backbone of the district) and, on the E, the depression through which the Jordan wends its way from the Sea of Gallice (Tiberias) to the Dead Sea. The Dead Sea, x,sgs feet below the level of the Mediterranean, 1,332 loca become the level of the sacutterranean, is 46 miles long and has an average width of 8½ miles; it receives the waters of the Jordan and of six other rivers, and has no outlet, the surplus being carried off by evaporation. Its surplus being carried on by evaporation. We water is intensely sait and has a specific gravity one-sixth greater than water, with as per cent. of sait. (The Great Sait Lake of Vtal, U.S.A., is So miles long and 30 miles wide, at 4,318 feet above mean sea-level, and contains as per cent. of sait.) The area of l'alestine W. of the Jordan of salt.) The area of Palestine W. of the Jordan is about 9,000 square miles, with a population (census Oct. 23, 1922), of 757,182, of whom 590,890 are Muhaminadans, 73,044 Christians, 83,794 Jews, and 9,494 members of other faiths. The estimated population on July 1, 1929, was 876,064, not including Beduin, who are about 103,000 in number. The 1929 estimate includes 80,225 Christians, 572,443 Moslems, 154,330 Jews and 9,066 others. Since 1939 about 60,000 immigraits (mostly Jews) have settled in the country; in 1929 the Jewsh have settled in the country; in 1929 the Jewsh limingrants came principally from Poland (25 per cent.). Russia (20 per cent.) Rusmain (6 per cent.) In 1929, 2,713 Jews (956 men, 1,140 women and 671 children) entered Palestine as immigrants; in the same period, 5,072 emigrated from Palestine, the same period, 5,072 emigrated from Palestine, the net increase thus being 2,358.

Palestine is divided into a administrative districts, under District Commissioners, and the districts, under District Commissioners, and the Jerusalem Division under a Deputy District Commissioner. English, Analuc and Hebrew are the official languages of the country. The chief town, Jerusalem, had been in Moslem hands since x44, and under Turkish rule since x527, until it surrendered to General Allenby on Dec. 9, x927, to be entered the next day by British thoops. The city, which occupies so prominent a place in the affections of the Jewish, Christian and Muhammadan peoples, had a population in Oct. x932, of 6a, 378. The Church of the Holy Sepnichre at Jerusalem is visited annually by large lands of Christian pilgrinis, pinnerpally of the Orthodox and Contic. pilgrins, principally of the Orthodox and Coptic churches. The site of Solomon's Temple is occupied by the Dome of the Rock, sometimes erroneously called the Mosque of Omar, which contains a relic of Mahomet and the "Holy Rock," the sacrificial altar of Abraham conflict of claims, Jewish and Arab, as to rights at the Wailing Wall of the Haram al-Sharif at perusalem has provided opportunities for disorder, and the Government submitted proposals | Chief Justice, Sir Michael McDonnell, order, and the Government submitted proposals | Chief Secretary, Mark Aitchison Young, C.M.G. to the Council of the League of Nations for a 'Asst. Chief Secretary, E. Mills, O.B.E.

Commission to define and determine the rights and claims. In Jan., 1930, the Council appointed a Commission, as requested by the British Government. Bethichen, the scene of Christ's Nativity, is 5 miles 8. of Jerusalem. The Church of the Nativity, at the E and of the present village, is reputed to be the oldest Christian church in the second of the Christian of the Christian Church in the second of the Christian church is reputed to be the oldest Christian church in the control of the Christian church in the characteristics. church in existence. King David was also born in Bethlehem. Nazareth, about 25 miles S.W. of the Sea of Galilee, had a population of 7,424 in xgas. Other large towns are Jaffa (47,799), Tel-Aviv (40,000), Gaza (17,480), Acre (6,420), and Haifa (24,634). An archaeologual museum, constructed, equipped and endowed at the cost of Mr. John D. Rockefeller, Jr., is in course of erection at Jerusalem.

The railway system of Palestine consists of five sections: Rafa-Haifa, continuing southward to Kantana to join up with the railways of Egypt, passengers and freight being transported across the Suez Canal at Kantara; Haya-Acre-Samakh, continuing beyond Samakh to Damascus in the French mandated territory of Syria;
Jaffa-Ludda-Jerusalem; and Nablus-Afule-Jaffa-Lydda-Jerusatem; and Nablus-Afule-Tulkarem. The main junction of the Governnumeron. The main junction of the Government Railways is at Lydda, the general offices being at Haifa. In 1920 the kilometres & Ma'an-Muldawara section) was 1,194 kilometres, the freight handled amounting to 569,285 tons, and the passengers carried numbering 1,290,475. The gross railway revenue was £ P655,143 and the working expenses £ P655,143 and the working expenses

£P586,035
The chief ports are Jaffa, Haifa and Acre. Harbour construction at Haifa was begun in 1929 and is now in progress. In 1929, 2,663 vessels (1,975,833 tons) engaged in foreign trade entered the ports, and 2,672 (1,999,435 tons) cleared. There are branches of Barclay's Bank, Anglo-Palestine, Banco di Roma, and Imperial

Ottoman Bank in the main towns. Although economic conditions are still primi-Attorney contents of the property of the progress. The country is generally fertile, and cereals, wine, olives and various fruits are produced, while sheep and goats thrive in the lowlands, and in the mountains in time of drought. innus, and in the mountains in time of grought.

In 1928-29 there were 227 Government schools with 19,449 pupils, 162 Christian schools with 19,739 pupils. There are also training colleges for teachers, technical, trade and agricultural schools, and a Hebrew University (with faculties of Humantagenet Remark) which days where of Humanities and Science), which draws about half its students from Palestine and the remainder from Poland, Russia and Rumania.

#### RHODESIA.

The total area of Rhodesia is about 440,000 square nules, and the total population is nearly 2,500,000 (1931). The territory is named after Cecil Rhodes, the founder of the British South Africa Company, and extends from Lake Tan-ganyika and the Congo watershed in the north to the Limpopo River in the south.

#### SOUTHERN RHODESIA.

Southern Rhodesia is that part of the territory named after Cecil Rhodes lying sonth of the Zambesi River, the political neighbours being Northern Rhodesia and Portuguese East Africa on the S. The total area is 150,344 square miles, and the population (1932) 1, 105, 949 of whom 49,904 are Europeaus. The native population is 1,055,000, with 4,045 Assatics and other coloured persons, including those of mixed race. The total number of Europeau births in 1930 was 1,173 (a rate of 24's per 1,000) and of deaths was 1,173 (a race of mar a por 1,000) and of decade 443 (a mel 1,000), the marriages numbering 553 (ax'9 per 1,000) Responsible Government was instituted in Sonthern Rhodesia on Oct. 1, 1933. The Government is administered by a Governor appointed by the Crown, with an Executive responsible to the Legislature, which consists of a Legislative Assembly, but that body may pass a law constituting a Legislative Council, in addition.

The laws in force in the Cape Colony up to June 10, 1891, were adopted for Southern Rhodesia so far as they are applicable. Sub-sequent legislation has been by proclamation of the High Commissioner, by ordinances passed by the Legislative Council, and by Acts of the Legislature. Municipal self-government has been established in Salisbury, Bulawayo, Gwelo, Umtali, and Gatooma.

The main arteries of communication are the Rhodesia and the Mashonaland Railways, the total unleage of which at Scht 30, 1930, was 2,628 unles (including 1,348 miles operated within the boundaries of Southern Rhodesia). The former is a continuation of the line from Cape Town to Vrybnig, vid Kimberley, and was opened to Bulawayo in November, 1897, the distance from Cape Town being 1,36a miles. A line connecting Bulawayo with Salishiry (301 miles) was completed in Oct. 1902. From Salishny the Mashonaland Railway runs eastwards to Umtah and is continued by the Beira Railway Companies to the port of Beira (Portuguese), a total distance of 374 miles The main northern extension of the railway was constructed from Bulawayo. It taps the Wankie coalfields and crosses the Zambesi at the Victoria Falls (282 miles). Branch hoes primarily constructed in the interests of established mines constructed in the interests of established mines are:—Sahslury-Sinoia (83 miles), Mt. Hampden Junction-Shamva (73 miles), Gwelo-Selukwe (24 miles), Bulawayo-West Nicholson (24 miles), Gwelo-Univuma-Victoria (123 miles), and Somabula-Shabani (63 miles). There is also a short branch line, Bulawayo-Jatopos. To provide facilities for the transport of passengers and goods in areas in process of development not directly served by existing railways, a system of road motor services has been organised. In Sentember 1923, Junes coverner 1823, miles September, 1931, routes covering 1,581 miles were in operation.

Southern Rhodesia is rich in mineral deposits, and it abounds in traces of the ancient gold-workers. The first regular crushing returns began in September, 1898, and the gold produced to December 31, 1938, was of the value of 275,098,148. The output for the year ended December 22, 1939 was only the year ended December 31, 1930, was valued at £2,316,649. Silver, copper, coal, diamonds, lead, chrome iron, asbestos, mica, platinum, corundum, and other minerals have also been produced in considerable quantities. Though the climate is sub-tropical, the average altitude makes it well suited for European occupation, and it pos-sesses all the essential characteristics and facilities necessary for successful agriculture and cattle raising, and for the cultivation of European fruit trees, cereals, and vegetables, in addition to tobacco, cotton, and the indigenous products of the country. The staple crop is maize, and tobacco, cotton and citrus fruits are largely exported. The total area under cultivation in 1930 was 418,000 acres (manz 317,700, tobacco 20,500, cotton 6,200). The export of citrus fruit in 1930 was 105,000 boxes. Cattle (4,468,400 on Dec. 31, 1930) thrive well, and the annual shows at Bulawayo and Salisbury are regarded as among the premier shows of beer cattle in South Africa. The exports of cattle in 1932 were 61,300 head. Daily products sold include butter 1,768,700 lb , milk 1,009,000 gallons, cheese 163,000 lb., and eggs 726,000 dozen. In addition to the main industries of mining and farming there are creameries, cotton ginneries, bacon factories, oil, soap and caudle factories, cement and lime works, and many other undertakings. Land is cheap and may be had on favourable terms. Considerable efforts have been made by the Government during recent been made by the Government during recent years to merease the number of new settlers During the years 1925-29 settlers and dependents numbered 947 (396 under Empire settlers scheme, and 545 from High Commissioner's Office, etc.) In addition, a further 1,004 men and youths obtained situations on the land in 1925-27. This scheme is (1931) temporarily in abeyance.

Complete courses of primary and secondary education up to the standard of matriculation of the South African Universities are provided in the Government schools. For European children there are 87 Government and Government-anded schools (r vocational, rs secondary and 74 primary). Children in rural areas, where the population is too scanty for a school, are provided for by Government grants to tutors or governesses. The total number of European children in all types of schools at the end of 1930 was 8,586. There are seven schools for children of mixed acc, with 6xz pupils, and native education conducted by mission agencies with Government and is provided in 1,446 schools, with 108,752 pupils. Grants in aid of native education 1930-31 amounted to £49,573, the total educational (other than native) expenditure being £288,386 in the calendar

Salisbury, the capital, is sutnated on the Mashonaland platean, altitude 4,880 ft (total population, census 1931, 28,800, including 9,721 whites). Bullaway, of the largest town in Matabeleland, altitude 4,460 ft (total population of 31,000, including 21,727 whites) other centres are Unital, Gwelo, Gatoonin, Que Que, Wankie, Fort Victoria, Selukwe, and Hartley.

#### NORTHERN RHODESIA.

Northern Rhodesia hes to the North of the Zambezi, its political neighbours being Tangan-yika and the Belgiau Congo on the north, Nyasaland and Portuguese East Africa on the east, Southern Rhodesia and South-West Africa on the south, and Portuguese West Africa on the west. The country compnises an area of 187,995 square miles, and with the exception of the Luangwa.

Zambezi and Kafue Valleys the altitude in most places exceeds 4,000 feet. The permanent Enropean population in May, 1931, was computed at 13,847; the native population was estimated (Dec. 21, 1930) at 1,331,330. Much of the country is suitable for farming, and contains large areas of good arable and grazing land. Over 2,500,000 acres of land are under settlement by white tarmers. The chief crop grown is maize. Other rrops are tobacco, coffee, wheat, oil seeds, and carnes. Stock raising is carried on by many farmers. The native-owned eatth, or the many farmers. tory is estimated at 362,768. and European-owned 103,201. Copper, zare, vanadrum, lead, gold, mica and coal have been discovered, and scientific prospecting is being carried on over large areas. The copper deposits have attracted much capital, the Roan Antelope mine having commenced ontput, while others are expected to follow. The copper mines of Northern Rhodesia appear likely to produce a large proportion of the world's supply. Many species of game are to be found, and good sport at a moderate cost is available for the log-game hunter, but the areas now open for hunting are somewhat restricted.

The trunk line of the Rhodesis Railway system traverses Northern Rhodesia from Livingstone to the Belgian Congo border. The Zambezi, Kafue, Chambesi and other rivers are navigable for a considerable portion of their comses. There are 44 post offices, z8 of which are money order offices. A telegraph line exists alongside the railway line throughout its whole length in the territory; other lines connect Abercorn with the Nyasaland and Tanganyika systems and also Fort Jameson with Nyasaland. The construction of 650 miles of new pole route was completed in 1931. A central wireless station (long and short waves) has been erected. at Broken Hill, and large district short-wave stations, all equipped for telegraph and telephone communication, have been installed at Livingstone, Mongu, Abercorn, Fot Jameson and Mpika. The administration of the territory is in the hands of a Governor appointed by the Crown, assisted by an Executive Council of five official members. There is a Legislative Council of 16 members, with a majority of official members. The seat of Government is at Livingstone, near the Victoria Falls, on the Zambezi. The country is divided into o Provinces for fiscal and administrative purposes.
The most important centres are Livingstone,
Broken Hill, Kort Jameson, Lusaka, Maabuka,
Abercorn, Kasama, Fott Roselwry, Ndola and Mongu-Loalui.

#### ST. HELENA.

probably the best known of all the solitary islands in the world, is situated in the South Atlantic Ocean, 955 miles S. of the Equator, 766 S.E. of Ascension, 1,140 from the nearest point of the African Continent, 1,800 from the coast of S. America and 4,477 from Southampton, in 15' 55' S. lat. and 5' 42' W. long. It is 10½ miles long, 6½ lat. and 5°4s' W. long. It is ro½ miles long, 6½ broad, and encloses an area of 47 square miles, with a population (Census 22x) of 3,747. St. Helena is of volcanic origin, and consists of numerous rugged mountains, the highest rising to 2,700 feet, interspersed with picturesque ravines. Although within the tropies, the south-east trades" keep the temperature mild and equable. St. Helena was discovered by the Portuguese navigator Juan de Nova Castella, on May 27, 1503 (St. Helena's Day), and remained unknown to other European rations until 1268. It remained uninhabited until the Dutch colonised remained uninhabited until the Dutch colonised remained unimabled unit are zero coloniary it care, rêg. The Ruglish East India Company seized it in 1851; but it was retaken by the Dutch in 1872. In 1873 it was again taken from the Dutch and was held by the Company, who the Dutch and was held by the Company, who had obtained a charter for its possession from Charles II., until 1834 (with the exception of the period 2815 to 2824, during which the British Government held it as a residence for the Emperor Napoleou, who died there May 5, 2821, when it was ceded by them to the Crown. It was formerly an important station on the route to India, but its prosperity decreased after the cutting of the Suez Canal A phormium (flax fibre) and lace-making industry has been established. St. James's Bay, on the north-west of the island, possesses a good anchorage.

Ascension (Resident Magistrate, E. A. Willmott), an isolated island in the South mott), an isolated island in the Souta Atlantic (3,447 miles from Plymouth, 760 from 8t Helona, and 900 from Cape Palmas on the African coast), is of volcanic origin, the peak rising to the height of a,830 feet, situated 70 SS'SS''N, lat. and 14° SS' S' W. long. It is said to have been discovered by a Portuguese named João de Nova Gallego, on Ascension Day, 1501, and two years later was visited by Alphonse d'Albuqueque, who gave the island its present hame. Its extreme length is 7½ miles, and extreme breadth 6 miles, with an area of about 38 square miles, and, being situated in the heart of the S E. trade winds, its climate is dry and salubrious up to x,800 feet, but above that height to its limit it is damp and forgy. It remained uninhabited till 1815, when the English took possession of it; in 1931 the population was about 139. The island was administered by the Board of Admiralty until Oct. 27, 1923, when by Royal Letters Patent it became a Dependency of St. Helena and was transferred to the Colonial Office. Georgetown, the capital, is situated in a small bay on the N.W. coast. Ascension is visited by the sea-turtle from January to May, which lay their eggs in the sand; the sooty tern, or "wide-awake," use the island as a nestingplace about every eighth month.

The government of St Helena is administered by a Governor, with the aid of an Executive Council of 4 members, the Governor alone making all ordinances.

Sarawak is a state on the north-west coast of the island of Borneo, with a seaboard of about 500 miles, an area of about 50,000 square miles, and a population of about 475,000, composed of various races. The territory of the Raja of Sarawak extends from Cape Data in the south to the Lawas District, where it touches the boundary of British North Borneo. The southern boundary is formed by three ranges, the Serang, Kelingkang, and Batang-Lupar mountains; the eastern boundary is a broken range tial oils, soap, and guano Aldabra, one of the

of mountains with peaks rising to 10,000 feet of mountains with pears rising to 10,000 too, the principal rivers are the Rejang (navigable for about 160 miles), the Baram (navigable for about 100 miles), the Baram (navigable for about 100 miles), the Baram (navigable Limbang Kuching, the capital, stands on a small river (the Sarawak) which is navigable for the sarawak of Kuching cas miles). The from its month to Kuching (23 miles). The government consists of a hereditary sovereign and a Supreme Conneil of 9 (4 Europeans and 5 Malay magistrates), and a General Conneil of 50, composed of European and Malay officials and native thiefs, meeting every 3 years. The civil service is composed of English officials to the number of 120, appointed by the sovereign. The government of Narawak was obtained in 1845. from the Sultan of Bruner by the late Sir James Brooke, who became well known as Rajnh Brooke of Samwak Other concessions have been made in 1861, 1882, 1884, and 1890, when the Limburg River was obtained. The Lawas River was added in 1905 In 1864 Great Britain recognized Sarawak as an independent state, and under an agreement of x888 the State has been placed under British protection. country produces sago, gutta - percha, india-rubber, bees-wax, illipe nuts, birds'-nests, oil, gold, silver, antimony, quicksilver, tobacco, rice, rattans, coal, gambier, and pepper The large petroleum field at Miri and Bakong, in the Baram district, is now a valuable asset; oil exports (1928) 598,389 tons, (1929), 734,454 tons; (1020) 645,200 tons

CHIEF TOWN, Kuching. Population (1931), 30,000 Distance from London, 8,700 miles; transit, 25 to 30 days. There are 20 wireless stations, in communication with Singapore. Steamer leaves Singapore for Kuching and Kuching for Singapore every Saturday. There is also direct communication with Sibu and Miri.

#### SEYCHELLES.

The Seychelles Islands, in the Indian Ocean, which number altogether 90, were occupied by the French about 1742, captured by a British ship in 1794, and were finally assigned to Great Britain in 1810. By letters patent of Sept 1903 they were erected into a separate colony. The principal erected into a separate colon. The principal islands of the group are Mahé, Praslin, Silhouette, Currense, and La Digue, and the total area of the islands, with dependencies, is estimated at 156 square innes, of which Mahé occupies nearly 56 square miles; the most important of the dependencies are the Amirantes, Farquhar Islds., Cottry, Aslove and the Aldabra Group. The population was estimated (Dec. 31, 4999) at 7, 588. At the census of 1921 the population of Minić was 19 426, Praslin 1,999, La Digue, 1,293, other islands 1,795. Victoria, the capital, on the N.E. side of Mahé, has an excellent harbour, and the lighthouses in the vicinity have been fitted up with modern automatic lights. Although only 4' S. of the Equator, the islands are healthy, the death-rate in 7000 being 16' 12 per 1,000. There are 27 Roman Catholic and Church of England primary schools; there are also a secondary schools.

The principal exports are copra, vanilla, coconuts, coconutoil, tortoise-shell, cinnamon, essendependencies of the Scychelles, and about 680 miles from Mahé, is famous for the gigantic land tortoises, whilst the unique double coco-unt, Coco de Mer, is found in Mahé, and, in larger quantities, in Prashn, where there is a famous valley The Governor is assisted by an Executive Council of 3 members (a ex-officio and x nommated), and by a Legislative Council of 3 official and 3 unofficial members

SIERRA 1	FONE	}	4
Tanana .	TEATT.		

The peninsula of Sierra Leone, situated on the West Coast of Africa, was ceded to Great Britain in 1787 by the native chiefs for the purpose of being used as an asylum for the many destitute negroes then in England At a somewhat later date the Colony was used as a settlement for Africans from North America and the West Indies, and great numbers of Africans rescued from slave ships have from time to time been liberated and settled there. The Colony has a coast-line of 210 unles, with an estimated area of 4,000 square miles. In 1921 its population was 61 \$4,000 square miles. In 1921 its population was 65,103, of whom 1,161 were resident Europeans. Of the rest, more than half are the descendants of liberated Africans, while the remainder belong to the neighbouring tribes. A babel of tongues is thus to be heard in the streets of Freetown. In 1896 a Protectorate was declared over the territory adjoining the Colony to the northward and eastward. The extreme depth of the Protectorate from north to south is about 210 miles, lying between 70 and 100 N. lat., and are miles, lying between y' and ro' N. lat., and the extreme breadth from east to west is roo miles, between ro' 40' and r3' ar' of W. long Its estimated area is 27,000 sq. miles, and its population about 1.265.748. For administrative purposes it is divided into a Provinces, under Provincial Commissioners, assisted by a Senior District Commissioners, ro District Commissioners and ra Assistant District Commissioners and ra District Commissioners. The principal peoples are the Limbas and Korankos in the north, the Temnes in the centre, and the Meudis in the south.

The principal exports are palm kernels, kola nuts, palm oil, and ginger: piassava, hides, and rice are also exported. The value of the palm kernels exported in 1930 leached £664,591. The chief imports are cotton goods, coal, apparel, hardware, provisions, and tobacco. Freetown, the capital, possesses the finest and

nost important harbour in West Africa.

A railway runs inland from Kleetown to
Pendembu, a distance of 227% miles, and a
branch line 83 miles in longth extends in a
north-easterly direction from Banya to Makem. Motor roads are now being opened up in the Colony and Protectorate, in the Colony connecting the various towns and villages with the port, and in the Protectorate as feeder roads to the railway. There are (1930) 1,912 miles of combined telegraph and telephone service.

Sierra Leone is a Crown Colony, possessing a Legislative Council partly elected and partly nominated by the Crown, with full power to legislate for the Protectorate as well as for the Colony. The Governor is advised by an Execu-

tive Council.	•

#### SOMALILAND

(The Somaliland Protectorate)

Somaliland occupies the "North-Eastern Hom" of the African continent, jutting out into the Indian Ocean along the south of the Gulf of Aden, and is divided between Great Britain, France and Italy, while the interior is subject to Abyssinia. The British Protectorate, declared in 1884, contains about 68,000 st, miles, its boundaries being defined by treaties with Abyssima, Fance and Italy; the northern coast as far as 49° E. and the 8th parallel of N. latitude are the limits on the north and south. The population, mainly consisting of Somalis, a

 Exclusive of Railway Rev £190,576; Exp. £263,005, in 1930, and Rev. £33,512; Exp. £285,843 in 1929). † Exclusive of allowances.

Muhammadan people, is estimated at 344,700. The Protectorate garrison is now confined to a Camel Corps, 400 strong, and a Police force of 550, the Dervish power having been finally broken in 1500. The chief products of British Somaliland are cattle, sheep, goats, hides, skins and gum. There is wireless communication with Aden. The Protectorate was transferred to the administration of the Colonial Office on April z,

#### SOUTH AFRICAN HIGH COMMISSION.

High Commissioner for South Africa, Ilis Excellency Sir H. J. Stanley, G C M.G. ..... Private Secretary & A D C., Capt. L. Holbech, D.S O., M.C. Imperial Secretary and Accountant, (vacant) ..... Asst. Imperial Secretary, Shirley Eales, 

The Office of High Commissioner in and for South Africa was created by Letters Patcut in 1898 In 1879 a second High Commissioner was appointed, to whom was assigned South-Eastern Africa, including Zululand and Amatongaland; arrica, incinding zaturand and Anacongaland; but this arrangement ceased in 1881, when a Special Commissioner for Zulu aftars was appointed, who was also Governor of Natal (which now includes Zululand and Amatongaland). The High Commissioner for South Africa, who wades the Commissioner for South Africa, who, under the Commission of 1889, was the officer for the time being administering the Government of the Cape, now represents the Crown in all matters occurring in South Africa

beyond the limits of the Union and of Southern and Northern Rhodesia. The High Commisand Aorthern Khodesia. The High Commis-sioner is Governor of Basutoland, and super-vises the affairs of the Bechmanaland Protec-torate and of Swaziland. Prior to October x, xpa3, Southern Rhodesia was administered by the British South Africa Company, and the High Commissioner exercised certain powers of control under the Southern Rhodesia Order in Council 1898. Upon the establishment of responsible government the Order in Council x808 lapsed, but under the Sonthern Rhodesia Constitution Letters Patent certain of the High Commissioner's previous powers and functions in regard to native administration were reserved to him and the Southern Rhodesia Order n Council, 1920, whereby the Native Reserves were vested in the High Commissioner, was continued in full force and effect. On April 1, 1924, the functions which the High Commissioner had exercised in Northern Rhodesia during the British South Africa Company's administration of that Territory were, with the assumption of the administration by the Crown, transferred to the Governor of Northern Rhodesia

The Office of High Commissioner, which was formerly held by the Governor of Cape Colony, was, by a Commission dated October 6, 1900, vested in Lord Milner, and by a similar Commission, dated March 15, 1905, in Lord Selborne. During the years 1910-1930 the Office was vested, by separate Commission, in the successive Governors-General of the Umon of South Africa. This airangement ceased upon the termination of the period of office of Major-General the Earl of Athlone, Ka Sir Heibert Stanley, a.c. Ma., was then appointed by llis Majesty to be High Commissioner for South Africa, and he holds that office concurrently with the newly created office of High Commissioner in the Union of South Africa for His Majesty's Govern-ment in the United Kingdom

#### BASUTOLAND.

# (The Territory of Basutoland.)

Bashtoland is an inland Native Territory of South Africa, bounded North and West by Orango Free State, East by Natal, and South by Cape Colony, with an area of 12,716 square miles. The

Census of 1921 showed 495,937 natives and 1,663 whites, 1,669 coloured and 172 Asiatics. The territory is well watered, and enjoys a good climate. It is one of the finest grain producing districts in South Africa, and the abundant grass enables the Basuto to rear immense herds of cattle, sheep and goats, the mohair produced being of excellent quality. The Maluti Mountains, forming a part of the great Drakensberg chain, occupy most of the country, which is clevated, broken, and rugged Basutoland has been called "The Switzerland of South Africa" and contains amongst its natural wonders the Maletsunyane Falls (670 feet)

The Territory is governed by a Resident Commissioner under the direction of the High Commissioner for South Africa, the latter possessing the legislative authority which is exercised by proclamation. The chiefs adjudicate on cases between natives, with a right of appeal to the magistrates' courts, where all cases between Europeans and natives are brought. The final court of appeal in the Territory is the Resident Commissioner's Court, appeal from which lies

direct to the Privy Council. The revenue is derived from Customs, native tax, income tax on Europeans, post-office, and licences. Telegraph offices have been opened at Butha Buthe, Leribe, omices have been opened at Butha Buthe, Leribe, Peka, Teyateyaneng, Maseru, Morija, Mafeteng, Mohale's Hoek, Quthing and Qacha's Nek. There are 597 native schools, with an average attendance (1920) of 37,150, a large proportion being in the schools of the French Protestant. Hission; there are also 9 with schools, The education vote for 1930-31 was £55,405. The chief articles of export are wool and mohair, cattle and hides, the imports being chiefly blankets, groceries and hardware.

### BECHUANALAND.

(The Bechnianaland Protectorate.)

The Bechnanaland Protectorate is a country of British South Africa, in the centre of the vast tableland stretching north to the Zambesi.

The Protectorate is bounded on the south and east by the Cape and Transvaal Provinces of the Union, on the north and north-east by Southern Rhodesia, the Zambesi and Chobe Linyanti Rivers, and on the west by South-West Africa It is about 500 miles long and 550 miles broad, with a total area of about ays, oso square miles; the Caprivi Zipfel was attached to the Protectorate for administrative purposes by Proclamation (1922), but was retransferred to S. W. Africa, Sept. 1, 1929. The population at the Census of May, 1921, was 1825,983, of whom 1,743 were Whites, 52 Indians, 2,003 (coloured and 250,28) Natives.

The climate is healthy during part of the year.

Malarial fover is prevalent during February, March, and April, but with ordinary pre-

melons are sown, and when the rainfall is adequate crops are reaped. Cattle thrive, and adequate crops are reaped. Cattle thrive, and atumbered 425,244 at the Census of 1921. Much of the country is thick bush. The High Commissioner for South Africa has the power of making laws by preciamation for the Protectorate, where he is represented by a Resident Commissioner. The population is almost entirely a native one, the principal triles being those of Tshekedi, Regent during the minority of Seretse (Bamangwato), of Molen Pilane (Bakçatla), of Kçari Sechele (Bakwena), of Bathoen (Bangwakotsi). of Seboko Mokgosi Bathoen (Bangwaketsi), of Seboko Mokgosi (Bamalete), and of Mathibe (Batawana).

The railway from Kimberley to Vryburg and Mafeking traverses the Protectorate on its way to Rhodesia. There is a telegraph line from Cape Province through from Mafeking, vid Gaberones and Francistown, to Bulawayo and Salisbury. The chief European centres are Lohatsi, Gaberones, Francistown, and Serowe, whither the late Chief (Khama) and all his people moved in zoor from Palapye. The headquarters of the Protectorate

#### SWAZILAND

(The Swaziland Protectorate.)

Swaziland (called by the natives Kwa Nawane) lies between the Drakensberg and Lebombo Mountains in British South Africa. The Transvaal Province forms a boundary on the south, west and north, the eastern boundary being Zulnland (Province of Natal) and Portuguese East Africa The total area is 6,705 square miles, and the population (1921) 112,951, of whom 3,205 are whites, the remainder being Ama-Swazi Bantus (or Swazis). Estimated European population (1932) 3,550. Swaziland is divisible into three longitudinal regions: the mountainous regions of the west, with an approximate altitude exceeding 4,000 feet; the Middle Veld, about 2,000 feet lower; and the Low Veld, bounded on the east by the Lebombo Mountains, with an average altitude not exceeding 1,000 feet. The country is well watered and healthy, the anunal rainfall averaging 55 inches, the mean temperature being 62° Fahr. (30°-90°). The soil is generally fertile, particularly so in the Low and Middle Veld. The whole of the Territory forms excel-lent graying for extile and extile-ranching on cautions is not seriously detrimental to health. Fartier, particularly so in the Low and Middle The country is essentially pastoral, although Veld. The whole of the Territory forms excel-Kamer corn, mealies, beans, pumpkins and lent grazing for cattle, and cattle-ranching on

a large scale has been commenced by several companies. There were about 334,000 head of cattle in the Territory at the end of 1930. In the winter season sheep are brought to Swaziland for grazing from the high table-lands of the Eastern Transvasi.

The agricultural products are, maize (the staple product), tobacco, millet, ground-nuts, beans, pumpkins, and sweet potatoes. Cotton growing from jassid resistant seed is becoming important. The country possesses considerable nuneral wealth including gold, tin, coal, copper and asbestos. During the year ended Dec. 31, 1930, 161 tons of cassiterite tin, valued at £23,414 were exported.

Mbabane, the headquarters of the Administration, is situated on the lulls at an altitude of 4,000 feet. There are townships in the districts at Bremersdorp, Hlatikuln, Stegl and Goedgegun. There are schools for Europeans at

various centres.

There is a daily South African Railway motor omnibus service between Breyten and Mbabane (89 miles); Bremersdorp and Stepf (43 miles). Piet Retief and Hatikulu (57 miles), and Goodgegun to Hilut (33 miles). There are post offices, and telegraph and telephone offices at all the chief centres

# STRAITS SETTLEMENTS.

# (See MALAYA.)

# THE SUDAN

The Sudan extends from the southern boundary of Egypt, 22° N. lat., to the northern boundary of Uganda, 3° 36′ N. lat., and reaches from the French Sahara about 12° 20′ E (at 22° N.) to the north-west boundary of Eritica (Italian) in 36° 30′ E (at 18° N.). The greatest length from north to south is approximately seem length and from east to west *zeem length sud from ast to west *zeem length sud from ast to west *zeem length sud from sext to west *zeem length sud from sext to west *zeem length sud from sext to west *zeem length sud from sext to west *zeem length sud from sext to west *zeem length sud from sext to west *zeem length sud from sext to west *zeem length sud from sext to west *zeem length sud from sext to west *zeem length sud from sext to west *zeem length sud from sext to west *zeem length sud from sext to west *zeem length sud from sext to west *zeem length sud from sext to west *zeem length sud from sext to west *zeem length sud from sext to west *zeem length sud from sext to west *zeem length sud from sext to west *zeem length sud from sext to west *zeem length sud from sext to west *zeem length sud from sext to west *zeem length sext to west *zeem length sext to west *zeem length sext to west *zeem length sext to west *zeem length sext to west *zeem length sext to west *zeem length sext to west *zeem length sext to west *zeem length sext to west *zeem length sext to west *zeem length sext to west *zeem length sext to west *zeem length sext to west *zeem length sext to west *zeem length sext to west *zeem length sext to west *zeem length sext to west *zeem length sext to west *zeem length sext to west *zeem length sext to west *zeem length sext to west *zeem length sext to west *zeem length sext to west *zeem length sext to west *zeem length sext to west *zeem length sext to west *zeem length sext to west *zeem length sext to west *zeem length sext to west *zeem length sext to west *zeem length sext to west *zeem length sext to west *zeem length sext to west *zeem length sext to west *zeem lengt risco miles, and from east to west risco miles. The northern boundary is the sand parallel of North latitude; on the east lie the Red Sca. Eritrea and Abyssima, on the south lie the British Protectorate of Uganda and the Belgian Congo; and on the west French Equatorial Africa. The total area is about 1,008,100 sq. miles, with a population of about 5,600,000, partly Narabs, partly Negroes, and partly Nubian of mixed Arab-Negro blood, with a small foreign element, including some 3,000 Europeans. The Arabs and Nubians are all Muhammadans, as are some of the Negroes, but the latter are generally some of the regioes, but one latter are generally pagains. The Gambella enclare (within the boundaries of Abyssinia) is leased from the Abyssinian Government as a trading post. The Me onters at Nimule, in Mongalia Province, as the Bahr el Jebel, and leaves the Sudan at Wadi Halfa From the Athara configuration to the Madragraphen the sizes here.

reckoned at 2,400 miles, giving a total waterway of 4,000 miles. Between Khartoum and Wadi Halfa occur five of the six Cataracts, the re-maining (first) cataract being in Egypt at

Government.—The Sudan is administered by a Governor-General, aided, since 1910, by a Council nominated from an onest the Officials of the Government. All Ordinances and Laws are made by the Governor-General in Council. No duties by the Governor-General in Council. No duties may be levied on imports from Egypt, and duties on imports out the Red Sea ports may not exceed those levied in Exypt. The Sudan is divided into 14 provinces (Mudiras) under governors (Mudira) Each province is subdivided into districts with one for more) District Commissioners in charge of each Native administrative officials are employed under the District Commissioners (vvd Justice is administered by a (Thef Justice and four puisne judges, one of whom is also Registiar-General of Lands. There are also Province and District Judges who are usually the Governors and District Commissioners of Provinces, but there are also District Judges who are professional lawyers in some of the more important centres. Appeals he from the District Judges to the Province Judges or the High Court, and from the Province Judges and the High Court to the Court of Appeal, which consists of three judges of the High Court The system of the law administered is "justice, equity and good conscience" in all cases in which there is no special enactment. There is no general code of civil and commercial law such as is in force in Egypt and many Continental countries. The religious law of Islam is administered by the Mohammedan Law Courts in matters of inheritance, marriage, divorce, and family relations generally amongst the Moslem population. There are District and Province Courts under District and Province Kadıs, and a High (Mahkama) Court at Khartonm presided over by the Grand Kadi. Criminal Justice is administered chiefly by the Governors and District Commissioners and Mamours of Provinces and Districts, all of whom are magistrates. The Judges of the High Court and District Judges also have criminal jurisdiction as magistrates. The more serious offences are tried by courts consisting of three magistrates, and many native notables have been made magnitrates for the purpose of sitting as members of such courts The decisions of such courts require confirmation by the Governor of the Province or the Governor-General, who exercise powers similar to those of confirming officers in Comts Martial, and to them also appeals lie Comts of Sheiks or Chiefs in all parts of the country have varying powers of limited jurisdiction in accordance with native customs. The Sudan is gairisoned by native troops, forming the Sudan Defence Force. small garrison of British troops is quartered at Khartoum. The Police are locally enlisted and are under Provincial administration.

Education.-In addition to khalwas and kuttabs (vernacular schools) there are zo primary boundaries of Abyssinian (Sovernment as a trading post. Well as Arabic, attended by about 1,300 purils; a The Nile onters at Nimule, in Mongalia secondary school at Khartoum (Gordon College); Province, as the Bahr el Jebel, and leaves the Sudan at Wadi Halfa From the Athara continuence to the Mediterranean the river has a fluence to the Mediterranean the river has a Omdurman, and Athara. There are also ar elementary vernacular schools for girls, and a sources to the confluence its length may be Training College for girls' teachers. schools, where instruction is given in English as

Production.—The principal grain crop is dura (great millet), which is the staple food of the people in the Sudan, and is also used as cattle and poultry food elsewhere. Egyptian cotton has been successfully established, and increasing quantities are being produced annually. The Geziva Irrigation Scheme at present (1930) enables an area of 630,000 acros to be cultivated between the Blue and White Niles, one-third of which is under cotton. The necessary water is stored by the Sennar Dam on the Blue Nile, about 170 miles south of Khartonm. Cotton cultivation in the irrigated area is Cotton cultivation in the irrigated area is managed by a syndicate, and is one of the largest cotton-growing schemes in the world (198,000 feddans in 1930). The Sudan is the chief source of the world's supply of grim arabic. Natural salt fields on the Red Sea coast near Port Sudan supply the whole needs of the country and maintain an export trade with Abyssinia. Work has been commenced on the country and the further exposure of salt. a new scheme for the further expansion of salt production on a large scale in this area. Other products include sesame, senna leaves and pods, ground-unts, dates, indes and skins, and gold.

Trade.—The total value of trade in 1930 amounted to £E11,423,423. The principal export is cotton, the value of which, together with cotton-seed, amounted to £ E3,256,625, or 65 7per cent. of the value of the total exports. Gnm arable was exported to the value of £F980,157. Other exports are 'sesame, cattle, fudes and skins, dates, ground-intes, dom-ints, durer, salt, seins, ivory and gold.

Communications.—The railways and steamers

throughout the country are administered by a Government department. During the past few years nearly 500 iniles of new railways have been built, while other transport has been revolutionised by the opening up of a net-work of motor roads spreading all over the country during the dry season. In 1930 there were 1,995 miles of railways open for traffic. The gauge is 3 ft. 6 m. Since the opening of the eastern railway the Red Sea port of Port Sudan receives much of the trade which formerly passed north-A line from Sennar Town, crossing the Sennar Dam, was completed during 1929, and affords an alternative route (498 miles) for produce of the Southern provinces to Haija Junetion, 126 miles W. of Port Sudan There are over .coc miles of the various reaches of the river Nile and its tributaries under navigation by a fleet of shallow draught steamers and barges. Three of these routes are only practicable in the flood season, June to September. the southern provinces motor car services are maintained in the dry season (December to March) between Juba and Nairobi (800 miles), Juba and Kampala (600 miles), Juba and Kampala (600 miles), Juba to Kampala and by an all-weather route, Juba to Aba (142 miles), operated by the Sudan Government and also by private enterprise. In the interior of the country there are other dry season motor roads. All the principal towns season motor roads. All the pilicipal towns are in direct telegraphic communication with Khartoum, the total mileage of tolegraph lines being 5,737 miles in 1938. There are 80 stationary and x6 travelling Post and Telegraph offices, and x0 wireless telegraphy offices.

Finance.—The revenue is derived mainly from land tax, animal tax, royalties on gum and ivory, customs and railways, posts, telegraphs

and steamboat services.

CAPITAL, KHARTOUM, at the junction of the White and Blue Niles. The town contains a large mosque for Mohammedans, a cathedral, large mosque for alonammedans, a cathedral, and the Gordon College, with extensive Government buildings Population 42,240 Opposite Khartoum, on the Blue Nile, is Khartoum North (102,512), and on the White Nile is Omdurman (102,983), the former Mahdist capital.

#### TANGANYIKA TERRITORY.

TANGANYIKA TERRITORY has a coast-line of about 500 miles and an estimated area of 373,500 square miles The Sultan of Zanzibar's rights over the narrow strip of coast territory were acquired by Germany in 1890 for a payment of 4,000,000 marks. The coast-line extends from the month marks. The coast-line extends from the mouth of the Umba to the mouth of the Rovuma River

of the Umba to the mouth of the Rovima River. The native population consists mostly of tribes of mixed Bantu race, and was enumerated for the whole area (April, 1921) at 4,107,000, the coloured population (other than native) being 14,991. In 1930, the native population of Tanganyika Territory was estimated at 4,822,244. The total white population is about 6,870. According to Genman law every native born after 1905 is free, but a unit seidom was continued under German unit. Legislation for the abolition of the status of slavery was enacted the abolition of the status of slavery was enacted

on June 9, 1922.

Considerable progress continues to be made with native education. In 1930 there were 94 Government schools, with 5,606 children in average attendance, and 3.044 Mission schools with average attendance of 97,745 pupils. The amount allotted to education in 1931-32 is £124,893. Two schools are maintained by the Government for the education of European children, one a day school at Dar-es-Salaam, and the other a small boarding school at Engare

parts of the Territory are unassisted. Government publishes a monthly journal printed m Swahili to disseminate news and useful information among the vernacular speaking population.

The total area under forests is about 4,x20 square miles, of which 3,896 square miles are meladed in the Government Forest Reserves, and about 70 square nules are privately owned. Non-native plantations are mainly for the production of sisal fibre and coffee, with small areas under tea and tobacco, minor crops being cotton, maire and coconuts. Native production consists chiefly of coffee, hannas, cotton, ground-nuts, rice, millet, maize, cassava and pulses.

In 1930 there were 5.170.162 cattle, 2,262.103 sheep and 3,259,443 goats in the Territory. The value of minerals produced in 1930 was—damonds £27,211, gold £47,013, salt £36,700, mica £6,182 and thi £852. Companies desuling to investigate the mineral resources can obtain information and assistance from the Mines Department, Dar-es-Salaam.

The chief exports are sisal, cotton, coffee, ground-muts, hides, skins, copra, grain, sinishin, bees-wax, glee, diamonds and gold; the chief imports being cotton piece goods, from and skeel manufactures, foodstuffs, machinery, building materials, kerosene and motor spirit, sugar, rice, spirits, and cigarettes.

Revenue . . . . . . £1,992,575 Expenditure . . . . . 2,084,898 £1,749,478 2,102,50X ..£4,285,952 3.998,365 £3 982,605 Imports Axports 2,897,938

The Southern Bugade headquarters, the and Bn., 6th Bn , Brigade Signal Section, S and T Sections, and a company of rst Bn. (Nyasaland) of the King's African Rifles, are stationed in Tauganyika Territory There is a Police Force of x.880 all ranks.

The chief scaports are Dar-es-Salaam, Tanga, Lindi, Mikindam, and Kilwa, all of which are accessible to oceangoing vessels. In 1930, 585 steamers (exclusive of coastal boats) of 2,473,007 tons, and 4,098 dilows of 80,057 tons entered and cleared at the various ports from places beyond the Torritory. There are two rallways of metre gauge in the Territory. #### TOGOLAND.

(Joint Franco-British Administration.)

The total area is about 43,040 square miles, with an estimated population of 920,000. The British sphere consists of an area of about 13,040 sq. miles with a population estimated (1931) at

275,925, excluding 43 Non-Africans. The man dated sphere adjoins the eastern frontier of th Gold Coast and is administered as part of it.

#### TRISTAN DA CUNHA

is the chief of a group of islands of volcaul origin lying in lat. 37° 6′ S. and long. x2° 2′ W discovered in x505 by a Portuguese admin (Trisão da Cunha), after whom they are names. The population numbers x27, and the inhabitants are said to be very long-lived. The principal settlement (Eduburgh) is in the north west of the island. In spite of periods of di-tress the inhabitants refuse to leave the islan for the Cape of Good Hope, to which they are attracted by offers of land. Two missionaries Rev. R. A. C. Pooley and Mr. Philip Lindsay were sent out from England in 1927 on a 3-year mission to the islanders

INACCESSIBLE ISLAND is a lofty mass of roc with sides z miles in length; the island is the resort of penguins and ser-fowl.

THE NIGHTINGALE ISLANDS are three 1 number, of which the largest is a mile long an \$\frac{1}{4}\text{in wide, and rises in two peaks, 660 and 1, 105 ft. above the sea-level respectively. The smaller islands, Stoltenhoff and Middle Isle, ar little more than huge rocks. Numbers of seal and sea-elephants visit these islands

GOUGH ISLAND (or Diego Alvarez), in 40° 20' 8 and 9° 44' W., lies about 250 miles S S E. of Trista da Cunha. The island is about 8 miles long and 4 miles broad, with a total area of 40 squar nailes, and has been a British possession sine 826. The island is the resort of penguins an has valuable guano deposits. There is no per manent population.

#### THE UGANDA PROTECTORATE.

The territories now comprised within thi 1,200 Protectorate came under British influence in x,350 1890, and a portion of them was for a time ad ministered by the Imperial British East Afric Company. In 1894 a British Protectorate wa declared over the kingdom of Uganda and som 1,150 1,350 of the adjoining territories. The present limit are approximately as follows:—On the north the Uganda-Sudan boundary, on the east, line drawn from Mt. Zulia, on the Sudar line drawn from Mt. Zuna, on the suusaboundary, along the Turkana escarpment ove the top of Mt. Elgon, and along the west boun dary of the Colony of Kenya and the eastern shores of Lake Victoria; on the south, b Tanganyika Territory (late German Eastern boundary of the Belgian Congo, Within thes boundary of the Belgian Congo. Within thes boundaries he part of the Victoria Nyanza part of Lake Edward, the whole of Lake George, half of Lake Albert, the whole of Lake Knoga, the whole of Lake Salisbury and the course of the Nile from its exit from Lake Victoria to Nimule, where the Sudar commences. Total area, 94,304 square miles including 13,565 square miles of water.

For administrative purposes, the Protectorat is divided into a Provinces. 1,200

is divided into 4 Provinces :-

(r) Eastern Province, comprising the district of Busoga. Bugwere, Bugishu, Budana, Tesc Lango, and Karamoja.

(a) Northern Province, comprising the district of Bunyoro, Gulu, Chua, and West Nile.

(3) Western Province, comprising the district of Toro, Ankole, and Kigezi.

(4) Buyanda Province (with islands in Lake Victoria) comprising the districts of Mengo, Masaka, Mubende, and Entebbe. Owing to sleeping sickness, the islands of Lake Victoria were entirely depopulated, and the inhabitants (about 20,000) settled on the mainland in fly-free districts; but the work of repopulating these islands was undertaken and completed in 1921 and 1922, and natives and their cattle have been

repatriated.
The whole Protectorate is now under direct administration; but the native kings or chiefs, whose rights are in some cases regulated by treaties, are encouraged to conduct the government of their own subjects The province of Buranda is recognised as a native kingdom under a Kabaka (H. H. Sir Daudi Chwa, K C.M G., grand-son of the celebrated Mutesa). He is assisted in the government by three native ministers and a Inklie, or native Council, and each county and district chief also has his Inklie to assist him in local government and in the administration of justice. In Buganda (and in Bunyoro, Ankole and Toro, also ruled over by paramount chiefs, as well as m most of the other parts of the Protectorate more directly administered), purely native matters are dealt with by the various Lukskos, but in serious cases there is an appeal to British courts. For Europeans and non-natives justice is administered by His Majesty's Courts. The principal British representative is the Governor, who (with the assistance of the Executive and Legislative Councils) makes Ordinances for the administration of justice, the raising of revenue, and other pur-poses There are local British courts of justice, and a High Court with civil and criminal junisdiction. The Appeal Court consists of the judges of the High Courts of Kenya, Uganda, Ayasaland, Zanzibar, and Tanganyika Territory There is an armed constabulary force, under a British Commissioner of Police and British There is also a battalion of the King's Officers African Rifles stationed in the Protectorate, and a volunteer reserve of Emopeans.

The total population of Uganda (December, 1930) is given as 3,513,625, composed as follows: Natives, 3,479,650; Asiatics, 14,002; Europeans, 1,973 At first educational work was entirely in the hands of the various Missionary Societies, who still receive grants towards scholarships, &c , for students and teachers ; their efforts have for some years been supplemented by Govern-ment, which has also established a University College for natives at Makerere, Kampala About 2,000,000 natives speak Bantu languages, the most important of which is Luganda, the language of the Baganda tribe, after whom the Protectorate is named. Swahili is also widely There are a few pygmies living near the Semiliki river and the Mufumburo mountains; the rest of the natives belong to the Nilotic,

Hamitic and Sudanese groups.

1000 1030 £1,412,242 522,972 324,763 Customs ... 439,375 Expenditure (excl. loans) 1,607,997 2,040,294 Total Exports ...... 4,274,758 2,060,453 Special Imports . ...... 2,318,177 1.614.164

The Customs Services are now merged in those of Kenya (q.v.). The export trade is mainly in cotton (£1,555,344 in 1930), coffee, chillies, oil-seeds, rubler, ivory, tin ore and hides and skins The trade is chiefly with Great Britain, the United States, and India.

Nile steamers ply to Rejaf, which is about 8 days march from Nimule, the Sudan port of the Kenya and Uganda Railway Marine Service on the Albert Nile and Lake Albert. The road between these two places is fit for motors for about five months only in the year. A regular steamer service is maintained by the Kenya and Security Services in maintained by the Armyr and Ligand Railray Administration on Lake Kloga, between Masindi Port and Namasagali, the tenminus of the Busega railway; and on Lake Victoria between Kisumu and Entelbe and Port Bell and the other Uganda ports The Lake Albert Marine, which has already been men-The Lake tioned, provides a weekly service on the Nile between Butiaba and Nimule, and a fortnightly service on Lake Albert between Butiaba and the Belgian port of Kasenyi. The Railway Administration therefore provides a through service from Junja and Kisumu to the Sudan and the Belgian Congo. The Busoga Railway, from Jinja (on Lake Victoria) to Namasagali, a point on the Nile below the rapids, which was completed in zgrs, has recently been merged in the main line of the K. & U. Ry., which now runs from Jinja zuł Eldoret to Nakuru, where it joins the old line to the coast. The continuation of this main line to Kampala has now been completed. and a further extension from Tororo Junction to Sorott md Mhale was opened in 1995. There is a railway from Port Hell to Kampala, 7% miles in length. There is a fleet of Government motor vans, and there are aeroplane landing grounds at Entebbe, Tororo and Jinja. Good all-weather motor-roads connect the principal administrative centres. Hotels exist at Kampala, Jinja, Tororo, Masindi, Fort Portal and Masaka.

The unit of currency is the shilling, and the

lower comage is on a cental basis.

In 1920 Executive and Legislative Conneils were constituted, and these came into being in Jan., 1921 The former consists of 6 appointed members and the latter includes the former, with the addition of unofficial members, and is presided over by the Governor. The head-quarters of the British administration is at ENTERBE; the chief commercial centres are Kampala (Buganda) and Jinja (Eastern Province).

# ZANZIBAR.

#### (The Zanzibar Protectorate.)

Sultan, H. H. Seyyid Sir Khalifa bin Harub, K.C.M.G., K.B.K., succeeded Dec. 9, 1911.

The Zanzibar dominions became independent in 1856 under the rule of Seyyid Mand, a son of Seyyid Said, Sultan of Muscat and Zanzıbar. They formerly extended along the manuland as far south as Tunghi Bay and north as Warshelkh; but since the cession of the coast-line from Ruvuma to Vanga, including the island of Mafia, to Germany in 1890, and of the Benadur and Kismayu coasts to Italy in 1904 and 1924 respectively, they are now confined to the islands of Zanzibar and Pemba, a coastal strip islands of Zanzibar and remos, a commend, the from Vanga to Ras Kiamboni (Dick's Head), the Zanzibar dominions on the mainland are under the administration of H.M. Government through the Governor and Commander-in-Chief in the Kenya Colony and Protectorate (q.r). Zanzibar has been a British Protectorate since November, 1890. On July 1, 1913, the Protectorate was transferred from the Foreign to the Colonal Office.

By a decree of Sultan Hamond (1897) the legal status of slavery ceased to be recognised in the

islands of Zanzibar and Pemba.

As the centre of the Arab power, Zanzibar, from the beginning of the 19th century until quite recently, donumated the tade of monopoly in cloves (the export of which was valued at Rs 97,55,6co in 1930) and produce

quantities of copra (exports in 1930, Rs.3s,13,s n addition, Zanzibar serves as a storehouse f the East African coast, where both imports an exports are received and distributed. years its importance as a port of transhipme and distributing centre has decreased, owing the development of the mainland, to the ope ing up of the coast ports to direct steamsh service with Europe, and to the transfer Aden of the seat of trade with the Benadir coas Recent figures, however, tend to indicate the island will continue, from the very fact its geographical position, to retain control the local traffic—of that portion of the trawhich goes to small towns up and down the adjacent mainland coast. There are \$45 mil of roads throughout the Protectorate suitab for motor traffic.

The principal imports are rice, grain groceries, sugar, tobacco, copra, petroleum ar piece-goods; the exports are cloves and copr in addition to re-exports of previously imports

rice, grain, copra and picze-goods.

The city of Zanzibar, on the island of the same name, is the largest in East Africa, ar possesses a magnificent harbour, which presen great facilities for shipping and trade generall The population of Zanzibar and Pemba (Censi of 1931) was 235,428, the area of the former beir 940 square miles, and of the latter 380 square mile

Tonnage of ocean-going steamers which enters the port in 1030, 2,718,862; and 3,546 dhow (68,969 tons). Zanzibar provides the best water supply on the East Coast of Africa, and it much in demand for shipping supplies.

# THE WORLD'S RUBBER,

In a Paper on "The Supplies of Rubber," Dr. George Rac. Dec., said the total area under plantation rubber at the end of x929 was between 6,600,000 acres and 7,200,000 acres, of which the area under native nubber in Netherlands' India was variously estimated at between x, x00,000 acres and 1,700,000 acres. The remaining 5,500,000 acres consisted of approximately 3,360,000 acres in estates owned by Europeans and Americans; 510,000 acres in Asiatic owned estates over 100 acres, and 1,630,000 acres in native holding-under 100 acres. About 80 per cent, of all the estate rubber trees were tappable, 90 per cent, of the native rubber in Malaya and Ceylon was tappable, and probably less than 50 per cent. of the native rubber elsewhere was tappable.

The total exports of rubber from producing

the nationality of producers, was approximatel as follows:-

-			Tons	Per Cen
British :- U.K			236,000	27.0
" Local .			69,000	8.1
Netherlanders			57,000	67
Other European	••		30,000	3.2
American			22,000	2.6
Asiatic estate			64,000	7.6
Malayan native		•••	100,000	23.4
Neth Ind. native			108,000	12 8
Other native			36,000	4'3
Wild	•••	••	26,000	3.x
		Ī	847,000	100.0

The absorption of rubber by manufacturer countries were 94,000 tons in 1910; 167,000 tons (i.e., the quantities of ribber they turned into in 1915; 354,000 tons in 1920; 358,000 tons in 1920; 360,000 tons in 1920; 360,000 tons in 1920; 360,000 tons in 1920; 360,000 tons in 1920; 360,000 tons in 1920; 370,000 tons in 1920; 370,000 tons in 1920; 370,000 tons in 1920; 370,000 tons in 1920; 370,000 tons in 1920; 370,000 tons in 1920; 370,000 tons in 1920; 370,000 tons in 1920; 370,000 tons in 1920; 370,000 tons in 1920; 370,000 tons in 1920; 370,000 tons in 1920; 370,000 tons in 1920; 370,000 tons in 1920; 370,000 tons in 1920; 370,000 tons in 1920; 370,000 tons in 1920; 370,000 tons in 1920; 370,000 tons in 1920; 370,000 tons in 1920; 370,000 tons in 1920; 370,000 tons in 1920; 370,000 tons in 1920; 370,000 tons in 1920; 370,000 tons in 1920; 370,000 tons in 1920; 370,000 tons in 1920; 370,000 tons in 1920; 370,000 tons in 1920; 370,000 tons in 1920; 370,000 tons in 1920; 370,000 tons in 1920; 370,000 tons in 1920; 370,000 tons in 1920; 370,000 tons in 1920; 370,000 tons in 1920; 370,000 tons in 1920; 370,000 tons in 1920; 370,000 tons in 1920; 370,000 tons in 1920; 370,000 tons in 1920; 370,000 tons in 1920; 370,000 tons in 1920; 370,000 tons in 1920; 370,000 tons in 1920; 370,000 tons in 1920; 370,000 tons in 1920; 370,000 tons in 1920; 370,000 tons in 1920; 370,000 tons in 1920; 370,000 tons in 1920; 370,000 tons in 1920; 370,000 tons in 1920; 370,000 tons in 1920; 370,000 tons in 1920; 370,000 tons in 1920; 370,000 tons in 1920; 370,000 tons in 1920; 370,000 tons in 1920; 370,000 tons in 1920; 370,000 tons in 1920; 370,000 tons in 1920; 370,000 tons in 1920; 370,000 tons in 1920; 370,000 tons in 1920; 370,000 tons in 1920; 370,000 tons in 1920; 370,000 tons in 1920; 370,000 tons in 1920; 370,000 tons in 1920; 370,000 tons in 1920; 370,000 tons in 1920; 370,000 tons in 1920; 370,000 tons in 1920; 370,000 tons in 1920; 370,000 tons in 1920; 370,000 tons in 1920; 370,000 tons in 1920; 370,000 tons in 1920; 370,000 tons in 1920; 370,000 tons in 1920; 370

In 1930 a separate classification was provided for Mexicans who, up to that date, had been counted with the white population. The number of Mexicans reported in 2930 (x,422,533) is included for that year in the figure for 'Other races," and its mediate accounts for most of the increase between 1930. It is estimated that the 1930 figure for the white population included 700,541 persons who would have been counted as Mexicans in 1930. It these are deducted from the rose total, there is obtained what might be termed an adjusted figure, 94,220,374, which is more closely comparable with the 1930 figure for the white population.

# BIRTHS AND DEATHS.

The annual compilation of mortality statistics for that part of the Continental United States known as the "Registration Area" began with the calendar year 1900. This area at that time included 40'5 per cent. of the total population, and in 1920 95'7 per cent. The birth tegistration area was established in 1935; it included at that time 31's per cent. of the total population, and in 1929, 94 7 per cent. The following table shows the number of births and deaths in the respective Registration Areas, with rates per 1,000 of the estimated population, for the calendar years rgro to rgag .-

# MARRIAGE AND DIVORCE.

The Law of Divorce differs in many of the States, while South Carolina has no Divorce Law. In general, adultery, cruelty, abandonment (desertion), habitual disukenness, and imprisonment on conviction of felony, are legal causes of divorce.

> DIVORCES GRANTED To Husland O Total.

IMMIGRATION AND ENIGRATION.

From 18so to 1931, 37,859,151 alien immigrants landed in the United States. In the useal year

ended June 30, 1931, 97,139 immigrants and 183,540 non-immigrant aliens were admitted, a

total of 280,679 During the same year, 61,888 emigrant and 229,034 non-migrant aliens, departed, a total of 290,916. The net decrease for

the year was 10,237

#### PHYSIOGRAPHY.

The Republic occupies nearly all that portion of the North American Continent between the Atlantic and Pacific Oceans, in latitude 25°-49° North and longitud 67°-124° 30' West, its northern boundary being Canada and the southern boundary Mexico Its coast-line has an estimated length of about 5,565 miles on the Atlantic, 2,730 mile on the Pacific, 3,641 miles on the Gulf of Mexico, and 1,050 miles on the Great Lakes The principal river is the mighty Mississippi-Missouri, traversing the whole country from north to south, and having a course of 1,700 miles to its mouth in the Gulf of Mexico, with many large affluents, the chief of which are the Yellowstone Platte, Nebraska, Arkansas, Ohio and Red Rivers. The rivers flowing into the Atlantic and Pacific Oceans are comparatively small; among the former may be noticed the Hudson, Delaware, Susquehanna, Potomac, and Savannah; of the latter, the Columbia, Sacramento, and Colorado. The Alabama and Colorado of Texas fall into the Gulf of Mexico, also the Rio Grande, a long river partiforming the boundary with Mexico. The areas of the water-basins have been estimated as follows :- Rivers flowing to the Pacific, 644,040 square miles; to the Atlantic, 488,877 and to the Gulf of Mexico, 1,683,325 square inites, of which 1,257,547 are drained by the Mississippi-Missouri. The chain of the Rocky Mountains separates the western portion o the country from the remainder, all communication being carried on over certain elevated passes, several of which are now traversed by railroads; west of these, bordering the Pacific coast, the Cascade Mountains and Sierra Nevada form the outer edge of a high table-land consisting in part of stony and sandy desert and partly of grazing land and forester mountains, and including the Great Salt Lake, which extends to the Rocky Mountains Eastward the country is a vast, gently undulating plain, with a general slope southwards towards the partly marshy flats of the Gulf of Mexico, extending to the Atlantic, interrupted only by the Alleghany Mountains, of inferior elevation, in the Eastern States. Nearly the whole of this plain, from the Rocky Mountains to some distance beyond the Mississippi consists of immense treeless savannahs and prairies of luxuriant grass. In the Eastern States (which form the more settled and most thickly inhabited portion of the country) large forests of valuable timber, as beech, birch, maple, oak, pine. sprace, clim. ash, walimt and in the south, live-oak, water-oak, magnolia, palmetto, tulip-tree, cypress, dc., stil exist, the remnants of the forests which formerly extended over all the Atlantic slope, bu into which great inroads have been made by the advance of civilisation. The Mississipp valley is eminently fertile. The mineral kingdom produces much ore of iron, copper, lead zinc, and alumnium; the non-metallic minerals include numense quantities of coal authracite, petroleum, stone, cement, phosphate rock, and salt. Precious metals include gold and silver, raised mainly in Colorado, California, and Alaska (gold), and Colorado Montana, Utah, and Idaho (silver). The highest point is Mount Whitney at 14,496 feel above sea level, and the lowest point of dry land is in Death Valley, 276 feet below ser level; these two points are in California, only 86 miles apart. The mean elevation of the 48 States is approximately 2,500 feet.

### GOVERNMENT.

The United States of America is a Federal Republic consisting of 48 States and I Federal District (of which 13 are Original States, 7 were admitted without previous organisation as Territories, and 28 were admitted after such organisation), and of 2 organised Territories.

THE CONSTITUTION.—By the Constitution of Sept. 17, 1787 (to which ten amendments were added on Dec. 15, 1791, and eleventh to nineteenth Jan. 8, 1798, Sept. 25, 1804, Dec. 18, 1865, July 28, 1868, March 30, 1870, Feb. 25, 1913, May 31, 1913, Jan. 29, 1919, and Aug. 26, 1920), the government of the United States is entrusted to three separate authorities—the Executive, the Legislative, and the Judicial.

#### THE EXECUTIVE

THE Executive power is vested in a President, who is elected every four years, and is eligible for re-election. The mode of electing the President is as follows:—Each State appoints, in such manner as the Legislature thereof directs (they are now elected by popular vote on the first Tuesday after the first Monday in November of the year preceding the year in which the Presidential term expires), a number of electors, equal to the whole number of Senators and Representatives to which the State may be entitled in the Congress; but no Senator or Representative, or anyone holding office under Government, shall be appointed an elector. The electors for each State meet at their respective State Capitals on the second Monday of the January following, and there vote for a President by ballot. The ballots are then sent to Washington, and opened on the second Wednesday of February by the President of Senate in presence of Congress, and the candidate who has received a majority of the whole number of electoral votes cast is declared President for the ensuing term. If no one has a majority, then from the three highest on the list the House of Representatives elects a President, the votes being taken by States, the representation from each State having one vote. There is also a Vice-President, who, on the death of the President, becomes cr officio President for the remainder of the term. In case of the removal or death of both President and Vice-President, a statute provides for the succession of the Secretary of State, Secretary of the Treasury. Secretary of War, Attorney-General, Postmaster-General, Secretary of Navy, and Secretary of the Interior, so that the State can never be without a Head or Ruler.

The President must be 35 years of age and a native citizen of the United States. He receives a salary of \$75,000, with a travelling allowance of \$25,000. Executive duties:-

(1) He is Commander-iu-Chief of the Army and of the Navy (and of the Militias when they are in Federal service), and he commissions all officers therein.

(2) With the consent of the Senate, he appoints the Cabinet officers and all the chief

(and many minor) officials.

(3) He exercises a general supervision over the whole Federal Administration and sees that the Federal Laws are duly carried out. Should disorder arise in any State which the authorities thereof are unable to suppress, the aid of the President may be myoked.

(4) He conducts the Foreign Policy of the Republic, and has power, "by and with the advice and consent of the Scinite, to make Treaties, provided two-thirds of the Scinitors present concur." The Declaration of War rests with Congress.

(5) He makes recommendations of a general nature to Congress, and when laws are passed by Congress he may return them to Congress with a veto. But if a measure so vetoed is again passed by both Houses of Congress by a two-thirds majority in each House, it becomes law, notwithstanding the objections of the President.

THE PRESIDENT.

President of the United States (1929-1933), Herbert Clark Hoover, of California, born at West Branch, Iowa, Aug. 10, 1874, graduated mining engineer, Leland Stanford Jr. University, 1895; Chairman of the American War Relief Committee, London, Eng., 1914-15; Chairman of Commission for Relief in Belgium, 1914-19; U.S. Food Administrator, 1917-19; Secretary of Commerce, 1921-28. Republican.

1. Une-President, Charles Curtis, of Kansas (born Jan. 25, 1860), elected Vice-President

Nov. 6, 1928. Republican.

#### THE CABINET.

(In order of succession to the Presidency, after the Vice-President.)

 Secretary of State, Henry Lewis Stimson, of New York, (born 1867), Secretary of War, 1911-13; Special Commissioner to Nicaragua, 1927; Governor-General of the Philippines, 1928-29, appointed March 5, 1929.

3. Secretary of the Treasury, Andrew W. Mellon, of Pennsylvania (born 1855), appointed

March 4, 1921; re-appointed March 4, 1925; present appointment, March 5, 1929. Secretary of War, Patrick Jay Hurley, of Oklahoma (born 1883), appointed Dec. 9,

Attorney-General, William De Witt Mitchell, of Minnesotic (born 1874); Solicitor-

General of U.S.A., 1925-29; appointed March 5, 1929.

Postmaster-General, Walter Folger Brown, of Ohio (born 1869); Assistant-Secretary of

Commerce, 1927-29; appointed March 5, 1929.

7. Secretary of the Navy, Charles Francis Adams, of Massachusetts (born 1866), appointed March 5, 1929. March 5, 1929.

8. Secretary of the Interior, Ray Lyman Wilbur, of California (born 1875); appointed Secretary of Agriculture, Arthur M. Hyde, of Missouri (born 1877); Governor of Missouri, 1921-25; appointed March 5, 1929. [March 5, 1929. Secretary of Commerce, Robert Patterson Lamont, of Illinois (born 1867), appointed

Secretary of Labour, William Nuckles Doak (born 1882), Dec. 9, 1930.

THE LEGISLATURE.

The Legislative power is vested in two Houses, the Senate and the House of Representatives, the President having a veto power, which may be overcome by a two-thirds vote of each House. The Senate is composed of two Senators from The Senate is composed of two Senators from each State, elected by the people thereof for the term of six years, and each Senator has one vote; and Representatives are chosen in each State, by popular vote, for two years. The number of Representatives for each State is allotted in proportion to its population—at present z for six,877. The Senate consists of 95 members. The salary of a Senator is \$x0,000 per annum, with mileage at we cause nor mile each session. with mileage at accents per mile each session.

The House of Representatives consists of 435 representatives besides a delegate from Alaska, a delegate from Hawaii, a resident commissioners from the Philippines, and a resident commissioner from Porto Rico. The salary of a Representative is \$50,000 per annum, with mileage as for Senators. By the XIXth Amendment sex is no disqualification for the Franchise.

THE SEVENTY-SECOND CONGRESS. (March 4, 1931—March, 3, 1933.)
President of the Senate, Charles Curtis, Kansas ... ...... \$15,000 Speaker of the House of Representatives, (to be chosen Dec 7, 1931) .... 15,000

LIBRARY OF CONGRESS.
(National Library),
Capitol Hill, Washington, D.C.

The Library of Congress was established in 1800 and destroyed by fire in 1814. In 1815, purchase of Jefferson collection formed basis for purchase of Jefferson collection formed hasis for a new collection. Partially destroyed by fire, 1851, and roplemished in 1851-a. Since that date increased (2) by regular annual appropriations by Congress (now \$18a,500); (2) by deposits under the copyright law; (3) by gifts and exchanges; (4) by the exchanges of the Smithsonian Institution, the library of which was in 1866 (theu 40,000 volumes; now over 550,000 volumes) deposited in the Library of Congress, with the stipulation that future agreestors. with the stipulation that future accessions should follow it. The collection is the largest in the Western Hemisphere, but statistics of the four largest libraries in the world are not sufficiently uniform to tell their order in respect to numbers. The Library of Congress now contains 4,202,288 volumes (gain in 1930-31, 188,322). The building was first occupied in 1897, and in 1931 it contained about 627,674 square feet (hearly 14 acres) of floor space. The total cost to June 20, 202, 12 approximately should follow it. The collection is the largest Congress, the appropriation for 1931-32 being \$2,328,877. An auditorium for chamber music (the gift of Mrs. F. S. Coolidge) was opened in (the gift of Mrs. F. S. Coolidge) was opened in spas, and in the same year the Library of Congress Trust Fund Board was created under an Act of Congress. This Board is permitted to accept and administer gifts and bequests of personal property in the interests of the Library of Congress, its collections and its service.

NATIONAL COMMISSION OF FINE ARTS.

Interior Dept Building, Washington, D.C. The Commission of Fine Arts was created by Congress May 17, 1910, to advise generally upon the location, selection, and erection of statues, fountains, and monuments in the District of Columbia, and also to advise generally upon questions of art when required to do so by the President or by any committee of either House of Congress. Under this latter provision its functions have been enlarged by Evecutive Order to cover all works of Art with which the Federal Government is concerned, including designs of public buildings, public parks, within the D.C. An expenditure not exceeding \$50,000 in any one year is authorised by Congress for travelling and other expenses. The members serve without remuneration.

Chairman, Charles Moore, Detroit, Mich.

The total dishursement in pensions since the Wan of Independence to June 30, 1931, is \$8,403,978,194, of which \$7,492,455,764 has been \$8,403,978,194, of which \$7,492,455,764 has been paid on account of the Civil War The cost of maintenance and expenses of administration in the fiscal year ending June 30, 1931, excluding the cost of medical examinations and special field examinations, amounted to \$1,374,344.

#### World War Pensions.

Disbursements in claims arising out of service in the World War between April 6, 1917, and July 2, 1921, are not included in the above totals, as claims of this nature are adjudicated in the U.S. Veterans' Bureau, which has jurisdiction over such matters. (See "Ordinary Expenditures" under "Finance," post.). By Executive Order of July 21, 1939, the Veterans Bureau, the Bureau of Pensions, and the National Home for Disabled Volunteer Sol-

the National Home for Disabled volunteer soldiers, were consolidated in accordance with the Act of Congress, approved July 3, 1930, by the President. The combined organisation is known as the Veterans' Administration, under the direction of Brigadier-General Frank T. Hines, formerly Director of the Veterans' Bureau, now Administrator of Veterans' Affairs.

#### THE NAVY OF THE U.S.

On October x, x93x, the Navy of the United States consisted of the following seagoing vessels. x5 battleships, 8 heavy cruisers, not "over-age"; z heavy cruisers, "over-age"; x6 light cruisers; 3 aircraft carriers; 78 destroyers, not "over-age"; x45 destroyers "over-age"; x4 light mine layers; 4 mine layers; 37 mine sweepers; 70 submarines, not "over-age"; x5 submarines "over-age"; z5 submarines; 5 gunboats; 8 river gunboats; 3 converted yachts; 8 destroyer tenders, y submarines tenders; a saircraft tenders; 2 repair ships: \$ tenders; a aircraft tenders; 3 repair ships; 5 store ships; 3 colliers; 29 oilers; a ainmunition ships; 6 cargo ships; a transports; a hospital ships; 34 tugs; 6 submarine rescue vessels; 8 miscellaneous auxiliaries, and 28 unclassified vessels.

On the above-mentioned date there were under construction: 7 heavy cruisers, x aircraft carrier, 3 submarines and x destroyer. In addition to the foregoing new construction, there have been authorized. 8 cruisers; xx destroyers , z Neff submarine ; and z transport, the construction of which has not been begun.

Information as to characteristics, costs, &c. available for publication concerning naval vessels mentioned above, may be found in the Ships' Data Book.

EDUCATION.

teachers (138,193 men and 693,741 women) wete employed. The average annual salary of all teachers was \$1,364. The total number of buildings used as school houses was 254,726, and the estimated value of all public school property

was \$5,486,938,599.
The total money received for school purposes, excluding balances on hand, was \$2,324,707,994.
Of this amount, \$a6 390,797 was received from permanent school funds and from the rent of permanent school funds and from the rent or school lands, \$308,392,475 from State taxes or State appropriation, \$x,600,316,451 from local tax or appropriation, and \$50,450,618 from all other sources, State and local. The total payments, excluding payments of bonds, were \$3,184,236,628. This amount includes expenditures for sites, This amount includes expenditures for sites, buildings, furniture, libraries and apparatus, \$382,996,255; for salaries of superintendents, supervisors, principals and teachers, \$7,207,046,270; and for all other purposes, \$594,394,372.

Compulsory Attendance Laws, 1982.
Every State in the Union has a compulsory school attendance law. In general, children are

ollinged to attend school from 7 to 14 years of age, and those from 14 to 16 must attend school or secure employment certificates. The required attendance each year varies from eighty days in two States to the full term in thirty-six States. In all States there are, connected with the local administrative units, officers charged with enforcing the compulsory attendance law, known in the majority of States as the truant or attendance officers.

Universities, Colleges and Professional Schools, 1927-28.

Of the 1,076 universities, colleges, and professional schools, 256 are public institutions and 850 under private control or management. The total number of instructors in both private and public institutions was 67,209 (\$3,253 men and 24,946 women). The public institutions enrolled 347,537 undergraduate and graduate students (25,272 men and 128,265 women). The private institutions enrolled 577,844 undergraduate and graduate students (343,972 men and 227,872 women). In general engineering, 3,042 students were enrolled; in chemical engineering, 4,948; in civil engineering, 12,502; in nechanical engineering, 20,434; and in mining engineering, 1,5434. The total number of baccalaureate degrees conferred in 1227-28 was \$3,056; (45,012 men and total number of instructors in both private and

The total number of baccalaureate degrees conferred in 1927-28 was 83,055 (45,012 men and 37,133 women); altogether 13,834 graduate degrees were conferred (8,976 men and 4,855 women); 1,245 honorary degrees were conferred. The schools of theology enrolled 13,642 students and reported 1,232 graduates; law schools 42,664 students and 8,652 graduates; schools of medicine, 21,427 students and 4,342 graduates; schools of dentistry, 9,282 students and 2,725 graduates; schools of pharmacy, 11,125 students and 2,455

graduates; and schools of veterinary medicine.

6rs students and 138 graduates.
Teachers' Colleges and Normal Schools, 1929-30.
In 1293-23, 32: teachers' colleges and normal schools reported to the United States Office of Education. These schools are chiefly concerned with the training of elementary teachers. of this number 273 are public institutions, and 58 are private institutions; 140 are teachers colleges, 134 are public, and 6 are private institutions (schools granting a degree after four years' work beyond high school); 66 are State normal schools; a6 are city normal schools; 47 are county normal schools; and 52 are private normal schools. The total number of instructors in all teachers' colleges and normal schools was 14,473. The total number of students enrolled was 279,295 (60,935 men and 28,250 women). Of this total eurolment, 264,257 students are in nor-mal training courses. The number of graduates from the normal training courses was 7,038 men and 42,289 women, making a total of 49,227. zz,073 bachelor's degrees were also conferred, 3,609 on men and 7,464 on women. Practice or model schools are usually operated in connexion with these normal schools, or the public schools are used for this purpose. The total enrolment in these model schools, so far as reported, was 90,60r. The total receipts for normal schools (1929-30) were \$69,983,932 The total number of volumes in the libraries was

4,055,076.
Nurse Training Schools, 1926-27. The number of nurse training schools has increased very rapidly since 1900. At that time 432 schools reported to the Bureau of Educa-432 schools reported to the Bureau of Educa-tion. In 1226-27 the number of such schools reporting was 1,797. The number of pupils enrolled in these schools in 1226-27 was 77,768 and the number graduated 18,623. Of the schools reporting, 75 are in hospitals for the insane. The capacity of the hospitals in which all nurse training schools reporting are located, is 359,077 beds, and the average daily number of patients is beds, and the average daily number of patients is z-f0.194. In 1936-37 a large majority of schools required a minimum age requirement for admission of only ze or zo years. In general hospitals 504 schools required a hours of duty duly, 366 schools required phours of duty, and 293 schools required to hours of duty. In hospitals for the meane, the number of hours of duty required was usually zo or more. Thirty schools required was usually zo or more. Thirty schools required hours of duty and none required more than as hours of duty, and none required more than

The remuneration granted the pupils in general hospitals is usually less than \$200. In the first year 46'9 per cent. of the schools pay under first year 46'9 per cent. of the schools pay under \$x00, and 47's per cent. pay from \$x00 to \$x90; in the second year 26'2 per cent. pay from \$x00 to \$x90; in the third year of the course 18'6 per cent. pay under \$x00, and 68'2 per cent. pay from \$x00 to \$x90. In the schools in hospitals for the insane the remuneration usually exceeds \$400. In the first year of the course 72'2 per cent. of the schools pay \$x00 or more: in the cent. of the schools pay \$400 or more; in the second year of the course 63 6 per cent. of the schools pay \$400 or over; in the third year of the course 72.4 per cent. of the schools pay \$400 or more.

More than 85 per cent. of all the nurse training schools in general hospitals offer a three-year course. About to per cent, offer a two-year or two-and-one-half year course. In hospitals for the insane, more than 86.7 per cent. of the

schools offer a three-year course, and the remaining schools offer a two-year course. ing schools offer a two-year course. 32 2 per cent. of the general nurse training schools require one year of high school work for admission, 3: per cent. require two years of high school work for admission, 3: 8 per cent. require a full high school course, and 2: 3 per cent. require only the completion of the elementary grades for admission.

Of the nurse training schools reporting, 180 are affiliated with colleges or universities. By this co-operation an excellent opportunity is afforded to the training schools to secure for their pupils a high type of instruction in technical and academic subjects.

Public High Schools, 1927-28.

Public High Sphools, 1927-28.

In 1237-25, 18,116 public high schools reported to the Bureau The total number of teachers in these secondary schools was 182,637 * (64,932 men and 127,706 women). The total number of pupils enrolled in these schools was 3,324,473 (1,598,605 boys and 1,755,868 girls). The total number of coloured pupils included in the precedure flures is access. In the first year of the ceding figures is 95,107. In the first year of the course 1,222,803 pupils were enrolled, in the second year 905,179, in the third year 670,089 and in the fourth year 955,312 pupils, including post-graduate and special pupils. In the 7th and 8th clementary radias correspondent and 8th elementary grades organised as a part of junior high schools, 862,840 pupils were enrolled. The number of graduates reported was 474.736 (210,916 boys and 263,820 girls).

There were 11,555 regular high schools that reported a four-year curriculum. In these fouryear high schools there are 2,194,354 jupils emolled (1,050,387 boys and 1,143,667 guls). In addition, there are 1,403 junion lugh schools, with 839,388 pupils (418,220 boys and 421,168 girls); 2,429 junior-senior high schools, with 741,944 pupils (351,571 boys and 390,373 girls), and 494 senior high schools, with 379,518 pupils

(181,503 boys and 198,015 guls).

Private High Schools and Academies, 1929-30.

The number of pupils in private high schools and academies, in general, has increased slowly but steadily. In 1900 the number of students eurolled in these schools was 110,797. In 1999 30 the number eurolled was 269,249 The number of schools reporting in 1900 was 1,978, and the number reporting in 1930 was 2,760. The total number of instructors in these private high schools in 1929-30 was 22,003 (8,577 men and 13 426 women). In this group of schools, more than

Includes 7,305 men and 24,634 women teachers in junior high schools

any other, there is a tendency for the schools to be either for boys or girls exclusively, rather than co-educational. Of the schools reporting in 1930, 504 were for boys only, 873 were for girls only. Altogether, 116 of the schools had military drill in 1938, enrolling 16,528 students.

The lowest American percentage was 29 in 1880, 1881 and 1882, the highest was 91 in 1883.

PRODUCTION AND INDUSTRY. Agriculture.—The total land surface, excluding Island possessions and Alaska, is 1,903,216,640* Island possessors and Alaska, is 1,905,320,000 acres, of which in 1925 204,319,325 were farms (505,027,400 acres improved). The total number of farms in 1925 was 6,371,640, of which 2,326,125 are between 100 and 500 acres, 1,421,078 between 50 and 100 acres, and 1,495,643 between 20 and 500 acres. The gross value of farm products of the United States in 1928 was \$15,881,706,000, as convened with \$1500 acres. Divors (1) tons in

compared with \$16,050,362,000 in 1927. Crops in 1928 were valued at \$9,726,822,000, live-stock products (including animals sold or slaughtered)

at \$6,154,884,000
The gross value of the principal crops was as under in 1928 and 1929':--

Leading Industries (Ranked by Value of Products) in Principal Industrial Cities for 1927.

New York.—Clothing; Printing and publishing; Fur goods; Bread and other bakery products; Slaughtering and meat packing; Millinery; Sugar refining; Electrical machinery,

apparatus, and supplies; Manufactured gas, illuminating and heating; Tobacco.

Chicago.—Slanghtering and meat packing; Printing and publishing; Clothing; Foundry and machine-shop products; Electrical machinery, apparatus, and supplies; Steel works and rolling nills. Breed and other lakery products ling mills; Bread and other bakery products.

Philadelphia.—Textiles; Frinting and publishing; Clothing; Sugar refining; Electrical machinery, apparatus, and supplies; Bread and other bakery products; Petroleum refuing.

Detroit.—Motor vehicles, not including motor-cycles; Motor vehicle bodies and motor vehicle parts; Foundry and machine-shop products; Printing and publishing; Brass, bronze, and coper, products; Statistical Statistics. per products; Slaughtering and meat packing.

Cleveland -Steel works and rolling mills; Motor vehicles, not including motor-cycles; Motor vehicle bodies and motor vehicle parts; Foundry and machine-shop products; Electrical machinery, apparatus, and supplies; Clothing.

St. Louis.—Motor vehicles, not including motor-cycles; Slaughtering and meat packing; Printing and publishing; Boots and shoes, other than subber; Clothing.

Baltimore -Smelting and refining, copper; Clothing; Sugar refining; Petroleum refining; Slaughtering and meat packing; Tinware; Printing and publishing.

Buffalo. - Flour and other grain-mill products; Motor vehicles, not including motor-cycles; Slaughtering and meat packing

Milwaukee .- Motor vehicle bodies and motor vehicle parts; Motor vehicles, not including motor-cycles; Foundry and machine-shop products : Knit goods : Boots and shoes, other than

rubber; Slaughtering and meat packing; Electrical machinery, apparatus, and supplies. Boston.—Printing and publishing; Clothing; Sugar refining; Confectionery; Boots and shoes, other than rubber; Cutlery and edge tools; Boot and shoe cut stock, not made in boot and shoe to the cut stock. and shoe factories; Foundry and machine-shop products: Bread and other bakery products.

Los Anyeles.—Petroleum refining; Motion pictures, not including projection in theatres; Printing and publishing; Slaughtering and meat packing; Foundry and machine-shop products; Bread and other bakery products; Clothing; Lumber-planing-mill products.

Pittsburgh.-Steel works and rolling mills Bread and other bakery products; foundry and machine-shop products; Printing and publishing; Iron and steel (blast furnaces); Slaughter-

ing and meat packing; Canning and preserving.

San Francisco.—Printing and publishing;
Coffee and spice, roasting and grinding; Sugar refining; Tobacco; Canning and preserving; Slaughtering and meat packing.

Motor Vehicle Industry.—The value of the complete passenger cars and business vehicles manufactured in 1927 was \$2,445,470,666; of parts and accessories, \$1,112,862,378, and of tyres and tubes \$774,055,051. The number of complete passenger cars produced was 2,826,274 and of complete business vehicles 331,272, while 64,362,497 tyres and 70,855,455 inner tubes were also manufactured in 1927. The factories gave also manufactured in 1927. The factories gave employment to 369,399 wage earners, who re-ceived \$612,955,661 in wages in 1927. The number of motor vehicles registered in 1928 in the U.S.A. was 24,493,124. The gasoline produced in 1928 amounted to 15,841,686,000 gallons, and that consumed to 13,810,944,000 gallons. The taxes levied on motor vehicles by the Federal, State, and Municipal Governments in 1928 amounted to \$807,887,967. The number of motor vehicles (including chassis) exported in 1928 was 515,76a, not including 66,969, shipped as "parts for assembly '

PUBLIO ROADS.—On Dec. 31, 1930, the total length of public roads was 3,009,066 miles, approximately 693,559 miles of which were surfaced roads. In 1930 the total expenditures for highways were approximately \$1,680,493,095.

nighways were approximately \$2,004,93,005.
SHIPPING.—On June 30, 1931, the mercantile marine of the U.S. (vessels of 500 gross tons and over) consisted of 383 sailing vessels of 523,921 gross tons; 1,882 steam and motor vessels of 9,609,536 gross tons, a total of 2,265 vessels of 10,123,437 gross tons. In the year ended June 30, 1932, sailing and steam vessels of 79,584,265 tons entered at the various ports of the U.S.; of this total 29,607,130 tons were American and 49,977,126 tons foreign. The tonnage cleaved from the various seaports was 77,943,285, of which 29,400,684 tons were American and 48,542,201 tons foreign.

POSTS AND TELEGRAPHS.—On June 30, 1930, there were 49,063 post offices in the U.S. handling 37,887,882,94 "pieces" of mail natter, of which amount 27,523,372,000 were domestic and 354,450,374 foreign. The telegraphs and telephones are not operated by the U.S. Government.

#### WEIGHTS, MEASURES AND CURRENCY.

The Weights and Measures in common use are shown on page 490. The Metric System of Weights and Measures is permissive, but is little used. The unit of currency is the dollar of 100 cents. The rate of exchange will be found on p. 478.

#### INDIAN POPULATION.

In 1930 the enumerated and estimated Iudian population of the United States, exclusive of Alaska, was 340,541 by blood (Okiahoma containing 121,884, Arizona 47,072, New Mexico 28,113, S. Dakota 23,726, California 19,197, Montana 14,228, North Dakota 10,704, Washington 12,707, and the 38 remaining States less than 20,000 each). Total disbursements authorised

for the fiscal year ended June 30, 2932, for Indian Service are \$3,752,400. In addition to this the sum of about \$5,000,000 is to be paid over to the Indians from receipts for oil and other leases, interest on trust funds, &c. The total wealth of U.S. Indians under the nominal control of the Indian Bureau on June 30, 1938, amounted to \$1,726,85,123,000 which \$500,206,386, was tribal, and \$796,708,737 individual.

# RECLAMATION.

Commissioner, Elwood Mead, Interior Dept. Building, 19th and F. N.W., Washington, D.C. Employees: Washington Office, 55; Field, 1,500 to 3,000. Expenditure per year about \$10,000,000.

The Burean of Reclamation was organised as a

The Bureau of Reclamation was organised as a bureau of the Interior Department, under the Reclamation Act of June 17, 1902. It is engaged in the investigation, construction and operation of irrigation works in 18 and and semi-arid States of the far West. Twenty-seven projects, comprising about 3,000,000 acres, are under construction or operation, and the major works aid in serving an additional 1,500,000 acres under private canals purchasing stored water from the government reservoirs. The funds for this work have come chiefly from repayments by the water usors, from oil leasing and other mineral operations, and from the sale of public lands. The money expended is returned to the fund by graduated payments of settlers.

The Bureau has built 17,467 miles of canals, ditches and drains (including 165,457 canal structures), involving the excavation of 292,105,859 cubic yards of materials. In connexion with this work there have been contructed 120 storage and diversion dams with an aggregate volume of 36,685,256 cubic yards, including the Arrowock Dam (340 feet high), Idaho, on the Boise River, and the Elephant Butte Dam (305 feet high). New Moxico, on the Rio Grande. The Bureau has built 122 tunnels, 1,451 miles of a transmission lines. It has manufactured over 125 million barrels of cement and sand cement. The construction cost to June 20, 1031, wolding 15 feed 21 feet of 21 feet of 21 feed 22 feet of 21 feet of 22 feet of 22 feet of 23 feet of 24 feet of 25 feet of 25 feet of 25 feet of 25 feet of 25 feet of 25 feet of 25 feet of 25 feet of 25 feet of 25 feet of 25 feet of 25 feet of 25 feet of 25 feet of 25 feet of 25 feet of 25 feet of 25 feet of 25 feet of 25 feet of 25 feet of 25 feet of 25 feet of 25 feet of 25 feet of 25 feet of 25 feet of 25 feet of 25 feet of 25 feet of 25 feet of 25 feet of 25 feet of 25 feet of 25 feet of 25 feet of 25 feet of 25 feet of 25 feet of 25 feet of 25 feet of 25 feet of 25 feet of 25 feet of 25 feet of 25 feet of 25 feet of 25 feet of 25 feet of 25 feet of 25 feet of 25 feet of 25 feet of 25 feet of 25 feet of 25 feet of 25 feet of 25 feet of 25 feet of 25 feet of 25 feet of 25 feet of 25 feet of 25 feet of 25 feet of 25 feet of 25 feet of 25 feet of 25 feet of 25 feet of 25 feet of 25 feet of 25 feet of 25 feet of 25 feet of 25 feet of 25 feet of 25 feet of 25 feet of 25 feet of 25 feet of 25 feet of 25 feet of 25 feet of 25 feet of 25 feet of 25 feet of 25 feet of 25 feet of 25 feet of 25 feet of 25 feet of 25 feet of 25 feet of 25 feet of 25 feet of 25 feet of 25 feet of 25 feet of 25 feet of 25 feet of 25 feet of 25 feet of 25 feet of 25 feet of 25 feet of 25 feet of 25 feet of 25 feet of 25 feet of 25 feet of 25 feet of 25 feet of 25 feet of 25 feet of 25 feet of 25 feet of 25 feet of 2

June 39, 1931, was \$206,041,522.

Nearly 650,000 persons are living on the 40,324

Arms irrigated by the Bureau, and in the project
towns and cities. Of the 3,000,000 acres above
referred to, 1,504,870 acres were irrigated and
1,550,967 acres were harvested in 1931, producing
crops worth \$65,007,270, or an average of \$2100
per acre. The 1,524,493 acres of additional lands
using stored water yielded crops worth \$54,654,350
more.

Public land farm units on the several projects are opened for settlement from time to time as canals are extended to make irrigation water available. Under present law, soldiers and sailors of all wars have a preference right of 90 days to enter these farms.

Information in regard to farms available for settlement may be obtained by addressing, Commissioner, Bureau of Reclamation Dept. of the Interior, Washington, D.C.

The Bureau issues the "New Reclamation Era,"

The Bureau issues the "New Reclamation Era," an illustrated monthly publication, containing articles of interest to urigation farmers and engineers, and numerous settlement and other booklets. An annual report is also issued, and other publications from time to time, relating to various phases of the work.

An engineering library of about 6.000 manu-

script and printed volumes on the subject of ing required by the various executive departirrigation is maintained in the Washington office of the Bureau. This library contains descriptions of the construction and operation of the projects, with numerous photographs and maps, plans, specifications, cost data and results of original experimental investigations, and is available for consultation by those interested. The bureau also maintains a photographic file of about 40,000 negatives of scenes on the projects from the beginning of construction through the period of settlement and development

#### GOVERNMENT PRINTING OFFICE.

North Capitol and G Streets, Washington, D.C. The Government Printing Office of the United States was established by Congress in 1860 and has been in continuous operation since that time. The buildings have a floor space of 22 acres, and together with the machinery and equipment which they contain, represent an expenditure of approximately \$10,100,000. The annual cost of operation and maintenance is over \$14,000,000. There are over 4,900 persons annually employed in the various divisions of the office at a total yearly compensation of In addition to doing all of the \$10,000,000. printing and binding ordered for Congress, the office executes all the punting and bind-

ments and independent establishments of the U.S. Government. The office has the largest battery of type-setting machines in the world, including 174 linotype machines, a Ludlows, a material casters, no monotype key-boards and 130 monotype casting machines, which produced about 2,470,000,000 ems of type in fiscal year 1931. The 182 presses of the office are credited with 2,470,000,000 chargeable impressions, not including 212,000,000 on money order forms and 1,485,000,000 on postal cards. During the year the office handled approximately 80,000 separate jobs. In addition to the execution of all kinds of printing and binding, this office produced 11,438,000 square inches of electrotypes and stereotypes, and 731,000 square inches of half-tones and linecuts, supplied blank paper to other Government establishments at a cost of \$633,000, and manufactured its own printing and writing inks, rollers, glue, type and type metal, some of these supplies being furnished to various branches of the Government, It also has one of the largest industrial cafeterias and recreational rooms in the United States.

Public Printer, George H. Carter, Iowa. \$10,000 Deputy Public Printer. John Greene, Mass. 7,500

Production Manager, Elwood S. Moorhead, Pa. ... .

# COTTON REPORT AS OF JULY 1, 1980.

The Crop Reporting Board of the United States Department of Agriculture, from the reports and data furnished by crop correspondents, field statisticians, co-operating State Boards (or Departments) of Agriculture and Agricultural Colleges, makes the following estimate of cotton acreage in cultivation on July 1, 1930.

U.S. Acreage in cultivation compared with last year, 97'3 per cent.

# Dependencies of the M.S.A.

#### THE PHILIPPINE ISLANDS

are situated between 4° 40°-21° 10′ N. lat. and 116° 40°-126° 34′ E. long, and are distant about so miles from the south-east coast of the continent of Asia. Their total land area is 114,400 square miles, of which total land area is 114,400 square miles, of which total langest islands, the 7,075 other islands having a combined area of 11,112 square miles. At the (eusus of 1918 the population was ascertained to be 10,214,310,31most all of Malayan stock, of whom (in 1928) 8,724,955 are Roman (athohe, 4,000,000 are Aglipayan, 200,000 are Protestant, (and 1918) 443,032 are Muhammadan, 508,556 are Pagan, 24,263 are Buddhists, and all others 5,454. Of the foreigneous researches about these-quarters are Chinese, and of the white population over one-half are from the United States (6,931 in 1921).

The Philippine Islands were chscovered in 1521 by the Pottuguese navigator Magellan, who was slain by the natives of Mactai. In 1565 spain midel took the conquest of the Islands, which were named "Filiplinas," after the son of the King of Spain, and in 1571 the city of Manila was founded by the conquistador Legaspi, who subdued the inhabitants of almost all the Islands, their conversion from barbarism and paganism being undertaken by the Augustiman friars in Legaspi's train. In 1762 the capital of the Spainish colony was occupied by a British force, but in 1764 the newly-acquired territory was restored to Spain. In the nineteenth century there were frequent disturbances in the Islands, and at the outbreak of the Spainish-American War of 1898 a rebellion under Agumaldo, a native leader, had just died down. Agumaldo was deported, but on his return his assistance was accepted by Admiral Dewey, the commander of the American Pacific fleet, after the annihilation of the Spainish vessels in Manila Bay on May 1, 1898 Manila was captured by the American troops midel General Wesley Merritt on Aug. 13, 1898, and the Islands were ceded to the Umted States by the Treaty of Paris of Dec. 10, 1898.

On Aug. 21, 1928, the Philippine Scouts, which form a part of the Umted States regular Army, over the states was all for the United States regular Army, over the decided Spafficers and 6 2 cellsted mid. In

On Aug. 21, 1928, the Philippine Scouts, which form a part of the United States regular Army, consisted of 88 officers and 6,239 enlisted men. On the same date the regular Army in the Philippines (other than the scouts) consisted of 512 officers and 3,788 enlisted men, many of these officers being on duty with the scouts The Philippine constabulary, which is under the Philippine Government, in Oct., 1928, consisted of 397 officers and 6,129 enlisted men. All enlisted men in the scouts and constabulary are natives of the Islands, while almost all the constitutions of the Islands, while almost all the constabulary are

matives of the similar, while almost all the constability commissioned personnel are filipinos. In 1927 the income of the Philippine Government was \$33,842,988 and the bonded indebtedness \$74,860,000. The expenditure on education in 1927 amounted to \$13,809,753 for public schools only; the University had an enrolment of 7,533 students, and there were 1,099,306 pupils enrolled in the public schools. The principal exports are sugar, abaca (Manila Hemp), coconut oil, copra, tobacco, embroideries, desiccated coconut, lumber and timber, copra meal and maguey; the imports being cotton and its manufactures, iron and steel and their manufactures, mineral oils, meat and darry products, automobiles and accessories, wheat flour, silk and its manufactures, paper and its manufactures and coal.

Exports to U.S. .... 27,3248,205 Exports to U.S. ..... 128,27,572 Towns.—Capital, Manila, in the island of Luzon; population (1928), 324,522. The next largest towns are Cebit (86,154), Legaspi (32,670), Itolio (67,149), and Zamboauga (47,305); there are several others with populations from 25,000 to

Governor General, Col. Dwight F. Davis, assumed office at Manila, July 8, 1929

#### GUAM

Guam, the largest of the Ladrone or Marianne Islands in the North Pacific Ocean, lies in 12° 25′ N. lat. and 144° 39′ E long., at a distance of about 1,506 miles east of Manila, the capital of the Philippine Islands, and foims a naval station between that dependency and the United States. The area of the island is estimated at 225 square miles, with a population of 20,827, of whom 19,627 are classed as native, 485 of the naval station, and 76 other than native. The natives are of Chamorio stock, mingled with Flipino and Spanish blood. The language is a Malay dialect containing many Spanish words, but English is fast becoming the language of the island

CAPITAL, Agana. Port of entry, Apra.

# WAKE AND MIDWAY ISLANDS.

Wake Island, annexed in 1898, has an area of about x 84. Inite and lies in the N. Pacific about x,000 miles from Hawaii on the direct route to Hong Kong.

Midway Islands, with a total area of 28 sq. miles and a population (1930) of 25, he in the N. Pacific about 1,200 miles from Hawaii The group is administered by the U.S. Navy Dept.

# PORTO RICO.

Porto Rico (Rich Halbour) is an island of the Greater Antilles group in the West Indies, and lies between 17' 56'-18' 30' N lat and 65' 30'-67' 15' W. long, with a total area of 3' 435 square miles and a population of 1,543,073 at the census of 1930. Three fourths of the population are of Spanish devecut and about one fourth coloured. The island is about no most in the sense of 1930. Three fourths of the population are of Spanish devicent and about one fourth coloured. The island is about no most in the south at the western end, marrowing towards the eastern extensity. The capital is 1,400 miles distant from New York, and 98 miles from Key West. Porto Rico was discovered in 1493 by Christopher Columbus. It was explored by Ponce de León in 1509. It continued a Spanish possession until Oct. 18, 1898, when it was ceded to the United States as a result of the Spanish-American War. Sugar is grown in the low-lying districts, and tolacco and coffee on the slopes of the hills; fruits, cotton, maire, sweet potatoes, rice, and yams are also grown. The trade is principally with the U.S. About 344 miles of railroad were in operation in June, 1931, and there are good harbours at San Juan and Ponce. The legislature which consists of elective houses; the Senate, composed of 2 members (a from each of the 7 senatorial districts and 5 senators at large), and the House of Representatives, composed of 39 members (a from

each of the as representative districts and 4 elected at large). The term of the Lexislature is 4 years. The Governor is appointed by the President of the U.S. and holds office at the pleasure of the President. A Supreme Court of 5 members is also appointed by the President. There is a Cabinet composed of 7 heads of Departments, two appointed by the President and five by the Governor. The Governor also appoints all inferior judges. Great improvement has been made in the progress and welfare of the Island made in the progress and welfare of the Island during the present century-the Island is selfsupporting, free public schools are established throughout, a system of good roads reaches every important city and town, public buildings are attractive and well built, health and sanitary measures are in force. The capital, San Juan, had 114,715 inhabitants in 1930, other towns being Ponce (53,430), Mayaguez (37,060), Arecibo (12,863), Bayamon (12,996), and Caguas (19,791).

TUTUILA, AMERICAN SAMOA.

American Samoa consists of the island of Tutuila, Aunuu, Ofu, Olosega, Tau, and Rose Islands, with a total area of about 55 square miles and a population of 10,055 in 1930, distri-buted (1930) as follows:—Tutulia and Aunu'u, 7,809: Th'u, 1,243; Olosega, 4,28, Ofu, 466, Rose Island, uninhabited; and Swain's Island (annexed

May 13, 1925), 99.

Tutuila, the largest of the group, has an area of about 40 square miles and contains a magnificent harbour at Pago Pago, the capital and seat of government. The remaining islands have an area of about 16 square miles. Copra is the only

export of importance.

#### VIRGIN ISLANDS.

The three islands, St. Thomas, St. John, and St. Croix, in the Virgin Island group, West Indies, formerly the possessions of Denmark, were purchased by the United States from Denmark for the sum of \$25,000,000, and proclaimed, January 25, 2027. The total area of the islands is 132 80, miles, with a population in 1330 of 25,012. St. Thomas (25 80, miles) has a population of 25,512. Croix (64 80, miles) has a population of 155, the capital being Christianstad (or Bassin); St. John (20 84, miles) has a population of 755, the capital being Cruz Bay. St. Croix exports sugar; St. Thomas is famous for its bay rum. for its bay rum.

CAPITAL, St. Thomas, contains one of the fluest harbours in the West Indies, accommodating vessels of large draught, and has a large coaling and oil refuelling station. The climate of the Virgin Islands is delightful at all times, and particularly so during the winter months. Governor, Paul M. Pearson.

Government Sec., Boyd J. Brown.

THE PANAMA CANAL

The administrative organisation for the canal is known as "The Panama Canal." Its headquarters are at Balboa Heights, Canal Zone, with the Governor of the Panama Canal (Colonel Harry Burgess, U.S. A.) at its head. The first suggestion for a canal across the

Isthmus of Panama was made by a Spanish engineer in 1530, and surveys were actively engaged upon by various private companies between the years 1885 and 1890. In 1876 a concession for the construction of a canal was granted to a French promotion corporation, which conducted surveys during a period of two years, and reported to an international congress held at Paris in May, 1879, over which Ferdinand

de Lesseps presided. This congress advised the construction of a canal at sea-level, and in 1881 the work was undertaken by the Universal Interoceanic Panama Canal Company, of which de Lesseps was nominal head. The amount of work to be accomplished proved to be greater than was estimated, and resulted in the failure of the company, a receiver being appointed in rass, A new company was formed to carry on the work, and excavation was resumed in zee. This was continued until May 4, zood, when the United States Government took possession of the effects of the French company in Panama.

Congress authorised the President in roos to purchase the effects of the French company for purchase the effects of the French company for \$40,000,000. Meanwhile, a treaty was negotiated with the Government of Colombia for the cession, upon payment of \$50,000,000, of the territory through which the canal was to be constructed. The failure of the Colombian Government to ratify this treaty led to the secession of Panama on November 3, 1903. The new Government was immediately recognized by the United States and a treaty was sixual on the United States, and a treaty was signed on February 26, 1904, in which rights of sovereignty over a strip of land ten miles in width, extending across the Isthmus, were ceded to the United States. The caual is built through the centre of this territory. In 1922 a treaty between Colombia and the U.S. provided for the payment to Colombia of \$25,000,000 in satisfaction of all claims at sing out of the Canal controversy The independence of Panama was recognised by this treaty

Including the purchase of rights, payments to Panama, and construction and operation of the canal and its adjuncts, the total appropriations by Congress to June 30, 1931, were \$532,387,285.
The net revenue from tolls and other revenues (including business operations), to June 30, 1931,

agarregated \$1.51.656,478.
The Canni was opened to commercial traffic Aug. 15, 1924, and was closed from Sept. 18, 1915, to April 15, 1916.

The canal is fifty statute miles long (44'08 nautical miles), and the channel is from 300 to 2,000 feet wide at bottom. It contains zz locks, and transit from sea to sea occupies zo to za hours (passage through locks 5 hours). The least width is in Culebra Cut, and the greatest in Gatun Lake, where the channel can be made much broader at any time by the cutting down of trees and a small amount of dredging. The water depth when the surface of Gatun Lake is at 8s feet above sea-level varies from 8s feet

#### ABYSSINIA or ETHIOPIA.

Emperor, His Imperial Majesty Haili Sellassic I. Ras Makonnen, Governor of Harar); born 1891; crowned as Negus Oct. 1928; proclaimed Emperor April 2, 1930; crowned Nov. 2, 1930.

Crown Prince, H.I.H. Prince Asfa Wosan, eldest son of the Emperor, born July 27, 1926. Minister in London, Bajirond Zellaka. Aguediou. Legation, 83 Elin Park Gardens, S.W. 20.

The area of Abyssinia and its dependencies is estimated at 350,000 square miles, with an estimated population of xo to xx millions, of whom less than one-half are Abysinians and the remainder Gallas, negro tribes on the west and south frontiers, and Danakiis and Somalis on the east. The political neighbours are the Sudan, the Italian colony of Eritrea, French Somaliland, Butish Somaliland, Italian Somaliland, Kenya Colony and the Uganda Protectorate.

Abyssinia is volcanic and mountainous. contains some mineral wealth; iron and coal are not uncommon, and gold is washed in various streams, while mica, platinum, salt, saltpetre, and sulphur are also procurable. The lower country and deep valley gorges are very hot; the higher plateaus are well watered, with a genial climate. In the hotter regions, sugar-cane, cotton, coffee, rubber, &c., flourish; in the middle sone maize, wheat, barley, wild oranges and other fruit trees, tobacco, potatoes, &c., are cultivated; and above 6,000 feet are excellent pastures with some corn cultivation. There are pastures with some corn cultivation. Interest we seasons in the year, a dry winter and a rainy summer from June to September. The chief river is the Blue Nile, issuing from the Tsana lake; the Atbara and many other tributaries of the Nile also have their rise in the Abyasinian highlauds. Horses, mules, donkeys, oxen, goats, and sheep, and camels in the low-

lands, form a large portion of the wealth of the people.

The Abyssinians are Christian (a branch The Abyssinians are Christian (a branch of the Coptic Church), and their nulers claim descent from Menelek, the son of Solomon by the Queen of Sheba. The government is nominally an autocracy, but the Emperor's power does not yet extend throughout the country There is very little popular literature, but education shows signs of progress. In addition to foreign mission schools, there are Abyssinian schools in the country. Of which addition to foreign mission schools, mere are no Abyssinian schools in the country, of which 4 are in Addis Ababa. The potential army numbers between 600,000 and 1,000,000. The principal pursuits are agriculture and cattle breeding, the chief exports being coffee, civet, wax, indes, rubber and gold. The import duty, wax, indes, rubber and gold. except for non-spirituous liquors and for a few except for non-spirituous in a lors and for a con-articles on the free list, is to per cent. ad-valorem; there are certain consumption taxes collected additionally. A railway, which is under French control, links Addis Ababa, the capital, vil Dire Dawa, with Jibuti, 405 miles away. The Government post and telephone administration is under French management, and the Italian Government have a concession that gives them control of a telegraph line from Adds Ababa to Asmara. The principal towns besides Addis Ababa are Dire Dawa, Harar, Goré, Jinma, Debra Markos (the capital of Gojam), Adua (the capital of Tigré), Gondar, Sayo, Aksum, Antalo, Dembecha and Ijnbe. There are ancient architectural remains at Aksum, Gondar, and Ankoher.

CAPITAL, Addis Ababa (population fluctuates, but is ordinarily about 60,000). Harar, in Eastern Abyssinia, has a population of about

45,000. Total imports (about) ......£z,500,000 

BRITISH LEGATION Oriental Secretary, Ph. P. C. Zaphiro, C.M.G. Archivest, M. E. Taylor.

BRITISH CONSULAR OFFICES. Addis Ababa-Consul, Col. G. Mackereth, M C. Adata Ababa — Consul, Col. G. Mackereth, M. C. Dangila—Consul, Major B. E. Cheesman, O.B.E. Gorei—Consul, Capt. E. N. Erskine, M.C. Harar—Consul, C. H. F. Plowman, O.B.E. Jijiga—Consul, Maj.A.T. Milea, D.S.O., O.B.E., M.C. Maji—Consul, Capt. R. C. R. Whalley.

Adis Ababa is 500 miles from Zella, via Harar; letters from London are from so to 24 days in transit to Addis Ababa; train from Jibouti takes 2 days.

takes 3 days.

#### AFGHANISTAN

King of Afghanistan, H.M. Nadir Shah, born 1880, acceded Oct. 16, 1929.

Minister in London, H. E. Sardar Ahmad Ali Khan, 31 Princes Gate, S.W. 1.

Afghanistan lies on the N.W. frontier of India. Estimated area, 245,000 sq. miles, and pop. 5,380.500. It is bounded on the W. by Persia (boundary fixed 1857 and 1904), on the S. by Baluchistan (boundary fixed 1856-7), on the S. by Baluchistan (boundary fixed 1856-7), on the N. by Asiatic Russia (boundary fixed 1856-7), and on the E. by the N.W. Frontier Province (boundary fixed 1853). The northern boundary runs from Zulfikar on the Persian frontier to Kushk, the Russian railway terminus on the Iranch line from Merv, and thence N.E. to the Oxus, which forms the boundary from Khamiab to Lake Victoria, whence the line to the Chinese frontier was fixed by the Pamir agreement of 1853. The IndoAfghan frontier was settled by the Durand agreement of 1853. On this frontier from the Pamirs to the Gomal Pass are many Pathan tribes, who are much influenced by mullalis.

Mountains, chief among which are the Hindii Kush, cover three-fourths of the country, the clevation being generally over 4,000 feet. There are three great river basins, the Oxus, Helmand, and Kabul. The climate is dry, with extreme temperatures. The population is very mixed The Duranis have prodominated since 724-cspecially in Kandahar; next come the Ghilfais (military and commercial) and the Tajika (alonginals, who are cultivators or retail traders). All are Sumi Muhammadans, except the Hazaras and Kizibashes, who belong to the Shitte sect. The national tongue is Pushtu, but Persian is

more universally spoken.

Afghanistan is divided into five major provinces, Kabul, Kandahar, Herat, Turkestan, and vinces, Ramin, Randanar, Herat, Turkestan, and Badakshan (with Qataghan, Kafinitan (now Nuristan), and Wakhan), and four minor provinces, the Eastern, Southern, Farah, and Maimena, which are inder governors, with subordinate nobles and judges, police, and revenue officers. Amir Abdurrahman (1886–1901) established a strong central government, with a vertler civil and multivar or requestion. with a regular civil and inlitary organisation, including offices for public works, posts, police, finance, trade, &c. He first formed a national army, paid and controlled by himself. Con-siderable quantities of niles and artillery have been purchased in Europe and the army now consists of about 35,000 to 40,000 regulars. A small Air Force is maintained. Factories for arms and ammunition, and for various commercial products, have been creeted in Kabul. The Afghan laws are based on the "Shariat," or Islanne law and tribal custom. Recently steps have been taken to develop education, intherto controlled by the mullalis. Two schools under French and German superintendence respectively have been opened and a large number of middle and primary schools in the provinces. Most of the people are industrious cultivators, and the country has become fairly settled, peaceful, and prosperous. There are generally peacetul, and presperous. There are generally two crops a year, one of wheat (the staple food), barley, or lentils, the other of rice, millet, maize, and dal. Afghanistan is rich in fruits. Sheep and transport animals are bred. Silk, woollen, and hair cloths and carpets are manufactured. Salt, silver, copper, coal, iron, lead, rubics, lapiz lazuli, and gold are found. The roads are generally unsuitable for wheeled traffic, but are being improved. Goods are conveyed by pack animals. The chief trade routes to India are the Khyber Pass route, from Kabul to Peshawar (see miles), and the road from Kandahar to

Chaman (70 miles). The Sind-Pishm railway is now completed to the Baluchistan Persian frontier. The evports to India are mainly fruits and nuts, raw wool, skins and ghi; while the imports therefrom are chiefly cotton yarn and piece goods, metals, leather goods, tea, and sugar. There is a large export of wool to Persia and Russia, cotton and silk goods, sugar, &c., being taken in exchange. The annual revenue is unknown, and consists largely of payments in kind. It may amount to \$2,000,000. There are taxes on land, a grazing tax, enstoms duties, stamps, lines, receipts from State lands, monopolies, and factories, and mining royatities.

As the result of a Butish mission to Kabul in 1904-5 the engagements which had existed with the Amir Abdurahman since x880 were renewed by the treaty of March 21, 1905. By the Anglo-Emssian Convention of August, 1907, Russia de-clared Afghanistan outside the Russian sphere of influence. The Amir Habibullah Khan was assassinated on February 20, 1919; his brother, Nasıulla Khan, seized the throne by a coup d'etat and temporarily held the rems of government at Kabul, but the Amn's third son, Amanulla Khan, soon after declared himself, and was recognised as King. Afghan troops crossed the Indian frontier on May 2, 2929, on which the Indian Government took immediate steps to expel them; fighting followed and Dakka was occupied by British troops, but overtures were made by King Amanulla and a treaty of peace was signed in August. By this treaty Afghanistan is left officially free and independent. By treaty of Nov 22, 1927, Great Britain and Afghanistan agreed to respect one another's invernal and external independence; to recognise boundaries then existent, subject to a slight re-adjustment near the Khyber; to receive Legations at London and Kabul and consular officers at Dellu, Calcutta, Karachi, Bombay and Kandahar and Jalalabad respectively. The Afghan Government import free of customs duty such material as is required for the strengthening of their country. The export of goods to British territory from Afghanistan is permitted without payment of customs duty. A Trade Convention was concluded and Afghamstan adhered to the International Postal and Telegraphic Union. In 1929 Amanulla Khan, whose modernist reforms had brought on him the charge of infidelity, was expelled. After a using pation of some months by a local free-booter Kabul was captured (Oct. 1939) by Nadir Shah.

CAPITAI., habul (about 80,000). The chief commercial centre is Kandahar (60,000). Other provincial capitals are Heat (20,000), Mazari-Sharif (46,000), and Khanabad (5,000).

British Envoy Extraordinary and Minister Plenipotentury, Sir Richard Roy Maconachie, K B.E., C.I.E. (1929).

Counsellor, Maj W. K. Fraser-Tytler, M.C. Military Attacké, Capt. A. E. Farwell.

Surgeon, Maj. H. H. Elliott, M B.E., M.C.

Secretary, Capt. A. E. H. Macann

Ovental Secretary, Khan Sahib Sikander Khan. British Consul at Kandahar, Khan Bahadur Salyyid Siddiq Hassan British Consul at Jelalabad, Mufti Abdul Latif

Khan.

#### ALBANIA.

(Shqipenia.)
King of the Albanians, Zog I, b. 1895; elected
President, Jan. 31, 1925; proclaimed King, Sept. z, zga8.

Prime Minister (Mch. 4, 1930), Pandeli Evangjeli. Minister for Foreign Affairs, Hussem Bey Vrioni.

Minister in London, (vacant)

Legation, 134, Gloucester Terrace, W.z. [Pad.

o644]. Charge d'Affairs, Malik Bey Libohova.

Sec. of Legation, Atlanto Koci.
Consul-General in London, Edwin Cripwell,
119, Finsbury Pavement, E.C. 2 [Met. 8615.] Albania (the former Turkish Province of Scutari and parts of Kossovo and Yanina) lies on the west of the Balkan peninsula of south-eastern Europe, the western boundary being the Adriatic; total area about rx,000 to rs,500 sq. miles; total population (Census of r930) 7,003,r04. The political neighbours are, on the north and east, Yugoslavia, and on the south-east and south, Greece. Albania was declared independent by a National Assembly at Valona, Nov. 28, 1912, and its independence was confirmed by the Treats of London of Dec. 20, 1912 The first Treaty of London of Dec. 20, 1912 The first King of Albania (Prince William of Wied) abandoned the throne in Sept. 1914, having been in power only six months, and during the Great War the country was invaded by troops of the Central Powers and of the Allies, and iemained in a state of anarchy. After the Armistice a National Council at Dunazzo established a provisional government, supported by an Italian military occupation of the country. The independence of the country was realimed and guaranteed by the Supreme Council of the Allies The provisional government was in power until 1920, when a revolt overturned it and set up a new government which remained in power until upset by a further revolution in December, 1924. A new Constitution was proclaimed on Jan ax, A new Constitution was proclaimed on Jan 21, 225, under which Albana became a Republic under a President (elected for 7 years), with a Council of Ministers, a Senate, and a House of elected Representatives. On Sept. 2, 228, the Constituent Assembly proclaimed the country a democratic monarchy and offered the crown to Ahmed Bey Zogu, the President, who assumed the title of Zog I, King of the Albamans; the Senate then ceased to exist, and a High Council of State was formed of 10 members appointed by the King.

The country is very primitive, agriculture and sheep and goat rearing being the principal industries, and olives and olive-oil, grains and tobacco the pinicipal products; but there is some mineral wealth which remains largely undeveloped. A harbour, under construction at Durazzo to accommodate vessels up to 4½ metres draft alongside in all weathers, is expected to be completed in 1932.

BRITISH LEGATION. (Rruga Tomorica, Durazzo.)

British Envoy Extraordinary, Minister Pleni-potentiary and Consul-General, Sir R. Hodgson, 

Air Attaché, Group Capt. T. G. Hetherington,

C.BR. Archivist, F. W. Borman.

Albanian Secretary (local rank), Triphoni Toni.

BRITISH CONSULAR GAFICER.

Durazzo-Vice-Consul (local rank of and Secretaru), Edward H. L. Hadwen. Pro-Consul, F. W. Borman.

#### ANDORRA.

A miniature Republic in the Pyrenees, with an area of 175 sq. miles, and a population of 5,500; it is under the joint suzerainty of France and Spain. There is a Council of Twenty-four, elected by certain of the inhabitants, a judge, and two lay vicars appointed by France and the Spanish Bishop of Urgel.

ARABIA.

Arabia is a peninsula in the south-west of the Asiatic continent, forming the connecting link between Asia and Africa, and lies between 30° 30' -60° E. long. and 12° 45'-34° 50' N. lat. The -60° E. long. and rs° 45'-34° 50' N. lat. The north-western limit is generally taken from Akaba, at the head of the Gulf of Akaba, to a point in the Syrian Desert about 150 miles north-east, and thence northwards to a point about 50 miles due east of Damascus. The re-maining land boundaries are in the form of a house-shoe, encompassing the Syrian Desert, and descending in a south-easterly direction to the the whole of Mesopotamia and the Euphrates Valley. The other boundaries of Arabia are the Red Sea and Gulf of Aden, the Arabian Sea, and the Persian Gulf and Gulf of Oman. depending speaking, the peninsula consists of a plateau sloping from south-west to north-east towards the Euphrates Valley, except that the broad south-eastern promontory, which encloses the Persian Gulf, contains a coastal range in the Sultanate of Oman.

The total area is estimated at 1,200,000 sq. miles (of which nearly one-half is occupied by the Syrian, Nafud, and Dahna deserts), and the total population is believed to be about 5,000.000. The various Arab States are shown below:—

THE KINGDOM OF HEJAZ AND NAJD. King of the Hejaz and Najd and its Dependencies (Jan. 11, 1926), H.M. Abdul Aziz İbn Abdul Rahman el Faisal al Saud, G.C.I.E., born 1882.

Minister in London, Sheikh Hafiz Wahba, 42 Raton Place, S.W. r. (Sloane, 3898.) 1st Sec., Mahmood Riyad Zada. and Sec., Youssof Salama.

In the 18th century Najd was an independent State and the stronghold of the Wahabite sect. It subsequently fell under the Turkish yoke, but in 1913 the present King threw off Turkish rule and captured from the Turkish the Province of Hasa. In 1921 he added to his dominions the territories of the Rashid family of Shammar. which he captured by force of arms, and in 1925 completed the conquest of the Hejaz, and accepted the surrender of the greater part of Asi, the whole of which is now part of the Kingdom.

Najd ("Platean") has no definite frontiers, but may be said to extend over about 800,000 square miles of Central Arabia, including the Nafud and Dahna Deseits, and reaches eastward to the Persan Gulf (Hasa). The population is largely nomade and is estimated at x,275,000 Arabs, negroes and half breeds, the majority being Muhammadans of the Wahabite movement. There is little agriculture, but wheat and barley There is little agriculture, but wheat and barley are grown; the principal industry is camel and sheep raising. The exports are woven cloaks, dates, live stock, indes and skins. The capital is Rlyadh, and the principal trading centres are llufuf, on the Persian Gulf littoral (30,005) Shaqra, Analsah, Burada, Hail and Hauta (Central), which have populations of 8,000 to 70,000. The only ports (Persian Gulf) are Qutif and Ojair, which are suitable only for sailing cast. Evadh is a station on the Pleruns' Riyadh is a station on the Pilgrins trans-Arabian caravan route from Hasa to Mecca, and contains a large mosque, the "Westminster Abbey" of the Wahabites.

The Hejaz extends from Asir II S. to Transpordan IN N, and from the Red Sea, the Gulf of Akaba in the W. to the Ill-defined boundaries of Central Arabia. The coastline on the Red Sea is about 800 miles, and the total area is about 112,500 sq. miles, with a population of from 350,000 to 400,000, including many nomad tribes. On the coast are the small ports of El Wedj, Yambo, Rabigh and Jeddah (the chief port of the country and the pilgrins' port), which contains the reputed "tomb of Eve, the mother of mankind"; and inland are many mother of mankind"; and inland are many settlements t'ough which runs the course of the Hejaz Ra..way. The Oans of Khuidar, east of the railway, contains a considerable population, descendants of former negro slaves, with a centie at Kasr el Yahudi. The importance of the Hejaz depends upon the pilgrimages to the holy cities of Medina and Mecca. Medina (Al Medina, "The City"), Sao miles by rail from Damascus, and the present terminus of the Hejaz Railway, has a permanent population of about 20,000, and is celebrated as the bunal place of Muhammad, who died in the city on June 7, 522 (12 Rabin, A.H. 13). The Mosque of the Prophet (500 feet in length and over 300 in breadth) contains the sacred tomb of Muhammad. Mecca, the birthplace of the Prophet, is 55 miles east of the seaport of Jeddah, by road, and about see miles south of Medina, and has a fixed population estimated at 60.000. The city contains the great mosque surrounding the Kaaba, or sacred shrine of the Muhammadan religion, in which is the black stone "given by Gabriel to Abraham," placed in the south-east wall of the Kaaba at auch a height that it may be kissed by the devout pilgrin. Jeddah, the principal pot, has a considerable trade in hides, mother-of-pearl, coffee and carpets. The course of the Heaz Railway runs from Medina in 8, through the Syrian Desert to Damascus and Beirut, and is

connected with the projected Baglidad Railway at Aleppo.

Astr extends, geographically, from a line drawn inland from Lith on the southern limit of Hejaz to the northern boundary of Al Yenen (about lat. 17° 15' N.) and includes the seaboard down to lat. 16° 1 Its breath evtends about 180 miles eastwards to Bishah in the north and to the boundary of the Beni Yam in the south. According to Arabian geographers, Asır is part of Al Yemen. The territory includes the Farsan Islands. The maritime lowland is interspersed with feitile areas near the wadis, which afford pasturage and bear grain. The capital is Sabla. a small inland town.

The total cost to the British Government of the subsidies paid to King Ibn Sand during the years 1917 to 1923 is approximately £542,000. No subsidy was paid before 1917 or after 1923, and the subsidy was given in the first instance in consideration of assistance in the war against Turkey. The later p .yments were made subject to the following conditions

(1) That 1bn Sand reframed, and restrained his adherents from aggressive action against the Hejaz,

adherents from aggressive action against the Heas, knweit, and Iraq (a) That he afforded co-operation in the matter of the Hia (algrimage to Mecca) by maintaining the safety of pilgrim routes to his territory (3) That his consented to be guided generally by the wishes of His Mayesty's Government in regard to lay foreign policy, and to co-operate with them in pro-moting their own policy, which had for its object the minimum of peaceful conditions in Alab countries and the promotion of the economic interests of both builties.

No terms of repayment were anggested.

CAPITAL. Riyadh (pop. 20,000).

But sh Envoy Extraordinary, Minister Plenipotentury and Consul-General, Sir Andrew Rvan, K.B.K., C.M. G. (1930). Jeddah—Puc-Consuls, C. G. Hope Gill; T. Wikeley, G. W. Furlonge; Munshi Insanullah

Pro Consul, Basil W. Scager.

THE PRINCIPALITY OF KUWAIT.

Ruler, Sheikh Sir Ahmad al-Jabir as-Subah. K C.I E , C S.I , acceded March, 1921.

Knwart (or Kowert) has been semi-independent for many years, and is in treaty relation with British India It extends along the shore of the Persian Gulf from Mesopotamia to Najd (El Hasa). The important harbour and gulf port of Kuwait, the capital (pop. 60,000), is an entrepot for goods for the interior, and for the export of horses, pearls, wool, &c. It was designated as the terminus of the Berlin Constantinople-Baghdad railway as originally projected in 1903.
The trade of Kuwaii (1929 30) was valued at 27, 825 for imports, and £182, 900 for exports.
Buttok Political Agent, Lt. Col H. R. P.

Dickson, C I.E.

THE SULTANATE OF OMAN.

Sultan, H. H. Seyyid Sir Taimur bin Faisal bin Turki, K C I.E., C.S.I., boin 1886, suc Oct. 5, 1913. Oman (area 82,000 sq imles, estimated pop. 550,000) is a Muhammadan State in S E Arabia with a coast-line of about 1,500 miles along the Persian Gulf, the Gulf of Oman, and the Arabian Seafrom El-Katar to Ras Sair. The country, much of which is arid and desert, attains in Jebel Akhdhar an elevation of 10,000 feet. The population is chiefly Arab, but includes also a considerable foreign element—Indians, Persians, Baluchis and Swahili negroes. The Sultan is in treaty relations with, and subsidised by, the Government of India, who have a political agent at his capital. In rgr3, at the end of the reign of the last Sultan, the tribes of the Interior rose in rebellion, and, having elected their own Imam or Spiritual Ruler, have since administered the whole of Oman proper, the efforts of the Sultan to establish his control having been, up to date, unsuccessful. This rebellion has, with the war, interfered with the prosperity of the country. The Sultan is pledged not to cede territory to any Power but the British Government. Muscat has a considerable trade, amounting in 1929-30 to £459,446, and in 1930-31 to £415.275. Dates and dried fish are the chief export, and rice, wheat, coffee, cotton and silk goods the chief imports The capital, Muscat (with the sister town of Matrah), has an estimated population Of 12,600.

Muscat-British Count and Political Agent, Mai. T. C. Fowle, C.B.E., per mensem Rs. 2,300.

#### THE IMAMATE OF YEMEN.

Imam, Yahya Muhammad Hamid-ud-din, born x86q.

Yennen occupies the S.W. corner of Arabia between Asır and the Aden Protectorate, with an estimated area of 74,000 square miles and a population of 3½ millions. I uder Turkish rule, it was divided into the vilayot of Sana, Taiz, and Hodeida, and it extends inland to the borders of the Hadramut. The highlands and central plateau of Yemen, and the highest contral plateau of Yemen, and the highest portions of the maritime range form the most fertile part of Arabia, where wheat, barley, millet, coffee and oats, are extensively grown. The chief port of Yemen is Hoderda which is noted for the export of coffee, shipped from Hodelda to Masawa and Aden, and thence to Europe. The trade from Yemen perhaps exceeds that of the remainder of Arabia. The Iwan is the beed of the Yelli least of the Shah. Imam is the head of the Zeidi sect of the Shah Division of the Muhammadan religion; about half of his subjects are Zeidis, the remainder being Shafais, over whom he rules by force majeure alone. On the withdrawal of the Turks ndgetre aione. On the withdrawai of the Turks from Yemen, the Imam took over occupation of the territory bordering on the Aden Protec-torate populated by the Shafai sect of Sunni Muhamnadans, and also the Thams, or coast lands, from S. of Hodeida to Shelkh Said. Since reso the Imam of Yemen has been gradually encroaching on the Adeu Protectorate, which is populated by tribes of the Shafai sect, but has now been ejected by air action from Aden, in support of the Protectorate tribes. In 1985, the Imam occupied Hodieda, which had been evacuated by the Idrisi, and later took the ports of Midi and Loheiya, together with the intervening country between the highlands and the coast, all of which is populated by Shafai tribes. The rule of the Imam is very unpopular with the Shafais owing to his exactions. so miles to the south of Sani is the town of Dhammar, an ancient seat of learning.

CAPITAL, Sana; population, about 40,000.

#### BAHRAIN.

Ruler, H. E. Sir Isa bin Ali Al Khalifah, K.C.I.E. Heir Apparent and Regent, H. E. Shaikh Hamid bin Isa Al Khalifah, C.S.I.
Financial Adviser, C. Dalrymple Belgrave.
Political Agent, Capt. C. G. Pryor.

Bahrain is the largest of a group of islands (Bahrain, Maharaq, Sitra, Nabi Saleh and some uniuhabited islets) half way up the Persian Gulf near the Arab Coast (El Hasa). Hahrain is the headquarters of extensive pearl fisheries and a distributing centre for the adjacent mainland. Pearls are the principal export, varying in value from z to z millions sterling per annum. The principal imports are rice, cottons, dates, sugar and spices. The people (about zz,coc) are Muhammadans. Bahrain has been in treaty relations with the Government of India since 1820. In 1880 the ruler engaged not to make treatles with any other state and in xgs3 the active control of affairs was handed over to the present regent.

CAPITAL, Manama; population, about 25,000.

#### THE HADRAMUT TRIBES.

The coastal region of Southern Arabia, between Yemen and Aden on the west and Oman on the east, and extending inland (corthwards) to the Dahna Desert, contains a coastal strip of some 550 miles. Parallel with the coast (at a distance of 50 miles from the Arabian Sea) is an extensive plateau inhabited by the Hadharim, an ancient people of Arabian stock (Hadoram was the son of Jokan, Genesis x, 27. There are many settlements on the coast and in the interior, but the latter are being steadily enveloped by the sand of the northern desert. There are sacred shrines near Kasm (Qabr Hud) and Shibam (Qabr Sailth). The eastern districts, known as Mahra and Gara, are very sparsely populated. The estimated area of Hadramut is 82,000 sq. miles, and its Muhammadan population, of independent Arab tribes, is estimated at 150,000. The most important Coastal Chief at 190,000. The most important Coastal Chief is the Sultan of Shehr and Mokalla (H.H. Sultan Omar bin Awadh) who is in treaty relations with Great Britain. Inland, the most important tribe is the Kathiri, whose chief towns are Saiwun and Term. The Kathiri are noted as travellers and traders, and many of them are settled and carry on commerce at Singapore and Java. A long-standing feud between the Kathiri and the Qa'iti (by whom the former were expelled from the coast) was settled by treaty in 1919 on the initiative of the Aden Government. Under this Treaty the Ka'iti Sultan of Mokalla permits access to the port of Mokalla on the part of Kathiri traders. Agriculture and cattle raising are the principal industries, together with the cultivation of dates, indigo and tobacco.

#### TRUCIAL COAST.

The independent tribes on the Pirate Coast. which partly encloses the Persian Gulf from Ras-el-Kheima to Odeid, are bound under treaties with the Government of British India to maintain a maritime truce for the prevention of piracy and slavery, and for the cessation of hostilities at sea. Hence their chiefs are some-times called the "Trucial" chiefs. The British Political Resident in the Persian Gulf is the recognised arbiter and adviser of these tribes, and peace is maintained by the British flag. In rigs these tribes agreed not to enter into relations with, or eeds territory to, any other Power than the British. The trade of the coast ports largely consists in exports of pearls to India vid Lingah and Bahrain.

# ARGENTINE REPUBLIC. (República Argentina.)

*President of the Provisional Government, General José F. Uriburu (assumed office, Sept. 8, 1930).

Min. for Foreign Affairs, (vacant). Interior, Mg. Octavio Pico. Finance, Dr. Enrique Uriburu. Justice and Public Instruc., Dr. Guillermo Rothe. Agriculture, Dr. David Arias. War, General Francisco Medina Marine, Admiral Carlos Dairreaux. Public Works, Dr. Pablo Calatayud.

Commercial Counsellor, Senor Dr. Don Juan E.

Richelet.

Attaché, Señor Don A Soilingo Consul-General, Señor Don Ernesto C. Perez.

7 Gower Street, W C r.
There is a Consulate-General at Dublin, and there are also Consulates at Liverpool, Southampton, Cardiff, Netroastle-upon-Tyne, Netront, and Glasgow; and Vice-Consulates at Aberden, Belfast, Bristol, Hull, Manchester, Maddlesbrough, and Swansea.

Algentina is a wedge-shaped country, occupying the greater portion of the southern part of the South American Continent, and extending from Bolivia to Cape Horn, a total distance of nearly 2,300 miles; its greatest breadth is about 930 miles. It is bounded on the north by Bolivia, on the north-east by Paraguay, Brazil, and Uruguay, on the south-east and south by the Atlantic, and on the west by Chile, from which Republic it is separated by the Cordillera de los Andes. On the west the mountainous Cordilleras, with their plateaus, extend from the northern to the southern boundaries; on the east are the great plains, those in the north are thickly wooded and are known as El Gran Chaco, and further south he the treeless pampas, which together consti-tute La Plata, extending from the Bolivian boundary in the north to the Rio Negro; and south of the Rio Negro are the vast plains of Patagonia. Argentina thus contains a succession of level plains, broken only in Cordoba by the San Luis and Cordoba ranges, in the north-western states by the eastern spurs of the Andes, and in the southern portion of the Pro-vince of Buenos Aires by the Tandil Hills (about vince of Buenos Arres by the Islanda Hink (about 2,000 ft.) and the Sierra Ventana, near Bahia Blanca (about 3,000 ft.). The Parana River, formed by the junction of the Upper Parana with the Paraguay River, flows through the north-eastern states into the Atlantic, and is navigable thronghout its course; the Pilcomayo, Bermejo, and Salado del Norte are also navigable for some distance from their confluence with the Paraua. In the Province of Buenos Aires the Salado del

Samborombon Bay (Atlantic). In the south the Colorado and Rio Negro rise in the extreme west and flow across the pampas into the Atlantic, many similar streams in Patagonia (notably the Chubut and Santa Cruz) traversing the country from the Andes to the Atlantic.

The Republic is composed of 14 provinces and 20 territories, comprising in all about 1,132,000 square miles, with a population of ro,522,035 in roas. Immigration is encouraged, and comes principally from Spain and Italy, but legislation, introduced in 1919, requires intending immigrants to produce certificates of good character and ability to work. In 1929 the immigrants numbered 128,305, and the emigrants numbered 82,805. The climate is moderate. Spanish is

the language of the country.

Government.—The estuary of La Pinta was discovered in 1515 by Juan Diaz de Solis, but it was not until 1514 that Pedio de Mendoza founded Buenos Anes. In 1810 (May 25) Spaulsh rule was defied, and in 1826 (July 9) the Independence of Argentina was declared by the Congress of Theuman. In 1833, after more than thirty years of disturbances and civil wars, the country settled down, and is now a well-governed and progressive Republic. The constitution dates from 1853 (revised 1859) and is modelled on that of the U.S of America, but each province enjoys practically complete antonomy. The executive is in the hands of the President, who selects his Cabinet. The National Congress consists of a Senate of 30 members and of a House of Deputies of 160 members. Members of Congress receive \$18,000 (paper) per annum.

Production —Of the total area about one-third

is sritable for agriculture and cattle raising. The principal productions are wheat, maize, oats, linseed, sigar, wine, wool, hides, cattle, sheep, and horses. There were (1930) 31,974,000 cattle, 43,084,000 sheep, 9,839,000 horses, 523,416 nules (1922), 4,819,835 goats (1925), and 3,764,000 pigs (1930). The exports are made up entirely of pastoral and agricultural products, with the exception of quebracho, copper, manganese, and wolfram. In 1929 the exports of wheat were wolfram. In 1939 the expots of wheat were 6,613,000 metric tous, oats 43,000, casein (1939) 13,700, côtion (1938) 18,500 tous, linseed 1,617,000, maize 5,048,000 metric tons, butter (1930) 23,000 tous, wold (1930) 135,000 tous, sheepskins (1938) 19,400 tous, chilled meat (1930) 355,500 tous, frozen meat (1930) 8,700 tous, frozen mutton and lamb (1930) 8,000 tous. Oil has been found in various patts of the Republic and is worked to a considerable extent in the neighbourhood of Computers Ryselayis in the Purstream Comodoro Rivadavia, in the Department of Escalante. The Argentine State Oilfields produced 5,207,000 hairels in 1930; the output of private companies was approximately 3,702,000 barrels in 1930

Communications,-There were (1930) 23,795 miles of railroad open. The railroads are almost entirely in the hands of British companies, and absorb about £324,000,000 of British capital. Telegraphs about 75,850 miles, mostly Government lines. There are as wireless stations, of which one is reserved for communication between England and the Argentine. There are aeroplane services between Argentine centres. The principal ports are Buenos Aires, Rosario, La Plata, and Bahla Blanca. In 1930, 2,357 vessels (2,826,82a net tour) entered at all ports; of the total, 4,28,682 net tons (43'38 per cent)

were British. Defence -The Navy consists of a super-

Sud flows south-east for some 300 miles into Presidential Election was held in Nov. 1931.

Dreadnought battleships (reconstructed in 1925), 1 old cruiser, 2 destroyer leaders, 4 destoyers, 4 coast defence ships, and auxiliary vessels.

Two light cruisers, 3 destroyer leaders and 3 submarines are being obtained in Enrope.

Strength about 800 officers and 14,000 men. The principal naval base is at Puerto Belgrano, near Bahia Blauca, and there are minor bases at La Plata and Buenos Aires, while a new submarine base is being built at Mar del The naval aviation base is at Puerto Belgrano, with a subsidiary base at Punta Indio. The Army is organised in 5 divisions, and numbers about 1,500 officers and 25,000 men on a peace footing. Each divisions would consist of about 40,000 men on a war footing.

Education .- Primary Education is secular, free and compulsory from the ages of 7 to 14. The scattered population of the country districts constitute a problem in attendance which is being gradually solved Secondary Education is controlled by the National Government in National Colleges, mumbering 5r in 1929, with 17,600 students, average annual fees \$45 (paper); 17,600 students, average animal rees \$45 (paper); in Normal Schools, numbering 86 in 1923, with 30,000 students who pay no fees; and in 60 Special Institutes for Commerce, Arts and Crafts, Mining, Agriculture, &c. There are National Universities at Cordoba, Bisenos Aires, There are National Universities at Cordoba, School, Special Control of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of La Plata, and Incuman, and Faculties at Santa Fé. Social Weljare, J. Resch.

Minister in London, Baron George Franckenstem, 18 Belgrave Square, S.W. 1.

Counsellor, Baron Lothar Wimmer. Secretary, Count May Attems. Consul-General, Charles D. Seligmann.

Prior to the War the Austrian Empire, joined Prior to the War the Austrian Empire, foined to the Kingdom of Hungary, was the largest Empire, next to Russia, on the continent of Enrope, situated between 45°-55° N. lat. and 9° 30'—26' 20° E long It embaced an area of 240,456 80. miles, and a population (1914) of energy 53,000,000. At the conclusion of the Great War, the territories of Austria comprised an area of 27 275 Supra miles with a resolution an area of 32,175 square miles with a population (1923) of 6,534,481 (estimated Dec. 31, 1927, at

6,678,527).
On June 28, 1914, the assassination of the Austrian Archduke Francis at Sarajevo (Bosnia) was presented to be the outcome of a plot fostered by Serbia, and after negotiations an ultimatum was presented by the Empire to the Serbian Government (July 33), and non-com-pliance with its terms led to the European War of 1914-18. Before the armistice of Nov. 11, 1918, the Hungarians, Czechoslovaks, Poles, Jugoslavs and Rumanians had seceded from the "Dual Monarchy," and a Republic of "German Austria" was declared Nov. 12, 1918, the throne being abdicated by the Emperor Karl (Nov. 28,

1918). Under the Treaty of St. Germain (Sept. 10, 1919) the political neighbours of Austria are Germany and Czechoslovakia on the N.; Italy and Yugoslavia on the S.; Switzerland on the W., and Hingary on the E.

Under the new Constitution (Nov., 1980), Austria became a Republican Federation of eight Provinces :-

Province.	Area (sq miles).	Population 2923.
Lower Austria and Vienna Upper Austria Carinthia Styria Salzburg Tyrol Vorarlberg Burgenland (West Hungary)	4,627 3,679 6,320 2,765 4,881	3,346,229 876,074 370,817 978,841 223,02 313,881 139,991 285,605
Total	32,175	6,534,481

Under the Constitution the Bundesrat and Nationalrat were constituted; a government formed, and a President elected; Vienna was later formed into a separate Province. elections resulted in a majority for the Christian Socialists over the Social Democrats, the Pan-Germans coming next in order. In June, zosz, the Ministry resigned in favour of a non-party Government, which gave way (May, 1922) to a Christian Socialist Pan-German Coalition Government under Doctor Selpel (a priest). Elections were held again in October, 1923, March, 1927, and November 1930, and a similar Government was returned on each occasion

Complete religious liberty is one of the funda-mental laws of the new Republic. The prevailing

religion is Roman Catholic.

Defence. - During the War of 1914-18 about 5,000,000, all ranks, were passed into the common Army of Austria-Hungary. The total casualties exceeded 8,500,000, of whom over 700,000 were returned as killed. Under the Treaty of St. Germain the military, naval and air forces were demobilised and reduced to minimum requirements and all warships were surrendered to the Allies, those under construction being broken up Service in the Republican Army is by voluntary enlistment for twelve years.

Education .- Primary education is compulsory and free, the children in attendance at schools numbering about 720,000 in 1927. Secondary education is provided in gymnasia, and real-schools and there are universities at Vienna,

Graz and Innsbruck.

Finance.—The finances of Austria went from bad to worse for four years after the Armistice. owing to heavy deficits and incessant inflation The deficit on the State Budget was estimated in July, 1983, at considerably more than one value of the crown had sunk to about one-fifteen-thousandth of its nominal value, £x being equal to 325,000 crowns (in place of 24'22). The circulation on Sept. 30, 1922, was over two billion crowns. In September and October, 1922, the League of Nations worked out a scheme for the restoration of the Austrian finances within two years under the control of a High Commissioner appointed by the League, the Governments of Great Britain, France, Italy, and Czechoslovakia agreeing to guarantee four-fifths of a loan of 520,000,000 gold crowns (about \$35,000,000) in order to fill the deficit in the Budget during the two years. The guarantees for the remainder were given by other powers

and a short term loan of £3,500,000 was issued in March, 1922. In the following June the big League of Nations loan was successfully floated, nearly one-half in London, about £5,000,000 in New York, and the rest in various continental capitals. The sum actually received amounted to over £26,500,000. About £11,000,000 was used to repay the previous short term loans made in 1922 and 1923. The High Commissioner, Dr. Zimmerman, appointed by the League of Nations to supervise the carrying out of their scheme for the reconstruction of Austria, entered on his office in Dec. 1922. Great progress has been made since in reducing Government expenditure and increasing the revenue. about 79,000 superfluous officials were dismissed or pensioned off by the end of December, 1924, and on the completion of the work of reconstruction Dr. Zimmerman left Vienna in July, 1026. The issue of uncovered bank-notes was stopped on Nov. 18. 1922, and the Austrian crown was stabilised at about Crs. 345,000 = £1. In rgsg a new currency was introduced, the unit being the Austrian schilling (=10,000 paper Crowns), the rate of exchange in Sept., rgsg, being 34.37 sch. = £1 sterling. Since the Armistice (Nov. 11, 1918), the Bitish Government has advanced about £10,000,000 to the Republic. The favourable condition of the Austrian State lasted until 1929, but in 1930 there was a small deficit on working account and in 1931 measures were passed to reduce expenditure and increase revenue

Receipts Current Expenditure	£43,300,000 38,400,000	±43,600,000 44,000,000
Working Surplus	4,900,000	•••
Deficit	•••	400,000
Capital Expenditure	4,200,000	7,200,000

In 1930 and 1931 Austria has been severely affected by the general trade depression which caused an increase in the number of unemployed, a falling off in production and foreign trade, and a decline in the revenue In May 1931 the leading bank, the Oesterreichische Credit Anstalt. got into difficulties and had to be supported by the Government. In order to reheve the strain on the Austrian National Bank, the Bank of England advanced 54,300,000 to the Austrian Government on June 16. In August 1931 the Austrian Government applied to the League of Nations to make an enquiry into its situation, and experts were sent.

Total Imports ...... £95,960,000 £79,283,000 63,930,000 54,574,009 Total Exports ....... Imports from U. K. 54,574,009 2,708,000 3,450,000 2,950,000 Exports to U. K. ... 2,820,000

Communications—In Sept, 1919, there were about 4,140 nulles of railway (exclusive of narrow guge lines). The mercantile marine was considerable in 1914, but the new Republic is land-locked.

Industries -The principal industry is agriculture, the chief products being wheat, barley, stock raising are important. The focests are principally comfronts trees. The live-stock includes horses, cattle, sheep, pigs, and goats. The vine is extensively cultivated. The most important mineral production is that of iron ore, magnesite, and salt; there are also lead, zinc, copper, common and brown coal, and graphite. The principal manufactures are woollens, cottons, steel, wood-work, brewing, and machinery. CAPITAL, Vienna, on the River Danube. Pop. (1993) 1,865,780; other large towns are Grac (125,706), Linz (102,081), and Innsbruck (26,401). FLAG: Three horizontal bands, red, white, red.

on the N. by the Kingdom of the Nether-lands, on the S. by France, on the E. by Ger-nany and Luxemburg, and on the W. by the North Sea. The kingdom formed part of the "Low Countries" (Netherlands) from 1815 until Oct. 14, 1830, when a National Congress pro-claimed its independence, and on June 4, 1831, Prince Leopold of Coburg was chosen hereditary king. The separation from the Netherlands and the neutrality and inviolability of Belgium were guaranteed by a Conference of the European Powers, and by the Treaty of London (April 19, 1839), the famous "Scrap of Paper," signed by Austria, France, Great Britain, Prussis, The Netherlands, and Russis. On Aug. 2, 224, the Germans invaded Belgium and ultimately over-came the resistance of the fortresses and overran almost the whole country. In revenge for the heroism of its defenders the Germans sacked and destroyed many cities, burning Louvain (with its library), Termonde, and other places, and established a reign of terror. They levied a war contribution on Belgium of close on £x00,000,000, apart from enormous fines on localities, firms, and private persons. On Friday, Nov. 15, 1018, at the great turn of the tide, Antwerp was reoccupied by the victorious Belgian army, and Brussels and the remainder of Belgian soil a few days later. About 10,000 persons were added in 1919 by the cession of Moreanet and part of Malmedy by Germany, and the district of Eupen, with the remainder of the district of Malmedy, were ceded by Germany and annexed by Belgum (Sept. so, 1920) after a plebiscite, thus adding a further 50,000 to the inhabitants.

miniotiants.
French and Flemish are the joint official languages, but while French is the language of the upper classes, Flemish is spoken by the majority, preponderating in Flanders, Limburg, and Babant, including Antwerp. Nearly all the inhabitants are, at least nominally, Roman

Belgium has a frontier of 831 miles, and a seaboard of 4s miles. The Meuse and its tributary the Sambre divide it into two distinct regions, that in the west being generally level and fertile, whilst the table-land of the Ardennes, in the east, has for the most part a poor soil. The "polders" near the coast, which are protected by dikes against floods, cover an area of 193 sq. miles. The highest hill, Baraque Michel, rises to a height of 2,230 feet, but the mean elevation of the whole country does not exceed 536 feet. The principal rivers are the Schelde (Escant) and the Mass (Meuse). Brussels has a mean temperature of 5° F. (summer 65°, winter 37°). GOVERNMENT.—The constitution jointly vest the legislative power in the King, the Senate, and the Chamber of Representatives. The 194 senators with the execution of sealered by

senators (with the exception of 40 elected by the provincial councils and 20 elected by the senators themselves) and 287 representatives are elected by the people, the former for eight, the latter for four years Universal male suffrage, with plural voting up to three votes by property and educational qualifications, was introduced by the Electoral Law of 1894, proportional representation being secured by an Act of 1900. In April, 1919, the Belgian Parliament decided as an emergency measure to hold 2019 elections on a "one man one vote" basis for Senate and Chamber. (Unmarried widows of soldiers enemy; women imprisoned by enemy for patriotic acts, also voted.) This Parliament, anomalous, and unconstitutionally elected, was required to make constitutional the machinery by which it was elected; i.e., to revise article 47 of the Constitution. This was revise article 47 of the Constitution. In swins done (Feb 7, 1921) and a new Chamber was elected in 1925. The present Chamber (elected in May, 1925), consists of 7, 'tatholics, a8 Liberals, 70 Socialists, 11 Frontists (extreme Flemish Nationalists), and 1 Communist. Deputies receive 42,000 france a year and a free pass over the railways. There are in addition representative Provincial and Communist Provincial and Communal representative Councils, elected on a somewhat more liberal

PRODUCTION.—Agriculture and forestry are important industries, the chief crops being oats, rye, wheat, potatoes, bailey and sugar-leet Under Annex IV. of the Treaty of Versailles Germany undertook to deliver to Belgium certain livestock to replace the animals seized or destroyed during the War of x914-x918. Belgium is essentially a manufacturing country, and it is largely dependent upon foreign supplies for its food. The mineral kingdom yields coal, iron, zinc, lead, and copper. The leading industries are colli-eries, quarries, and metallurgic (Mons, Charlero), eries, quarties, and mecanurgic (atons, onarietos, Liège, Namur, Hannaut, Brabant, and Limbourg), glass, textiles (Ghent and Vervicis), lace (Brussels, Mechlin, Bruges, &c., flour and starch mills, sugar, distilleres, breweries, &c.

DEFENCE,—In 1928 a new Recruiting Law was

passed, entailing compulsory service for an average of 12 months, including rappels. The annual contingent is fixed at 44,000, and the Army consists of a Field Army of 3 Corps, each of a Divisions, and 1 Cavalry Corps of a Divisions. EDUCATION.—Schools are maintained by com-

munal taxation, with provincial and State grants, while many are under ecclesiastical control. Roman Catholic largely predominating. There are 134 State high schools, including 44 for guls, and numerous private institutions. Special schools abound. The Universities of Gheut and Liège are maintained by the State; those of Brussels and Louvain are free institutions Louvain University has been rebuilt After considerable opposition, and by way of a compromise, Ghent University, which had hitherto transacted its business and given its teaching in French, was in 1923 made bi-lingual, many Flemish lectures being substituted for French, and Flemish becoming the official language of the University.

francs), manufactured articles (15,995,266,000) and foodstuffs and beverages (1,932,952,000) and live animals (152,642,000).

COMMUNICATIONS.—In 1929 there were 4,800 kilometres of State railways (normal gauge) and 5,137 kilometres of narrow gauge. In 1929 there were 48,000 kilometres of telegraph wire. The navigable rivers and canals have a wire. The navigable rivers and canals have a length of x,syx nules (xsys), and there are 6,xy7 miles of roads. Most of the maritime trade of Belgium is carried on in foreign bottoms, the mercantile marine consisting (xsys) of x60 vessels (xso,310 tons), in addition to which there were xsx sishing boats in xsyo, x8,4x3 vessels entered at Belgian ports (tounage xs,xx3,7yx). The principal port and commercial enterpot is Antwerp, on the Raver Scheldt. Other ports are Ostend, Glent, Bruges, Nicuport, Blankenburg and Zeebrugge (blocked by the Blankenburg and Zeebrugge (blocked by the British Fleet April 23, 1918, and since repend for traffic). The vexed question of the Scheldt, of waich the right bank is in Netherlands training and the scheldt. Netherlands territory and the left in Belgium, appears likely to be settled by negotiation between the respective Governments. navigation is to be free to both countries, from the mouth to Antwerp, and the Netherlands war vessels are to be removed from the river.

The Capital, BRUSSELS, had a population (Dec 3x, x930) of 885,924 (with suburbs). Other towns with over x00,000 inhabitants are Antwerp, the chief port (451,334), Ghent (808,539), which has large cotton and flax spinning mills, and is the second port of importance after Antwerp, while its flower shows are famous; and Liège (169,566) the centre of the iron industry. #### THE BELGIAN CONGO.

Governor-General, His Excellency Lieutenant-

General Auguste Constant Tilkens. The Independent State of the Congo, founded in 1885, became a Belgian Colony on Nov. 15, 1908. Situated between long. 12°-31° E. and lat. 5° N.-13° S, the colony comprises an area of 909,654 similes, with a native population estimated (1918) at 10,000,000. The total European population (Jan., 1930) was 25,679, of whom 17,676 were Belgians, 1,392 were British, 1582 Portuguese, 1,490 Italians, 717 French, 695 Greeks, 544 Americans, 315 Swiss, 350 Dutch, and 918 others of various nationalities.

The Congo River is navigable for large vessels from its mouth at Banana to Matadi (95 miles), where the European steamers discharge and recharge their cargo; but between that place and Leopoldville, on Stanley Pool, there occur rapids and falls which have been avoided by a railroad 249 miles in length. A narrow-gauge line runs from Boma to Tchela in the Mayumbe (86 miles). Above Leopoldville the river and its numerous affluents are navigable by steamer for about 7,000 miles, the falls on the Upper River being avoided by a metre-gauge line from Stanleyville to Ponthierville (78 miles) and another from Kindu to Kongolo (325 kilometres). Another line from Kabalo to Albetville on Lake Tanganyika (170 miles) connects the West Coast of Africa with British East Africa and the East Coast. The Katanga-Bukama Railway (446 miles) links up the Rhodesian Railway system with the steamers bying on the Univer Coayes River conjecting plying on the Upper Congo River, connecting with both the East and the West Coast. The Bukama-Port-Franqui Railway (702 miles) commenced in 1923 and opened in 1938 makes it possible to travel by train direct from Cape Town to the river Kasai, a distance of 3,400 miles. This new route plays an important part in the export of copper from the Katanga mines, in the expot of copper from the Ratanga mines, its possibilities being limited only by the capacity of the Port of Matadi. Other railways are Kindu-Kongola (223 miles), Aket-Bondo (95 miles), Charlesville-Makumbi (56 miles) and Manono-Mayumba (22 miles), making a total for mannon-nayimit (3s innes), making a total or the Colony of s, rrs miles. A new huc has been completed from Katanga to join the recently completed Benguela Railway in Portuguese Angola, and work has been started on a line from Stanleyville to Lake Albert which will provide the last link to direct river and rail communication between the Cape and Cairo. Regular air services are established from Boma to Leopoldville, Luebo and Elisabethville, from Luebo to Kabalo and from Leopoldville to Coquilhatville. Motor roads total over 6,250 The most important motor road is the Route Royale Congo- Ail (563 miles from Djamba, on the Rubi, to Redjar, on the Nile. Another uns from Bukama (vvi Kanda-Kanda and Luebo) to Djoko-Punda, on the Kasaı (625 miles). A complete system of telegraphic communication has been established throughout the Colony and is connected with the international system.

The West Coast District has rather scanty rain (40 inches), but on the Mayumbe Hills and in the whole interior the rainfall averages between 60 and 80 inches, and the country is very fertile and productive. Sleeping sickness, once very mevalent and destructive, is now decreasing. Extensive forests cover the central districts; oil palms are plentiful everywhere, and supply

an ever-increasing trade in palm-oil and palm-kernels. Cotton, cocoa, rubber and coffee are successfully planted. The Colony is rich in minerals. Extensive radium deposits exist in the Katanga which has also enormous deposits of copper, and the smelters at the Lubumbashi produce about 10,000 tons mouthly (1925). Bukama is the centre of an extensive tin-belt, and alluvial and reef gold are found in the North-eastern Congo. Diamond-bearing gravels are worked in the south. The chief exports are palm-kernels the south. The chief exports are paint-kerners and palm-oil, ectton, cocoa, gum-copal, rubber, ivory, copper, gold, tin, radium, and diamonds. Capital, Leopoldville (pop. 2,765 whites). Principal towns, Boma (pop 420 whites); Elasabethville (Katanga) (pop. 3,084 whites); Stanleyville, Eastern Province (752 whites); Coquilhatville (406 whites).

Ruanda and Urundi (ceded July, 1919) formed the NW. corner of German East Africa from 5' S. lat to the S borders of (British) Uganda and have an area of about 15,000 square miles, with an estimated population of 3,000,000. They lie W. of the Victoria Nyanza and N.E. of Lake Tanganyika, through which are their respective outlets. The soil is poor, and the only exports are live-stock and hides. The administrative capitals are Niauza (Ruanda) and Kitega (liundi), the commercial capitals being Kigali (Ruanda) and Usumbura (Urundi).

Envoy Extraordinary, Minister Plenipoten-trary in London, Schor Don Carlos Victor Arannayo, 16 Glosvenor Place, W. z. xst Secretary, Schor Don Mamerto Urriolagoitia. Secretary (Specially Attached), Schor Don Eduado Aramayo

Endario Aramayo Frinancia! Counsellor, Señor Carlos Navarro Military Attache, Col. Meliton Brito. Attache, Pastor Llobet.

Consul-General, Senor Don Mamerto Urriolagoitia, 16 Grosvenor Place, W. 1

The Republic of Bolivia extends between lat. The Republic of Bolivia extends between lat. 8° and 23° S. and long 57° 30° and 73° W., and its area is officially estimated at 594,460 square miles (other estimates giving an area of 708,125 square nules), with an estimated population of 2.911,283. The Republic derives its name from its liberator, Simon Bolivar (born 1783, died 1830).

The chief topographical feature is the great central plateau (6,500 square miles) over 500 miles in length, at an average altitude of z2,000 feet above sea level, between the two great clains of the Andes, which traverse the country from south to north, and contain, in Illampu (Sorata), and Illimani, two of the highest peaks of the western hemisphere. The total length of the navigable streams is about 12,000 miles, the principal rivers being the Itenes, Beni, Mamoré, and Madre de Dios.

Mining and agriculture are the principal in-dustries, the mineral productions being very valuable. The ancient silver mines of Potosi are now worked only for tin, but gold, partly dug and partly washed, is obtained on the Easten Cordillera of the Andes; the tin output is, after that of the Straits Settlements, the largest in the world, while copper, antimony, wolfram, bismuth, salt, and sulphur are also found. Its agricultural produce consists chiefly of rice, barley, oats, maize, cotton, coca, indigo, indirubber, cacao, potatoes, cinchonia bals, medicala herbs, &c. Manufactures are in a very undeveloped state. The principal exports are tin and silver ores, crude rubber, copper ores, bismuth, lead ores, wolfram, wool, coca, hides, and antimony; the chief imports are iron and steel products, textiles, machinery, sugar, flour, and coal. There are (1999) 1,374 miles of railways in operation, and the construction of a line from Cochabamba to Santa Cruz, in two sections of 115 and 110 miles Cruz, in two sections of xxx and xxo miles respectively is m the preliminary stages. There are 4,000 miles of telegraph wire, and wireless services between Euberalta, La Paz. Cobija, Capitandi (Chaco). There is direct railway communication to the sea at Antofagasta (a days), Anea (x day), and Mollendo (a days), and also to Buenos Aires (3½ days); branch lines run from Oruro to Cochabaniba, and from Rio Mulato to Potosi. Construction on the railway between La Quiaca (on the Argentine frontier) and Atocha (in Bolivia) is now compensation. frontier) and Atocha (in Bolivia) is now com-pleted. There is through railway communica-tion with Buenos Aires from La Paz. Communication with Peru is effected by rail to Gnaqui and thence by steamer across Lake Titrcaca to the railroad at Puno. The principal line is the Antofaçasia and Rolivia railroad (729 miles), and a line from La Paz to the province of Yungas (the first section of which is open) may eventually connect with the steamers on the rivers Beni, Mamoré, and other tributaries. A line from Potosi to Sucre, the legal capital, is under construction, and trains run to Betanzos.

Bolivia is without a sea-coast, having been deprived of the ports of Tocopilla, Colnja, Mejillones, and Antofagasta by the "Pacific War" of 1879-1882 (see Chile). The Peace Aimy amounts to about 5,000, all ranks, the War Effective being about 105 000.

Faro Brazil, the most extensive State of South America, discovered in 1500 by Pedro Alvares Cabral, Portuguese navigator, is bounded on the north by the Atlantic Ocean, the Guinnas, Colombia and Venezuela; on the west by Peru, Commin and venezuers; on the west by Perri, Bohrvia, Paragriay, and Argentina; on the south by Uruguay, and on the east by the Atlantic Ocean; and extends between lat. 5° zo' N. and 33° 45'S. and long. 34° 45' and 73° 59' zz' W., being 2,32 unles from north to south, and 2,321 from west to east; with a coast-line on the Atlantic of 3,577 miles The Republic comprises an area of 3,358,870 square miles, with a population (('cusus 1920) of 30,635,605, estimated at 30.103,856 in 1928

The northern States of Amazonas and Para are manuly wide, low-lying, forest-clad plains. The central state of the Matto Grosso is principally plateau land and the eastern and southern States are traversed by successive mountain ranges interspersed with fertile valleys. In the extreme south, towards the interior, the land rases by gentle gradations to the height of a,ooo to 5,000 feet above sea level. The principal ranges are Serra do Mar in São Paulo, the Serra

Geral (Caparao 9,393 feet) between Minas Geraes and Espirito Santo, the Serra do Mantiqueira (Itatiaya, 9,63 feet), and the Serra do Espirihaço (Itacolumi, 5,748 feet), in the south-east of Minas Geraes; the Serra do Paranán, between Goyaz and Minas Geraes, the Serra dos Aymores, which divide Espirito Santo from Minas Geraes; and the Serra da Gayyucia, Branica and Ararips, which envelop Plauhy.

Brazil is unequalled for its rivers. The River

Brail is unequalled for its rivers. The RiverAmazon has tributaries which are themselves
great rivers, and flows from the Peruvian Andes
to the Atlantic, with a total length of some 4,000
miles. Its principal northern tributaries are the
Napo and Maranon, the Putunayo or Ica, Rio
Branco, Rio Negro, and Japura: its southern
tributaries are the Jurua, Purua, Madeira and
Tapajos, while the Xungu meets it within aco
miles of its outflow into the Atlantic. The
Tocantins and Aragnaya flow northwards from
the Plateau of Matto Grosso and the mountains
of Goyaz to the Gulf of Para. The Parnalyba
flows from the encircling mountains of Paulhy
into the Atlantic. The São Francisco risos in
the South of Minas Geraes and traverses Bahla
on its way to the Eastern coast, between Alagons
and Sergipe. The Paragnay, rising in the southwest of Matto Grosso, forms a boundary with
Bollvia on its way through Paragnay to its confluence with the Parana, which rises in the
mountains of that name and divides Brazil from
Paragnay On the Iguassu, which unites with
the Urugnay at the Argentine boundary, are the
majestic Palls of the Iguassu, and on the São
Francisco are the no less famous falls of Paulo

GOVERNMENT.—Brazil was colonised by Portugal in the early part of the sixteenth century, and in 1822 became an independent empire under Dom Pedro, son of the refugee King Joho VI. of Portugal, the centenary of Brazilian independence being celebrated by an International Exhibition at the capital (Sept. 7, 1922, to July 2, 1923). On Nov. 15, 1886, Dom Pedro II, second of the line, was dethroned and a republic was proclaimed. The constitution rests on the fundamental law of Feb 24, 1891, which established a federal republic under the name of Estadow Unidos do Brazil. The President and Vice-President are elected for 4 years by the direct votes of all male Brazilians over 21 years who can read and write; they are ineligible for the succeeding term. They are aided, as an executive, by a Council of Ministers, who are responsible to the President and not to the legislature. Congress consists of a Senate of 63 members and of a Chamber of Deputies of 222 members; members of both houses are paid. The language of the country is Portugues of respectively languages being read and spoken in the following order:—French, Italian, English, German and Spanish.

Propuction.—The milierals are very considerable and valuable, comprising gold, silver, iron, diamonds, topazes, and other precious stones. The immense iron deposits have been scarcely touched. Manganese is exported, and there are important deposits of monozite saud. Low-grade coal deposits are in the south. Its agricultural produce is abundant and its forests are immense. Cattle-raising is an important industry, the number being 34,270,324 (Census of 2920). The chief products of the country are coffee, maize, sugar, raw cotton, hides and skins, cocca, cleaginous fruits, herva-maté, rubber and tohacco: the

rubber comes from the more northern provinces, especially the valley of the Amazon, and is shipped from Pariand Maukos; coffee coming chiefly from São Paulo. Tobacco and cocoa are grown largely, especially in Bahia. Cotton is being largely cultivated. Sugar-cane is grown in large and increasing quantities in the northern provinces, Pernambuco being the centre of the sugar-producing zone. The exports include also meat, hides, maize, beans, and herva-maté (tes). The principal imports are machinery, wheat, iron and steel products, cotton goods, and coal and coke.

DEFENCE—The peace effective of the Army is about 54,910 all ranks. The Navy consists of a Dreadnoughts, r battleship, xr destroyers, r tender, 4 submarines, and some small vessels and siteraft.

EDUCATION.—Primary education is carried out by private initiative and at the cost of municipalities and States, in some cases with a Federal subsidy; there were 1,783,577 pupils in 1928. Secondary and Technical education is carried out by Federal, State and Municipal authorities, with 2,40 pupils in Federal schools, 7,975 in State and Municipal institutions, 43,652 in private schools, and 24,658 in technical institutes in 1928. Higher education (1,7,657 students in 1928) is carried out by Federal and State governments at the State University of Rio de Janeiro, and at the University colleges at Manaos (Amazones) and Curityba (Parana) and other private colleges.

and other private colleges.—In January, 1939, there COMMUNICATIONS.—In January, 1939, there were 19,840 miles of railway open. Length of telegraph lines, about 75,000 miles. In 1938 steam and saling vessels of 44,154,974 tons (of which 8,790,384 were under the Birtish flag) entered Brazilian ports, the principal harbours being Mandos, Pará, Maranhao, Pernambuco, Maceio, Bahla, Victoria, Rio de Janeiro, Santos, and Rio Grande.

Press Secretary, Dr. T. Tchitchovsky. The Kingdom of Bulgaria is bounded on the porth by Rumania, ou the west by Yuco-Slavia

north by Rumanna, on the west by Yugo-Slavia and Greece, on the east by the Black Sea, and on the south by Greece. The total area is stated at 39,824 square miles, with a population (Dec. 31, 1930) of 5,944,000. The prevailing religion of the Bulgarians is the Eastern Orthodox Church. For secular purposes, the Gregorian (Western) Calendar is in use.

Calcinuar is in use.

A Principality of Bulgaria was created by the Treaty of Bertin (July 13, 1878) and in 1885
Eastern Roumelia was added to the newlycreated principality. In 1908 the country was declared to be an independent kingdom, the area at that date being 37,202 square miles, with a population of 4,337,500. In 1918-13 a successful war of the Bulkan League against Turkey increased the size of the kingdom, but in August, 2913, a short campaign against the remaining members of the League reduced the acquired area, and led to the surrender of about \$,000 curves miles to Rumanus (in Rot - ---square miles to Rumania. On Oct. 18, 1915, Bulgaria entered the War on the side of the Central Povers by declaring war on Serbia. She thus became involved in the defeats of 1918, and on Sept. 29, 1918, made an unconditional sur-render to the Alhed Powers. On Nov. 29, 1208, she signed the *Treaty of Neutlly*, which ceded to the Alhes her Thracian territories (later handed over to Greece) and some territory on the western frontier to Yugoslavia.

GOVERNMENT .- The executive power is vested in the Tsar, and is exercised by a Council of Ministers, appointed by him. The legislature is a single chamber National Assembly or Sobranyé of representatives (x per so,000 inhabitants), elected for a maximum, term of four years by adult manhood suffrage. Members receive sa,ooo leva a month and free rallway travel. PRODUCTION.—About 80 per cent, of the population is agricultural, farming and small holdings,

the principal crops being wheat, rye, barley, outs, inaice, beans, tobacco, oleagnious seeds and sugar beet. The rearing of the silkworm is an important industry. The live-stock includes sheep, goats, cattle, pigs horses, asses and mules. Rich and extensive brown and black mules. Rich and extensive brown and black coal deposits produce about 1,500,000 tons yearly for home needs, mainly from the State mine at Pennik. Cortam areas are well mineralised with copper, lead, zinc, iron, manganese, etc., and also rock salt and bituminous shales. There is a variety of thermal and mineral springs, several of which have been modernised. The only minerals worked on a commercial scale are corner and lead Local commercial scale are copper and lead. Local industry, encouraged by tariff protection and other inducements, is rapidly expanding, and

cotton and woollen textiles, chemicals, leathers, timber, oils, soaps and metal articles are being produced. The exports consist chiefly of cereals, off seeds and cake, leaf tobacco and cigarettes, eggs, poultry, dairy produce, live-stock, flour, attar of roses, silk cocoons, minerals, nuts and skins. Imports include raw materials for textile skins. Imports include raw materials for texture and other industries, cotton and woollen piece goods, metals, agricultural and industrial machinery and appliances, motor cars, rolling stock, chemicals, tanning materials, leathers, mineral and vegetable oils, paper, timber, earthen and glass ware, colonial goods and food products.

DEFERGE.—Before the War of 1914-1918 service in the Army was universal and compulsory, and on a peace footing it numbered about 55,000, all ranks. During the War (Oct.—1915-Sept. 1918) about 550,000 passed into the ranks of the Army. By the Treaty of Neutlly the Bulgarian Army is limited to 20,000 all ranks.

EDUCATION is free and compulsory and the proportion of attendances is good; the number of illiterates in Bulgaria is comparatively small.

There are several technical schools. Sofia has an
Agricultural College and a Universities.

COMMUNICATIONS.—On Dec. 31, 1930, there were 15,015 miles of roads of which 10,000 miles were open, 4,055 miles under construction, and 368 miles traced. Of roads in actual use 4.718 miles traced. Of 10405 in account 4.718 miles were State and 4.716 miles Communal. There were 1,507 miles of normal and numal. There were x,507 miles of normal and age miles of narrow gauge railway open in 1929. In 1939 there were 378 poet and telegraph offices, 521 telephone exchanges with x7,223 subscribers (7,902 in Sofia). The principal Black Sea ports are Varna and Bourgas; and Rustchuk, Svistov, Vidin and Lom on the Danube. In 1930 the vessels engaged in foreign trade cleared at Black Sea ports unumberal with the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the sta trade cleared at Black Sea ports numbered 788 (1,381,440 tons).

# ORITE. (República de Chile,)

Prendent (Dec. 5, 1931-1937), Juan Esteban Montero.

Ambassador in London, Seffor Don Enrique Villegas.

Chancery, 3 Hamilton Place, Park Lane, W.z. zet Secretary of Embassy, Don Luis Renard. at Secretary of Legation, Don Carlos Nieto. Commercial Counsellor, Don Jorge Buchanan. Commercial Attaché, Don Santiago Monk. Consul, Don Raul Cousiño, 56 Victoria Street, 8. W. z.

A State of South Americs, of Spanish origin, lying between the Andes and the shores of the South Pacific, extending coastwise from the Rio Sams to Cape Horn south, between lat. 17° 25' and Same to Cape norm south, between late, 7, 15 and 55, 56, 8, and long, 66, 36, and 75, 48, W. Extreme length of coast-line about a,800 miles. Its extreme length is about a,800 miles, with an average breadth, north of 41°, of 100 miles. The great chain of the Andes runs along its eastern limit, with a general elevation of 5,000 to 15,000 feet above the level of the sea; but numerous summits attain a great height—the highest being, in Aconcagua Provincia, 7,019 metres (23,025 feet) with many others over 20,000 feet. The chain, how-ever, lowers considerably towards its southern extremity. There are no rivers of great size, and none of them are of much service as navigable highways. In the north the country is arid. Chile is divided into x6 provinces and a territories (Aysen and Magallanes) and the aggregate area is estimated at \$89,798 square miles. In \$989 Chile signed a treaty ceding the province of Tacna to Peru but retained the province of Arica in return for a payment to Peru of

£1,200,000.

The population (Census of 1930) was 4,287,445.

The population are four distinct Included in the population are four distinct racial divisions; (a) the Spanish settlers and their descendants; (b) the indigenous Araucanian Indians, Fuegians, and Changos; (c) mixed Spanish-Indians; and (d) European immigrants, spanish-indians; and (a) European immigrants, vs.360 Italians, 7,200 British and Irish, 8,950 Germans, 7,200 French and 5,000 Syrians. In 1929, the births numbered 195,020 (40'x per 2008); marriages, 42,004 (9'6 per 2000); and deaths, 210,006 (25'x per 2000).

GOVERNMENT. — Chile was discovered by Spanish adventurers in the z6th century, and remained under Spanish rule until 1810, when a

revolutionary war, culminating in the Battle of Maypu (April 5, 1818), achieved the independence maypu (April 5, 1818), acrowed the independence of the nation. The present constitution was voted by an overwhelming majority at the plebisette held on Aug. 30, 1829, and superseded that of May 25, 1832. It was drafted by a Committee appointed ad hoe by President Alessandri. In accordance with the new Constitution, the President is to be elected by direct vote of all Chilean citizens who have the right to vote. The National Congress consists of a Senate of 45 members, and of a Chamber of a number of Deputies to be fixed by a new electoral law in 1925. There is universal suffrage for persons who have attained the age of 21, can

persons who have attained the age of ar, can read and write, and are on the electoral roll.

PRODUCTION, &C.—Agriculture and mining are the principal occupations. Wheat, maize, barley, oats, beans, peas, lentils, wines, tobacco, hemp, Chile popper, potatoes, onions and melons are grown extensively; the vine and all European fruit-trees flourish; the exportation of fruit to the United States is increasing yearly. Excellent wines are produced, and the Government is taking store to devalor their exportation. is taking steps to develop their exportation The live stock includes (1925) 1928,433 cattle, 4,003,872 sheep, 323,582 horses, 357,032 coats, and 246,526 swine The mineral wealth is considerable, the country being extremely rich in copperable, the country being extremely rich in copperable, the country being extremely rich in copperable, the country being extremely rich in copperable, the country being extremely rich in copperable. ore, iron-ore and manganese ore The production of bar copper in 1930 was 197,530 metric tons, Chile being the second greatest copper producing country in the world. The rainless north yields more especially nitrate of soda, iodine, borate of sods, copper, gold and silver, a large number of mines yielding both being m actual work in Tarapaca, Guanaco, and Cachinal in Atacama, and Caracoles in Antofagasta; the centre, copper, iron, manganese and silver; and the south, iron and coal (1,309,522 metric tons of coal were mined in 1930. In 1929-1930 the production of nitrate was 3,000,783 metric tons, the exports of this fertilizer being in the same period 1,794,024 tons. Early in 1930 a law was passed constituting a national nitrate company, to be called Compania de Saltiro de Chile (Cosac), with a capital of £75,000,000 with State participation, to take over the whole of the nitrate industry, the export tax leing abolished, and its place in the budget taken by a fixed payment to the Government during the first three years, and after that by the Government's share in the company's profits. There ment's snare in the companys profile. Interest are smelting-works for copper and silver, tanneries, corn and saw-nills, starch, soap, biscuit, rope, glassware, paints, mineral waters, boot and shoe, hosiery, hat, cloth, cheese, furniture, candle, match, brush, cordage and paper actories, hreweries and distilleries; and the domestic industry furnishes cloth, embroideries, baskets, and nottery. No. of industrial establishnomesuc inquistry intrinsines cioti, emproideries, baskets, and pottery. No. of industrial establishments in 1928 10,495, employing 96,983 persons, capital invested 2,205,244,660 pesos (nominat capital 1,402,281,50 pesos). The many ports favour commerce, and 13 lines of steamers consent the country with Parameters. nect the country with Panama and the Magellan Stratt direct with Europe, a passage to Liverpool occupying from 30 days The staple articles of export are nitrate of soda, fodine, oats, borax, flozen meat, wheat, copper bars and ores, silver ores, corn, flour, hides, wool, barley, honey and beans. The imports include silks, woollens and other textiles, food, and agricultural and mining machinery, and motor vehicles.

COMMUNICATIONS. - There were (1929) 5,428 miles of railway, — Inere were (222) 3,425 miles of railway, of which 1,748 miles are British controlled. In April, 222, a convention was signed by Chile and the Argentine for the construction of two more Trans-Andine Wrocchile. lines. In 1929 there were 34,396 kilometres of telegraph, 909 post-offices, and 8,969 kilometres of teleprone, with 19 public wireless stations. The mercantile marine (1929) numbers stations. The mercantile marine (1929) numerical risp vessels (143,769 tons). In 1929 1,083 vessels (1,473,392 tons) entered Chilean ports from abroad, and 18,538 coasting vessels (25,595,409 tons); legislation was passed in February, 1922, reserving the coasting traffic to vessels of the Chilean mercantile marine.

DRFENCE.—All able-bodied male citizens from soth to 45th year must serve in the army for a training period. The peace effective of the active aimy is 19,000. The Air Force has a peace strength of 136 machines with 150 pilots and r,000 mechanics. The navy consists of r battleship (recently renovated), x ironclad, 3 cruisers, xx destroyers and 9 submarines, with a complement of 6,000 officers and 8,000 other ranks.

complement of 5,000 officers and 8,000 other transa. Education was made compulsory, and 647 per cent of the children attended the 3,732 schools in resp of a total on the registers of 564,965. There is a State University at Santiago. The National Library contains 293,085 volumes. The language of the country is Security and the religion is Roman Catholics. Spanish and the religion is Roman Catholic.

449,085,953

The estimated foreign population of China was as follows in 1925: British, 15,247; Japanese, was as follows in 1925: British, 18,247; Japanese, 18,851; Russian, 79,765; American, 9,844; Portuguese, 2,739; German, 3,050; French, 2,576; the total being 326,841. Out of a total of 7,922 foreign firms in China, 725 were British, 1,142 Russian, 3,940 Japanese, 184 German, 377 American, and 229 French (in 1823). China became a Republic on Feb. 12, 1918, with a President and a Lordstehm of a Frenchick Ministry and a Lordstehm of a

with a President and Vice-President and an Executive Ministry, and a Legislature of a Senate (Tran Yi Yuan) of as members and a House of Representatives (Chang Yi Yuan) of 556 members. The government of the 28 provinces is entrusted to civil and military governors, the latter (Tuchun) ranking first and holding practically all the powers of government; under them each province is subdivided into circuits superintended by Taopins or integrated and speak into districts. into circuits superintended by Taopins or in-tendants, and again into districts. All the territorial officials are appointed by the central Government, and the provincial governors, though free to act independently in many matters of local detail and finance, are respon-sible to the central Government at Peking in all important questions, and especially so in foreign affairs. The Treaty of Kiakhta, 1915, between China, Russia, and Outer Mongolia recognises the Hutukhta Khan as Ruler of Outer Mongolia, while Chura, as the Suzerain Power, appoints Residents at Urga and three other towns. Mongolia has since developed into an independent self-governing republic, and is in alliance with the Soviet Government at Moscow. The civil government of the three Manchurian provinces and of Turkestan is now similar to that of the province of China proper. exact status of Tibet is still unsettled.

On Oct. 1, 1930. Weihalver, the island of Liu Kung and certain other islands, leased to Great Britain in 1808, were restored to China. The area comprised in the lease was about 1825 square miles, with a population of about 170,000. On Jan. 15, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031, 1031,

The revolution of xoxx brought out a victorious general in the person of Yuan Shih-kai, but from his death in 1916 until June 1928 his subordinates and their successors fought for supreme power. Presidential elections were held and their results disputed, and the Parliament elected in 1913 held occasional meetings in 1924, but its measures were not carried into effect, The Emperor (who had lived in the Imperial Palace since his enforced abdication) was stripped of his title and driven out of the stripped of his title and driven out of the Capital in sga4, and such government as existed in 1927 was centred in Peking (for Northern China), while the Kuomentung (People's National Party) was represented by a Nationalist Government at Canton (for Southern China). In June 1928 Peking was captured by the Nationalists, and the capital of the country was transferred to Nanking and on October 2 1928 (Peking and Conductive 1928). to Nanking, and on October 10, 1928 (the anniversary of the outbreak of the Revolution at Wuchang in 1911), Chiang Kai-shek, the com-mander-in-chief of the victorious Nationalist armies, was installed as President of the Republic.

EDUCATION.—In 1918—19 there were 134,000 schools in operation, with 4,500,000 pupils. There is a University in Peking. In 1922 there were upwards of 1,250 Chinese newspapers and magazines, published at regular periods, in Peking, Shanghai, Tientsin, and the other large centres, in addition to English and other Foreign daily newspapers.

COMMERCE.—The net trade of the open ports is stated as follows in Haikwan taels.

Your.	Imports.	Exports	Total.
1914 1926 1927 1928 1929	569,241,382 812,853,874 1,012,932,000 1,212,635,000 1,265,776,821 1,309,755,742	355,225,629 807,755,813 918,620,000 1,103,185,000 1,015,687,218 894,843,594	985,468,011 1,620,609,687 1,931,552,000 2,315,820,000 2,261,466,039 2,261,599,336

COMMUNICATIONS. — Railways. — About 7,000 miles were open in Jan 1928, inclusive of the Manchurian lines, while 2,500 miles more are projected or under construction.

Shipping .- The China Merchants Steam Navigation Co. have a fleet of 31 ships of an aggregate tonnage of 60,000. Besides this, there are a large number of small vessels engaged in the coasting trade and on the Yangtse. In 1927 the total tonnage of the 154,275 vessels and junks entered and cleared at Chinese ports was 116,210,785 tons Of these ships 33,791 (40,258,049 tons) were British, 27,205 (35,745,525 tons) tons) were British, 27,205 (35,745,525 tons) Japanese, and 4,844 (5,577,x25 tons) U.S.A. In June, x228, a vessel of x4,750 tons, constructed at the Kiangnau Dock and Engineering Works at Shanghai, was launched and supplied to the order of the United States Shipping Board.

Telegraphs are being rapidly constructed by the Central Government, and Peking is in communication overland with Europe and Tibet, the line being extended to Lhasa. In ress there were about 50,000 miles of land lines and several high-power wireless installations.

CUSTOMS AND POSTS .- The Chinese Maritime Customs is the controlling service; this body consists of nearly 1,000 Europeans, a large proportion of them British subjects, all under the control of the *Inspector-General* (F. W. Maze.) By an Imperial Decree of May, 1906, the Maritime Customs Dept. was transferred from the Foreign Board to the Board of Revenue, and two Chinese Administrators-General were appointed. But the change has not materially affected the powers hitherto exercised by the Inspector-General. In addition to the collection of dues at the Treaty Ports, this service manages the lighting and navigation thereof, and keeps a small fleet of cruisers to enforce its regula-

tions. The Chinese Post Office, formerly a branch of the Customs, was transferred in 1911 to the Ministry of Communications, and a Foreign Co-Director General, with a considerable foreign staff, was appointed; letters can be sent all over the 18 provinces at a uniform rate of 3 cents for so grammes. The number of Chinese post offices (1921) was 2,429, and of postal agencies 8,877. In 1922, 426,363,676 postal packets and 4,792,420 parcels were handled.

At the end of September, 1922, according to the official statement of the Ministry of Finance, the total debt was tacks, 1906,000,000, or less than a tacks (1s.) per head of the Chinese population. Included in the expenditure of 1919-20 is the sum of 214,000,000 tacks towards repayment of debt.

#### OUTLYING TERRITORIES.

Manchuria lies to the north of China Proper, and has a total area of about 360,000 square riles, with a population estimated at x1,000,000. The capital is Mukden (pop. 250,000), a station on the Manchurian railroad and connected with the Russian system. Indigo, opium, cotton, tobacco, and various cereals are grown. and

there is great mineral wealth.

Mongoliahas an estimated area of about, 360,000 square miles, and a population of 3,000,000 to 5,000,000, of whom the greater number are Buddhists. In rgrs Mongolia threw off its allegiance to China, and by the Treaty of Kiakhta was recognised as an Autonomous Republic. Negotiations with Russia, after the rg17 revolution, led to an alliance, and by Treaty (May 31, 1924) the U.S.S.R. acknowledge the suzerainty of China over Outer Mongolia. North-West (or Outer) Mongolia covers an area

of about 360,000 square miles, and consists of an elevated plateau bounded by the Russian Altai range (N.W.), the Sayans (N.E.), the Kentel (S.E.), and the Ektagh Altai (S.W.). The plateau contains many lakes and is watered by ymmerous rivers, among which are the head-waters of the Yenisei, the Irtish and the Selenga. Agriculture is almost unknown, but excellent pasture provides grazing grounds for numerous cattle and sheep, and particularly for transport animals (camels and oxen). The exports are wool, hides and akins, and gold. The chief centres are Urga (Kuren, or Ulan-Buotr-Khoto, "Town of the Red Knight"), Uliasauta, and Kobdo, all dimportance as trading centres on the main caravan routes Part of Outer Mongolia has caravan routes Part of Outer Mongolia has declared itself independent of its suzerain as the Republic of Tannu Tuva. The districts affected lie between the Sayan and Tannu Ola ranges, the capital of the Republic being Chem Belder (or Krasny, "Red Town"). Inner Mongolia covers an area of about

1,000,000 square miles and includes the Gobi

(" Desert "), or Ska-mo ("Sand Desert"), which covers nearly one-third of the total area, and in the extreme south-east the Ordos Desert, bounded on the south by the Great Wall of China, and encircled on the north by part of the main stream of the Hwang-ho river. north-east of Inner Mongolia rises the Keru-luu. which flows into the Dalai Nor in Manchuria. Agriculture is carried on wherever Chinese influence has been exerted, but is mainly confined to the south-eastern borders. The principal industry (as in North-West Mongolia) is sheep and cattle raising and the breeding of camels, owen and horses for transport, in order to supply the caravan routes from China to Siberia. centres of population depend mainly upon the overland commerce of China and Eastern Russia across the Gobl, the general direction of the caravan routes being from south-east to northwest. The principal centres are : Kalgan, Kukukhoto Kuku-erghi, Dolon-Nor and Biru-khoto In the north-east, Keru-lun (on the river of that name) is a junction of the southern routes from the Chinese province of Pechili and the western route from Urga, in N.W. Mongolia.

Tibet (area, 750,000 square miles; pop. 3,000,000) borders on British India. (See p. 672.)

Chinese Turkestan (or Sinkiany) has a total area of 600,000 square miles and a population estimated at 2,000,000. It includes Zungaria and Chinese Tartary, and provides sheep, cattle, and transport animals for the caravan routes. The chief centres are Kashgar and Urumchi. (See p. 677.)

Capital of the Chinese Republic, Nanking. Population (1928), 1,000,000.

Nanking, selected as the capital of China in rese in place of Poking, is the principal city in the province of Kiangsu, and the seat of the provincial government of Kiangsuan (embracing the three provinces of Kiang-su, Kiang-si and Ngan-hui. About 2000 A.D. it was named Kiang nan, but in 1368 this was changed to Nanking ("Southern Capital"). The city is built on the south bank of the Yangtse Klang river, about equidistant from Canton and Peking, and is connected by railway (192 miles) with Shanghai. Psking, the former capital, had an estimated population of x,300,000 in xgax.

Shanghai comprises (a) the International Settlement administered by the Shanghai Municipal Council (for the defence of which British Forces were despatched), the estimated popula-tion being: 1,007,868 of whom 977,397 were Chinese, 18,476 Japanese, 6,323 British, 3,487 Russians; (b) the French Concession, an independent administration (population · Foreigners, 7.811, and Chinese, 297,720); and (c) the Shanghar City, Chapet and Kantao areas surrounding these settlements.

The population of the principal ports is The population of the principal ports is estimated as follows:—Amoy, 400,000; Canton, 1,379,000; Chingking, 2,021,600; Koochow, 2,500,000; Chingking, 2,021,600; Koochow, 2,500,000; Hankow, 250,000; Hankow, 250,000; Hankow, 360,000; Kiungchow, 360,000; Nanking, 380,000; Ningpo, 3,200,000; Shanghai, 2,000,000; Soochow, 2,000,000; Teintsin, 828,000; Tsingtau, 320,000; Wanhaien, 728,000; Wenchow, 2,750,000; Wunchow, 2,750,000; Wunchow, 2,750,000; chow, 350,000.

COLOMBIA (Républica de Colombia)

President(1930-1934), Dr. Eurique Olaya Herrera, born 1867, assumed office Aug 7, 1930.

Envoy Extraordinary and Munister Plenipo-tentrary in England, Senor Dr. Don Alfonso Lopez.

Counsellor Don Jorge Garcés.

Attachés, Sr. Dr. Don Bernudo Samper; Sr. Dr. Don Camilo Cruz Santos.

Consul-General, Don Alejandro Lopez, 7 Sicilian Avenue, Southampton Row, W.C. z. Consul-General in Liverpool, Schor Don Carlos Vernaza, 41 North John Street.

The Republic of Colombia lies in the extreme north-west of South America, having a coast-line on both the Atlantic and Pacific Oceans. In the first the Audite stat rather Oceanies. It is situated between x² 40°S to xx² 35′N. latand 68° to 79° W. long, with an estimated area of 45,,666 aquare miles, and a population (Census 1928) of 7,851.000, of whom more than one-half are whites and half-castes. The country is intersected by three great ranges of the Andes. known as the Western, Central, and Eastern Cordilleras; the second contains the highest peaks, but the latter is the more important, as it consists of a series of vast table-lands, cool and healthy. This temperate region is the most densely-peopled portion of the Republic.

The principal rivers are the Patia, Cauca, Magdalena, Caqueta and Putumayo. The Patia flows through the famous Mining Gorge of the

flows through the famous Minima Gorge of the Western Cordilleras, and one of its tributaries (the Carchi, or Upper Gulatara) is spanned by the Rumichaca Arch, or Inca's Bridge, of natural stone. On the Finnza is the Great Fall of Tequendama, 480 feet in height.

The Colombian coast was visited in 1502 by Christopher Columbus, and in 1536 a Spanish expedition under Quesada established a government of certain coastal communities under the name of New Granada, which continued under name of New Granada, which continued under Spanish rule until the revolt of the Spanish-American colonies of rear-reas. In reas Simon Bolisar (born 1783, died 1830) established the Republic of Colombia, consisting of the territories now known as Colombia, Panama, Vene-

zuela and Ecuador. In 1829-1830 Venezuela and Ecuador withdrew from the association of previnces, and in 1831 the remaining territories were formed into the Republic of New Granada. In 1858 the name was changed to the Granadine Confederation and in 1861 to the United States of Colombia. In 1886 the present title was adopted. In 1903 Panama seceded from Colombia, and is now a separate Republic.

The Colombian forests are extensive; among the trees are mahogany, cedar, fustic, and other dye-woods and medicinal plants. The mineral productions are emeralds, gold, silver, platinum, copper, iron, lead, and coal; petroleum is available in onormous quantities, and in the year 1930 the output was 2036,000 barrels; it is possible that new oilfields will shortly be opened near the Venezuelan frontier. The principal agricultural products are coffee, cotton, plantains, and bananas, and in some parts tobacco, wheat and other cereals. Manufactures, for home consumption, consist of woollen and cotton stuffs. The chief exports are coffee, petroleum, gold, bananas, and hides. All religions are tolerated.

The standing army consists of about ro,cos men; the navy has been nearly abolished. Railroads are in their infancy, about 1,800 miles being open in 1930, with a1,900 (1928) miles of telegraph; open in 1930, with 21,900 (1928) miles of telegraph; there are (1930) also 3.589 miles of motor roads. There is a daily passenger and mail service (German) between Bogotá and Barranquilla and a bi-weekly service in concert with Pan-American Airways to the U.S. New York can be reached in 34 days and mail is delivered in Fugland 12 or 12 days after leaving Bogotá. There are wireless stations at Barranquilla, Bogotá, Medellin, Cali and Cúcuta.

# COSTA RICA

(República de Costa Rica.)
President (1928-1932). Cloto Gonzalez Viquez,
assumed ojnce May 8, 1928.
Minister of Foreign Affairs, Leonidas Pacheco.

Minister in London (vacant). Consul-General, London, John C. Eggers, 33-36 King William Street, E.C. 4. The Republic of Costa Rica, the most southern

State of Central America, extending across the isthmus, between 8° zy' and zz° zo' N. lat. and from 8z° 3o' to 85° 45' W. long., contains an area of about 23,000 English square miles, and a popula-

about \$3,000 kngish square miles, and a population (Jan. 1, 1931) of \$16,031.

For nearly three centuries (1530-1821) Costa Rica formed part of the Spanish-American dominions, the seat of government being at Cartago. In 1821 the country joined in the War of Independence, and from 1824-1839 it was one of the United States of Contail America. of the United States of Central America.

The principal agricultural products are coffee, and beans, the soil being extremely fertile. The chief exports (139) are coffee (£2,120,500), bananas (£894,423), cacao, gold and silver bullion, skins and hides, fresh full and timber The imports are dry goods, hardware, provisions, railway materials, machinery, paints, and general merchandise (in 1920, 50 per cent. from United States, 12 13 from United Kingdom, za'a8 per cent, from Germany).

The chief ports are Limon, on the Atlantic coast, through which passes the bulk of the important banana trade with the U.S. and U.K., important banana trace with the U.S. and U.K., as well as by far the larger part of the other exports and imports; and Puntarenas on the Pacific coast. In 1930, 595 vessels (1,33,0,78 tons) entered at Costa Rican ports. About 420 miles of railroad were open in 1939. In 1930 there were sog post offices, and sog telegraph offices (3 wireless), with 2,612 miles of telegraph and telephone line. A considerable amount of English capital temperated in the English. Search is the is embarked in the Republic. Spanish is the language of the country.

Cuba (the largest of the "West India" Islands) lies between 74° and 58° W. long., and 13° and 23° N. lat., with a total area of 44,178 sq miles and a population of 3,66x,582 (June 30,

17930).
The island of Cuha was visited by Christopher and October 27, Columbus, during his first voyage, on October sy, 1492, and was then believed to be part of the Western mainland of India. Early in the x6th century the island was conquered by the Spaniards, to be used later as a base of opera-tions for the conquest of Mexico and Central America, and for almost four centuries Cuba remained under a Spanish Captain-General. The slave trade was abolished early in the 19th century, and the slaves were emancipated from 1880 1886. The government of Spain was marked by a generally corrupt administration, compli-cated by internal unrest fomented by external influences, and the various attempts at independence met with severe military repression. The separatist and autonomous agitation culminated in the closing years of the 10th century in a ferce and bloodthirsty war, and although a conciliatory movement was evinced by the Madrid authorities in 1897, the struggle was continued by the party of separation in the island. In 1898 the government of the United States put into execution a threat of interference by the despatch of the battleship Maine to Havana harbour, and in February of that year the vessel was sunk by an explosion, the cause of which appears likely to remain an unsolved mystery. On April 20, 1898, the U.S. Government demanded the evacuation of Cuba by the Spanish forces, and a short Spanish-American war led to the abandonment of the island, which was occupied by U.S. troops. Puntarenas, 7,848; Liberia, 3,830.

In process of redemption, but showing increase in regar through failure of French Bank.

In process of redemption, but showing increase in widest and most far-reaching character were instituted. On May 20, 1902, an autonomous government was inaugurated with an elected President, and a legislature of two houses. The island was, however, again the prey of revolution from July to Sept., 1906, when the U.S Government resumed control. On Jau 28, 1909, a republican government was again inaugurated.

republican government was again insuguracer of the total area of \$2,000,000 acres, only about 1,375,000 acres are cultivated, 50 per cent. of these being under sugar cause and 30 per cent. under tobacco, sweet potatoes and bananas. Rice, coffee, cocoa and maize are also grown and topical fruits (oranges, coco-nuts, pineapples, &c.) thourish. The chief agricultural products of the island are tobacco and sugar; sugar crop 5,157,222 tons (1928-9), 4,671,230 tons (1929-30); the chief product of the forests is mahogany, while cedar is also used for boxing the tobacco crop. The live stock includes about 4,500,000 cattle and foco,000 horses, the vast savannahs of Central Cuba being particularly suitable for cattle ranges.

3,600 miles of railroad are open and about 6,000 miles of telegraph line; there are about

Part of the Austro-Hungarian Monarchy declared its independence on Oct. 18, 1918, as the tzechoslovak Republic, and ten days later the Narodus Vybor (National Council) of Czechoslovakia took over the administration of the independent territories. The political neighbours of the Republic are the Austrian and Hungarian Republics on the A., the German Republics on the W., and the Polish Republic and the Kingdom of Rumania on the E. Within these limits are the former Austrian Provinces of Boltemia and Moravia and part of the Province of Silesia; and Northern Hungary from the Danube (at Biatislava, on the Austrian frontier) to the Carpathians (at the headwaters of the Ung River in the eastern slope of Mt. Vercezka)—a total area of about 54,877 80, miles, with a population (Census of 1930 as under:—

Bohemia Morama and Silesia	7,106,766 3,563,157
SlovakiaSubcarpathian-Russia	3,330,885 785,350

Total..... 14,726,158

Of the total population it is estimated that 65's per ceut. are Czechoslovaks, 23'3 per cent. Germans, 3'5 per cent. Magyars 3'4 per cent. Ruthenians, and o'5 per cent. Poles. The new State was recognised by Austria in 1918 and by Hungary on March 10, 1929. The National Assembly, consisting of a Senate and a Chamber of Deputies, is elected by universal adult suffrage of both soxes. The executive power is exercised by a Council of Ministers, appointed by the President. The coalition of Czech parliamentary parties (which with short intervals had monopolised the executive from the foundation of the Republic) broke up in the Spring of 1926. For a time the Government was carried on by a non-pullamentary cablnet. At present a coalition of the Czech, German and Slovak "bourgeois" parties are in office. In the present Ministry two portfolios (those of Justice and Public Works) are, for the first time, held by representatives of the German minority, and in January, 1927, two representatives of the Slovak Peoples (Catholo) Party joined the Ministry. The Constitution guarantees religious and political freedom. About 80 per cent of the

By the Peace Treaty Czechoslovakia acquired about to per cent. of the whole industry of the former Austrian Empire. It has several rich coalfields, and possesses valuable mineral resources which, notably in Slovakia, have not yet been fully developed. Radium, gold, silver, iron, graphite and lead are all mined, while the whole country is rich in mineral and thermal aprings. Bohemia has rich deposits of clay, kaolin and sand. The whole country is well farmed, and agricultural production is on a very high level of excellence. In foodstuffs, however, the country is not self-supporting. Thirty-three per cent. of the total area of the country is forest land, and both in the productiveness of the forests and the quality of the timber the forest wealth of the Republic is enormous. In its industrial development Bohemia may be compared to Belgium. In Bohemia, Moravia and Silesia, which have a total population of zelf-millions, which have a total population and soliesia, which have a total population are engaged in industry. The various industries are well organised, and as regards both machinery and modern improvements the factories are as well equipped as any in Europe. Except in Slovakia and Ruthenia illiteracy is almost unknown, and both the German and Czech elements which compose the working-class population are hardworking and in many cases highly skilled. The new Republic possesses, therefore, many valuable economic advantages, and it is no exaggeration to state that Czechoslovakia is in a far more flourishing state than most of its neighbours

Csechoslovakia has no direct access to the sea, but has a right of access over the Elbe and Oder to Hamburg and Stettin, for which purpose the Government proposes to canalise the Upper Elbe in order to connect it with the Oder and the Dannbe. If this proposal is carried out, the country will be traversed by a waterway saffording a communication from the North Sea and Baltic, vid the Danube, to the Black Sea.

#### DANUBE COMMISSIONS.

The International Danube Commission (Headquarters, Vienna) was created by the Treaty of Versailles (1919), the States represented under the Treaty being Austria, Bayaria, Bulgaria, Czechoslovakia, Fral.es, Great Britan, Hungary, Italy, Rumania, Württemburg, and Yugoslavia. The Commission maintains the liberty of navigation and the equal treatment of all flags of the Danube from Ulm (Wurttemburg) to Bralla (Rumania) and its international system, obtaining funds for administrative expenses from equal contributions of all the States represented. From Bralla to Sulina (the mouth of the Danube), the navigation is controlled by the European Commission of the Danube (Headquarters, Galatz), created by the Treaty of Paris 1856, after the Crimean War; the representation on this Commission is confined to France, Great Britain, Italy and Rumania. The river is connected by canals with the Main, a tributary of the Bhine (Ludwig Canal); a new and deeper canal is under construction to permit the passage of larger craft than at present, thus linking up the whole Rhine and Danube systems across Europe from the North Sea to the Black Sea. The total length of the river is about 1,738 miles, and ocean-going vessels reach Bralla, where trans shipment into river barges is necessary. A pilotage and river-improvement service is maintained by the International Commission at the Iron Gates (headquarters, Orsova), the expenses being met by shipping dues.

The clinef towns on the Danube are the Black Sea port of Sullina, with Galatz (confluence of the Sereth), Bralla, Turnu-Severin and Orsova (Iron Gates), in Runania; Russchuk, Vidin and Lom Palanka, in Bulgaria; Belgrade, the capital of Tungary; Bratislava in Czechosłowakia, Vienna (the seat of the Commission), and Linz, in Austria; Passau and Regensburg, in Bavaria and Ulm in Wittempura.

and Ulm, in Wirttemburg.

The financial situation of the European Commission is shown below:—

 Receipts during 1989
 Gold france

 Expenditure, 1989
 4,652,550

 3,807,53

The receipts consist almost entirely of navigation dues (5,020,653 francs in 2027). The expenditure (1927) included 2,065,291 francs of the prolongation and strengthening of the embankments at Sulina, and 251,507 francs in repayment of the British portion of the loar raised by the Commission in 2024.

A Kingdom of Northern Europe, and the smallest of the Northern States, consisting of the islands of Zeeland, Fünen, Lolland, &c., the peninsula of Jutland, and the outlying island of Born-holm in the Baltic. Denmark is situated between 54° 34′ -57° 44′ N. lat. and 5° 5′ - 12° 40′ E. long., with an area of 15,042 square miles, and a population (Nov. 5, 1230) of 3,521,000. Nearly one-half of the population live exclusively by agriculture, and one-fourth by manufactures and trade.

In 1864 Denmark was attacked by Prussia and Austria and deprived of Schleswig-Holstein (Prussia taking the whole territory after a further war with Austria in 1866). At the conclusion of peace between the Central Powers and the Allies in 1919, the question of Schleswig-Holstein was subjected to a plebiscite of the inhabitants, and North Schleswig is now part of Denmark.

The common products are wheat, rye, oats, barley, potatoes, cattle, horses, pigs, sheep, and butter. Its manufactures are, for the most part, for home consumption. Its principal imports are coals, manufactured goods (woollens, silks, cottons) iron, hardware, wine, fruit, coffee, tea, maize tons) fron, hardware, wine, fruit, corree, tea, maize and colonial produce. In 1930, 1, 233,000 hectares were under corn crops, 23,800 sugar beet, 411,000 for age roots, and 297,800 hay crop. In July, 1930, the live stock numbered 494,300 horses, 3,057,400 cattle, 193,000 sheep, and 4,871,900 swine. The crops in 1930 included 9,976,000 hkg. (hkg. = 100 kilogrammes) of oats, 10,510,000 of barley, 242,000 reve. 2,460,000 mived corn, and 2,780,000 2,547,000 rye, 7,495,000 mixed corn, and 2,780,000 qrs. of wheat. Its chief exports are agricultural produce, including wheat and barley, bacon, hams, flour, butter, eggs, hides, skins, corn-meal and oil-cake, horses, and cattle. Sca-going mercautile marine (1930) 599 steamers, with a gross tonnage of 735,490. There are (1930) 5,294 kilometres of railway and 12,053 km. of telegraph line.

DEFERCE.—The Army consists of about rs, one trained men, the vote for r930-31 amounting to Kr. 35,000,000. The Navy consists of 4 coast-defence ironciads and x completing, x small crusers, 23 torpedo-loats (built and building), x4 submaines (built or building). Vote, r930-31, Ki. 22,000,000.

EDUCATION is free and compulsory, the schools schools are numerous, technical and agricultural predominating. There are Universities at Copenhagen and Aarhus.

Vice-Consul, Senor A. M. Ventura.

The Republic of Santo Domingo, formerly the Spanish portion of the island of that name, is the oldest settlement of European origin in the oldest settlement of European origin in America. The island was discovered by Christopher Columbus in December, 249s, who named it "La Española" or "Little Spain." In 1496 he ordered his brother, Bartholomew Columbus, to found the capital at the mouth of the Ozama River, on the south of the island, which city he called Santo Domingo. The island immediately became the objective for adventurous Spanish colonists, who exploited the native Indians almost to the point of extermination for the sake of the gold found in the streams. African negroes were imported for the sugar and other plantations both in Santo Domingo and Haiti, and this accounts for the present large pro-portion of negroid blood in both countries. A short time after its discovery Santo Domingo short time after its discovery vanto Domingo became the "jumping-off point" for other adventurers proceeding from Spain to the newly-found mainlands of the western hemisphere, and this greatly diminished the importance of the island and caused an exodus to those places.

In 1821 Santo Domingo broke away from Spain and declared itself independent, but in 1822 it was invaded and subjugated by its negro neighbours from the west, the Haitians. The latter were driven out in 1844, when the Dominican Republic was definitely proclaimed by the natives, and has so remained except for an interregnum of two years (1862-1864) when the Spaniards again took possession, but were eventually forced to withdraw.

On November 29, 1916, American military forces landed in Santo Domingo and a Military Government was proclaimed From October 22, rgas, a Provisional Dominican Government was in office until July zs, rga4, when a properly elected Constitutional Government was installed, with complete authority over all matters except the collection of the customs and the redemption of foreign obligations, which con-tinue to be administered by an American official.

The Dominican Republic comprises an area of about 19,322 square miles, with a population estimated at 1,000,000. An extensive system of entimated at 1,000,000. An excellent a system of motor lighways, totalling nearly 700 miles of first class roads, has been built, but they have been allowed to fall into very poor condition for want of proper maintenance. There is a direct road from Santo Domingo City to Port-au-Prince, the capital of Haiti, enabling the journey from capital to capital to be made in one day. There are about 150 miles of public 1 allway, and a tele-phone system connects practically all the towns of the republic. There are six wireless stations. and the All America Cable Company maintains an efficient service with all parts of the world.

Sugar and cocoa beans are the most important crops, and coffee and tobacco are grown in fair quantities, the other products being mahogany, furniture woods, lignum vitae, log-wood, dividivi, cotton, wax, honey, maize, hides and turtle-shell.

The total import trade in 1930 was \$15,209,219 of which 56 12 per cent. came from the United States, 7 04 per cent. (rice) from British India, and 588 per cent. from the United Kingdom. British trade is hampered by distance (as compared with the U.S.), by lack of resident British merchants and industrial undertakings, and by indifferent and slow steamship services from Europe.

Charge des Archives, Sr. Carlos Arrarte.
Consul-General in London, Sr. Carlos Arrai te,
23 College Hill, Cannon St., E.C. 4. Consuls at Liverpool, Burmingham, Hull, Glasgow, and Cardiff.

An equatorial State of South America, extending from lat. r° 38' N. to 6' 5' S., and between 60' 20' and 8r° W. long. (according to the Ecuadorran geography, but there are boundary disputes with Pern), comprising an area of

276,000 English sq miles.

The former Kingdom of Quito was conquered by the Incas of Peru in the latter part of the 15th century. Early in the 16th century Pizarro's conquests led to the inclusion of the present territory of Ecuador in the Spanish Vice-Royalty of Peru. The independence of the country was achieved in a revolutionary war which culminated in the hattle of Mount is the chief port (population, 1920, about 100,000);

Pichincha (May 24, 1822).
The Republic of Ecuador is divided into 27 provinces and one territory. It has a population of about 2,000,000, mostly descendants and red of the Spaniards, aboriginal Indians, and others).

Mestizoes. The territory of the Republic extends across the Western Andes, the highest peaks of which are Chimborazo (20,720 ft.), Inlinza (27,405 ft.), Carbustrazo (26,525 ft.), Cotocachi (26,302 ft.), and Pichincha (26,000 ft.) in the Western Cordillers; and Cotopazi (24,405 ft.), Antisana (28,864 ft.), Cayambe (29,260 ft.), Altar (27,730 ft.), Sangay (27,464 ft.), Tungurahua (26,696 ft.), and Sincholagua (26,365 ft.) in the Eastern Cordillers Remador is watered by the Tuner Anagon, and by the rivers Guayaouli. Upper Amazon, and by the rivers Guayaquil, Mira, Santiago, Chones, and Esmeraldas on the Pacific coast. There are extensive forests, and the cinchona bark tree is common. The Witchbroom disease, which appeared (1922) in the cocca plantations, has had a disastrous effect on the agricultural wealth of the country. The average yearly output previous to sear was one million quintals (of 100 lb.) as compared with

335,052 quintals in 1929 and 387,424 in 1930. Its chief products are cocoa, petroleum, rice, vegetable ivory, bananas, cotton, coffee, india-rubber, sugar, orchella weed, straw hats and hammocks, bark, yams, tobacco, fruits, sarsaparilla, wheat, &c. Its minerals consist of gold, quicksilver, lead, iron and copper; emeralds and rubies are occasionally met with, and sulphur is found in many parts. The chief exports are cocoa, petroleum, caoutchouc, vegetable ivory and gold, cinchoua bark, Panama hats, coffee, and cattle; the chief imports are textile machinery, foodstuffs, and manufactured goods. A rail-

road connecting Guayaquii and Quito was opened in 1908. The Galtipagos (Tortoise) Isdauds (a,870 square miles) belong to Ecuador. In October, 1926, an American Financial Mission arrived in the country and their recommendations have been chacted as laws. A new customs tariff, prepared by the Mission, came into force on July 1, 1927, and produced 26,727,725 sucres in the year ended Dec. 31, 1928, ad, ado, ao sucres in 1900, but only 11, analy 12, sucres in the first six months of 1930, and a new monetary law memory the gold standard, the currency being stabilized at 5 sucres = \$z U.S. A Central Bank was estabhshed on March 4, 1927, and a new banking law enacted.

In November, 1927, the Swedish Match Company of Stockholm secured the exclusive right to import and manufacture matches in Ecuador for a period of 25 years in return for a loan of 8,800,000 sucres, which sum was applied towards the establishment of a Mortgage Bank.

The language of the country is Spanish.

Of the total population in 1917 males numbered 6,369,517 and females 6,348,738; in 1997, males numbered 7,036,938 and females 7,006,996 (Nomade being excluded in each case).

Physical Features.—The Nile valley varies

in width from less than half a mile in the southern granitic region to over zo miles in the northern limestone region, and the cliffs in some places use to heights of over a thousand feet above the river. The fertile lands, on which the prosperity of the country depends, occupy the floor of the valley between the river and the bounding cliffs, while to the north of Cairo they

[•] A Wasf is an institution of Muhammadan Law similar to the "trust" of Enclish Law. When property is made Wasf it is deficiated expressly or implicitly to some charitable or religious ob ect, or for the benefit of private individuals The nearest British equivalent is "The Public I rustee."

⁽t) Dahkla and Kharga Oases. (t) Including Siwa.

spread out into the irregular fan-shaped forma-tion of the Delta which comprises the six provinces of Lower Egypt, with the richest soil in the country. The Nie has a total length of 3,470 miles from the Victoria Nyanza to its mouths. In the 960 miles of its course through Egypt it receives not a single tributary stream. The river has a regular yearly rise and fall, attaining its maximum level about the middle of September and its minimum about the end of May. At Cairo the average rise and fall is about 13 feet. Westward from the Nile Valley into Tripoli stretches the Libyan Desert. Though as a whole it constitutes one of the most arid and inhospitable regions of the world, the Libyan Desert contains a number of depressions wherein wells and springs furnish water in sufficient quantity to irrigate small areas and to support populations of several thousands. These depressions are the Oases, of which the principal from S.E. to N.W. are known as Kharga, Dahkla, Farafra, Baharia, and Siwa. On the eastern edge of the Libyan Desert, a few miles south-west of Cairo, stand the Pyramids of Giza, of which the highest, the Great Pyramid, is 451 feet high. Close to the pyramids is the Great Sphanz, 185 feet long. In the Eastern Desert a great back-bone of high and rugged mountains extends north-westward from Abyssinia to near Suez, and reappears as a detached mass in the Peninsula of Sinai. Flanking this mountain chain on the west, between the axis of the range and the Nile, are plateaux of sandstones and limestones, dissected by wadis (dry water-courses), often of great length and depth, with some wild vegetation and occasional wells and springs. The roads follow the course of the main wades from well to well, and here and there are to be found small encampments of wandering Arabs. The north (Mediterranean) coast of Sinai is flat and sandy. Inland, the ground gradually rises into a highly dissected limestone plateau, which extends southward for about zo miles and terminates in the great scarp of El Tih. South of El Tih the character of the country abruptly changes, the southern third of the poninsula being formed of rugged granitio mountains intersected by deep ravines. Springs and wells occur in fair abundance, mostly in the wade, and running water (mostly brackish) is found at a few points.

Nature Population —There are three distinct elements in the native population of Egypt. The largest, or "Egyptian" element, is a Hamito-Semite race, known in the rural districts as Fellathic (Fellah = ploughman, or tiller of the soil). The fellahis have been mainly Minhammadans since the conquest of the county in the 7th century, but \$24,474 Contic Christians are enumerated in the towns and villages. These Egyptian townsmen and peasantry numbered 12,404,942 in the total of the Census of 1217 (Including 126,434 in the total of the Census of 1217 (Including 126,245 including 136,45 (Census of 1217). A second element is the Bedouin, or nomadic Arabs of the Libyan and Arabian deserta (22,653 Bedouins and 127,364 Sudanese and Berbarin), of whom about one-seventh are real nomade, and the remainder semi-sedentary tent-dwellers on the outskirts of the cultivated land of the Nile Valley and the Faydm. The third element is the Nubern of the Nile Valley abuse of the Conic Valley and the rapid of the Valley and the Tay of the Nile Valley and the Tay of the Nile Valley and the Tay of the Nile Valley and the Tay of the Nile Valley and the Tay of the Nile Valley and the Tay of the Nile Valley and the Tay of the Nile Valley and the Tay of the Nile Valley and the Tay of the Nile Valley and the Tay of the Nile Valley and the Tay of the Nile Valley and the Tay of the Nile Valley and the Tay of the Nile Valley and the Tay of the Nile Valley and the Tay of the Nile Valley and the Tay of the Nile Valley and the Tay of the Nile Valley and the Tay of the Nile Valley and the Tay of the Nile Valley and the Tay of the Nile Valley and the Tay of the Nile Valley and the Tay of the Nile Valley and the Tay of the Nile Valley and the Tay of the Nile Valley and the Tay of the Nile Valley and the Tay of the Nile Valley and the Tay of the Nile Valley and the Tay of the Nile Valley and the Tay of the Nile Valley and the Tay of the Nile Valley and the Tay of the Nile Valley and the Tay of the Nile Valley and the Tay of the Nile Valley and the Tay

Nubians are Muhammadans.

Foreign Population.—At the Census of 1917 the foreign residents were 25,998, of whom 30,797 were Turks, 56,731 Greeks, 40,198 Its ians, 24,354

British, 22,270 French and Tunisians, 2,780Austro-Hungarians 4,225 Russians, 127 Germans, 23,932 other Europeans and Americans, and 2,496 Persians.

Religions.—At the Census of 1927 there were 11,523,753 Muhammadans, 1.036,107 Christians, 59,581 Jews and 8.814 other religions. The chief Muhammadan religions authorities in Egypt are the Sheik el Gamt el Azhar and the Mufti el

Di-yar el Masriya.

Government.—From B.C. 30 to A.D. 639 Egypt was a province of the Roman Empire, but in A.D. 640 the Christan inhabitants were subjugated by Moslem invaders, and Egypt became a province of the Eastern Caliphate. In 1527 the country was incorperated in the Ottoman Empire, and was governed by pashas sent from Constantinople until the beginning of the 18th century, when for about 100 years the ruler was chosen from among the Mamelukes, or bodyguard Mokammed Ali, who was proclaimed Pasha in 1805, exterminated the Manuclukes in 1811, and was eventually made het editary governor of Egypt and the Sudan by a firman from the Sultan of June 1, 1841.

Rulers of Egupt since 1811.

Legislature—Legislative power is exercised by the King in concurrence with the Parliament within the limits laid down in the Constitution established by Royal rescript of April 79. 7923, and general elections took place for a Parliament consisting of two houses, which first assembled March 15, 7924. Parliament consists of a Fenate of 722 members of whom two-fifths are nominated by the King, the ren-amider being elected on the basis of x Senator for every x80,000 inhabitants; and of a Chamber of Deputies elected on the basis of x for every 60,000 inhabitants.

Executive.—The executive power is exercised by the King through his Ministers within the limits of the Constitution, the Ministry being held jointly responsible to the Chamber of Deputies.

Local Government.—The cluef towns constitute governorships (muhd/xas), and the remainder of the occupied country is divided into provinces (mudirias), which are subdivided into districts (markaz), each under amamür, who controls the head man (omda) of each village in his district. By the law of 1883 provincial councils were instituted, consisting of two representatives from each markaz, under the presidency of the mudir (or governor) of the province. These councils were reorganised in 1910 and were made the elementary education authority for the province, with certain restricted powers of local government.

Defence.—In 1882, a military revolt, headed by an officer of the Egyptian Army (Ahmed Arabi Paska) assumed alarming proportions, and a British expedition was despatched to re-establish the authority of the Khedivo. Meanwhile a revolt had broken out in the southern provinces, headed by Sheikh Mohammed Ahmed.

of Dougola, who proclaimed himself a Mahdi of Islam, and the British expeditionary force, sent to quell the rebellion of 188s, remained in the country as an army of occupation The defence of Egypt is reserved by the Constitution and remains under British control, the British garrison (under the command of a British general officer) amounting to 3 cavalry regiments, 3 batteries of artillery, a companies of engineers, 7 battalions of infantry and x armonied car company, a total of xx.450. Service in the Eyyptian Army is nominally compulsory on all Egyptian subjects between the ages of 19 and 27, the recruits required each year being chosen by ballot; but certain classes (professors, stuby ballot; but certain classes (professors, stadents, flovernment employees, &c) are exempt, and exemption may also be purchased for £E20, if paid before the ballot. Natives of the Sudan are enlisted voluntarily for service in the Egyptian Army, which had a strength of about ra, aso all ranks in rgs?. There is no Nacy in the proper sense of the term; there are 3 small cruisers belonging to the Coast Guard and Fisheries service, and 4 vessels under the Muistry of Communications while the

under the Ministry of Communications, while the different Government Departments possess s'eamers on the Nile for inspection purposes.

The Egyptian Police (under the Ministry of the Interior) consists of City and Provincial Police, the former comprising 306 officers (75 Europeans), 476 European constables, and 6,585 men, the latter 366 officers and 6,565 men. There are also 60,859 ylanjas, or native night-watchinen. Education on native lines has long been given in elementary vernacular schools. The native

in elementary vernacular schools. The native system of education is completed by the more promising pupilsat the Azhar University in Cairo, the principal University of the Moslem world. In 1923-3 there were 151 Elementary Schools (Maktabs) under Government supervision, with a3,996 pupils and 3,770 Maktabs under inspec-tion for grants-maid with 27,499 pupils; there were also 54,528 pupils in other elementary schools. The government primary schools give a 4-years' course and propare for admission to secondary acquaitural and other special secondary, agricultural and other special schools. There were also x,x48 Egyptian instischools. There were also 1,148 Egyptian insti-tutions with 121,935 pupils and 560 foreign institutions with 56,956 pupils. There are Colleges of Medicine, Law, Education, Engineering, Commerce, Veterinary Science and Agriculture at Cairo. Much assistance is given to education by pivate enterprise and benevolence and foreign schools abound. A National Univer-sity was founded in 1908 at Cairo.

Agrundture.-The total area of Egypt is estimated at approximately 222,400,000 English acres, of which about 8,450,000 acres are formed of the alluvium brought down by the Nile from the Abyssman hills, the remainder being chiefly limestone desert. Only the former are cultivable, and only the portion that can be irrigated from the waters of the Nile—this portion amounts at present to 5,600,000 acres (1926), and is capable of extension (to 7,600,000 acres) by the improvement of water storage facilities and means of distribution. In 1930 the land was held as to 5,303,568 feddins by a,170,033 native owners, and as to 480,741 feddins by 6,894 foreign owners. The principal crops grown during Sash (summer) are cotton, rice, sugar cane, and Sorgho (a variety of maze) Nui (flood) part of Sash, has the date of its comnencement fixed by the Irrigation Department according to the quantities of water available

before the flood, which reaches its highest level in September—it generally commences in July. The principal crops are maize and nice (winter) commences in November and ends in June. The principal crops are cereals, bersim (a variety of clover) and—mainly in Upper Egypt—beans, lentils, onions and helba. The total cotton crop and the value of the quantities exported in recent years :-

Year,	Kantars	Export value
1924-25	7,273,974	£E57,544,253
1925-26	7,964,645	43,825,564
1926-27	7,652,189	35,961,447
1027-28	6,041,499	45,138,000
1928- <b>29</b>	8,070,000	41,361,000
1030-31	8.015.400	

Live Stock.—In 1929 the cattle numbered 800,853, buffaloss 822,587, horses 38,371, mules 21,738, donkeys 739,121, sheep 1,002,683, goats 731,176, and camels 172,619.

Minerals -The riparian districts of the lower Valley of the Nile are ill-provided with workable numeral deposits, with the except in of abundant building materials. The mineral resources of Egypt, therefore, are situated in its otherwise barren deserts. Known deposits are chiefly situated at great distances from one another and from the Nile. This fact has retarded exploration and development, but of late years considerable progress has been made. Owing to luck of knowledge of mining, consequent upon their pursuit being entirely agricultural, the local industrial classes have had very little hand in the existing enterprises, whose capital and organisation are chiefly foreign.

Manufactures and Industries.—The principal articles of Egyptian manufacture are cotton and wollen fabrics, silks, embroideries, brass, silver and copper ware, leather goods, rugs, pottery, alcoholic beverages, sugar, perfumery and cigarettes. The principal Egyptian indus-tries are dyeing, tanning and coment.

Raulrays.—The principal lines radiate from Cairo to Alexandria (and on to Rosetta), Dannietta, and Ismailia (continuing northwards to Port Said and southward to Sucz). From Cairo the line runs southwards for a distance of 554 miles to Shellal, the First Cataract. At this point a steamer connexion runs to Wadi Halfa, connecting the Egyptian State with the Sudan Government Railways. Westwards from Alexandria (and close to the coast) runs a line, which it is hoped to extend eventually to the frontier at Solluni, thus joining Tripoll to Egypt. The total length of the Egyptian State Railways (excluding the Auxiliary Railways of Upper Egypt and the Western Oases Railway) on March 31, 1930, was a 3,300 miles. 37,585,000 passengers and 5,780,491 metric tons of merchandise were carried during 1933-4, the net receipts being £ Ex,820,487. The gauge is standard (4 ft. 81/2 in.), with the exception of 138 miles between Juxor and Shellal, which are 3 ft. 6 in. gauge. There are two other State-owned lines in Egypt, namely, the Auxiliary Railways of Upper Egypt, consisting of a8a miles of standard gauge, and the Western Oases Railways, a length of 141 miles (75 centimetre gauge) connecting the oasis of Khaiga with the Nile Valley. In addition to the Government lues, there are 865 miles of light railways exploited by public companies,

Motor Vehicles.—On Dec. 31, 1928, there were 14,122 private motor cars, 6,321 taxi-cabs, and 4,045 lorries and omnibuses.

Caravan Routes .- The principal caravan routes lead to the Cases of the Libyan Desert (though Kharga can now be reached by train), whence there is a route, known as the Darb el 'Arbain, leading to Dar Für and the south of the Sudan. There are many well-known routes across the Arabian Desert to the Red Sea, that from Qena to Qoseir being probably the most frequently

Shipping.—For the SUEZ CANAL see page 868.—Apart from the three great seaports of Alexandra, Port Said, and Suez, Egypt has but few harbours and anchorages adapted for large craft; the principal are those of Sollam and Matruh on the Mediterranean, Tor, Abu Zenima, Zeitia, Jemsa and Hurghada in the Gulf of Suez, and Safaga. Qosser and Halab on the Red Sea. The Khedivial Mail Steamship Line (which is under British management) has its headquarters at Alexandria and a depôt at Suez. The principal port is Alexandria, where 2,102 vessels (4,781,305 tons) entered and 2,106 vessels (4,800,655 tons) cleared in 1925.

Posts and Telegraphs -There were in 1925 58,753,000 letters and post-cards, and 26,391,000 newspapers, &c., and a total foreign correspondence of 43,000,000 Therewere on March 3x, 1925, 136,522 miles of telegraph and telephone wire. A system of savings hanks has been introduced, under the control of the Post Office, the actual deposits being collected in rural districts by the sarraf (village tax-collector).

13,910,000 Debt.-The Caisse de la Dette, a body repre-Deut.—The Caisse de la Dette, a body representing the creditors of the Egyptian Treasury, has considerable powers and special privileges. The Caisse, appointed during an era of bankruptcy, succeeded in protecting the interests of the bondholders, but as Egypt became solvent and prosperous, its stingent regulations prevented the development of the country out of surplus revenue a large part of which was held surplus revenue, a large part of which was held in suspense as contingent security for the service of the debt. Though the Carsse still exists, its duties are now limited to receiving the revenues necessary for the luterest and for the payment of the coupons as they become due, while it also holds a considerable reserve fund  $(£ \mathbb{F}_3 \circ 65, \mathbf{x}_4 \circ \mathbf{n})$  and  $\mathbb{F}_3 \circ \mathbf{n} \circ \mathbf{n} \circ \mathbf{n}$  and  $\mathbb{F}_3 \circ \mathbf{n} \circ \mathbf{n} \circ \mathbf{n}$  and  $\mathbb{F}_3 \circ \mathbf{n} \circ \mathbf{n} \circ \mathbf{n}$  and  $\mathbb{F}_3 \circ \mathbf{n} \circ \mathbf{n} \circ \mathbf{n}$  and  $\mathbb{F}_3 \circ \mathbf{n} \circ \mathbf{n} \circ \mathbf{n}$  and  $\mathbb{F}_3 \circ \mathbf{n} \circ \mathbf{n} \circ \mathbf{n}$  and  $\mathbb{F}_3 \circ \mathbf{n} \circ \mathbf{n} \circ \mathbf{n}$  and  $\mathbb{F}_3 \circ \mathbf{n} \circ \mathbf{n} \circ \mathbf{n}$  and  $\mathbb{F}_3 \circ \mathbf{n} \circ \mathbf{n} \circ \mathbf{n}$  and  $\mathbb{F}_3 \circ \mathbf{n} \circ \mathbf{n} \circ \mathbf{n}$  and  $\mathbb{F}_3 \circ \mathbf{n} \circ \mathbf{n} \circ \mathbf{n}$  and  $\mathbb{F}_3 \circ \mathbf{n} \circ \mathbf{n} \circ \mathbf{n} \circ \mathbf{n}$  and  $\mathbb{F}_3 \circ \mathbf{n} \circ \mathbf{n} \circ \mathbf{n} \circ \mathbf{n}$  and  $\mathbb{F}_3 \circ \mathbf{n} \circ \mathbf{n} \circ \mathbf{n} \circ \mathbf{n}$  and  $\mathbb{F}_3 \circ \mathbf{n} \circ \mathbf{n} \circ \mathbf{n} \circ \mathbf{n}$ sterling) on April 1, 1928 and 1929 :-

The Cost of the Debt (in the Budget for 1930-31) inclusive of £E664,826 assigned to the service of the Ottoman Loans of 1855, 1891 and 1899,

which were guaranteed on the Egyptian Tribute, was stated at £E4,697,284.

CAIRO, the capital (population 1927, 1,064,567), stands on the E. bank of the Nile, about 14 miles from the head of the Delta. Its oldest part is the fortress of Babylon in old Cairo, with its Roman bastons and Coptic churches. The carliest Arab building is the Mosque of 'Amr, dating from A.D. 643, and the most conspicuous is the Citadel, built by Saladin towards the end of the 12th century. The bazaars are always interesting, especially the Khan-ol-Khalili, the Hamzawi, and the Brass Bazaar, though the Muski, which leads to them, is fast losing its oriental character.

ALEXANDERA(population 1927, 573,023), founded B.C. 322 by Alexander the Great, was for over 1,000 years the capital of Egypt 1ts great Phaios, or lighthouse, was one of the "Seven Wonders of the World" (see p. 87). It now contains two roys palaces, Ras-el-Tin and Montaza, while almost the entire cotton trade of the country is here controlled by the law dealers. the country is here controlled by the big dealers and brokers. At the census of 1927 the towns of Tanta (90,014), Port Said (104,603), Mansura (53,696), Assurt (57,132), Farytim (52,372), Zagazig (52,351), and Damanhur (51,709), also exceeded 50,000 inhabitants. CAPITAL, Cairo.

FLAG: Green, with r white crescent (convex side to flagstaff), and three 5-pointed white stars (arranged in an equilateral triangle) between the hours.

Mühtary Attaché, Col. Aejmelæus-Aimä, C.B.E. Commercial Attaché, J. E. Lundstrom (actung), reg Cannon Street, E.C. 4. A country situated on the guifs of Finiand and Bothnia, which was conquered by Russia from Sweden, and united to the Russian Empire, as an automonus but not sovereim Grand-Dudy. an autonomous but not sovereign Grand-Duchy. in 1809. When the Russian Empire broke down in 1917 Finland declared herself an independent sovereign state (Dec. 6, 1917). The following year the country sustained severe disturbances on account of the aggression of Russian Bolshevism. but succeeded in restoring order, and the rela-tions between Finland and Russia were finally tions between Finland and Russia were finally settled by the Treaty of Dorpat (Oct., 1920). The area is 149,226 square miles, with a population (1930) of 3,634,047, of whom (in 1920) 1,574,128 were Finnish-speaking, 240,653 Swedish-speaking, and 1,603 Laps, leading a nonadic life in the north. Nearly all the inhabitants are Lutherans. The Aland Archipelago, a group of some 300 small islands at the entrance to the Gulf of Bothnis (area 537 square miles, population about 27,000), forms part of the Republic. There are 3 universities, 2 at Halsinki (Helsington) and 2 at Turkn (Abo). Helsinki (Helsingfors) and a at Turku (Abo); the university of Helsinki (founded 2640 at Turku and removed to Helsinki in 1828) has nearly 5,000 students, of whom about 7,000 are women. In addition, there are x technical and x commercial schools. The leading crops are rye, barley, cats, potatoes. Saw mills, wood pulp, cellulose and paper manufacture provide the chief industry, and the forests (6x,400,000 acres)

are a great source of wealth; there is no European country so wealthy in forests except Russis, the exports of timber in 1928 being rates, are exports of timber in 1938 being ratios standards; wood pulp, eardboard and paper, and dairy produce are also exported. There are (1931) 3,378 miles of railroad and about 3,900 miles of telegraph, with a well developed telephone system (32 per 1,000 inhabitants). There is railway connexion with Sweden and There are and the beautiful the second telephone conversion with Sweden and Russia, and telephone connexion with most European countries and with U.S.A. The merchant fleet (1930) consists of 983 vosses (331,032 tons), of which 557 are steamers.

Service in the Army is universal and computers the pages of fact the below about a computer the pages of fact the below about a computer.

sory, the peace effective being about 25,000 all ranks; there is also a volunteer organisation of Civic Guards with an enrolled strength of about

The country was formerly governed by the Finnish Senate of as members, with a Diet of 4 estates elected by the people; but under the Constitution of Jan. 1, 1997, there is a single Chamber elected by universal suffrage of both sexes, women being likewise eligible for election to the Chamber. Finland was thus the first to the Chamber. Finland was thus the first country to concede woman suffrage and representation, and it is noteworthy that it was gained without agitation.

Finland is a Prohibitionist country, the only

one in Europe.

Finnish and Swedish are the official languages.

GOVERNMENT. - The monarchical system of government was overthown by the French Revolution (1769-1793), and the French Revolution (1769-1793), and the First Republic endured until the Great Napoleon (born Aug. 15, 1769, died May 5, 1821) founded the First Empire in 1804. The monarchy was restored in 1814, and also after the "Hundred Days" of Napoleon (March ac-June 29, 1815), until the Second Republic of 1848, which became the Second Empire on Nov. 22, 1852. On Sept. 4, 1870, the Emperor Napoleon III. (nephew of the Great Napoleon) was deposed, and the Third Republic was set up. The head of the Republic is the President, elected for 7 years by the National Assembly of ejected for 7 years by the National Assembly of the two houses of the Legislature, the Senate of 314 members (elected by indirect vote for 9 years, one-third being renewable every 3 years) and the Chamber of Deputies of 61s members (elected by direct vote for 4 years) Members of the legislature receive 64,000 france a year and travelling facilities over the railways Production.—The chief agricultural involuces

PRODUCTION .- The chief agricultural products are wheat, barley, rye, maize, oats, potatoes, beetroot (for the manufacture of sugar), hops, &c. Fruit trees abound, and are very productive, the principal being the olive, chestnut, walnut, almond, apple, pear, citron, fig, plum, &c The agricultural production is shown in the

following table :-

#### Production (Metric Tons).

(rop	. zgag.	1,030
Wheat	8,705,000	6,891,000
Rye	1,002,000	750,000
Barley	x,285,000	1,000,000
Oats	5,744,000	4,400,000
Potatoes	13,429,000	14,000,000

Forestry is an important industry, the principal forests being those of the Ardennes, Complègue, Fontainebleau, and Orléans, consisting chiefly of coak, birch, pine, beech, elm, chestnut and the cork-tree in the south. The vine is cultivated to a very great extent (944,443,000 gallous of wine were produced in 1930), as the names Bordeaux, Burgundy, Champagne, &c., universally testify; cider-making is also an important

of Versailles, the coalfields of the Saar Basin are ceded to France for 12 years, at the end of which time the inhabitants are to decide by a plebiscite whether they will remain French, return to Germany, or become a self-governing return to Germany, or become a self-governing community. The coalields abut on Lorraine, and have an area of sry square miles, with a population of 640,000, and they include the towns of Saarbrick (60,000), Saarlouis (16,000), and Merzig (10,000), on the River Saar. In 1911 the coal mines of France produced 30,000,000 tons, and the production of the enlarged area reached 34,000,000 tons of 000 in 1939. The most important manufactures are of metals, wetches devaller; each test work convince not most important hammacures are of message watches, jewellery, cabinetwork, carving, pottery, glass, chemicals, dyeing, paper making, woollens, carpets, linen, silk and lace. Glass manufacture and pottery are also important, and the sardine fisheries and the culture of ovsters are a source of wealth.

DEFENCE.—The National Army of France consists of the Metropolitan Army, the Colonial Army, the Gendarmeric and Republican Guard, and of the partly native armies of Algeria, Morocco, and Timis. The peace strength of the Metropolitan Army (1930-32) was 326,992 all ranks, including the (Military) Air Force (35,800). The Naval Air Force (for Coast Defence) is included by the Naval personal. In the West of the Peace 1930 and 1930 are 1930 and 1930 are 1930 and 1930 are 1930 and 1930 are 1930 and 1930 are 1930 are 1930 and 1930 are 1930 are 1930 are 1930 and 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 are 1930 in the Naval personnel. In the War of 1914-1918 over so per cent, of the French people were mobilised, and 9,717,000 all ranks passed into the Armles of France (exclusive of troops from Algeria, Tunis and Morocco). The French Navy was manned in 1930 by 57,415 officers and other ranks. For strength see Tables pp. 286 and 287.

ARMISTICE MONUMENT.—In the Forest of Compleyne is a Carrefour de l'Armistice, from which the Claristre de la Victoire leads to the Armistice Monument, unveiled Nov. 12, 1922.
The monument marks the spot where the Germans signed the armistice terms presented by Maréchal Foch, and bears the inscription Ici le 11 Novembre 1918 succomba le criminel orgueil de l'Empire Allemand vaincu par les peuples libres qu'il prétendait asserver.

EDUCATION.—The educational system is highly developed. Central Administration comprises (a) Ministry of Public Instruction; (b) Superior Educational Council, charged with the actual administration; (c) Consultative Committee (advisory); (d) Educational Bureaux and Inspecting Staffs, whose heads report direct to the Minister. Local Administration comprises (a) Territorial Academies, with inspecting staffs for all grades; and (b) Departmental Councils, presided over by the prefet, charged especially with primary educa-tion. By the Law of July, 1904, all congrega-tionist institutions are to be suppressed within zo years, and many were at once closed, some re-oponing under lay management. (i.) Primary Secular, comp. and free Age 6-12. Schools include (a) infants; (b) lower primary; (c) higher do. Supplementary courses, and courses for adults. Lower and higher primary certificates granted. Numerous private courses are aided from local funds. Schools are for boys, for girls, or mixed. (ii ) Secondary: State lycées, communal colleges, and many private establishments, 7-yrs. course, ally testify; etter-making is also an important and many private establishments, 7-yrs, course, industry, and the production in 1929 amounted to 512,166,000 gallons. The live stock (1928) (c) Latin and sciences; or (d) Latin and modern included 15,005,080 cattle, 10,415,010 elleep, and 6,016,940 pigs. The mineral resources include completion. For females, a similar organisation, coal, pig iron, copper, lead, sliver, antimony and salt. Under Article 50 of the Treaty Association well-known. (iii.) Special Schools are very numerous, many public institutions being dependent on ministries other than that of Public Instruction. (iv.) Universities. State universities alone grant degrees, but numerous private faculties and private institutions further higher education): Aix, Algiers, Besançon, Bordeaux Caen, Clermont, Dijon, Grenoble, Lille, Lyon, Montpeller, Nancy, Paris, Poitiers, Rennes, Strassbourg, and Toulouse.

COMMUNICATIONS. — The length of the Routes Nationales in 1928 was 14,425miles. The principal rivers of France are the Seine, Loire, Garonne, and Rhône; the navigable waterways having a length of (1924) 4,222 miles, with 2,221 miles of canals. The system of railroads in France is very extensive; they are almost entirely concedes, and become State property after the evpiration of the concession. The length of lines of general interest, inclusive of local lines, open for traffic on January 1, 1930, was 26,777 miles, of which over 750 miles are electrified. The length of telegraph wires (1929) was 22,427 miles, and of telephone lines 120,000 miles, with nearly 1,000,000 subscribers. In 1928 there were 642,744 private motor-cars registered in France, of which (1926) 541,438 were touring cars. Goods transport vehicles numbered 205,587, cycle-cars 27,450, motor-cycles 22,207, and motor-boats 3,313. In 1927 the passengers carried in civil aircraft numbered 15,857, the weight of cargoes being 1,544,000 lb. (exclusive of 275,000 lb. of mails).

Shippiny—The gross tonnage of the French mercantile marine in 1230 was 3,52,579 gross tons, of which 146,911 tons were motor vessels and 60,288 tons were sailing ships. During the year 1230 the tonnage of French and foreign vessels entering French ports amounted to \$3,02,343 tons, of which 14,436,236 tons were French, while the total clearings amounted to 49,326,673 tons, of which 12,772,845 tons were French. The chief ports are Marselles, Cherbourg, Le Havre, Rouen Bod deaux, Calais, Boulogne, and Dunkirk. A bill was passed by the Chamber in 1221 for the canalisation of the Rhone, which will make the river navigable for 1,200 ton vessels from the 80 to Switzeriand, and will also provide electric power and rrigation to the surrounding departments.

COMMERCE.—The principal imports are wool, cotton, coal, sitk, oleaginous fruits and seeds, machinery, raw skins, cereals, thinber, caoutchouc, copper, petroleum oils, coffee, and wines. The principal exports are cotton tissues, silk tissues, wool, woulen tissues, wines, sinallwares, autromobiles, &c. silks, raw skins, millinery and artificial flowers, dressed skins, tools and metal goods, machinery, pig non, butter, table fruits, refined sugar, brandy and liqueurs, fish, and cheese.

Alsace - Lorraine. — High Commissioner, M. Miham (1920). Alsace-Loriame, formerly a part of the Holy Roman Empire, was ceded to France in 1648 at the Peace of Westbalia, and was ceded to Germany by the Treaty of Frankfort (May 10, 1871), after the Franco-Prussian War. At the close of the War, 1914-1928, the Provinces were regained by France under the Treaty of Versatiles (June 28, 1929). They embrace the fertile plain between the Rhine and the Vosges, and stretch beyond these mountains as far as Luxemburg. When, tolacco, hops, iron, and coal are among the leading productions, and the cotton industry is most flourishing The area is 5,563 square miles; the population in March, 1921, 794,529. Mulhouse (1928), and Metz (69,624).

Algeria.—The three departments of Algeria Algiers, Oran, and Constantine—form an integral part of France, under a Governor-General, assisted by a Consultative Council. These departments lie between 4° 36′ N. to 6° 16′ E. longitude, 37′ 6′ N. to an undetermined S. limit, about 30° N., covering an area estimated at 333, 130 square miles, with a population (1926) of 6,064,865. of whom \$72,439 were Europeans and 5,722,445
natives. The revenue in 1931 was estimated
at francs 1,199,265,329, and the expenditure at
francs 1,299,402,883. The bulk of the trade is
with france, the experts to France amounting in 1929 to france 2,023,723,000 (total exports fr. 4,036,589,000), and the imports from France to fr. 4,552,960,000 (total imports fr. 5,849,950,000). The exports consist mainly of wine, wheat and other cereals, sheep and oxen, skins, fruits, zinc and iron ores, olive oil, phosphates, cork wood, esparto grass, manufactured tobacco, and vegetables. The principal imports from the U.K. were coal and patent fuel, machinery, cotton oil, cotton tissues, tin plates, clothing, and prepared skins. Iron copper, quicksliver, zinc, and lead mines are being worked. In 1926 there were 2,596 miles of railroad open for traffic; and in 1928 the number of ships engaged in foreign trade entering Algerian ports was 4,322 of a net tomage of 6,982 250 tons. The principal town is Algiers, the capital (municipal population, 1926, and,a:8), a most important coaling station and much frequented as a health resort; outcomes are oran (150,301), Constantine (93,733), towns are Oran (150,301), Constantine (93,730), Bona (51,869), Sidi-bel-Abbas (43,000), Phillipville (30,000), Mascara (28,000), and Tiempeen (27,000) General, M. Jules (137de (1930)). much frequented as a health resort; other large

CAPITAL, Paris, on the Seine, Population (1931), 2,871,039; there are 82,127 houses and 1,140,366 families according to the census of March 252. Fourteen other cities exceed 100,000 — Marseilles 652,196, Lyons 570,740. Bordeaux 256,026, Lilie 201,921, St. Etlenne Bordeaux 256,026, Lille 201,021, St. Etienne 122.737, Nautes 184,509, Nice 184,441, Toulouse 180,771, Strasburg 174,492, Le Havre 128,022, Rouen 122,808, Roubaix 177,209, Toulon 125,120, Nancy 124,491, Clermont-Ferraud 121,707, and Reims 100,998. Mulhouse, Amiens and Limoges

exceed 90,000, and 30 others exceed 50,000.

In AFRICA.—Algeria (see anove) is an integran part of France. Morocco (see p. 848-846) is a Frencl. (and partly Spanish) protectorate.

Truis has been a French protectorate since 1881. It lies between Algeria and Tripoli, and extends southwards to the Sahara, with a total content of the sahara, with a total content of the sahara, with a content of the sahara, with a content of the sahara, with a content of the sahara, with a content of the sahara, with a content of the sahara, with a content of the sahara with a content of the sahara with a content of the sahara with a sahara with a content of the sahara with a content of the sahara with a sahara with a sahara with a sahara with a sahara with a sahara with a sahara with a sahara with a sahara with a sahara with a sahara with a sahara with a sahara with a sahara with a sahara with a sahara with a sahara with a sahara with a sahara with a sahara with a sahara with a sahara with a sahara with a sahara with a sahara with a sahara with a sahara with a sahara with a sahara with a sahara with a sahara with a sahara with a sahara with a sahara with a sahara with a sahara with a sahara with a sahara with a sahara with a sahara with a sahara with a sahara with a sahara with a sahara with a sahara with a sahara with a sahara with a sahara with a sahara with a sahara with a sahara with a sahara with a sahara with a sahara with a sahara with a sahara with a sahara with a sahara with a sahara with a sahara with a sahara with a sahara with a sahara with a sahara with a sahara with a sahara with a sahara with a sahara with a sahara with a sahara with a sahara with a sahara with a sahara with a sahara with a sahara with a sahara with a sahara with a sahara with a sahara with a sahara with a sahara with a sahara with a sahara with a sahara with a sahara with a sahara with a sahara with a sahara with a sahara with a sahara with a sahara with a sahara with a sahara with a sahara with a sahara with a sahara with a sahara with a sahara with a sahara with a sahara with a sahara with area of about 45,000 sq. miles and an estimated population of 2,000,000, of whom about 600,000 are Berbers and 500,000 Arabs. The valleys of the northern region support large flocks and herds, and coutan rich agricultural areas, in which wheat, barley, and oats are grown. The vine and olive are extensively cultivated. The principal minerals are coal, copper, lead, zinc principal inherats are coat, copier, read, zinc and iron, and phosphates and matble are also worked. The chief exports are phosphates, olive oil, wheat, espatto grass, barley, beans, blankets, sponges, and dates; the chief imports are textiles and other manufactures, iron, steel, machinery and provisions. Eighty per cent. of the trade is with France and Algeria. In 1929 the imports were valued at s,036,000,000 francs and the exports at 1,641,000,000 francs. Tunis, the the exports at x,6xx,000,000 france. Tunis, the capital, has a municipal population of x8,995; other towns are Sfax (27,723), Bizerta (20,523). Suas (21,226), Kairwan (19,426), Gabes (15,112), and Monastir (8,837). French West Africa extends from Mauritania to Dahomey, and has a total area of x,509,733 square miles, and a population of x1,344,076. It consists of Senegal (19,400 sq. miles, pop. x 250,500), capital, St. Louis; the trade of Senegal in 1936 was francs 200,908,934 imports, and francs 200,908,934 imports, and francs 200,908,909,94 imports, and francs 200,908,909,91 import cotton fabrics (francs 200,549,000); Upper Senegal Niger (304,000 sq. miles), and the Niger Military Territory (533,000 sq. miles), which have a total population of about 6,036,200; French Giunea (25,000 sq. miles, pop. 2,737,330); Indra Castica, 100 sq. miles, pop. 2,737,330); adjoining Dahomey (38,000 sq. miles, pop. 2,737,330); adjoining Dahomey is the French Sphere of the former German colony of Toyoland (23,400 sq. miles, pop. 800,000); while the hinterland of these colonies forms the French Schara, which has an estimated area of 924,160 sq. miles and a population of about 450,000. French Equatorial Africa consists of the French Congo (53,000 sq. miles, pop. 9,000,000) and of the French Sphere in the former German territory capital, has a municipal population of x85,996; (513,000 84. miles, pop. 9,000,000) and of the French Sphere in the former German territory French Sphere in the former German territory of Cameroon (25,000 84, miles, pop. 2,750,000). The Hooghly; Karikal, in the Cauvery delta; and Manh, on the Godstery delta; and Manh, on the Godstery delta; and Manh, on the Godstery delta; and Manh, on the Malabar coast—the total area being so square miles with an estimated population of (1928) 865,000. The trade of Pondichery and Karikel in 1927-8 was valued at £265,529 for

gold, silver, iron, copper, lead, and zinc. The chief exports are gold, cattle, bark, manioc (for arrowroot), beans, hides, skins, fibre, rice, timber and rubber; the chief imports are cottons, metal manufactures, wines and spirits, coal, clothing, line and cement. The capital, Antananarivo, has a population of 75,000; other towns are Tamatave (the chief port), Majunga, Diego-Suarez, Mananjary, Tuléar, Andevoranto and Vohémar Off the south-east coast are the uninhabited islands of St Paul, Kerguelen and Amsterdam. There is now direct communication across French and British territory in Africa, with posts on the Atlantic and Indian ocean.

In AMERICA -- Off the south-east coast of Newfoundland are two small groups of islands, of which the largest arc St Pierre and Miquelon. In the Vest Indies, Martinique and Guadaloupe, with Basee Terre, Marie Galante, Ile des Saintes, Petite Terre, St. Bartholomew, and St. Martin; Petite Terre, St. Battholomew, and St. Martin; and in South America, Cayenne or French Guiana. Included in Cayenne is a group of islanda (St. Joseph Ile Royal, and Ise du Diable) known as Isle du Salut. On Decu's 1816 Major Dreyfus was imprisoned from 1894-1899. The total area of French possessious in North and

total area of French possessions in North and South America is 35,320 square miles, with a population of 488,850.

In OCEANIA—New Caledonia (7,200 %), ms., pp. 50,500 is a large island with dependencies, the Isle of Pines, the Wallis Archipelago, the Loyatty Islands (Mané, Lifou, Uvéa, &c.), the Huon Islands, and Futuna and Alofi. The Society Islands (Tainti, Moorea, &c.) have area of about \$65 square miles, and a population of about \$4,000; the Marquesas (Nukahiya, Hiyasa &c.) son 80, miles, non. 250. Leeward or about 14,000; the harquesas (Nutaniva, Hivasa, &c.) 500 sq. miles, pop. s,500. Leeward Isles (Huahiné, Raiatéa, Tahaa, Bois-Bora, Maupiti, &c.); the Gambier Islands (Mangareva, &c.); the Tubuai Islands (Ruruti, Raivavac, Rimatava, &c.): Rapa Island; Makatéa; and Majao Island. The New Hebrides are under joint Franco-British administration.

# GERMANY. (Deutsches Reich.)

President of the German Reich, General Field-Marshal Paul von Hindenburg, born Oct. General a, 1847, assumed office May 12, 1925

MINISTRY (October 10, 1931).

Chancellor, Dr. Bruening. Foreign Affairs, Dr. Bruening. Interior, Herr Grocuer Labour, Dr. Stegerwald. Finance, Herr Dietrich. Agriculture and Food, Dr. Schlele, Justice, Dr. Joel. Defence, Herr Groener. Communications, Herr Treviranus. Posts, Dr. Schatzel. Economy, Prof. Warmbold.

Ambassador in London, Baron von Neurath. 9 Carlton House Terrace, S.W. 1. Consular Dest. of the Embassy, 9 Carlton House Terrace, S.W. 1.

The area of Germany is approximately 182,200 square miles, with a population on June 16, 1925, of 62,592,575 (without Saar district), of 10, 1935, of 0.592,575 (who have the free the free the females. The population on Dec. 1, 1930, was 64,93,993. Biths in 1930 numbered 1,126,839 and deaths 710,905, births being 17'5 per 1,000 of population, deaths 11'1 per thousand. Religious confessious in the present area were

neugious concessions in the present area were in 1925:—Protestants 40,024,677, Roman Catholics 20,193,334, Jews 564,379, others 1,638,229.

There are 45 large towns with over 100,000 inhabitants, and of these 20 are in Prussia, 4 in Saxony, 3 in Bayaria, 2 each in Baden and Hosse, 2 each in Wittenburg 2019. Hesse, I each in Winttemburg and Brunswick, and three Hanse Towns.

At the outbreak of war, Aug 1914, "Germany" was a Confederate League, bearing the name "German Empire," under the hereditary presidency of the King of Prussia, holding the title of "German Emperor."

By the Treaty of Versailles the "Reichsland of Elsass-Lothringen and the Saar coal basin (temporarily) were ceded to France; parts of Posen and West Prussia to the newly-formed Republic of Poland; North Schleswig to Den-mark; and Moresnet and Malmedy to Belgium. Plebascites held in June 1920 in parts of East and West Prussia yielded majorities for Germany. A plebiscite to decide the fate of Upper Silesia, which was held under the Peace Meaty, resulted in division between Poland and Germany. Memel City with adjoining territory has been ceded to Lithuania.

The Colonial possessions of the German Empire extended over x.035,085 sq. miles in Africa, 96,220 sq. miles in the Pacific, and 2,943 sq. miles in Asia—a total of x.134,335 sq. miles, with a population estimated in x914 at x5,000,000. By the Treaty of Versailles Germany renounced her overseas possessions, with all rights and titles therein, and the delegates to the International Council at Paris allocated Togoland and Kamerun to Great Britain and France; German East Africa to Great Britain; German S.W. Africa to the Union of South Africa; the German Pacific possessions N. of the Equator to Japan; and those S of the Equator to Australia and New Zealand.

On Nov. 9, 1918, the German Emperor abdicated, and the Government of the country was Cauch, and the Government of the country was taken over by the Council of the People's Commissioners in Berlin. On Nov. 11, 1918, Germany was granted an armistice, and on June as, 1919, peace was signed at Versailles. In Jan. 2919, elections were held to a National Assembly on the basis of universal adult suffrage unale and female), and on Feb. 11, 1919, the first President of the German Versammlung was elected at Weimar. Under the new Constitution of August 11, 1919, the federal legislature consists of a Reichstay representing the whole nation and elected by popular suffrage (male and female), with proportional representation, and a Reichstat representing the separate States The people possess the right of initiative and the referendum, Bills dealing initiative and the referendum. Bills dealing with economical questions or social issues arising thereout must first be submitted to the new advisory Economical Council (Reichswirtschaftsrat)

PRODUCTION AND INDUSTRY.—Germany is primarily an industrial country. On June 16, 1925, 41.4 per cent of all persons with earning occupations were engaged in industry, 30.5 per cent. in agriculture, 16.5 per cent. in trade and communications, 4.7 per cent. in the public services and the professions, x.8 per cent. in the health services, and 5'x per cent. in domestic service. Of the total area in 1925 the area under agriculture was 25,508,000 hectares (whereof 20,681,147 hectares arable land in 1927), and the area under forests 12,737,22 hectares. The Live Stock (Dec. a, 1989) included 3,617,141 horses, 19,943,974 cattle, and 19,943,974 pigs. The production of coal in 1989 was 163,440,000 netric tons, lignite 174,444,000 tons, iron ore 6,373,500 tons, and potash salts 13,378,000 tons. Rock-salt, lead-ore, gold and silver ore, graphite, asphalt, petroleum, Epsomsalts, boracite, tin-ore, quicksilver-ore, antimony-ore, cobalt-ore, inckel-ore, arsenic-ore, manganese-ore, bismuth-ore, uranium-ore, wolf-ram-ore, pyrites, vitrolic-ore, and alum-ore are also worked. Crefeld, Elberfeld-Barnen, Cheminitz, Augsburg, and the provinces of Westphalia and Silesia are the great centres of the textile industries. By laws of 1919 and 1920, all coal, heavy iron and steel, potash and coal-tar producing concerns were compulsorily fused into All-German Syndicates, governed by assemblies representing Producers, Traders and Consumers, with equal representation for Employers and Employed.

ECNONIC CONDITION.—Industrial production passed its highest point in xsy, but did not begin to sink rapidly until xsys, but did not begin to sink rapidly until xsys, in xsys output of iron and steel fell more than 40 per cent below the highest post-war volume, and some manufacturing industries were occupied to less than half their capacity. In consequence of drastic increases in agrarian import duties, the production of primary food-products increased, and in 4 years the importable wheat-deficit fell from a million to about a quarter million tons. In February, xsys, the total number of unemployed was 3,356,000: February, xsys, 4,972,000; September, rsys, 4,324,000. Export trade in xsys and rsys fell off less than that of other commercial countries, and as import trade declined heavily very large active trade balances were attained. Shipping was badly depressed, xsys. In the summer of 1931 a serious credit crisis, accompanied by bank failures, was caused by the summary withdrawal of foreign short-term credits, and the Reichsbank's reserves were dangerously depleted. The crisis was met by placing payments to abroad under Reichsbank control, expropristing foreign currency in private hands, and negotiating the suspension of further credit withdrawals until March, xsys. The stability of the reichsmank at gold parity was maintained. By emergency decrees under Art. 48 of the Constitution the Government drastically regulated Finance and Credit, reduced official salaries, increased social-insurance contributions and reduced benefits, and pre-

scribed measures against unemployment.

OLD AGE AND INFIRMITY INSULANCE.—The German scheme of social legislation gives all subordinate bread-winners in Germany a legal right to pecuniary subvention when unfitted for work through sickness, accident, premature infirmity, or old age. Insurance is compulsory. This National Insurance is based on mutual insurance and self-administration. The Infirmity Insurance Act came into force Jan. 2, 2900. The insured include all persons working for wages or salary as workpeople, artisans, journeymen, apprentaces, domestic servants, laundresses, dressmakers, sempstresses, housekeepers, charwomen; overseers, foremen, engineers, assistants, clerks and apprentices in merchants' offices (excepting assistants and apprentices in cliemists' shops), schoolmasters, schoolmistresses, tutors and governesses, including foreigners working in Germany under these categories.

premature infirmity are given to insured persons when unfit for work; old age pensions to all insured persons on attaining the age of 70, though still capable of work. A comprehensive project of reform of the State insurance legislation became law in 1911. The new law codified previous legislation, established new Insurance Authorities, reduced working-class influence in the Accident Insurance organisations, provided pensions for widows and orphans, and made other changes of importance. Another Bill extending Insurance benefits to private officials, clerical employés and others above the class of nanual workers, became law in 1911. A law establishing Federal Unemployment Insurance for all persons subject to Sickness Insurance and also for seament, which is financed by equal contributions from employers and employed, came into force on Oct. 1, 1921.

continuous from consequences of the Treaty of Persatiles the German Military Forces, as from March 2x, r2so, must not comprise more than seven divisions of infantry and three divisions of cavalry, a total force of rococo all ranks. By Article x8x of the Treaty, the German Naval Forces, must not exceed 6 battleships of the Deutschland or Lothringen class, 6 light cruisers, rs destroyers, and rs torpedo boats. No submarine vessels are to be included in the naval forces, and all war vessels in excess of the above numbers are to be broken up or devoted to commercial purposes. Under the terms of the Armistice of Nov. xx, xys8, the German High Sea Fleet surrendered to the Allies (Nov. xx, xys8) and was interned in Scapa Flow, manned by German naval crews. It was scuttled by its crews in Scapa Flow, while in custody, on June 2x, xysp. In consequence of this breach of the Armistice agreement by the German crews the Allies (Nov. xo, xps9) called upon the government to surrender y light cruisers, and certain floating docks, cranes, and dredgers, in addition to the previous naval surrenders. By Article ys8 of the Treaty the armed forces of Germany must not include any military or naval Air Forces, and no dirigible balloons, aeroplanes, see-planes

or flying boats.

COMMUNICATIONS.—The total length of the full-gauge Railroads at end of 1928 was \$6,359 kilometres, of which all except 3,735 kilometres, belonged to the German Railroads Corporation, which under the Daves Reparation Scheme of 1924 acquired all the lines taken over by the Republic from the States in 1921. In addition there were 1,864 kilometres of narrow-gauge railroads. The number of registered automobiles (July 1, 1932) was 510,668, motor cycles 793,073, and motor lorries 165,072. Length of Telegraph and Telephone Lines 392,700 kilometres; telegrans transmitted, (1930) 33,900,000; post, telegraph, and telephone offices, 57,213; telephone subscribers, 3,203,000; letters carried, 5,500 millions; value ocash on delivery orders, 3,50 millions; value or cash on delivery orders, 3,50 millions; value of manerally separated from the general administration. In addition to some 6,000 miles of navigable rivers there are over 1,500 miles of canals and 1,500 miles of ship canals. At the outbreak of the War of 1914, 7938 Germany ranked second to Britain in the list of maritime countries. On January 1, 1913, the Mercantile Marine consisted of 2,008 sea-going steamers of 1955 register tons and upwards (4,380,348 tons gross register), and of

s.4se miling vessels (447.87o tons gross register); number of seamen, 77.746. As a result of the War and of the Peace Treaty shipping in 2079 sank to 419,000 tons, but there has since been a rapid recovery, due mainly to native building, but partly to purchases from abroad. Finished new constructions of vessels exceeding 100 gross tons were in 100 gross, 100 gross; 100 gross, 100 gross, 100 gross, 100 gross, 100 gross, 100 gross, 100 gross, 100 gross, 100 gross, 100 gross, 100 gross, 100 gross, 100 gross, 100 gross, 100 gross, 100 gross, 100 gross, 100 gross, 100 gross, 100 gross, 100 gross, 100 gross, 100 gross, 100 gross, 100 gross, 100 gross, 100 gross, 100 gross, 100 gross, 100 gross, 100 gross, 100 gross, 100 gross, 100 gross, 100 gross, 100 gross, 100 gross, 100 gross, 100 gross, 100 gross, 100 gross, 100 gross, 100 gross, 100 gross, 100 gross, 100 gross, 100 gross, 100 gross, 100 gross, 100 gross, 100 gross, 100 gross, 100 gross, 100 gross, 100 gross, 100 gross, 100 gross, 100 gross, 100 gross, 100 gross, 100 gross, 100 gross, 100 gross, 100 gross, 100 gross, 100 gross, 100 gross, 100 gross, 100 gross, 100 gross, 100 gross, 100 gross, 100 gross, 100 gross, 100 gross, 100 gross, 100 gross, 100 gross, 100 gross, 100 gross, 100 gross, 100 gross, 100 gross, 100 gross, 100 gross, 100 gross, 100 gross, 100 gross, 100 gross, 100 gross, 100 gross, 100 gross, 100 gross, 100 gross, 100 gross, 100 gross, 100 gross, 100 gross, 100 gross, 100 gross, 100 gross, 100 gross, 100 gross, 100 gross, 100 gross, 100 gross, 100 gross, 100 gross, 100 gross, 100 gross, 100 gross, 100 gross, 100 gross, 100 gross, 100 gross, 100 gross, 100 gross, 100 gross, 100 gross, 100 gross, 100 gross, 100 gross, 100 gross, 100 gross, 100 gross, 100 gross, 100 gross, 100 gross, 100 gross, 100 gross, 100 gross, 100 gross, 100 gross, 100 gross, 100 gross, 100 gross, 100 gross, 100 gross, 100 gross, 100 gross, 100 gross, 100 gross, 100 gross, 100 gross, 100 gross, 100 gross, 100 gross, 100 gross, 100 gross, 100 gross, 100 gross, 100 gross, 100 gr

FINANCE.—Under Articles a48-a53 of the Treaty of Fernalles the German Government undertook to pay the cost of the Armies of Occupation from Nov. zz. zoz8, until they shall be withdrawn, the occupied area extending to the Rhine (with "bridgeheads" on the right bank) from Eiten, on the Netherland's frontier, in the from Eiten, on the Netherland's frontier, in the north, to the junction of the German-Lorraine frontiers, in the south. The amount of the reperations due by Germany under the Treaty was fixed in January, 1921 (by the Financial Council of the Ailles at Brussels) at 122 milliards of gold marks (£6,600,000,000) payable in bonds, to be redeemed by annual payments of a milliard sold marks, together with a sum equivalent to gold marks, together with a sum equivalent to as per cent. of German exports. Of the amounts thus payable the various shares from 1921-1929 were apportioned to France 52 ninety-second parts, Great Britain 22, Italy 10 and Belgium a ninety seconds; from 1929-1932 the shares are varied to France 130 two hundred and thitteth parts, Great Britain 55, Italy 25 and Helgium so two hundred and thirtieths; and for the succeeding 21 years France 156 two hundred and seventy-six parts, Great Britain 65, Italy 30 and Belgium at two hundred and seventy-six parts.

A new Reparations Scheme was agreed to by Germany and the Alhes in August, rpat, providing for annual payments rising to s,500 million gold marks, liable to increase according to an index of prosperity, the money to be supplied from (1) taxation, (a) railway bonds, and (3) bonds imposed on private industry. In 1930, by an agreement come to at the Hague on the basis of recommendations by a Committee of Experts which met in Paris in the spring of 1929, Experts which met in Paris in the spring of 1938, Reparations were definitely settled. Germany agreed to pay during a term of 37 years annuities averaging 1,989 million marks, and thereafter until 1939-38 annuities varying between 1,711 million and 898 million marks. The Reparations control of German taxes and the mortgages on the railways and on industry were removed. In connection with the settlemant German occupied territory was avausted. ment German occupied territory was evacuated in 1930. On the initiative of president Hoover, Reparations Payments were suspended for one year from July 1, 1931.

In November, 1983, was put through a Currency Reform, consisting in the creation of a renter-mark, nominally worth 1 gold mark, and in the stabilisation of the depreciated apper-mark at 1 hillion paper-marks or 1 gold-mark. The stabilised paper mark notes have since been withdrawn from circulation, and the renten-marks are being gradually replaced by reichs-marks for pre-war gold value, issued by the Reichsbank as reconstituted under the Reparations settlement of 1924. Although the currency reform of 1923 was only provisional it reacted beneficially on the Finances, stopping the rise in the cost of administration and preventing depreciation in the value of the taxes received. For covering the deficits in the weeks intervening between stabilisation and complete balancing of the budget, the Republic obtained limited credits from the new Rentenbank. In the financial year 1924-23 a complete budget balance was attained, but in consequence of declining revenue due to trade depression and of heavy expenditure for Unen-playment Relief deficits have of late been the rule. The Budget Estimates for 1931-28 (in which are not included the separately financed Rallways and Fosts) were:—

The long and short term Debt of the Republic on May 31, 1931, totalled 11,494 million reichsmarks. Of this sum 780 million marks represented the outstanding liability on the Reparations Foreign Loan of (nominally) 800 million marks, 4,077 million marks represented the dipreciated paper mark pre-war and war debts as valorised under the law of July 16, 1928, and 1,453 million marks the international 5% per cent. (Young Plan) loan of 1930. Under the paper-mark debt valorisation law bondholders who acquired before July 1, 1920, will ultimately receive 12½ per cent. In gold marks of the nominal value of their holdings with interest. Bondholders who acquired later will receive 1½ per cent, but this will bear no interest until Reparations are paid.

GERMAN FEDERATED STATES.
PRUSSIA.
GOVERNMENT (April, 1915).

President, Herr Braun.
Interior, Herr Severing.
Finance, (vacant).
Agriculture, Herr Steiger.
Trade and Commerce, Dr. Schreiber.
Instruction and Worship, Herr Grimme.
Minister of Justice. Herr Schmidt.
People's Welfare, Herr Hirtsiefer.

The Republic of Prussis comprises the larger portion of Germany, with a total area in 1924 of 113,750 sq. miles and a population on June 26, 1925, 07 § 5,120,172 (Saar district excluded). The number of births in 1929 was 701,736, against 1,209,500 in 1913. The number of deaths in 1929 was 493,981 against 656,490 in 1913. Marriages were 365,201, against 232,709. The surplus of births over deaths in 1929 was 207,757. Prussia possesses a large number of navigable rivers intersecting the country-viz. the Presci.

rrussia possesses a large number of lavigable rivers intersecting the country—viz, the Pregel, Oder, Elbe Weser, and Rhine. The coasts of the Baitic and North Seas form a number of gulfs and bays. The principal mountains are the Harr and the Giant Mountains, the latter reaching an altitude of 5.355 feet. The forests are acting an auturue of 5,255 feet. The forests are extensive, occupying an area of 18,053,000 acres, chiefly consisting of fir. Minerals consist of coal, iron, copper, lead, potash, alum, nitre, zinc, cobalt, sulphur, nickel, arsenic, baryta, amber, agate, jasper, onyx, &c., and, to a small extent, silver. Salt (from the brine springs of Prussian Savoney is abundant. Prussian Saxony) is abundant. Metallic ores, coal, salt, precious stones belong partially, and amber totally, to the Crown. Agriculture and the rearing of cattle are the industries employing the rearing of cattle are the industries employing the largest number of persons, but Prussis has long ceased to be a mainly agricultural State. Wheat, rye, oats, barley, puas, millet, rape-seed, maize, linesed, flax, hemp, tobacco, sugar-beet, hops, &c, are extensively cultivated. Prussia's manufactures comprise practically all branches The cotton works are extensive, and there are numerous manufactories of silk, woollen, mixed cotton and linen fabrics, including shawls, carpets &c., and woollens, with leather, earthenware, glass, paper, and tobacco manufactures, as well as metallurgical works of great importance and large output. Brewing is a business of great importance. r,000,000 Reich 1-marks.

Budget (net), 1931-32 ...... 2,248

The whole of the old Funded Debt of Prussia was taken over by the Republic under the arrangement for transfer of the Prussian State Railways. It will be valorised on the same conditions as those laid down for the Federal Debt under the law of July 16, 1925.

CAPITAL, Berlin, on the Spice. In 1920, by fusion of suburban municipalities and of some adjacent rural communes, was created Great Berlin with a population on June 16, 1925, of 4,ox3,588.

Other largest cities are Cologne, on the Rhine (698,664), Breslau, on the Oder (554,80z), Essen, on the Ruhr (468,696), Frankfort, on the Main (461,849), Düsseldorf, on the Rhine (421,096), Hangover, on the Leine (422,435), and Dortmund on the Emscher (320,256)

Minister-President Dr. Held.

also grown, and tobacco is one of the staple articles. Wine is produced in the Palatinate, in Lower Francouia, and in Middle Franconia. The hop-plant is most extensively cultivated. Many important manufactures are carried on. The brewing of beer is carried to great perfection. The chief imports are sugar, coffee, woollens, silks, stuffs, drugs, hemp, cotton, tobacco, and flax; the chief exports are timber, grain, wins, hops, beer, leather, glass, jewellery, &c. The Thuringian Duchy of Coburg was incorporated in Bavaria in roar.

A maritime Republic in the south-east of Europe, bounded on the N. by Albania, Yugo-slavia and Bulgaria, on the S. and W. by the Ionian Sea, and on the E. by the Aegean and Turkey, with an estimated area of 50,272 sq miles and a population (census of May 25, 2938)

of 6,204,684. or 6, 204,004.

Prior to the Balkan Wars of 1912-13 the area was less than 25,000 sq. miles, the addition of portions of Macedonia and Epirus, Cretes, 250 sq. miles, pop. 336,151), and certain Aegean Islands increasing the area to 43,522 sq. miles. During the War of 1912-1918 Greece eventually declared for the Allies against the Central Powers, and her territories were increased by the occupation ner torritories were increased by the occupation of Thrace (including the monastic republic of Mount Athes), and the islands of Imbres and Tenedes. Under an arrangement with Italy, to come into effect after the ratification of the Treaty of Serres, Rhodes, Eyeo, and the Nodecanes (iz islands) were surrendered by Tirkey, and these were to be handed over to Greece by Italy. Greece also received under the Treaty a mandate for the occupation and administration of the town and district of Smyrna, but military operations by forces of the Angora Government, under Mustapha Kemal Pasha, recovered the mandated region in Kemal Pasha, recovered the mandated region in Sept. 1938, the Greek forces being annihilated, and Smyrna was evacuated on Sept. 8, 1938, and that part of the Greek population of Asia Minor which escaped massacre by the Turks took refuge in Greece. By the Treaty of Lausanne (1932) Greece lost Eastern Thrace (that part lying E of the Maritza river) and the islands of Turkeys and Turkeys, which were retroceeded to Imbros and Tenedos, which were retroceded to Turkey. The country is thus composed of a continental portion (the southern part of the Balkan Peninsula), and of islands in the Ægean, Mediterranean, and Ionian Seas. The surface

is nearly all mountainous; the coasts are elevated, irregular, and deeply indented.

Government.—Greece became independent in 1830, after a successful insurrection against the Turkish government, to which the country had been subjected since the 18th century, and after a succession of rulers of the Glucksburg dynasty a succession of There of the Charles of the Constituent Assembly on March 25, 1924. The legislature consists of a Senate of 120 members, and of a Chamber of Deputies (or Bould) elected for 3 years by universal manhood suffrage.

Production. — Agriculture is the principal industry and employs more than half the population. The most important of the fruit trees are the clive, the vine, orange, lemon, fig, almond, citron, pomegranate, and currant-vine. The principal minerals are silver, lead, zinc, emery, copper, magnesium, sulphur, salt, and marble. The chief manufactures are smelting, textiles, and shipbuilding. The imports are cotton and other manufactures, corn, tunber, cattle, hides, sugar, salt fish, and coal. The exports consist of wine, oilves, olive oil, tobacco, currants, figs, cognac, hides, lead, iron ore, magnesite, iron pyrites, chrome one, emery, marble, sponges and carpets.

Defence.-Service in the Army is universal and compulsory between the ages of az and 57. Both the land and sea forces were reorganised during the War of 1914-1918, and about 150,000 all ranks fought with the Allied Armies. The Navy consists of z armoured cruiser, z cruiser minelayer, 4 modern t.-b.-d, 7 torpedo-boats, a d 6 submarines with 5 patrol vessels (small torpedo boats).

Education is free and compulsory, maintained by local taxation supplemented by Notate grants. Secondary education is somewhat backward, particularly in the country districts. The University at Athens is of some repute.

Finance—The debt in 1912 was 1,040,900,000 drachine, and the Balkan Wars of 1912-13 added 354,950,000 drachine, the Great War added 1,028,000,000 drachine, and subsequent mulitary operations to March, 1921, were responsible for 1,776,140,000 diachina. On May 31, 1930, the total was stated at £120,077,506.

Communications -There were (1928) 1,993 miles of railroad open for traffic. There is a ship canal cutting through the Isthmus of Corinth canal cutting through the latimus of Corinth for ships up to 1,500 tons. The post offices number 1,146, telegraphs, 4,960 miles. The mercantule marine consists (1931) of 547 steamships (1,407,868) tons and 7-29 sailing ships (18,508 tons). The principal harbours are the Pireus (port of Athens), Syra, Patras, Salonica, Volo, Corfu, Calamata, Laurium, Cavalla, and Canea (Crete).

(République d'Herti.)

President, Stenio Vincent, assumed office Nov. 18,

1930. Foreign Affairs, M. Abel N. Léger.

Vinister in London, Dr. Louis Baron.

Consul, W. Haines, 4, Denmark Street, N. 27.

The Republic of Halti is the western or French portion of the island of San Domingo, which, next to Cuba, is the largest of the "West India" next to China, is the largest of the "west India" Islands. For merly a French colony it was proclaimed independent on Jan. x, x804, and is governed under a Constitution ratified on June xx, xyx8. The legislature consists of a Senate and a Chamber of Deputies. The President is elected by the legislature for a resided of the years. Fresident is elected by the legislature for a period of six years. In 1973 a treaty was entered into with the U.S.A. whereby certain public services of the Republic were to be controlled by U.S. officials. The Treaty expires in 1936. On Oct. 1, 1931, the U.S. officials in charge of Public Health, Public Works, and the Agricultural Technical Service, were withdrawn. The Kinancial and Constabulary services still remain under U.S. control U.S. control.

The area of the Republic of Haitl is estimated at ro,so4 square miles, with a population estimated (Jan. 1, 1992) at a, 300,300 inclusive of white foreign residents and military forces of the United States. The mountains are richly

^{*} At par z Queteal = \$z U.S.

and heavily timbered, and susceptible of cultivation nearly to their summits; it is probably the most fertile spot in the West Indies, whilst its harbours, especially Port-au-Prince, offer considerable facilities to foreign trade. The principal productions are coffee, logwood, cocca, cotton, hides, sugar, honey, gums, and ollseeds, these being the chief exports. It is said to contain mines of gold, silver, copper, tin, and inon. Its commercial prosperity has been almost annihilated by repeated revolutions. The principal foreign trade is carried on with the United States, Great and Greater Britain, France, and Germany; the principal articles imported from Great Britain are piece-goods, jute bags, hardware, and agricultural tools. An armed Constabulary, urban and rural, was formed in 1926. This force is officered in part from U.S. Marinc Corps and Navy, and consisted (Oct. 1, 1921) of 1930 officers (U.S. and Haitians) and 2,950 other ranks. A coastguard service is attached to the Constabulary. There are about 135 miles of relivary. In 1925-26 the entries and clearances at Port-au-Prince were 268 steam vessels (1,001,007) tout for the people speak a debased dialect known as Creole French.

# HUNGARY. (Magyarorazág.)

Regent, H.S.H. Admiral Nicolas Horthy de Nagybanya, born, 1867; elected March 1, 1920. MINISTRY.

Prime Minister and Minister of Finance, Count J. Károlyi. Foreign Afuirs, Dr. L. Walko.
Interior, M. Francis Keresztes-Fischer. National Defence, Julius Gömbös.

Justice, Dr. T. Zsitvay.

Agriculture, M. Bela Ivady.

Public Worship, Education and Public Welfare, Dr. Alexander Ernszt. Without Portfolio, M. John Mayer.

Minister in London, Baron Ivan Rubido-Zichy, 35 Raton Place, S.W. I.
Offices of Legation and Passport Office, 35B Eaton Place, S.W. 1

By unanimous vote of the National Assembly, Hungary was re-constituted a Kingdom in 1920, rungary was re-constituted a Kingdon in 1392, after having been declared a Republic on Nov. 17, 1918. The area of present-day Hungary is about 56,179 sq. miles, its territories being decreased from the area of the former Kingdon of Hungary (which was united to the Austrian Empire by the identity of sovereigns) through the transfer of identity of sovereigns) through the transfer of Transylvania to the Rumanians and of Croatia and Slavonia to the new Yugoslav Kingdom (9.2), and of Slovakia and Ruthonia to Czechoslovakia (9.2). The population (almost entirely Magyar) was 8,652,787 (Dec. 1929). The political neighbours are Czechoslovakia on the X., Yugolsavia on the S., Rumania on the E., and Austria on the W.

On the declaration of Republican institutions in 1918, Count M. Karolyi assumed office as Provisional President, but on March 22, 1919, Count Karolyi resigned, and was succeeded by a "Bol-shevik" administration with a "Soviet" (Work-meu's Council), in which Bela Kun (or Cohen) was the dominant personality. This administration was driven out of power by the successes tration was driven out or power by the successes of the Rumanian military forces (which invaded Hungary and occupied Budapest) and was followed by a Socialistic Government under Julius Peidel (Aug. 1, 1929). Six days later the Socialistic Government was superseded by an administration appointed by the Archarke Socialistic Government was superseded by an administration appointed by the Archduke Joseph, who accepted office as Provisional President, Aug. 7, 1919, but resigned in consequence of the protests of the Supreme Council in Paris. On March x 1920, Admiral Nicholaus von Horthy of Nagybana was elected Governor of Nagybana was elected Governor of Nagybana was elected Governor of the National Assembly.

Hungary by vote of the National Assembly, which gave him sovereign rights, with certain restrictions

In 1921, the ex-king Karl made two efforts to regain the throne, remaining in the country from March as to April 9, and from Oct. av until removed under escort. On each occasion the Hungarian Government was informed that a Hapsburg restoration would not be tolerated by the European Powers.

All religions are tolerated; the greater number of Magyars are Roman Catholics, but there is a large Protestant minority. The parcelling out of the great estates, which was forcibly attempted during the Karolyi regime, has been continued to a small extent, but on an economic basis; a land-reform bill aiming at "a more equitable distribution of landed property," was carried out in 1920-1928, reducing by about 10 per cent. the total area of large estates.

A single chamber National Assembly (intro-A single channer reactions assembly that due of Jan. 4, 1920, was replaced in Dec. 1926, by a Parliament composed of a Chamber of Deputies elected by universal suffrage, and an Upper Chamber, which corresponds in a modified form to the Chamber of Magnates as it existed before the revolution of xox8.

The greater part of the arca of present Hungary consists of the Alfold or Great Plain, parts of which may be considered as among the most fertile for agricultural purposes in the world, producing grain of excellent quality and supporting a number of horses, cattle and swine. The mountainons districts having been ceded to surrounding states by the Peace Treaty, Hungary has lost the greater part of the forests and mines, which formerly contributed so largely to the national wealth.

No part of Hungary touches the sea. The length of navigable livers is 687 miles; there are about 5,000 miles of railways and 5,800 miles of telegraph in the present Kingdom.

Pengos.	
Revenue	1.364.000.000
Imports	1930 832,900,000 910,400,000 £838,000 £1,777,000

CAPITAL: Budapest, on the Danube, has a population of (1930) 993.522. The other large towns are: Szeged (125,039), and Debreczen (108,816); there are 34 other towns with a population lation over so.coc.

Hungarian and German are the languages of the country, but English is increasing in commercial use

ICELAND. (Island.)

King, Christian X. (see Denmark).
Presidents of Al-thing, G. Olafsson: A.

Iceland is a large, volcanic, and treeless island in the North Atlantic Ocean, extending from 63° as to 66° 33′ N. lat., and from 33° as to 34° 35′ V. long., with an estimated area of 40,497 square miles, or greater than that of Ireland. The

population was estimated at roc,coo in 1928.

An Act for the creation of a Danish-Icelandic Federal Constitution, Denmark and Iceland to be free and independent States under the same Sovereign, came into force on Dec. x, 1918, but since the constitution granted in 1915 the assembly (Al-thing) had been more or less independent of the Government at Copenhagen in internal questions. The principal products of the island are sheep, cattle, poines, and fish, and the imports consist of almost all the necessaries of life, the chief items being grain and meal, sugar, coffee, salt, cotton goods, tobacco, spirits, hardware, and timber. Total imports (1929): £3,219,715; exports,£4,000,286. Iceland is in direct telegraphic communication with Great Britain.

Legation, 5x, Queen's Gate Gardens, S.W. 7
Iraq, or Mesopotamua, "the land between the
vers" (Emphrates and Tigns), extends from Kurdistan on N. and N.E. to the Persian Gulf on the & and S.E., and from Persia on E. to Syria and the Arabian Desert on W. the approximate position being between 37½ to 48½ E. long., and from 37½ to 30 N. lat. The territory was freed from Turkish rule during the War of 1914-18 by Anglo-Indian and British Dominion troops under Generals Nixon, Maude, and Marshall (Gen. Maude succumbing to cholera after the capture of Baghdad). Under the Treaty of Lausaine, ratified on Aug. 6, 1923, Thrkey renounced the sovereignty over Mesopotamia, and its future administration has been entrusted to Great Britain by the Supreme Council rendenced the sovereignly over also prizamia, tended. In 1908 certain wolks were indertaken, and its future administration has been entrusted to Great Britain by the Supreme Council of the Allies. A provisional Arab Government is since the British occupation notable improvements have been effected; the Irrigation Dewis and in Aug. 1921 the Emir Faisal (3rd son of and immediately remunerative schemes. The of the Allies. A provisional Arab Government was set up by the High Commissioner in Nov.

ex-King Hussein of the Hedjaz) was elected King of Iraq, to be enthroused on Aug. 23, 1921. By Treaty between Great Britain and Iraq (Oct. 10, 1921) the former undertakes to exercise its good offices to secure the admission of Iraq to the League of Nations, and as soon as that admis-sion has been accomplished all the responsibilities of Great Britain as the mandatory power will be terminated, by a protocol signed April 30, 1923, the duration of the treaty was cut down 1933, the duration of the trenty was cut down from so years to 4; but in a new trenty signed at Haghdad on Jan. 13, 1936, provision was made that the treaty of Oct. 1933 should remain in force for a period of as years from Dec. 16, 1938, unless before the expiration of that period Iraq shall have become a member of the League of Nations. In March, 1934, a Constituent Assembly met in Baghdad, ratified the treaty between Great Britain and Iraq, and nessed on overance law and an electoral law for passed an organic law and an electoral law for the election of a (Tamber of Deputies. The constitution thus instituted is a Constituconstitution thus instituted is a Constitutional Monarchy, hereditary in the family of King Faisal, with a Senate of so members nominated by the King, and a Chamber of Deputies of 88 members elected by manhood suffrage. The first Parlament under this Constitution was opened by King Faisal on July 16, 1925 In September, 1929, the British Government gave an assurance that they would support Iraq's candidature for admission to the League of Nations in 1932. On June 30. 1930, a new Treaty was signed at Baghdad by the High Commissioner and the Prime Minister. This Treaty which, if ratified, will come into force on the entry of Iraq into the League of Natious, is of as years' duration and regulates the relations between Great Britain and Iraq during that poriod on the basis of an alliance between two equal and independent States.

The total area of the districts comprised within the British Mandatory Sphere is about 126,000 sq. miles, the distance from Basra in the south to Mosul in the north being approximately soo miles. The sphere comprises the former Turkish vilayet of Mosul, Enghand and Massa. At the Census of 1920 the population was ascertained to be 2,849,282, as under:—

Baghdad vilayet ..... 1,360,304 Basia vilayet ......
Mosul vilayet ..... 785,600 703,378

Total .....

Bayldad includes the Baglidad, Samarra, Diyala, Kut, Diwaniyah, Hiliah and Dulain Divisions (Lavara); Baera lucludes the Lives of Basra, Amara and Muntafik; and Mosed includes Mosul, Arbil, Kirkuk and Sniemani. (Mosul covers a great part of the ament kingdom of Assyria, the ruins of Nmewh, the Assyrian capital, being viable on the banks of the Tigris, overette Mosul.) opposite Mosul.)

Of the total population there were in reso 1,146,685 Suum Muhammadans, 1,494,015 Shiite Muhammadans, 87,488 Jews, 78,792 Christians, and 43,302 other religions.

Mesopotamia is capable of supporting a population many times in excess of its present inhabitants if irrigation is developed and extended. In 1908 certain works were undertaken.

wealth of the country depends entirely upon weath of the country depends entirely upon agricultural development, and two harvests can be gathered in the year, the chief crops being wheat, barley and beans, and rice, and Indian corn; wheat averages 444b. per acre, barley firstle, and rice over z.coolb. In zgal-ng there were z.447.000 over z.coolb. The year of the triggies and Euphrates) under ceneral cultivation an increase of under general cultivation, an increase of 64 per cent. on the previous year. Cotton growing is a developing industry and it is estimated that Mesopotamia could yield 300,000 bales annually if sufficient labour is forthcoming. A concession for the exploitation of the oil in the Baghdad and Mosul vilayets was granted to the Turkish Petroleum Company (now the Iraq Petroleum Company), in March, 1925. The results of the geological surveys made by the company suggest that Iraq may contain one of the richest olifields in the world. A number of wells have been drilled in the neighbourhood of Kirkuk, and in October, 1927, the first "gusher" was struck and capped at Baba Gurgur. The Khanaqin Oli Company (a subsidiary of the Auglo-Persian Oli Company, holds a concession which is conflued to the Transferred Territories (an area on the N.E frontier transferred from Persia to Turkey in 1923-14), which is an adaptation of the D'Arcy concession held by the A.P.O.C. Since the war oil has been struck near Khanaqin and the field is considered a promising one. The Khanaqin Oil Company have opened a refinery near to Khanaqin town which produces sufficient petrol, kerosine and crude oil for the needs of Iraq. The country is being opened up and existing communications improved and secured. Schools, hospitais and dispensaries have been established under British auspices. Basra was equipped with wharves, rallway sidings, &c., for military purposes, and is thus suited for commerce. the imports are textiles, sugar, and tea, and the chief exports are dates, wool and barley.

The Kuphrates (which has a total length of 1,800 miles from its source to its outflow in the

The Buphrates (which has a total length of 1,300 miles from its source to its outflow in the Fersian Gulf) is formed by two arms, of which the Murad Su (425 miles) rises in the slopes of the Ala Dagh, a mountain of Eastern Erzerum, and flows westwards to a junction with the Kara Su, or Frat Su (275 miles), the latter rising in the north-west of Eazerum in the Dumin Begin. The Tigris has a total length of 2,250 miles from its source to its junction with the Euphrates at Garmat Ali, 70 milles from the Persian Gulf, and rises in two arms south of the Taurus mountains, in Kindistan, uniting at Til, where the boundaries of the vilayets of Diarleskir, Van and Bitlisconjoin.

The Baghdad Ratheay—In 1899 the Anatolian Rallway Company obtained a concession from the Sultan of Turkey for the construction of a railway from Konieh (the eastern terminus of the Anatolian Railway) to the Persian Gulf at Koweit, vid Baghdad, a total length of 1,550 miles, with a single track of 4 ft 8½ in, gauge. Its projected course was from Konieh to Adama, thence S.E. to Aleppo, Jerabius (where it would cross the Euphrates and enter Mesopotamia), and Mosul, and thence S. down the right bank of the Tigris to Baghdad and the Persian Gulf. The section Konieh-Eregii-Bulguriu (224 miles), was opened in Oct. 2904, and at the outbreak of the Great War about 1,200 miles) were in operation, with gaps in important sections (notably in the hills N.W. of Aleppo, and in the Mesopotamian desert W. & S.

of Mosul). The line crosses the Euphrates at Jerablus and is open to goods and passenger traffic as far as Nisibin. The track actually extends a further zo miles into Syrian territory in the direction of Mosul. Raitheads at Nisibin and Kirkuk are connected by a motor service, and through bookings by this route from Europe to Baghdad are obtainable. The first through train from Basra to Baghdad left Basra on Jan. z3, z3so. The total length of fine open at that date was 945 miles compared with z, zzy miles during the War, some unimportant lines having been disused since the cessation of hostilities with Turkey; since that time lines have been laid from Baghdad to Kerbala and Baghdad to Kirkuk. The line to Kirkuk will be extended to Mosul.

The chief city is Baghdad, the former capital of the Abbasside dynasty, one of the Caliphs of that dynasty being Haroun al Rashid of "the Arabian Nighta." Baghdad has an estimated population of 270,000, other towns being Basra, 85,000, and Mosul (opposite the site of N.neveh), 90,000,

A Kingdom in the South of Europe, consisting of a peninsula, the large islands of Sicily and of a permissing, the large islands of Serdjina, the island of Elba, and about 70 minor islands (with certain dependences hercinaftenoted). It is bounded on the N by the Republics of Switzerland and Austria, on the S. by the Mediterranean, on the E. by the Adriatic and Yugoslavia, &c., and on the W. by France and the Ligurian and Tyrrhenian Seas. The total area of the kingdom of Italy in 1914 was 110,623 81 miles, and by the Treaty of Versaultes (June 28, 1919) Italy gained from Austria-Hungary the Trentmo (about 4,000 sq. miles) and Trieste (with about 1,000 sq. miles of the Adriatic Sea-board).

The total area of the Kingdom of Italy was estimated (Dec. 1927) at 119,743 square niles, with a population at the census of March 29, 1931, of 48,158,817. There is a large settled and floating population of Americans and English.

By a treaty signed at Rome (Jan. 27, 1924), the Free State of Frume came to an end. Yugo-slavia's sovereignty over Port Baros and the Delta is established by the treaty, and Italy acquired the town and harbour works of Frume, together with a narrow strip of hinterland. Italy agreed to lease to Yugoslavia the Thaon dr Revel quay at a rental of one gold lira for 50 years, the railway station being established as an international frontier station. Finne is now the capital of the newly created Italian Provincia del Carnaro, and has the status of an Italian provincial town.

The Italian peninsula is traversed throughout its length by the chain of the Apennines; the Alps form its northern limits, dividing it from France, Switzerland, Germany, Austria and Yugo-slavia. Mont Blanc (15,78s feet), the highest peak of the Alps, is in the French Pennine Alps,

but within the Italian borders are Monte Rosa (15,217 feet) and several peaks from 12,000 to 14,000 feet. The chief rivers are the Po, the Adige, the Tiber, and the Arno.

GOVERNMENT.—Italian unity was accom-plialed under the House of Savoy, after an heroic struggle from 1848-1870, in which the great patriots Mazzeni (born 1805, died 187a) and Garthaldt (born 1807, died 1882) were the principal figures. It was completed when Lombardy was ceded by Austria in 1860 and Venice in 1866, and through the evacuation of the Papal States by the French in 1870. In 1872 the King of Italy entered Rome, and that city was declared to be the capital. The government Anig of Italy entered Rome, and that city was declared to be the capital. The government was that of a constitutional monarchy with a legislature of two houses—the Senate (of 385 life members appointed by the King), and the Chamber of Deputtes of 336 members (elected by adult manhood suffrage). Under the reforms mattituted by Signor Mussolini an entirely new and complex form of government has been and complex form of government has been built up—the Fascist "syndical-corporative" state. The Senate and Chamber are retained, but the latter are elected cu bloc, a list being drawn up by the Fascist Grand Council and submitted to the electorate for acceptance or rejection as a whole. The basis of the composition of the list is roughly equal representation of capital and labour, the essence of the "syndical-corpor-ative" idea being that the State should take charge of the economic development and functioning of the country.

PRODUCTION — Agriculture (including the growing of grapes, olives and chestnuts) is the principal industry. Italian wines are numerous and celebrated, and olives and olive-oil are furnished by Tuscany, Liguna, and the province of Barl; while fruit abounds and is largely ex-ported. The cultivation of the silkworm forms an important industry. Among the principal minerals are fron, lead, zinc, copper, manganese, and antimony ores, sulphur, gypsun, amiantius, alum, and boracic acid. Silver is found in Saidinia, and some gold in the Alps. Salt and tobacco are

Government monopolies.
